

## ACCESS SERVICE

7. Special Access Service7.1 General

Special Access Service provides a transmission path to connect customer designated premises\*, either directly, through a Telephone Company Hub where bridging, multiplexing or IntelliMux<sup>SM</sup> functions are performed, or through a DS3 Premises Multiplexer where multiplexing functions are performed at a customer designated premises. In addition, Special Access provides a transmission path to connect a customer designated premises to a WATS Serving Office (WSO), to a wire center where connection to an advanced data service# occurs, or to a fiber meet location of a Verizon Dedicated SONET Ring Service as set forth in Section 23.1 following or an IntelliLight Optical Transport Service as set forth in 7.2.14 following. Special Access Service includes all exchange access not utilizing Telephone Company end office switches, with the exception of IntelliMux<sup>SM</sup> Service and WATS Access Line Service. (T) (N) (N) (N)

Special Access service may also be provided within the Corridor areas served by the Telephone Company, under the provisions of Section 2.4.7.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

7.1.1 Channel Types

There are ten types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

Customers can order a basic channel and select, from a list of available transmission parameters and channel interfaces, those that they desire to meet specific communications requirements.

\* When Telephone Company central office switches provide local exchange service which utilize a common line which must be interconnected for interstate communications (e.g., Centrex), the Telephone Company central office, where the local exchange service ends and the access connection begins, shall be treated as a customer premises for purposes of this tariff. The physical space from which other Telephone Company services are provided, whether or not on Telephone Company property, shall be treated as a customer premises. The central office where packet data services and data base services reside shall also be included in this definition.

# Advanced data services include Telephone Company provided frame relay services, switched multi-megabit services, Internet Protocol services and ATM-cell relay services. Connections to advanced data services are provided by the Telephone Company where such connections are technically and operationally feasible, as determined by the Telephone Company.

(Issued under Transmittal No. 1103)

Issued: August 18, 2010

Effective: September 2, 2010

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic Service in this tariff, there is no restriction against doing so.

Following is a brief description of each type of channel:

(D)

|

(D)

Voice Grade - a channel for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz.

WATS Access Line - a channel between a customer designated premises and a WATS Serving Office (WSO) for transmission of interstate or international traffic.

(D)

|

(D)

Video - a channel for the transmission of a standard 525 line/60 field monochrome or National Television Systems Committee color video signal and one or two associated 5 or 15 kHz audio signals. The bandwidth for a video channel is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 MHz.

Serial Component Video - a channel for one-way transmission, at a rate of 270 Mbps, of broadcast quality 4:2:2 component video signals in serial digital format.

---

(Issued under Transmittal No. 1363)

Issued: December 18, 2017

Effective: January 2, 2018

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

Digital Data - a channel for the digital transmission of data at rates of 2.4, 4.8, 9.6, 19.2, 56 or 64 kbps.

High Capacity - a channel for the transmission of isochronous serial digital data at rates of 1.544, 3.152 or 44.736 Mbps.

High-Definition (Hi-Def) Digital Video Transport Service - a channel for one-way broadband transmission of high quality video signals in digital format, at a rate of 19.39 Mbps or 1.485 Gbps.

45 Mbps Digital Video Transport Service - a channel for one-way broadband transmission, at a rate of 45 Mbps, of high quality video signals in digital format.

Supertrunking Transport Video Service (SVS) - a channel with a bandwidth of up to either 750 MHz or 870 MHz for the transmission of multiple Amplitude Modulation (AM) standard 525 line/60 field monochrome or National Television Systems committee (NTSC) color video signals and monaural or Broadcast Television Systems Committee (BTSC) stereo audio signals over fiber optic facilities.

Detailed descriptions of each of the channel types are provided in 7.2 following:

The customer also has the option of ordering Voice Grade and analog and digital high capacity facilities (i.e., Group, Supergroup, Mastergroup, 1.544 Mbps, 3.152 Mbps, and 44.736 Mbps) to a Telephone Company Hub for multiplexing to individual channels of a lower capacity or bandwidth. The customer also has the option of ordering DS3 High Capacity facilities with a DS3 Premises Multiplexer for multiplexing to individual DS1 High Capacity channels at a customer designated premises. All of the DS1 High Capacity channels derived from the DS3 Premises Multiplexer must terminate at that premises.

Descriptions of the types of multiplexing available at the Hubs or using a DS3 Premises Multiplexer, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements. Descriptions of the optional features and functions available are also set forth in 7.2 following.

For example, a customer may order a DS3/44.736 Mbps facility from a customer designated premises to a Telephone Company Hub for multiplexing to twenty-eight 1.544 Mbps channels. The 1.544 Mbps channels may be further multiplexed at the same or a different Hub to Voice Grade channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Voice Grade Channels. (D)

(Issued under Transmittal No. 1259)

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories

There are five basic rate categories which apply to Special Access Service:

- Channel Terminations, including WATS Access Connections (WACs) (described in 7.1.2(A) following)
- Channel Mileage (described in 7.1.2(B) following)
- Optional Features and Functions (described in 7.1.2(C) following)
- Surcharge (described in 7.4.2 following)
- Message Station Equipment Recovery Charge (described in 7.4.3 following)

Additionally, rates and charges for Integrated Optical Service Riders may also apply to Special Access connected to Integrated Optical Service Riders as set forth in Section 24.2 following. (T)  
Rates and charges for Ports also apply to a Special Access DS3 (N)  
connected to a point to point SONET service as set forth in Section 24.3 following. (N)

## (A) Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the serving wire center of that premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability itself is provided as an optional feature as set forth in (C) following. One Channel Termination charge applies per customer designated premises at which the channel is terminated. This charge will apply even if the customer designated premises and the serving wire center are collocated in a Telephone Company building. For WATS Access Line Service, the WATS Serving Office (WSO) is never considered a customer premises. A Channel Termination charge does not apply: (S)(x)

- at a DSR fiber meet location where high speed interconnection of the Company's facilities to the facilities of the customer or of a third party occurs; or (S)(x)
- to a DS1 High Capacity channel derived from a DS3 Premises Multiplexer located at the customer designated premises, as further described in Section 7.2.9(D)(8) following. (S)(x)  
(S)(x)  
(S)(x)

The Channel Termination rate category may also be employed to provide for connections to other service offerings.

(x) Reissued material originally filed under Transmittal No. 1103 and effective September 2, 2010.

(Issued under Transmittal No. 1108)

Issued: September 9, 2010

Effective: September 24, 2010

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories (Cont'd)

## (B) Channel Mileage

The Channel Mileage rate category provides for the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center associated with a customer designated premises and a Telephone Company Hub, between a serving wire center and a wire center where connection to an advanced data service occurs or between two Telephone Company Hubs. The Channel Mileage rate category also provides for the dedicated ring facilities between devices (nodes, high speed interfaces, or amplifiers) on a DSR as set forth in Section 23.1 following or IOTS Service as set forth in 7.2.14(C)(4). (T)  
A serving wire center associated with a customer's designated premises may be either the wire center from which the customer would normally obtain dial tone or an alternate serving wire center as described in 7.2.9(D)(7) following. Channel Mileage rates are comprised of a fixed rate element and a per mile rate element. (T)

(Issued under Transmittal No. 640)

Issued: November 14, 2005

Effective: November 29, 2005

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories (Cont'd)(C) Optional Features and Functions (Cont'd)

The Optional Features and Functions rate category provides for optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, they will be charged as a single rate element.

