Dedicated port offerings include Serial DS1 access, HSSI DS3 access, Channelized DS3 access, SONET OC3c, SONET OC12c single mode access and IP Channel access, where facilities and conditions permit.

The Serial DS1 access is a 1.544 Mbps connection incorporating a CSU/DSU functional interface. A Serial DS1 access counts as one unit.

The HSSI (High Speed Serial Interface) DS3 access is a non-channelized 45 Mbps connection incorporating a CSU/DSU functional interface. The HSSI DS3 access counts as one unit.

The SONET OC3c access is a full-duplex 155 Mbps (STS-3C) intermediate reach single-mode optical SONET/SDH (Synchronous Digital Hierarchy) interface, with no CSU/DSU functionality. The SONET OC3c access counts as one unit.

The SONET OC12c access is a full duplex 622 Mbps (STS-12C) intermediate reach single-mode optical SONET/SDH (Synchronous Digital Hierarchy) interface with no CSU/DSU functionality. The SONET OC12c access counts as one unit.

The Channelized DS3 access is a 45 Mbps connection having the ability to provide 28 DS1 channels using the appropriate demultiplexing equipment, with no CSU/DSU functionality. The Channelized DS3 access counts as one unit.

The IP Channel access is a single 1.544 Mbps port connection incorporating a channelized DS3 interface board within a router and DS3 multiplexing equipment in the switching wire center where the CenturyWAN platform resides. Up to 28 IP Channel ports can be provided on a single DS3 system. One IP Channel access charge applies for each DS1 access line terminated on the DS3 multiplexing equipment, and each counts as one unit.

5. DESCRIPTION OF DATA SERVICES AND RATES (Cont'd)

5.1 TCP/IP Data Aggregation (Cont'd)5.1.4 Rate Regulations (Cont'd)

B. Rate Application (Cont'd)

Frame Relay 1.544 Mbps Service, when used in connection with IP Channel, may be ordered as a UNI port only application with DS1 transport, as appropriate. In this case, Customer must provide, on the order, the channel assignment within the IP Channel multiplexing system for termination to the Frame Relay Port.

The total number of units in service associated with dedicated port access will determine the rate to be applied to all dedicated channels at each central office. For example, if the total number of dedicated units is 92, all dedicated access will be rated at the applicable dedicated access rate for the 60-99 tier, and the selected commitment period.

Shared use (ratcheting) is not permitted.

C. Term of Commitment

With the exception of IP Channel access, the router based dedicated data aggregation service is initially offered as a two, three or four year commitment. IP Channel is only offered on a CenturyWAN site established under a three or four year commitment period. The commitment period must be selected by Customer at service enrollment. Customer may upgrade to a longer term at any time.

D. Commitment Levels

An implementation period not to exceed six months from Customer's specified enrollment date for the two, three or four year rate plans for CenturyWAN and 12 months for the five year rate plan will be negotiated between Company and Customer. During implementation, the applicable rate will be determined by the total number of dedicated ports in service.

However, for all rate plans, if the total of dedicated port units during implementation is less than 30, the full rate for 30-59 DS1 Serial Access units will apply to the units in service. Following implementation, the minimum monthly commitment is 30 dedicated units. Each Serial DS1, HSSI DS3, Channelized DS3, SONET OC3c, OC12c single-mode access and IP Channel access will be counted as one unit towards meeting the 30 unit commitment level.

E. Changes to Commitment Level

Once activated, the total nationwide quantity of ports must remain in service for the remainder of the commitment period. An allowance of five percent decrease to the in service unit quantities of dedicated access (quantified at each quarterly review) will be permitted. Penalties for not meeting the initial commitment level are set forth under 5.1.4H and liabilities for reductions in quantities once the initial commitment has been met are set forth under 5.1.4K.

F. Service Enrollment

When Customer elects to enroll in CenturyWAN, Customer must specify in writing, the enrollment date (which will be the anniversary date). The specified enrollment date must be within 120 days from receipt of the written enrollment request. Customer must also specify the central offices to be included and select a commitment period (two, three or four years). Each CenturyWAN platform deployed in a central office for Customer will have its own term commitment period. By the enrollment date, Service Requests must be issued to provide the appropriate amount of dedicated ports to equal the quantity commitment.

