ACCESS SERVICE

7. Special Access Service**7.1 General

Special Access Service provides a transmission path to connect customer designated premises*, either directly or through a Telephone Company Hub where bridging or multiplexing functions are performed. Special Access Service also provides a transmission path to connect a customer designated premises and a WATS Serving Office. Special Access Service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

7.1.1 Channel Types

There are seven types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

Customers can order a basic channel and select from a list of available transmission parameters and channel interfaces, those that they desire to meet specific communications requirements.

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting data over a channel that is identified as a Metallic Service in this tariff, there is no restriction against doing so.

* Telephone Company Centrex CO and CO-like switches and packet switches included in the Public Packet Switching Network (PPSN) are considered to be customer designated premises for purposes of this tariff.

** Pursuant to FCC 17-43, released April 28, 2017, Frontier has detariffed (1) TDM channel terminations for wire centers in competitive counties; and (2) packet-based services. Terms and Conditions for detariffed services can be found in the Interstate Service Guide and Pricelist.

13. Additional Engineering, Additional Labor and Miscellaneous Services

In this section normally scheduled working hours are an employee's scheduled work period in any given calendar day (e.g., 7:00 a.m. to 4:00 p.m.) for the application of rates based on working hours.

13.1 Additional Engineering

Additional Engineering will be provided by the Telephone Company at the request of customer only when:

- (A) A customer requests additional technical information after the Telephone Company has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.1.5 and 7.1.6 preceding.
- (B) Additional engineering time is incurred by the Telephone Company to engineer a customer's request for a customized service as set forth in 7.2 preceding.
- (C) A customer requests a design change which requires additional engineering review as set forth in 5.2.2(C). The charge for Additional Engineering will apply whether or not the customer authorizes the Telephone Company to proceed with the design change.

The Telephone Company will notify the customer that additional engineering charges, as set forth in Section 16 following will apply before any additional engineering is undertaken.

13.2 Additional Labor

Additional Labor is that labor requested by the customer on a given service as set forth in 13.2.1 through 13.2.5 following. The Telephone Company will notify the customer that additional labor charges as set forth in Section 16 following will apply before any additional labor is undertaken.

(D)
(D)

13.2.1 Overtime Installation

Overtime Installation is that Telephone Company installation effort outside of normally scheduled working hours.

13.2.2 Overtime Repair

Overtime Repair is that Telephone Company maintenance effort performed outside of normally scheduled working hours.

ACCESS SERVICE

15. Metropolitan Statistical Area Services15.1 General Description

This section of the tariff provides the regulations, rates, and terms and conditions that apply to telecommunications services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules, as well as contract-based services provided in MSAs where the Telephone Company has received Phase I or Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's rules. MSAs are classified as full service relief MSAs, limited service relief MSAs, and non-relief MSAs. For purposes of this tariff, the term "MSA" includes non-MSA areas in which the Telephone Company operates. A non-MSA area for which the Telephone Company has been granted pricing flexibility is treated identically to an MSA that has been granted the same level of pricing flexibility.

Full service relief MSAs are those MSAs which qualified for Phase II pricing flexibility for all elements of service, i.e. channel terminations between Telephone Company end offices and end user premises; channel terminations between interexchange carrier points of presence and LEC serving wire centers; special access services other than channel terminations; and switched access entrance facilities and dedicated transport facilities.

Limited service relief MSAs are those MSAs that qualified for Phase II pricing flexibility for all elements of service except channel terminations between Telephone Company end offices and end user premises.

Non-relief MSAs are those which have not qualified for any Phase II pricing flexibility. It is possible for a non-relief MSA to qualify for Phase I pricing flexibility for some or all services.

The MSAs for which the Telephone Company has received Phase I or Phase II pricing flexibility, and the type of flexibility received, are listed in Section 15.2 following. The services provided pursuant to Phase II pricing flexibility are listed in Section 15.3 following. These services are comparable to the corresponding Switched Access transport services set forth in Section 6 of this tariff. The general regulations, service descriptions, and rate regulations found in Sections 6 of this tariff are also applicable to the corresponding services in Section 16.9. Unless otherwise provided for in Section 16.9, regulations set forth in Sections 1, 2, 5, and 13 are also applicable.