The following is a list of Bell Atlantic's Open Network Architecture (ONA) Special Access Basic Service Elements (BSEs) which provides a cross-reference to the generic name contained in Bell Operating Companies, Service Descriptions, ONA Services User Guide, July 31, 1991, from the product name utilized in this tariff.

<u>GENERIC NAME</u>	<u>BELL ATLANTIC PRODUCT NAME</u>
Access to Clear Channel Transmission	Clear Channel Capability
Automatic Protection Switching	Automatic Loop Transfer
Bridging	Bridging
Conditioning	Conditioning
Inband Signaling	Inband Signaling
Network Reconfiguration	Network Reconfiguration
Route Diversity	Route Diversity
Secondary Channel Capability	Secondary Channel

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories (Cont'd)(C) Optional Features and Functions (Cont'd)

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements
- DS3 Premises Multiplexer

(N)

A Hub is a Telephone Company designated serving wire center which may perform bridging, multiplexing, and/or IntelliMux<sup>sm</sup> reconfiguration functions. The bridging functions performed are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth. IntelliMux<sup>sm</sup> Service allows the customer the capability to reconfigure their special access services.

Descriptions for each of the available Optional Features and Functions are set forth in 7.2 following. IntelliMux<sup>sm</sup> Service is described in 7.2.12, following.

7.1.3 Service Configurations

There are two types of service configurations over which Special Access Services are provided: two-point service and multi-point service.

(A) Two-Point Service

A two-point service connects two customer designated premises, either on a directly connected basis, through a Hub where multiplexing or IntelliMux<sup>sm</sup> functions are performed, or through a DS3 Premises Multiplexer where multiplexing functions are performed at a customer designated premises. Two point service also connects a customer designated premises and a WATS Serving Office (WSO).

(T)

(N)

(N)

Applicable rate elements are:

- Channel Termination(s)
- Channel Mileage (as applicable)
- Optional Features and Functions (when applicable)

In addition, a Special Access Surcharge as set forth in 7.4.2 following, a Message Station Equipment Recovery Charge as set forth in 7.4.3 following may be applicable.

(Issued under Transmittal No. 1103)

Issued: August 18, 2010

Effective: September 2, 2010

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

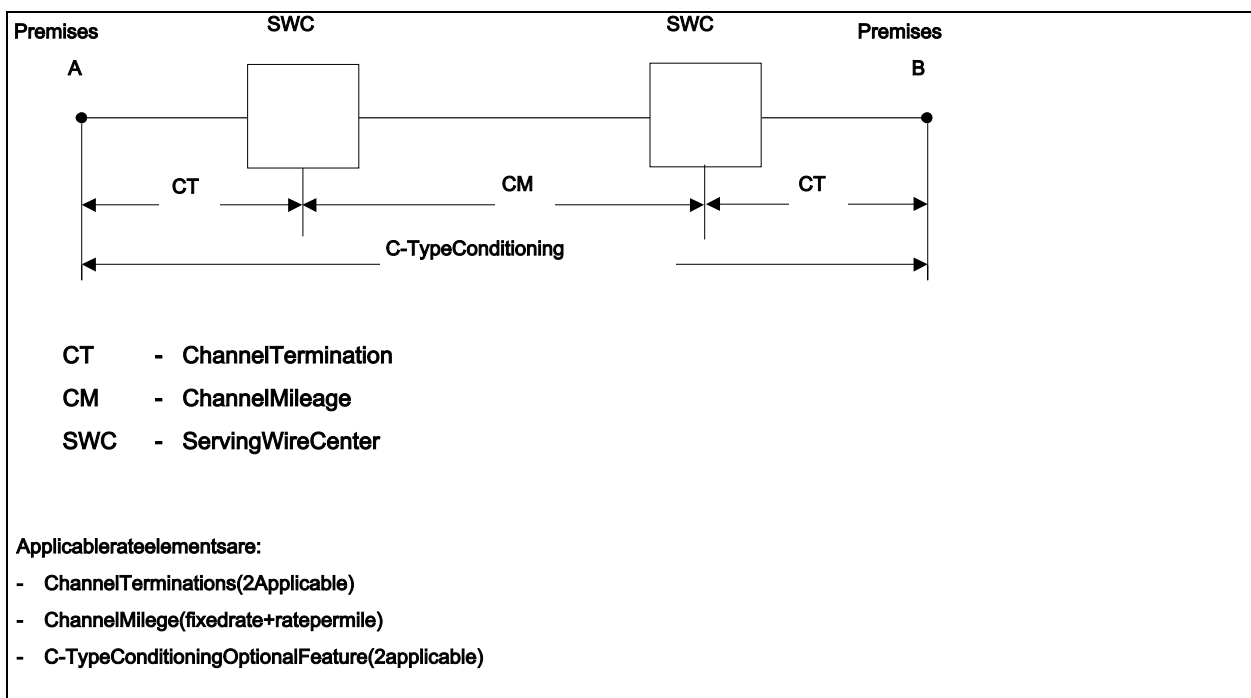

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.3 Service Configurations (Cont'd)(A) Two-Point Service

The following diagram depicts a two-point Voice Grade service connecting two customer designated premises located 15 miles apart. The service is provided with C-Type Conditioning.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.3 Service Configurations (Cont'd)(B) Multipoint Service

Multipoint service connects three or more customer designated premises through a Telephone Company Hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between Hubs (i.e., bridging locations). Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.2 following.

Multipoint service utilizing a customized technical specifications package as set forth in 7.2 following will be provided when technically possible. If the Telephone Company determines that the requested characteristics for a multi-point service are not compatible, the customer will be advised and given the opportunity to change the order.

When ordering, the customer will specify the desired bridging Hub(s) selected from the Exchange Carrier Association Tariff F.C.C. No. 4. This Tariff identifies type(s) of bridging functions which are available and the serving wire centers at which they are available.

Applicable Rate Elements are:

- Channel Terminations (one per customer designated premises)
- Channel Mileage (as applicable between each designated customer premises and the Hub and between Hubs)
- Bridging
  
- Additional Optional Features (when applicable).

In addition, the Special Access Surcharge as set forth in 7.4.2 following and a Message Station Equipment Recovery Charge as set forth in 7.4.3 following may be applicable.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

