5. Ordering Regulations (Cont'd)

5.6 Service-Specific Ordering Information (Cont'd)

5.6.9 Dedicated Signaling Transport (DST)

For DST, the customer must provide the following information to the Telephone Company at the time of ordering: the number of STP Access Mileage 56 kbps links, the originating point code for the customer's designated premises, the Common Language Location Identifier (CLLI) code of the Telephone Company Signaling Transfer Point, Link Type, the customer designated premises Telephone Number, the contact telephone number for installation and maintenance of the customer's designated premises, and the desired due date of the order.

When ordering DST the customer will provide an estimate of total annual volume and busy hour busy month volume projected for a period of three years. The forecast must be itemized by message type and CCS/SS7 octet load. Octet load must be High Day Busy Hour. The Telephone company will utilize this forecast to project further facility requirements. An updated forecast providing an estimate of total annual volume and busy hour busy month volume projected for a period of three years should be provided to the Telephone Company every year thereafter. The updated forecast shall be provided to the Telephone Company during the month of January each year.

5.6.10 Line Information Data Base (LIDB) Service

For LIDB Service, the customer shall provide a LIDB Access Service Order which specifies the originating point codes (OPCs) of the customer's designated Operator Service System (OSS) sending the query or queries and the desired due date of the order. LIDB Validation and Originating Line Number Screening Services are provided via DST as set forth in Section 17.2 following, from a customer Signaling Point of Interconnection (SPOI) to the two Telephone Company interconnecting Signal Transfer Points (STPs) located in Hartford and New Haven, Connecticut in order to utilize LIDB Access Service. Customers may also obtain LIDB Services through a CCS7 transport service provider that has previously ordered DST and LIDB Services from the Telephone Company.

(D)

*Busy Line Interrupt (BLI) and Busy Line Verification (BLV) Service discontinued pursuant to 47 C.F.R. § 63.71.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Special Access Service Rate Categories

The following rate categories apply to Special Access Services:

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

Effective November 16, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.13 and the wire centers within such counties are listed in Section 23.1.3 and 23.1.4.

For all rate elements other than End User channel terminations and their applicable optional features, price flex rates and charges, as provided in this tariff and/or the Interstate Service Guide and Pricelist, apply, regardless of whether the county is Competitive or Non-Competitive. (C)

For End User channel termination and their applicable optional features, the application of "price cap" or "price flex" is dependent upon whether or not the serving wire center is location in a Competitive County. If the End User channel termination is in a Competitive County, price flex rates and charges apply, as provided in the Interstate Service Guide and Pricelist. If the End User channel termination is in a Non-Competitive County, price cap rates and charge apply, as provided in Section 7. (C)

7.4.1 Standard Channel Termination

A Standard Channel Termination provides for the transmission facilities between a customer premises and the serving wire center of that premises. One Channel Termination charge applies per customer premises at which the Special Access Service is terminated. This charge applies even if the customer premises and the serving wire center are colocated in a Telephone Company building, e.g., Centrex CO type switch.

A Standard Channel Termination includes a standard network channel interface arrangement based on the technical characteristics of the Telephone Company facilities at the point of termination and the type of signaling capability, which, if required, is provided as an optional feature.

The Standard Channel Termination rate will apply for all Telephone Company Access Connections except High Capacity Services utilizing an Expanded Interconnection Arrangement. A Standard Channel Termination monthly rate will apply even when the customer designated premises and the serving wire center are located in the same Telephone Company building unless the customer establishes an Expanded Interconnection Arrangement, in which case the Cross-Connect Termination monthly rate will apply as specified in Section 18 following.

ACCESS SERVICE

8. Testing, Maintenance, and Additional Labor Services (Cont'd)8.6 Additional Engineering and Labor Services (Cont'd)8.6.2 Additional Labor Service

Additional Labor Services must be requested by the customer and agreed to by the Telephone Company. The Telephone Company will notify the customer that additional labor charges will apply before it undertakes any additional labor. (D)

Additional Labor Charges, except as set forth in 8.6.2(B), apply on a first and additional basis for each half hour or fraction thereof.

(A) Overtime Installation

Applies to Telephone Company installation effort performed outside of a normal business day.

(B) Stand by

Applies to time more than one-quarter (1/4) hour during which Telephone Company personnel stand by at the customer's request.

(C) Other

- (1) Additional testing, or maintenance of facilities which connect to facilities of other Telephone Companies, in addition to the normal effort required to test, maintain facilities provided solely by the Telephone Company.
- (2) Customer requested stand by of Telephone Company personnel during the provision of Special Access Service at daily rates, e.g., during the broadcast of a televised event.
- (3) Any other labor to accommodate a specific customer request involving labor not covered by any other section of this tariff.

24. Metropolitan Statistical Area Access Services

24.1 General Description

- (A) This section of the tariff provides the regulations, rates, and terms and conditions that apply to telecommunications services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. MSAs are divided into the categories below:

(1) Full Service MSAs

Full Service Relief MSAs are those MSAs which qualified for Phase II pricing flexibility for all elements of service, such as local channels (channel terminations) between LEC end offices and customer (end user) premises; entrance facilities; local channels (channel terminations) between an Interexchange carrier's point of presence and a serving wire center. The Full Service Relief MSAs are set forth in Section 24.2(A), following.

(2) Limited Service MSAs

Limited Service Relief MSAs are those MSAs that qualified for Phase II pricing flexibility for all elements of service except local channels (channel terminations) between LEC end offices and customer (end user) premises. The Limited Service MSAs are set forth in Section 24.2(B), following.

- (B) The services provided in MSAs pursuant to this section of the tariff are set forth in Section 24.3, following. These services are comparable to the SWA Dedicated Transport Services in Sections 6.3.1(A), 6.3.1(B), 6.3.1(E), and 17. (T)
 The general regulations, service descriptions, and rate regulations for the (D)
 SWA Dedicated Transport Services in Sections 6 and 17 are also applicable (D)
 to the services specified in this section, except as provided below.

An exception in 24.4(F) applies for term pricing plans.

- (C) Unless otherwise provided for in this section, regulations set forth in Sections 1, 2, 5, and 8 also apply.