(C)

(C)

ACCESS SERVICE

15. Metropolitan Statistical Area Services (Cont'd)

15.2 Metropolitan Statistical Areas

MSAs are listed below by the type of relief that has been granted. MSAs in which the Telephone Company operates that are not listed have not been granted any Phase I or Phase II pricing flexibility.

Full Service Relief MSAs:

none currently

Limited Service Relief MSAs:

Rochester, NY MSA

Non-relief MSAs with Phase I pricing flexibility

none currently

15.3 Services Available in an MSA

The following services are available in MSAs with Full or Limited Service Relief:

Switched Access Services/Dedicated Transport:

Voice Grade Service

DS1 Service

Common Channel Signaling Network Connections

DS3 Service

(D)

(D)

ACCESS SERVICE

15. Metropolitan Statistical Area Services (Cont'd)**15.4 Rate Regulations**

Pricing Flexibility left in this section is only applicable to Switched Access services. (C)
In some cases, service may be provided that spans areas that have been granted different levels of pricing flexibility. Where possible, rate elements for such services are attributed to specific wire centers that have a defined level of pricing flexibility. Some rate elements, such as interoffice mileage, may not be attributable to a single wire center. When a service spans areas with different levels of pricing flexibility, the following regulations apply:

Channel terminations will always be attributable to a single wire center. Channel terminations between interexchange carrier points of presence and LEC serving wire centers will be billed using the rates in Section 16.9 for wire centers in Full Service Relief MSAs and Limited Service Relief MSAs. Channel terminations between interexchange carrier points of presence and LEC serving wire centers will be billed using the rates found in Section 16.5 for wire centers in non-relief MSAs.

Channel terminations between Telephone Company end offices and end user premises will be billed using the rates in Section 16.9 for wire centers in Full Service Relief MSAs. Channel terminations between Telephone Company end offices and end user premises will be billed using the rates found in Section 16.5 for wire centers in Limited Service Relief MSAs and non-relief MSAs.

All other rate elements that are attributable to a single wire center will be billed using the rates in Section 16.9 for wire centers in Full Service Relief MSAs and Limited Service Relief MSAs. All other rate elements that are attributable to a single wire center will be billed using the rates found in Section 16.4, 16.5, or 16.6 for wire centers in non-relief MSAs.

When a rate element is not attributable to a single wire center, the wire centers to which it is attributed will be identified. When all wire centers to which such a rate element is attributed are in Full Service Relief MSAs or Limited Service Relief MSAs, the rate element will be billed using the rates in Section 16.9. When at least one of the wire centers to which such an element is attributed is in a non-relief MSA, the rate element will be billed using the rates found in Section 16.4, 16.5 or 16.6.

16.10 Competitive and Non-Competitive Counties for Special Access

16.10.1 General

Certain Special Access rates and charges are applied based on whether the End User Channel Termination is served from a "Competitive County" or "Non-Competitive County." Competitive Counties and Non-Competitive Counties are defined in Section 2.6, and the wire centers within such counties are listed in Section 10.2 below.

In wire centers within a Competitive County, monthly rates and nonrecurring charges for Special Access rate elements have been detariffed and moved to the interstate service guide and pricelist. In wire centers within a Non-Competitive County, monthly rates and nonrecurring charges for Special Access rate elements are subject to the "Non-Competitive County Rate" to the extent it is specified. Until February 1, 2018, the "Competitive County Rate" reflects the rate in place as of August 1, 2017.

(N)
(N)

For Interexchange Carrier Point of Presence Channel Terminations, Channel Mileage and Optional Features and Functions, including Multiplexing, the "Competitive County Rate," if specified, applies regardless of whether the county is Competitive or Non-Competitive.

16.10.2 Competitive and Non-Competitive County Lists

(A) The following wire centers are in Competitive Counties:

State	County	Wire Center
AL	Conecuh	RPTNALXA
AL	Escambia	ATMRALXA
AL	Escambia	HXFRALXA
AL	Escambia	MCCLALXA
AL	Marengo	THMTALXA
FL	Escambia	MOLNFLXA
FL	Escambia	WLHLFLXA
GA	Gordon	FAMTGAXA
GA	Gordon	RNGRGAXA