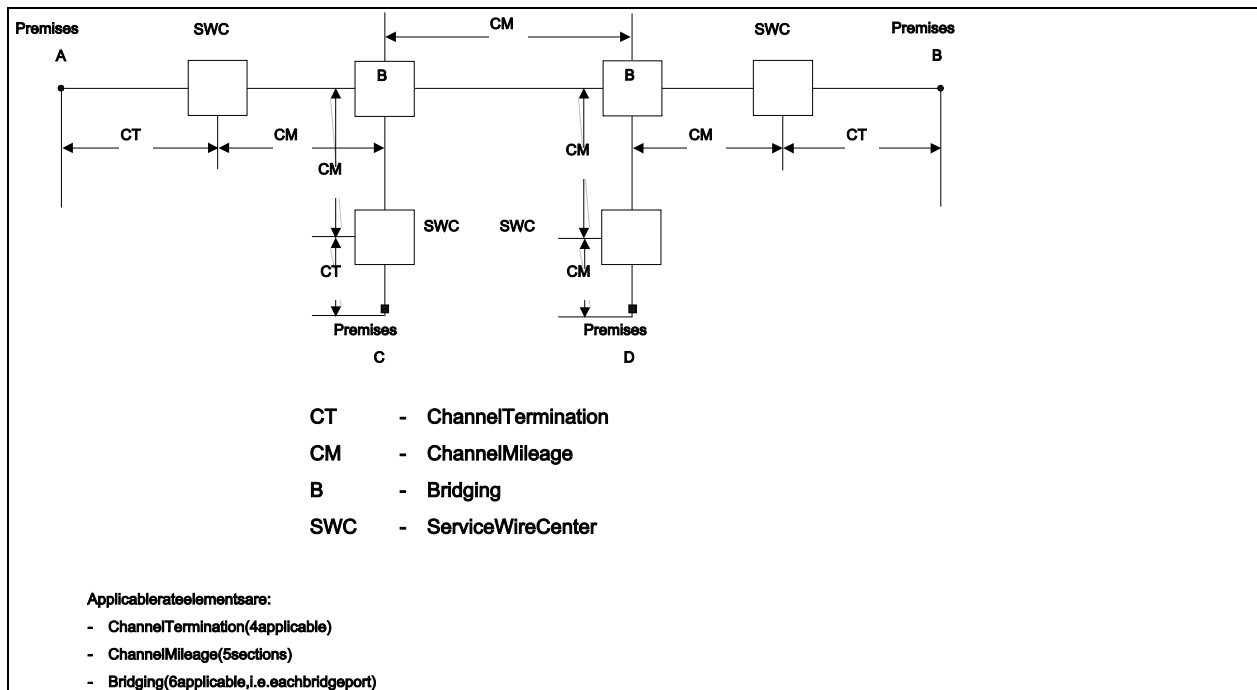

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.3 Service Configurations (Cont'd)(B) Multipoint Service (Cont'd)

Example: Voice Grade multipoint service connecting four customer premises via two customer specified bridging hubs.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.4 Alternate Use

Alternate Use occurs when a service is arranged by the Telephone Company so that the customer can select different types of transmission at different times. A customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12, Specialized Service or Arrangements. The customer will pay the stated tariff rates for the Access Service rate elements for the service ordered (i.e., Channel Terminations, Channel Mileage [as applicable] and Optional Features [if any]).

7.1.5 Special Facilities Routing

A customer may request that the facilities used to provide Special Access Service be specially routed. The regulations, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in this section and in 11. following:

7.1.6 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this tariff as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.7 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

- (A) For Voice Grade analog and WATS Access Line services, acceptance tests will include test for loss, 3-tone slope, DC continuity, operational signaling, C-notched noise and C-message noise when these parameters are applicable and specified in the order for service. Additionally, for Voice Grade services, a balance (improved loss) test will be made if the customer has ordered the improved loss optional feature.
- (B) For other analog services (i.e., Video) and for digital services (i.e., Digital Data High Capacity) acceptance tests will include tests for the parameters applicable to the service as specified in the order for service. (D)

In addition to the above tests, Additional Cooperative Acceptance Testing for Voice Grade Service to test other parameters, as described in 13.3.4(B)(1) following, is available at the customer's request. All test results will be made available to the customer upon request.

7.1.8 Ordering Options and Conditions

Special Access Service is ordered under the Access Order provisions set forth in 5. preceding. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.)

---

(Issued under Transmittal No. 1363)

Issued: December 18, 2017

Effective: January 2, 2018

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.9 Special Access Surcharge

In addition, a Special Access Surcharge as set forth in 7.5.14 following will apply to jurisdictionally interstate private line facilities provided by the Telephone Company to a customer, in accordance with regulations as set forth in 7.4.2 following.

7.1.10 Connections with Other Network Services

Special Access Service may be ordered to allow connections between the end user premises and serving wire center which provides Other Network Services.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions

For the purposes of ordering, there are eight categories of Special Access Service. These are:

Voice Grade (VG)  
WATS Access Connection (WAC)

(D)  
(D)

Video (TV)  
Digital Data (DA)  
High Capacity (HC)

(D)

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service are described in this section.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

The channel description specifies the characteristics of the basic channel and indicates whether the channel is provided between customer designated premises or between a customer designated premises and a Telephone Company Hub where bridging or multiplexing functions are performed.

Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. This information is displayed in a matrix with the transmission parameters listed down the left side and the packages listed across the top. Each package is identified by a code, e.g., VGC. The first two letters of the code indicate the category of Special Access Service to which the parameters are applicable. These two letter codes are shown above in parentheses following the category of Special Access Service. The letter "C" following the two letter code indicates the technical specifications package for a customized service. A numeric or alpha-numeric designation following the two letter code indicates the specific predefined package. For a customized service, the customer may select any parameters available with that category of service as long as the parameters are compatible. When appropriate, the Technical Reference which contains detailed specifications for the parameters is shown following the matrix.

(Issued under Transmittal No. 1363)

Issued: December 18, 2017

Effective: January 2, 2018

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)

Channel interfaces at each point of termination on a two-point service may be symmetrical or asymmetrical. On a multipoint service they may also be symmetrical or asymmetrical. However, communications can only be provided between points of termination with compatible channel interfaces. Only certain channel interfaces are compatible. These are set forth in 7.3.5 following in a combination format.

Only certain channel interface combinations are available with the predefined technical specifications packages. These are delineated in the Technical References set forth at the end of this 7.2. When a customized channel is requested, all channel interface combinations available with the specified type of service are available with the customized channel.

The optional features and functions available with each type of Special Access Service are described in this section. The optional features and functions information also indicates with which technical specifications packages they are available. Such information is displayed in a matrix with the optional feature or function listed down the left side and the technical specifications package listed across the top.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service#(A) Basic Channel Description

A Voice Grade channel is a channel which provides voice frequency transmission capability in the nominal frequency range of 300 to 3000 Hz and may be terminated as analog two-wire or four-wire, or, where facilities permit, as a four-wire in a digital format when used in conjunction with another Voice Grade Channel Termination at the other end. Voice Grade channels are provided between customer designated premises or between a customer designated premises and a Telephone Company Hub.

# No new customers may place orders for Voice Grade Service as of the date specified for the locations in the following table. The Telephone Company will continue to provide Voice Grade Service pursuant to this Section 7.2.3 to existing customers in these wire centers with in-service Voice Grade Service as of the specified effective date, or orders for Voice Grade Service placed with the Telephone Company within the permitted time period(s) specified following:

<b>Service Limited to Existing Customers Effective:</b>	<b>Moves, adds or changes are permitted:</b>	<b>Moves, adds or changes are no longer permitted effective:</b>	<b>Service No Longer Available On or After:</b>	<b>Wire Center:</b>	(N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service# (Cont'd)(B) Technical Specifications Packages (Cont'd)

The technical specifications for these parameters (except for dropouts, gain hits, and phase hits) are delineated in Technical Reference TR-NWT-000335, Issue 3. The technical specifications for dropouts, phase hits, and gain hits are delineated in Technical Reference PUB 41004, Table 4.

(C) Channel Interfaces

The following channel interfaces for Voice Grade service do not require signaling capability: AH, DA, DB, DD, DE, DS, NO, PR and TF.

The following channel interfaces for Voice Grade service require signaling capability: AB, AC, CT, DX, DY, EA, EB, EC, EX, GO, GS, LA, LB, LC, LO, LR, LS, RV and SF.