The minimum number of central office deployed to meet the 30 unit commitment is two separate central offices.

Subsequent to enrollment, growth Service Request orders require a dedicated one unit minimum.

G. Quarterly Review

Each Customer's service commitment will be reviewed quarterly beginning with the first six months following enrollment. Customer will be notified in writing as to the status of the commitment requirements. This notification will inform Customer of any shortfall in the channel quantity level. Penalties for a missed commitment level are set forth under 5.1.4H and 5.1.4K.

H. Penalties for Failing to Obtain the First Six Month/Four Year or First 12 Month/Five Year Commitment Level

At the first quarterly review, when the number of CenturyWAN dedicated port units is less than the acceptable commitment range, the following penalty charges will apply, based on the difference between the commitment level less five percent. Dedicated port unit quantity shortfalls will incur a liability charge of 50% of the 30-59 Serial DS1 access rate per month, per unit below the commitment level until the dedicated port unit commitment is obtained. The minimum commitment level is 30 units billable at the full 30-59 Serial DS1 access rate. The five percent allowance applies only to quantities greater than the 30 unit minimum requirement.

I. Service Availability

During the subscription period commencing at the enrollment date, Company objective level of service availability will be 95% of the monthly hours of operation for each central office. Should the service availability actually be less than 95% of monthly hours for the average channel of a central office (e.g., 30 days x 24 hours x .95 = 684 hours), Customer may terminate subscription for that central office without any termination liability or receive a credit of 40% of the monthly bill for that central office.

J. Renewal Options

1. CenturyWAN Option 1 - No Growth in the Last Six Months of Initial Term

At the expiration of the term, Customer may select an additional two, three or four year commitment or continue billing the rate applicable to the expiring term on a month to month basis. If Customer fails to make a selection, Company will notify Customer and continue with an additional month of billing. If Customer does not select a new term agreement within 30 days from the expiration date, billing will continue on a month to month basis. To cancel the agreement after the initial term, Customer must provide written notification to Company that the service is to be discontinued.

2. CenturyWAN Option 2 - Growth in the Last Six Months of the Selected Term

During the last six months of the term selected, Customer will be permitted to order growth only if Customer is willing to commit to another two, three or four year term for all base units and growth units in service at the conclusion of the last month. An allowance of a five percent decrease in units will be permitted. If the decline in units exceeds five percent, 50% of the 30-59 Serial DS1 access rate will be assessed for the number of deficient units less the five percent allowance.

K. Termination With Liability

Once the initial TCP/IP channel level or dedicated unit commitment is met, a reduction of nationwide quantities from the installed base (determined at each quarterly review) will incur a termination liability of 50% of the remaining monthly payments to the end of the subscribed period.

TCP/IP dial-up, and dedicated access services which are discontinued are not held in reserve for Customer use at the time of disconnection.

L. Termination Without Liability

During Customer's subscription period, should the monthly rate for Customer's TCP/IP data aggregation service increase due to Company action, Customer may at his/her option, terminate the subscription without penalty or liability.

5.4 High Capacity Broadband Access Cloud

This service is offered in Missouri.

5.4.1 Service Description

High Capacity Broadband Access Cloud (HiBAC) Service is a multi-protocol network that transparently transports a combination of HiBAC Asynchronous Transfer Mode (ATM), inter-worked Frame Relay services, HiBAC Frame Relay services, DSL services and TCP/IP Data Aggregation Services (CenturyWAN) technologies over a single network facility. HiBAC Service is made available to network service providers for provision of high-speed data service to their Customers, and provides subject to the terms and conditions set forth herein, for the establishment of a point-to-point virtual circuit between two Customer Designated Locations (CDLs). HiBAC service is comprised of a Broadband Access Point, Frame Relay and ATM User Network Interfaces (UNIs) and Permanent Virtual Circuits (PVCs) in various Quality of Service (QoS) connections. QoS refers to priorities given to cell transmissions and sensitivity of cells to delay variation and loss within the network.

HiBAC Service combines multiple Company wire centers equipped for ATM Service, Frame Relay Service, ADSL Service and CenturyWAN services in Company designated areas which consist of a specific geographic grouping of these wire centers.

HiBAC Service offers simplified Customer to Customer connectivity, service/network interworking, data aggregation and data delivery by means of a single connection or Broadband Access Point (BAP), i.e., an ATM NNI or UNI.

