CENTRALIZED EQUAL ACCESS SERVICE**5. Ordering Options for Switched Access Service****5.1 General**

This section sets forth the regulations and other related charges for Access Orders for Access Service. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.

An Access Order is an order, in a form or format acceptable to SDN and the customer, to provide the customer with Access Service, access related services, or to provide changes to existing services.

Transport is provided by the Routing Exchange Carriers listed in Section 9 following as tandem switched only. Direct-Trunked Transport as defined in Section 2.6 is not available to a Routing Exchange Carrier's end office since equal access is provided through the SDN centralized access tandem (Federal Communications Commission No. DA 90-1964). (Z)

Unless covered under another separate contract or agreement (i.e. transiting traffic service agreement), all traffic delivered by an IC to the SDN access tandem will be considered access traffic and billed accordingly. (Z)

5.1.1 Ordering Conditions

Access Service may be ordered from SDN. Switched Access Service is provided in Feature Group D with Signaling System Number 7 (SS7) arrangements. Access Service between a customer's premises and the customer's point of termination at the SDN access tandem is solely the responsibility of the customer and must be provided by the customer or ordered from another carrier. Access Service from the SDN's CEA switch to an end office must be ordered from a Routing Exchange Carrier or other Exchange Telephone Company. (S)

The customer shall supply all the necessary information to provide service, (e.g., customer name, customer address, customer contact and facility interface, etc.) (S)

Orders for Access Service between SDN's central access tandem and the Routing Exchange Carrier's point of interconnection shall be in BHMCs. (S)