Compatible channel interfaces are set forth in 7.3.5(C) following.

(D) Optional Features and Functions(1) Central Office Bridging Capability

Active Bridging

(D)

(D)

(2) Reserved(3) Conditioning

Conditioning provides more specific transmission characteristics for Voice Grade services. C-Type conditioning controls attenuation distortion and envelope delay distortion. Sealing Current helps maintain continuity on dry metallic loops.

In addition, a customer may require that either the attenuation distortion or the envelope delay distortion, or both, be improved to more stringent specifications than those provided for C-Type conditioning. In these cases the customer has the option of ordering either Improved Attenuation Distortion or Improved Envelope Delay Distortion, or both, as needed.

For two-point services, the parameters apply to each service. For multipoint services, the parameters apply to each mid link or end link. C-Type conditioning and Data Capability may be combined on the same service.

# Service availability limited. Refer to # footnote on Page 7-19.

(T)

(D) Optional Features and Functions (Cont'd)(3) Conditioning (Cont'd)(a) C-Type Conditioning

C-Type Conditioning is provided for the additional control of attenuation distortion and envelope delay distortion on data services. The attenuation distortion and envelope delay distortion specifications for C-Type Conditioning are:

Attenuation Distortion  
(Frequency Response)  
Relative to 1004 Hz

Frequency Variation  
Range (Hz) (dB)

504-2804	-1.0 to +3.0
304-3004	-2.0 to +6.0

Envelope Delay  
Distortion  
Variation  
Frequency (micro-  
Range (Hz) seconds)

1004-2604	≤	500
-----------	---	-----

604-2604	≤	1500
504-2804	≤	3000

(T)

(D) Optional Features and Functions (Cont'd)(3) Conditioning (Cont'd)(b) Improved Attenuation Distortion

Improved attenuation distortion is provided for additional control of attenuation distortion. The improved attenuation distortion specifications are:

Attenuation Distortion  
(Frequency Response)  
Relative to 1004 Hz

Frequency Variation  
Range (Hz)    (dB)

404-2804	-1.0 to +2.0
304-3004	-1.0 to +3.0
304-3204	-2.0 to +6.0

(c) Improved Envelope Delay Distortion

Improved envelope delay distortion is provided for additional control of envelope delay distortion. The improved envelope delay distortion specifications are:

<u>Envelope Delay Distortion</u>	
<u>Frequency Range (Hz)</u>	<u>Variation (micro-seconds)</u>
1004-2604	< 100
804-2604	< 200
604-2604	< 300

(T)

(D) Optional Features and Functions (Cont'd)(3) Conditioning (Cont'd)(d) Sealing Current Conditioning

Sealing Current Conditioning is provided to help maintain continuity on dry metallic loops. It is usually associated with four-wire DA or NO type channel interfaces.

(4) Customer Specified Premises Receive Level

This option allows the customer to specify the receive level at the Point of Termination. The level must be within a specific range on effective four-wire transmission. The ranges are delineated in Technical Reference TR-NWT-000335, Issue 3.

# Service availability limited. Refer to # footnote on Page 7-19.

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service# (Cont'd)

(T)

(D) Optional Features and Functions (Cont'd)(5) Improved Termination and Improved Return Loss

- (a) Improved Termination - On Effective Four-Wire Transmission at Four-Wire Point of Termination (applicable to each two-wire port): Provides for a fixed 600 ohm impedance, variable level range and simplex reversal. Telephone Company equipment is required at the customer's premises where this option is ordered. The Improved Termination parameters are delineated in Technical Reference TR-NWT-000335, Issue 3.
- (b) Improved Return Loss - On Effective Two-Wire Transmission at Two-Wire Point of Termination: Provides for more stringent Echo Control Specifications. In order for this option to be applicable, the transmission path must be four-wire at one POT and two-wire at the other POT. Placement of Telephone Company equipment may be required at the customer's premises with the two-wire POT. The Improved Return Loss parameters are delineated in Technical Reference TR-NWT-000335, Issue 3.

(6) Data Capability

Data Capability provides transmission characteristics suitable for data communications. Specifically, Data Capability provides for the control of Signal to C-Notched Noise Ratio and intermodulation distortion. It is available for two-point services or multipoint services.

The Signal to C-Notched Noise Ratio and intermodulation distortion parameters for Data Capability are:

- Signal to C-Notched Noise Ratio is equal to or greater than 32dB

# Service availability limited. Refer to # footnote on Page 7-19.

(11) Effective Four-Wire Transmission with Two-Wire Interface

When a customer requests that an effective Four-Wire channel be terminated with a Two-Wire interface at the customer designated premises, then this optional feature applies. Placement of Telephone Company Equipment (Hybrid) is required at the customer's premises to convert the Four-Wire channel to the Two-Wire POT. When this option is ordered, a Four-Wire channel termination charge applies. Per the voice grade technical references, certain voice grade service are always provisioned as Four-Wire services and will be billed as a Four-Wire Channel Termination.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3.1 WATS Access Line Service#(A) Basic Channel Description

A WATS Access Line Service is a channel which provides voice frequency transmission capability. The service provides customer premise to customer premise connection through the combination of a WATS Access Connection (WAC), a dedicated channel between the customer's end user's premises and a WATS Serving Office (WSO) equipped with Lineside BSA or Trunkside BSAs service as set forth in Section 6 preceding. The WAC is dedicated to one customer who has the ability to transport traffic interstate.

# No new customers may place orders for WATS Access Line Service as of the date specified for the locations in the following table. The Telephone Company will continue to provide WATS Access Line Service pursuant to this Section 7.2.3.1 to existing customers in these wire centers with in-service WATS Access Line Service as of the specified effective date, or orders for WATS Access Line Service placed with the Telephone Company within the permitted time period(s) specified following:

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3.1 WATS Access Line Service# (Cont'd)(A) Basic Channel Description (Cont'd)

The WAC is comprised of a Channel Termination from the customer's end user serving wire center to the customer's end user premises.

WATS Access Line Service is service arranged for originating, terminating or two way transmission to or from an end user's premises at the option of the customer. It is provided with rotary dial or dual tone multifrequency address signaling and with either loop start or ground start signaling. Two way WATS Access Line Service is subject to recording capability and central office capacity.

(T)

(A) Basic Channel Description (Cont'd)

Originating only and Two Way (originating only) WATS Access Line Service customers, at their option and at no charge, may be provided access to test lines in their local central office to test the WATS Access Connection. Access to two types of lines is available, balance (Type 100) and milliwatt (Type 102). Where available, this feature is only provided in Telephone Company electronic end offices in which WATS Access Connections are provided.

(B) Technical Specifications Packages

<u>Parameters</u>	<u>Packages WAL -</u>		
	<u>1</u>	<u>2</u>	<u>3</u>
Attenuation Distortion	X	X	
Bit Error Rate			X
C-Message Noise	X	X	
Echo Control	X	X	
Envelop Delay Distortion	X	X	
Frequency Shift	X	X	
Impulse Noise	X	X	
Intermodulation Distortion	X	X	
Loss Deviation	X	X	
Phase Jitter	X	X	
Signal-to-C Notch Noise	X	X	

WACs are offered as either effective two-wire, effective four-wire, high capacity or improved two-wire access connections. The technical limitations are delineated in Technical Reference GR-334-CORE, Issue 1.