HiBAC Service is available where facilities and conditions permit. For locations where Customer requests HiBAC Service and digital or SONET facilities are not available, special construction charges may apply.

The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this Tariff.

5.4.2 Service Provisioning

The Broadband Access Point is an ATM protocol arrangement between Customer's designated network service provider (i.e., Interexchange Carrier or Internet Service Provider) and the point of connection into the HiBAC Service network. The Broadband Access Point is available in DS3, OC3c and OC12c bandwidths. Once connected, the network service provider obtains access to their end user Customers in a method that is independent of the originating protocol.

5.4 High Capacity Broadband Access Cloud (Cont'd)5.4.2 Service Provisioning (Cont'd)

A connection from the end user to HiBAC Service is provisioned as either a UNI Port and Access Line or as a UNI Port Only. The UNI Port and Access Line is the facility that provides Customer access to Customer's serving wire center and/or interoffice transport from Customer's serving wire center to a physical interface (UNI Port) on Company's Frame Relay or ATM switch. HiBAC UNI Ports and Access Lines are provided for digital special access lines with frame relay protocol in bandwidth levels of 56Kbps, 128Kbps, 256 Kbps, 384Kbps, DS1 and DS3 as well as with ATM protocol in DS1, DS3 or OC3c bandwidths.

Company may setup access arrangements on behalf of Customer. Access facilities arranged by Company will be billed at the rates provided by the underlying carrier. Any special construction or non-standard charges assessed by carrier supplying the local access will also be the responsibility of Customer. For UNI Port Only, both the port and the digital special access line must be ordered by and billed to one customer.

The HiBAC UNI Port is further defined by its speed or bandwidth capability based on the originating protocol. Ports are provisioned on a specified speed which is based upon Customer's request. The actual throughput of Customer traffic cannot exceed the bandwidth of the access line and the port speed. ATM ports are provisioned based on Customer's specified speed of the Sustained Cell Rate (SCR) and Peak Cell Rate (PCR). SCR is the maximum average cell transmission rate on a given PVC. It allows the network to allocate sufficient network resources to guarantee network performance objectives. The PCR is the maximum cell transmission rate (cells per second) per PVC.

HiBAC Service PVC provides a virtual connection between two Customer locations. The PVC defines a dedicated path across the UNI Access Line between the CDL and Company's ATM or Frame Relay switch. Each UNI Access Line requires the purchase of at least one PVC. Customer may subscribe to multiple PVCs. This feature is established over the UNI Access Line via address mapping which enables Customer to have PVCs to various locations. The path is set up by Company based on information from Customer which is submitted on a Service Request (SR). In provisioning FRS, multiple PVCs may be defined on one physical port, the cumulative Committed Information Rates (CIR) may exceed the physical bandwidth of that port and cause "over-subscription". When this occurs, there can be no guarantee that the CIR defined for that port and PVC will be available at any point in time. CIR is the maximum information rate at which Customer's frame relay traffic will be admitted to the HiBAC Service network without being designated eligible for discard. No PVC can have a CIR greater bit rate than the lower of the two port speeds connected by the PVC segment.

Customer must designate the CIR and maximum Burst Rate (Be) of the PVC. A monthly recurring charge and a nonrecurring charge based upon the CIR capacity (for frame relay) and the SCR (for ATM) of each PVC ordered, as set forth under 5.4.6 will apply for each PVC. HiBAC Service ATM PVCs are available as Variable Bit Rate non-real time (VBR-nrt), Variable Bit Rate real-time (VBR-rt) and Constant Bit Rate (CBR). ATM is based on the SCR which is the maximum average cell transmission rate on a given PVC. It allows the network to allocate sufficient network resources to guarantee network performance objectives.

Company does not undertake to originate data, but offers the use of its service components, where available for the purpose of transporting Customer-originated data.

HiBAC Service is ordered under the SR provisions.

5.4.3 Obligations of Company

In addition to the general conditions described in Section 2, when Customer requests a path which is related to other Local Exchange Carriers, Interexchange Carriers or other Frame Relay or ATM networks, Company will provide assistance in establishing the associated PVC.

Company is responsible for service up to and including the network interface. Company's responsibility is limited to the furnishing of communications facilities and switches suitable for HiBAC Service.