# Service availability limited. Refer to # footnote on Page 7-29.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3.1 WATS Access Line Service# (Cont'd)

(T)

(E) Service Provision Restrictions

The provision of WATS Access Line Service, as described in (A), (B), (C) and (D) preceding, is subject to individual state restrictions governing the provision of intrastate access services and intrastate competition in general. Individual state restrictions are as follows:

(1) State of Delaware

Intrastate traffic, at the customer's option, will either be delivered to Diamond State and billed by Diamond State to the customer's end user, or will be delivered to the customer for completion; all such traffic will be governed by the rules, regulations, and tariffs of the relevant state jurisdictions.

(2) State of New Jersey

Interexchange carriers are not authorized to offer intrastate intraLATA WATS Service in New Jersey by order of the New Jersey Board of Public Utilities. Intrastate intraLATA calling must conform to the rules and regulations of the New Jersey Board of Public Utilities. Originating intrastate intraLATA WATS calls are subject to blocking or completion by New Jersey Bell, as directed or allowed by the New Jersey Board of Public Utilities. Terminating intrastate interLATA (Toll Free\*) calls should be returned by the customer to New Jersey Bell for completion, or if this is not possible due to technical limitations and such calls are completed, billing information should be returned to New Jersey Bell to allow New Jersey Bell to bill such calls as its own traffic.

\* "Toll Free" service includes any access service which utilizes the following NPA's: 800, 888, 877, 866, 855, 844, 833, and 822 as they become available to the industry.

# Service availability limited. Refer to # footnote on Page 7-29.

(T)

(E) Service Provision Restrictions(3) State of Pennsylvania

Reserved for future use.

(4) State of Virginia

Interexchange carriers are not authorized to offer intraLATA WATS Service in Virginia by order of the Virginia State Corporation Commission. IntraLATA WATS calls will either be blocked, or diverted to C&P of Virginia for completion, at the customer's option.

(F) WATS Access Line Extensions (WALE)

When WATS Access Line Service is ordered to the end office that normally serves the customer and that office is without WATS screening capability, service is provided from the nearest end office with WATS screening capability (WSO).

There is no channel mileage applicable to the distance between the end office that normally serves the customer and the office that provides the WATS screening capability (WSO).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service(A) Service Description

A basic Video channel is a channel with one-way transmission capability for a standard 525 line/60 field monochrome, or National Television Systems Committee color, video signal and one or two associated 5 or 15 kHz audio signal(s). Video channels are provided between customer designated premises or between a customer designated premises and a Telephone Company Hub.

Video Service is provisioned as either Basic Service or as Multichannel Service.

## 1. Basic Video Service

Basic Video Service is a single video channel with one or two associated 5 or 15 kHz audio signals. The audio signal may be either diplexed or provided as separate channels. The provision and the bandwidth of the associated audio signal(s) is a function of the channel interface selected by the customer.

Basic Video Service is provided on a full-time or part-time (i.e., daily) basis. At the option of the customer, Basic Video Service channels may be provided under a Service Discount Plan as specified in Section 25.2 following.

## 2. Multichannel Video Service

Multichannel Video Service is a service arrangement of three to eight video channels provisioned over a single fiber. One or two separate 15 kHz audio signal(s) is associated with each video channel.

(D)

All electronics are owned and provided by the Telephone Company.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service(A) Service Description (Cont'd)

For both services, Basic and Multichannel Video, the use of up to twenty-five (25) feet of coaxial cable from the point of entry into the customer's building to the channel interface is included in the Channel Termination rate element. In the event the customer requests that the Company extend the location of the channel interface beyond 25 feet, and the Company agrees to extend the communications path, the charges set forth for Other Labor as specified in Section 13.2.5 following will apply for the extended portion of the communications path. The extended communications path is subject to distance limitations, which are specific to the communications path being extended.

6TV7-15	15kHz	2 Channels, separate

Compatible channel interfaces are set forth in 7.3.5(f) following.

(D) Optional Features and Functions

## (1) Video Matrix Switching\*

Video switch arrangements are only provisioned at Video Hubs as specified in N.E.C.A. Tariff F.C.C. No. 4. A separate voice grade data control channel is required to operate the switch arrangement and is not included as part of the option.

## a) Basic 20X10 Video Switch Arrangement\*

An arrangement which will enable the customer to switch video transmission carried on special access video channels originating from up to twenty (20) locations and terminating at up to ten (10) locations (20 x 10).

## b) Video Switch Arrangement Expansion Module\*

The expansion module is additional equipment which allows expansion of a basic 20X10 video switch to another 20X10 video switch to allow operation to twenty (20) originating and twenty (20) terminating locations (20X20).

(D)  
|  
(D)

\* Note: Effective April 20, 2002, the services described in (D)(1)(a) - (c) are no longer available to new customers. Instead, new customers should see (D)(5) for Advanced Video Switching.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(D) Optional Features and Functions (Cont'd)

## (3) 1X6 Video Distribution Amplifier

A distribution amplifier is additional equipment which amplifies one video channel to produce six identical output signals. This equipment will be located at Telephone Company central offices.

## (4) Additional Audio Channels

A 3rd and 4th audio channel arrangement is available for each video channel. Additional channels for Basic Service are either 5 or 15KHz signals which may be diplexed or provided as one or two separate channels. Additional audio channels for Multichannel Service are 15KHz signals over separate channels.

## (5) Advanced Video Switching

Advanced Video Switching (AVS) is available with certain Video Services which allows the customer to switch compatible video channels provided in premises to video hub service configurations.

(D)

The following video services require a dedicated switching arrangement to provide AVS:

(T)

- Basic Video Service (BVS)
- Multichannel Video Service (MVS)
- Serial Component Video Service (SCVS)
- 45 Mbps Digital Video Transport Service (45Mbps DVS)

(T)

The following video service may be ordered as (i) a dedicated switching arrangement; or (ii) on an individual channel basis with each channel being connected to a port on a Telephone Company shared switching arrangement.

(N)

- High-Definition Digital Video Transport Service (Hi-Def DVTS)

Individual channel connections are subject to available capacity on the shared switch.

(N)

Certain material previously found on this page can now be found on 1<sup>st</sup> Revised Page 7-41.1.

(This page filed under Transmittal No. 918)

Issued: May 14, 2008

Effective: May 29, 2008

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(D) Optional Features and Functions (Cont'd)(5) Advanced Video Switching (Cont'd)

A matrix in the video switch defines the size of the AVS and the mapping of services to specific input/output ports. Switching matrixes can be established in 32 X 32, 64 X 64, 96 X 64, 96 X 96, 128 X 96, and 128 X 128 input/output port configurations.

(M)

AVS is available with full-time and part-time video services. Compatible services may be switched as full-time to full-time, full-time to part-time or part-time to part-time service configurations.

(M)

When more than one type of service is supported on the AVS, interconnection of different service types is prohibited, e.g., a BVS channel may not be connected to a SCVS channel. Compatible video may be switched to create new end-to-end channels. A customer may not exceed the capacity of its AVS arrangement.

The following services or combination of services require a minimum switch capacity of 32 inputs and 32 outputs (32 x 32).

- All Basic Video Services (BVS)
- All Multichannel Video Service
- All 45 Mbps Digital Video Transport Service (45Mbps DVTS)
- All Serial Component Video Service (SCVS)
- Combinations of BVS, Multichannel Video Service and /or 45Mbps DVTS
- All High-Definition Digital Transport Service (Hi-Def DVTS) when ordered as a dedicated switching arrangement.

(T)

(N)

|

(N)

The following services require a minimum switch capacity of 64 X 64.

- Combination of BVS and SCVS
- Combination of 45Mbps DVTS and SCVS.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(D) Optional Features and Functions (Cont'd)(5) Advanced Video Switching (Cont'd)

AVS is provided at the designated Telephone	(T)	(x)
Company Video Operation Center (TVOC)/hub as	(T)	
specified in National Exchange Carrier	(M)	
Association Inc. (NECA), Tariff F.C.C. No. 4.	(M)	(x)

When AVS is provisioned as a dedicated switching	(T)	(x)
arrangement, the customer must perform all	(T)	
switching of the video channels connected to its	(M)	
AVS. A separate dial-up line or Special Access		
service channel is required to connect the		
customer's designated premises to its AVS located		
in the TVOC.	(M)	(x)

When AVS is provisioned as a dedicated switching	(T)	(x)
arrangement, the customer may share its AVS	(T)	
arrangement, however, only the customer will be		
on record with the Telephone Company with		
authority to manage and control the switch. The		
customer of record will also be the responsible		
bill party.	(M)	(x)

When AVS is provisioned through a Telephone	(N)
Company shared switching arrangement, the	
Telephone Company will perform all switching of	
video services connected through the shared	
switch.	(N)

(x) Certain material on this page formerly appeared on 1<sup>st</sup> Revised Page 7-41.1.

## (5) Advanced Video Switching (Cont'd)

## (a) Application of Rates and Charges

(N)

## (i) AVS provisioned as a dedicated switching arrangement

When AVS is provisioned as a dedicated switching arrangement, AVS rates and charges apply as a Premises to Hub Channel Termination for each connection to the TVOC. The rates are differentiated by the type of service involved. The Premises to Hub Channel Termination provides for the communications path between a customer designated premises and the dedicated switching arrangement at the TVOC where switching is performed. When the wire center serving the customer's designated premises and the TVOC are not located in the same wire center, channel mileage applies between the two wire centers involved.

In addition to the Premises to Hub Channel Terminations, a recurring monthly rate and nonrecurring charge applies for the switch capacity of the dedicated switching arrangement. The dedicated switching arrangement is provided for a term of either 5 years or 10 years as selected by the customer.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(E) Serial Component Video Service(1) Service Description

Serial Component Video Service (SCVS) is a broadband digital video transport channel with one-way transmission capability. SCVS provides 270 Mbps high quality video as defined by the Technical Reference SMPTE 0259M-2008. This standard describes a serial digital interface, 525 line/60 field National Television Systems Committee (NTSC) digital television equipment operating with 4:2:2 serial component signals that conform to American National Standards Institute (ANSI) digital format. The service may include up to four (4) 20 kHz Audio Engineering Society (AES)/European Broadcasting Union (EBU) digital audio signals. (T) (C)(x)

SCVS is provided on a full-time or part-time (i.e., daily) basis over digital network facilities between customer designated premises or between a customer designated premises and a video hub where compatible channels may be switched. At the customer's premises, the Company will install coaxial cable for the transmission facilities within the building up to the channel interface. The channel interface enables delivery of digital audio signals, which are embedded in the digital transmission. It is the responsibility of the customer to embed the audio and ancillary data in the digital transmission. The quality of the video signal may be impaired if the distance of the coaxial cable results in transmission parameters which are not within the limits specified in the technical publication set forth in (2) following.

Where suitable facilities are not available to provide SCVS, Special Construction charges as set forth in Section 5.1.3 preceding may apply.

SCVS is compatible with the optional Advanced Video Switching feature described in 7.2.5(D)(5) preceding.

(2) Technical Specifications

The technical specification for SCVS are delineated in Technical Reference SMPTE 0259M-2008, Revised 1997 with one exception. The Company will only accept a 75 ohm impedance interface to or from a customer provided high- quality coaxial cable. (C)(x)

(x) SMPTE 0259m-2008 replaces Society of Motion Picture and Television Engineers (SMPTE) Standard 259M and ANSI/SMPTE 259M in their entirety.

(Issued under Transmittal No. 1037)

Issued: August 27, 2009

Effective: September 11, 2009

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(E) Serial Component Video Service (Cont'd)(3) Channel Interfaces

The following channel interface (CI) defines the provision of audio signals associated with SCVS.

<u>CI</u>	<u>Description</u>
02TD6.E	Uncompressed serial component digital video transport with ancillary channels through the serial digital interface.

(4) Terms and Conditions

- a) SCVS is available on a part-time basis with daily rates or on a full-time basis as a month-to month, 3-year or 5-year term plan.
- b) The minimum service period for full-time SCVS is one year. A minimum service period charge applies if SCVS is disconnected in less than one year except when the requirements for portability are met as set forth in (f) following. (C)
- c) SCVS is available based on negotiated intervals as described in 5.2.1(B) preceding.
- d) At the expiration of a 3 or 5-year term plan, the service will be converted to the Month-to-Month term plan and rated at the then prevailing rate for Month-to-Month service unless the customer subscribes to a new term plan.
- e) Early termination of the 3 or 5-year term plan is subject to termination liability, except when the customer subscribes to any new video term plan of equal or greater value in revenue than the remainder of the present plan, or meets replacement requirements for portability as described in f) following. (C)

Certain material formerly shown on this page now appears on page 7-44.

(Issued under Transmittal No. 79)

Issued: August 8, 2001

Effective: August 23, 2001

Vice President

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(E) Serial Component Video Service (Cont'd)(4) Terms and Conditions (Cont'd)

f) Portability is the replacement of a service under a term plan with another service for the balance of the term. Portability requirements are:

(N)

- The replacement service must be of the same speed or type, and must not already be in a term plan.
- The replacement service must be ordered within 30 days of disconnection of the original service.
- The number of replacement services is equal or greater than the number of services being disconnected.
- When a SCVS is moved to a new location, portability will apply provided that the same customer of record is retained at each of the points of termination involved. Only one move is permitted within a calendar year.

When the terms and conditions for portability are met, the new/replacement service is subject to all of the same terms and conditions that applied to the service being replaced. That is, the new/replacement service must satisfy the balance of the minimum service period requirement if not already met, and the balance of the commitment period remaining in the term plan.

(N)

(Issued under Transmittal No. 79)

Issued: August 8, 2001

Effective: August 23, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)7.2.5(E) Serial Component Video Service (Cont'd)(4) Terms and Conditions (Cont'd)g) Termination Liability

Termination liability is in addition to the minimum period charge and is calculated as shown in i) or ii) following. When calculating termination liability charges, the Company will apply the option that provides the customer with the lowest termination liability

(T)  
(M)

(M)

i) Option I

Termination liability is 50% of the monthly rates for each month and fraction thereof remaining between the minimum period and the end of the selected term plan/commitment period.

ii) Option 2

For services discontinued within the first year and prior to the end of the selected commitment period, the termination liability charge will be the difference between the full basic Month-to-Month rates and the term plan rates for the period the service has been in effect.