In order to perform software updates and other maintenance, it may be necessary to take the equipment associated with HiBAC Service out of service during Company's maintenance window. Company will provide Customers reasonable and timely notification to minimize impacts to Customer's service. Company reserves the right to temporarily interrupt HiBAC Service at other times in emergency situations.

5.4 High Capacity Broadband Access Cloud (Cont'd)5.4.4 Obligations of Customer

In addition to the general conditions described in Section 2 preceding:

Customer must provide compatible equipment in accordance with interface requirements. This equipment is responsible for all error correction that may be required when the network supporting HiBAC Service discards frames.

Customer is responsible for the installation, operation and maintenance of any CPE.

It shall be the responsibility of the customer to ensure the continuing compatibility of the CPE that is used in conjunction with HiBAC Service. The CPE shall be in compliance with FCC rules and regulations.

Customer, upon request, shall furnish such information as may be required to permit Company to design and maintain the HiBAC Service it offers and to assure that the service arrangement is in compliance with the regulations contained herein.

At service subscription, Customer will be expected to specify the PVC CIR capacity and the maximum amount of uncommitted data (Burst Rate or Be) for each frame relay port ordered and the SCR and PCR of the PVC for each ATM port ordered.

Customer shall be responsible for obtaining permission for Company's agents or employees to enter the premises of Customer or its users at any reasonable hour for the purpose of installing, inspecting, repairing, or, upon termination of the service, removing the service components of Company.

5.4.5 Rate Regulations

A. Minimum Period

B. Rate Elements

1. HiBAC Broadband Access Point

A nonrecurring charge and a monthly rate, based on the bandwidth level of the port connection (i.e., DS3, OC3c or OC12c), apply per port for each digital special access line or Optical Networking connection to the network supporting HiBAC Service. This configuration is used for connecting two networks together for bidirectional messaging. Each port can accommodate multiple PVCs. The Broadband Access Point is also available under a one, three or five-year plan. Company may setup access arrangements on behalf of Customer. Access facilities arranged by Company will be billed at the rates provided by the underlying carrier. Any special construction or non-standard charges assessed by carrier supplying the local access will also be the responsibility of Customer.

2. HiBAC UNI Port Only

A nonrecurring charge and a monthly rate, based on the bandwidth level (i.e., 56 Kbps, 128 Kbps, 256 Kbps, 384 Kbps, DS1, DS3 or OC3c) and protocol (ATM or frame relay) of each port connection, apply per port for each digital special access line or Optical Networking connection to the network supporting HiBAC Service. Each port can accommodate multiple PVCs. Company may setup access arrangements on behalf of Customer. Access facilities arranged by Company will be billed at the rates provided by the underlying carrier. Any special construction or non-standard charges assessed by carrier supplying the local access will also be the responsibility of Customer.

(a) User-to-Network Interface (UNI) Port Only

The UNI port provides for a user to carrier connection (i.e., end user Customer to Company).

3. HiBAC UNI Port and Access Line

A nonrecurring charge and a monthly rate, based on the bandwidth level (i.e., 56 Kbps, 128 Kbps, 256 Kbps, 384 Kbps, DS1, DS3 or OC3c) and protocol, ATM or Frame Relay, of the port connection, apply per port for each physical connection to the network supporting HiBAC Service. Each port can accommodate multiple PVCs.

B. Rate Elements (Cont'd)

4. HiBAC PVC CIR Capacity and Sustained Cell Rate

A monthly rate and a nonrecurring charge apply for the PVC based on the CIR capacity for frame relay and the SCR for usage with ATM protocol for each port requested by Customer. PVCs utilizing frame relay protocol are available in CIR capacities ranging from 0 - 32 Kbps to 45,000 Kbps.

PVCs using ATM protocol are available with SCR ranging from 0 - 32 Kbps to 135,000 Kbps in various QoS connections. The QoS parameters offered for these PVCs are:

Variable Bit Rate-real time (VBR-rt) - Supports burst data traffic with average and peak traffic parameters which is transported immediately (i.e., LAN and video applications). The VBR-rt is described by values representing SCR. Cells transmitted within the SCR have the highest priority of the VBR traffic, and will not be tagged as eligible for discard.