For services discontinued after the first 12 months of a term plan but prior to the end of the selected plan period, the following applies:

- Where there is no commitment period less than the actual time the service has been in effect the termination liability charge will be the difference between the full basic Month-to-Month rate and the selected term plan rate for the period the plan has been in effect.
- Where there is a commitment period less than the actual time the service has been in effect, the termination liability charge will be the difference between the monthly rate for the longest term plan that could have been satisfied prior to termination of the service and the monthly rate for the selected term plan multiplied by the actual number of months the plan has been in effect.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(E) Serial Component Video Service (Cont'd)

(T)

(5) Rate Regulations

- a) A Channel Termination charge applies for each termination of SCVS. Included in the Channel Termination rate element is the use of up to twenty-five (25) feet of coaxial cable from the point at which the video service enters the customer's building to the channel interface. In the event that the customer requests that the Company extend the location of the channel interface beyond 25 feet, and the Company agrees to extend the communications path, the charges set forth for Other Labor as specified in Section 13.2.5 following will apply for the extended portion of the communications path. The extended communications path is subject to distance limitations, which are specific to the communications path being extended.

Serial Component Video Service may be connected to a Telephone Company provided integrated optical service, where such connections are technically and operationally feasible, as determined by the Telephone Company. A Serial Component Video Service Channel Termination charge will not apply at the integrated optical service end of the circuit.

(N)

(N)

- b) A fixed and per mile Channel Mileage rate element applies for the transmission facility between the serving wire centers of the customer's designated premises.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(F) High-Definition (Hi-Def) Digital Video Transport Service(1) Service Description

High-Definition (Hi-Def) Digital Video Transport Service (Hi-Def DVTS) is a broadband digital video transport channel with one-way transmission capability of 19.39 Mbps high quality video as defined in American National Standard Institute/The Society of Motion Picture and Television Engineers (ANSI/SMPTE) Standard 310M or with one-way transmission capability of 1.485 Gbps as defined in Technical Reference SMPTE 0292M-2001. These standards describe a serial digital interface for equipment conforming to the SMPTE and Advanced Television Systems Committee (ATSC) digital television standards. Hi-Def DVTS automatically detects the customer input as 19.39 Mbps or 1.485 Gbps and provides the compatible transport of the signal to the corresponding receive channel termination in accordance with SMPTE standards. Hi-Def DVTS is provided with an electrical interface and operates with a standard broadcast data stream as specified in the appropriate standards; see (2), Technical Specifications below.

(C)(x)

Hi-Def DVTS is provided over digital network facilities in a premises-to-premises configuration (between customer designated premises) or in a premises-to-hub configuration (between a customer designated premises and a video hub where channels may be switched). At the customer's premises, the Company will install fiber optic and/or coaxial cable for the transmission facilities within the building up to the channel interface. The channel interface enables delivery of multiple video channels and/or digital audio signals, which are embedded in the digital transmission. It is the responsibility of the customer to embed or de-embed the audio and ancillary data in the digital transmission. The quality of the video signal may be impaired if the distance of the coaxial cable results in transmission parameters which are not within the limits specified in the technical publication set forth in (2) following.

Hi-Def DVTS is compatible with the optional Advanced Video Switching feature described in 7.2.5(D)(5) preceding.

(x) SMPTE 0292M-2001 replaces ANSI/SMPTE Standard 292M in its entirety.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(F) High-Definition (Hi-Def) Digital Video Transport Service (Cont'd)(2) Technical Specifications (Cont'd)

The Company will only accept a 75-ohm impedance interface to/from customer provided high quality coaxial cable that meets Company transmission requirements.

(3) Channel Interfaces

The following channel interface (CI) is available with Hi-Def DVTS.

O2TB6

(4) Terms and Conditions

- a) Hi-Def DVTS is available on a month-to-month basis or as a 1, 3 or 5-year term plan.
- b) The minimum service period for Hi-Def DVTS provided on a month-to-month basis is one (1) month. The minimum service period for Hi-Def DVTS provided under a term plan is three (3) months. The minimum period liability is forgiven when a term plan customer elects to switch to another video service with a minimum period of the same or longer duration. (T)  
(C)  
|  
(C)
- c) Hi-Def DVTS is available based on negotiated intervals as described in 5.2.1(B) preceding.
- d) At the expiration of a term plan, the customer's Hi-Def DVTS will automatically be renewed for the same term at the current prevailing rate or the customer may subscribe to a new plan. To terminate service without incurring new termination liabilities, the customer must disconnect service within 90 days of the expiration date.
- e) Early termination of the term plan is subject to termination liability, except when the customer subscribes to any new video term plan of equal or greater value in revenue than the remainder of the present plan.

Termination liability is in addition to the minimum period charge and is calculated as shown in i) or ii) following. When calculating termination liability charges, the Company will apply the option that provides the customer with the lowest termination liability

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(G) 45 Mbps Digital Video Transport Service(1) Service Description

45 Mbps Digital Video Transport Service (45 Mbps DVTS) is a broadband digital video transport channel with one-way transmission capability of 45 Mbps high quality video as defined by American National Standard Institute and Telcordia Technologies. 45 Mbps DVTS is provided with an electrical interface with an optional encoder/decoder (CODEC) at either or both ends of the circuit for full time service. The service may include up to six (6) 5Hz - 22kHz Audio Engineering Society (AES)/European Broadcasting Union (EBU) digital audio signals.

45 Mbps DVTS is provided on a full-time or part-time basis over digital network facilities between customer designated premises, or between a customer's designated premises and a video hub where compatible channels may be switched. At the customer's premises, the Company will install fiber optic and/or coaxial cable for the transmission facilities within the building up to the channel interface. The channel interface enables delivery of digital audio signals, which are embedded in the digital transmission. It is the responsibility of the customer to embed the audio and ancillary data in the digital transmission. The quality of the video signal may be impaired if the distance of the coaxial cable results in transmission parameters which are not within the limits specified in the technical publication set forth in (3) following.

(C)  
(C)  
(C)

Where suitable facilities are not available to provide 45 Mbps DVTS, Special Construction charges as set forth in Section 5.1.3 preceding may apply.

(2) Optional Features and Functions

At the customers option a video encoder and decoder, CODEC, may be provided at either or both ends of a 45 Mbps DVTS. A CODEC enables compression of the NTSC composite video signal into a 44.736 Mbps data stream or decompression of the 44.736 Mbps data stream into NTSC composite video and audio signals.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(G) 45 Mbps Digital Video Transport Service (Cont'd)(5) Terms and Conditions

- a) 45 Mbps DVTs is available on a month-to-month basis or as a 1, 3 or 5-year term plan. 45 Mbps is also available as a part time service on a daily basis.
- b) The minimum service period for 45 Mbps DTVS is 3 months unless the optional CODEC service is purchased. When 45 Mbps DTVS includes the optional CODEC, the minimum service period is one (1) year.

The minimum service period liability is forgiven when a customer elects to switch to another video service with a minimum service period of the same or longer duration.

- c) DTVS is available based on negotiated intervals as described in 5.2.1(B) preceding.
- d) At the expiration of a term plan, the customer's 45 Mbps DVTs will automatically be renewed for the same term at the current prevailing rate or the customer may subscribe to a new plan. To terminate service without incurring new termination liabilities, the customer must disconnect service within 90 days of the expiration date.
- e) Early termination of the term plan is subject to termination liability, except when the customer subscribes to any new video term plan of equal or greater value in revenue than the remainder of the present plan.

Termination liability is in addition to the minimum period charge and is calculated as shown in i) or ii) following. When calculating termination liability charges, the Company will apply the option that provides the customer with the lowest termination liability

i) Option I

Termination liability is 100% of the monthly rates for each month and fraction thereof remaining in the balance of the selected term plan/commitment period.

e)(Cont'd)

ii) Option 2

The termination liability charge is the difference between the monthly rate for the longest term plan that could have been satisfied prior to termination of the service and the monthly rate for the selected term plan multiplied by the actual number of months the plan has been in effect.