Variable Bit Rate-Non Real Time (VBR-nrt) - Used for connections in which there is no fixed timing relationship between samples, i.e., burst data traffic with average and peak traffic parameters. The information is stored and transported at a later time (i.e., Frame Relay Service).

Constant Bit Rate (CBR) - Supports connections that depend on precise timing (clocking) to ensure undistorted delivery, i.e., voice and some types of video.

C. Application of Rates and Charges

Customer may access HiBAC Service via a Broadband Access, a HiBAC UNI Port and Access Line or UNI Port Only. Company may setup access arrangements on behalf of Customer. Access facilities arranged by Company will be billed at the rates provided by the underlying carrier. Any special construction or non-standard charges assessed by carrier supplying the local access will also be the responsibility of Customer.

C. Application of Rates and Charges (Cont'd)

The HiBAC UNI Port (unbundled or bundled with an access line) and its associated PVC segment(s) may be ordered and billed separately from the associated Broadband Access Point. A request by one Customer to discontinue a PVC does not result in the disconnection of the HiBAC UNI Port and Access Line.

A SR is required for the programming and activation of PVCs. If the sum of the port bandwidth utilized by existing and additional PVCs for CBR and VBR-rt services exceeds the bandwidth allotted for these services within the subscribed bandwidth level for that port, additional PVCs will not be added.

The nonrecurring charge will be applied whenever a change is made to Customer's HiBAC Service configuration (including changes to CIR or remapping PVCs), at Customer's request. Such changes are defined as those rearrangements necessary to add or rearrange Customer's configuration, including changes to Customer's selected network service provider.

D. Term and Volume Plan (TVP)

1. General

The terms and conditions specified herein are applicable to HiBAC Service and are in addition to other regulations as specified in this Tariff.

The HiBAC Service TVP will allow Customers discounted access rates based upon the volume and term commitment. Rates will be based upon the TVP selected by Customer.

The HiBAC Frame Relay UNI Port Only, HiBAC Frame Relay UNI Port and Access Line, HiBAC ATM UNI Port Only, HiBAC ATM UNI Port and Access Line rate elements are available under a TVP arrangement.

HiBAC Service TVP rates will not be greater than standard month to month HiBAC Service rates, for the same rate elements.

Payment periods of one, three and five years are available to all Customers under the TVP rates regardless of when they subscribe to a TVP arrangement. Rate elements must be ordered under the same TVP period.

D. Term and Volume Plan (TVP) (Cont'd)

1. General (Cont'd)

Customer must designate on the SR the payment period for the TVP. The volume commitments of the TVP selected must be in service no later than the date the TVP was initiated. The volume commitment of the HiBAC Service is to be maintained for the length of the TVP selected.

Inside moves, as specified in Section 4, will not incur termination liability charges.

Outside moves, as specified in Section 4, will allow Customer to retain the same TVP payment period. Any other move will be treated as a disconnect of the service and termination liability charges will apply.

2. Rate Application

For conversion of existing month to month HiBAC Service to a TVP arrangement, Customer will be required to submit written notification or a change order SR to convert to the TVP. No service or billing interruption will occur when Customer converts from month to month rates to TVP. If no other changes to the service(s) are ordered, no charges will apply.

3. Threshold Levels

Rates are applied based on the following HiBAC UNI Port Only and UNI Port and Access Line threshold levels: 2-50, 51-200, 201-500, 501-1,000 and over 1,000 units. A unit is defined as a HiBAC Port Only or Port and Access arrangement.

4. Changes to Commitment Quantity or Term

At any time during the plan term, Customer may increase the commitment quantity of UNI Ports or UNI Ports With Access Lines or commitment term to receive a lower threshold rate by submitting written notification to Company.

5. TVP Plan Enrollment

When Customer elects to enroll in a TVP he or she must specify, in writing, the enrollment date (which will be the anniversary date) and the commitment quantity for the applicable HiBAC Service arrangement. The specified enrollment date must be within 30 days of receipt. By the specified date, Customer must issue SR(s) to add the TVP and/or convert month to month arrangements to the TVP to fall within the commitment quantity specified.

6. Annual Review

Each Customer's TVP will be reviewed annually. Customer will be notified as to the status of the TVP if the in-service quantity of HiBAC Service falls below the volume commitment. An allowance of up to five percent will be considered as still having met the volume commitment. Where Customer has less than the volume commitment quantity for a specified discount, charges will be assessed.

If the total number of in-service quantities qualifies Customer for a different TVP rate, Customer will have the option of increasing the commitment quantity for the remainder of the plan.

When a penalty is assessed at the annual review the number of UNI Ports and UNI Ports and Access Lines in-service will become the commitment quantity for the subsequent years' annual review.

7. TVP Conditions

After enrolling in the plan, Customer may delete or add UNI Ports or UNI Ports and Access Lines rated at the specified term period/threshold level rate at any time during the plan. For example, if Customer subscribes to a three year TVP at the 501-1000 UNI Ports threshold level, then UNI Ports may be added at any time at the three year 501-1000 threshold rate level.

8. Shortfall Charges for Failing to Meet Commitment

At the annual review, if the total volume in-service does not meet the volume commitment, a payment equal to the difference between the volume of the TVP rate contracted for and the volume obtained plus 10% will be assessed. The payment will be calculated using the prorated HiBAC Service aggregation quantity at the time of the review. Customer may choose to increase the volume commitment within 30 days after enrollment to the TVP and continue the TVP arrangement or choose to be billed on a going forward basis under either a different TVP or under the month to month rates. If after 30 days, the TVP volume levels are not met, the TVP will be automatically changed to the standard month to month rates.

9. Changes in Length of TVP Period

Prior to the completion of the selected TVP period, Customer may elect to convert to a new TVP period of the same or different, subject to the following conditions:

- No credit toward the new payment period will be given for payments made under the original TVP arrangement;
- Nonrecurring charges will not be reapplied for existing service(s);
- If the new TVP period is shorter in length than the time remaining under the existing TVP, the change to the new TVP period constitutes a discontinuance of the existing TVP service and termination liability charges apply.

D. Term and Volume Plan (TVP) (Cont'd)

10. Renewal Options

Upon expiration of a TVP period, Customer may choose a new TVP period, convert to month-to-month or terminate service. The month to month rates will be those rates that are in effect at the time of conversion. If Customer fails to make a choice by the end of the TVP period, the HiBAC Service will continue billing at the existing term and volume commitment level rates and a new TVP period will begin based on the previously effective term and volume commitment. All terms and conditions, including termination liabilities will apply to the new TVP period.

Conversion to a different TVP period will require Customer to submit a change order SR. Conversion of existing TVP service to a different TVP period will be allowed without application of any nonrecurring charges.

Conversion to month to month rates will be treated as a disconnect of service and establishment of new service. However, if no other changes are ordered, no charge will apply.

11. Notification of Discontinuance

A SR for discontinuance of a TVP arrangement must be received by Company at least 30 days prior to actual disconnect of service. Recurring charges will apply for a period of 30 days from the date Company receives disconnect notification or until the requested disconnect date, whichever period is longer.

12. Upgrade to Higher Speed Service

Customers may elect to upgrade service(s) to a higher speed during a TVP period. The upgraded service will be subject to all appropriate NRCs in addition to the following conditions:

- Both the existing and the new services are provided solely by Company;
- The order to discontinue a service at an existing speed or capacity and the order for the upgraded service are received by Company at the same time;
- The new service will be provided at the same Customer location(s) as the discontinued service;
- The higher speed term commitment must be equal to or longer than the time remaining under the TVP;
- The total monthly rate of the new agreement is equal to or greater than the total monthly rate of the existing agreement period;
- The monthly rates for the upgraded service(s) and/or service elements will be those in effect at the time of the service upgrade. The upgraded service will be subject to all appropriate nonrecurring charges;
- Termination liability charges will not apply as long as the upgraded service remains connected at the same point of termination(s).

13. Termination Liability

When a TVP service is discontinued prior to the end of the commitment period, termination liability charges will apply, as set forth below, based on the remainder of the TVP period in effect at the time of disconnect. The termination liability is also applicable to the HiBAC Broadband Access Point.

One Year TVP - 50% of any remaining portion of the first year's recurring charges for the in-service quantity.

Three Year TVP - 50% of any remaining portion of the first year's recurring charges. In addition, for any remaining portion of the second and third years, Customer will be liable for 10% of the total monthly recurring charges in that time period.