(6) Rate Regulations

The rates and charges for 45 Mbps DVTS include channel terminations, channel mileage and a CODEC charge when the customer chooses that option.

- a) A Channel Termination charge applies for each termination of DVTS. Included in the Channel Termination rate element is the use of up to twenty-five (25) feet of coaxial cable from the point at which the video service enters the customer's building to the channel interface. In the event the customer requests that the Company extend the location of the channel interface beyond 25 feet, and the Company agrees to extend the communications path, the charges set forth for Other Labor as specified in Section 13.2.5 following will apply for the extended portion of the communications path. The extended communications path is subject to distance limitations, which are specific to the communications path being extended.
- b) A Channel Mileage rate element applies on a fixed and per mile basis for the transmission facilities between the serving wire centers of the customer's designated premises when mileage is over zero.
- c) A CODEC rate element applies monthly for each optional CODEC provided on a 45 Mbps DVTS circuit.

The rates for 45 Mbps DVTS are listed in 7.5.5(F) following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(H) Supertrunking Transport Video Service(1) Service Description

Supertrunking Transport Video Service (SVS) - a channel with a bandwidth of up to either 750 MHz or 870 MHz for the transmission of multiple Amplitude Modulation (AM) standard 525 line/60 field monochrome or National Television Systems Committee (NTSC) color video signals and monaural or Broadcast Television Systems Committee (BTSC) stereo audio signals over fiber optic facilities.

The signal performance and quality of the video channel may be degraded by the number of signals and the end to end distance of the channel. The Telephone Company will work cooperatively with the customer to determine the number of video signals which can be provided over a single SVS channel.

For two-point service configurations, a single channel termination at each customer designated premises transmits or receives all of the video signals transported over the SVS channel. For multipoint service configurations, each video signal is provided over a Transmit only channel termination at one of the designated premises involved and a Receive only channel termination at each of the other designated premises involved. A Transmit channel termination provides an electrical to optical conversion of the customer's video signals allowing the customer to transmit, or originate, AM signals for transport over the SVS channel to one or more Receive channel terminations. A Receive channel termination provides an optical to electrical conversion allowing the customer to receive the multiple amplitude modulation signals.

(2) Technical Specifications

The Technical specifications are delineated in Technical References SR-INS-001532, Issue 1; SR-NPL-001434, Issue 1; and SR-NWT-001851, Issue 1. (T)  
(T)

(3) Channel Interfaces

The following Channel Interface (CI) is available with the 750 Mhz or 870 MHz transport for point to point and point to multipoint configuration of SVS.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.5 Video Service (Cont'd)(H) Supertrunking Transport Video Service (Cont'd)(4) Rate Regulations

At the option of the customer, SVS channels may be provided under a Service Discount Plan (SDP) as specified in 25.2.1 following.

The minimum period for SVS is one year.

A channel termination rate applies for each termination of SVS on a Transmit only or Receive only basis. The Channel Mileage rate element applies on a fixed and per mile basis for the transmission of facilities between the serving wire center of the premises involved and is subject to the mileage bands specified in 7.5.5(G) following.

The customer may upgrade from 750 to 870Mhz without incurring termination liability on the 750Mhz term contract, provided the upgrade term is of equal or greater length than the remainder of the existing 750Mhz term contract. The customer will be required to pay the new rates associated with the 870Mhz service.

(5) Service Interruption Credit

Service Interruption Credit will apply as set forth in Section 2.7.1.1(B)(1)(b) preceding. (T)

(6) Cancellation Charges

Cancellation charges apply as set forth in Section 5.2.3 preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 Digital Data Service#(A) Basic Channel Description

A Digital Data channel is a channel for duplex transmission of synchronous serial data at the rate of 2.4, 4.8, 9.6, 19.2, 56 or 64 kbps. The actual bit rate is a function of the channel interface selected by the customer. The channel provides a synchronous service with timing provided by the Telephone Company through the Telephone Company's facilities to the customer in the received bit stream. Digital Data channels are only available via Telephone Company designated hubs and are provided between customer designated premises between a customer designated premises and a Telephone Company Hub, or between a customer designated premises and a wire center where connection to an advanced data service## occurs. Subrating is not available at the 19.2 kbps speed and the 64 kbps speed requires B8ZS Line Code Formatted Signal.

# No new customers may place orders for Digital Data Service as of the date specified for the locations in the following table. The Telephone Company will continue to provide Digital Data Service pursuant to this Section 7.2.8 to existing customers in these wire centers with in-service Digital Data Service as of the specified effective date, or orders for Digital Data Service placed with the Telephone Company within the permitted time period(s) specified following:

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 Digital Data Service# (Cont'd)(D) Optional Features and Functions (Cont'd)(3) Secondary Channel (Cont'd)

Secondary Channel is provided only at the 2.4, 4.8, 9.6 and 56 kbps DDS speeds and is available as a point-to-point or multipoint service except for multipoint service at 56 Kbps. Due to transmission equipment restrictions, SC cannot be provided on 56 Kbps circuits that require the installation of Loop Repeater equipment.

The Secondary Channel option is only available on new orders for service. The addition of SC to an existing Digital Data Service will be treated as a disconnect of the existing service and a new connect for the service with SC.

The Technical specifications for this feature are as described in Technical Reference TR-NPL-000157, Issue 1. The bit rates of the SC are as shown in the following table:

<u>Digital Data Channel Transmission Speed</u>	<u>Secondary Channel Transmission Speed</u>
2.4 Kbps	133 bps
4.8 Kbps	266 bps
9.6 Kbps	533 bps
56.0 Kbps	2.666 Kbps

The following table shows the technical specifications packages with which the optional features and functions are available.

	<u>Available with Technical Specifications Package DA-</u>			
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
Central Office Bridging Capability	X	X	X	X
Secondary Channel	X	X	X	X

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service

## (A) Basic Channel Description

A High Capacity channel is a channel for the digital transmission of 1.544, 3.152, or 44.736 Mbps isochronous serial data. The actual bit rate and framing format is a function of the channel interface selected by the customer. High Capacity channels are provided between customer designated premises, between a customer designated premises and a Telephone Company Hub, between a customer designated premises and a wire center where connection to an advanced data service# occurs, or Hub-to-Hub for IntelliMux® Service(s) at 1.544 and 44.736 Mbps transmission. High Capacity channels may also be connected to the following Telephone Company provided services, provided that such connections are technically and operationally feasible, as determined by the Telephone Company:

in-service integrated optical service  
in-service point to point SONET service

## (1) DS1 High Capacity/1.544 Mbps Service

DS1 service (a 1.544 Mbps facility) is provided with an electrical interface.

A nominal 64.0 kbps service is available only as a channel of a 1.544 Mbps facility between two Telephone Company Digital Data Hubs or as a cross connect of two 2.4, 4.8, 9.6, 19.2, 56.0, or 64.0 kbps channels of two DS1 services at a Digital Data Hub(s). The customer must provide system and channel assignment data.

## (2) DS3 High Capacity/44.736 Mbps Services

DS3 service is available in standard channel termination configurations and is provided with an electrical interface.

(D)

(D)

# Advanced data services include frame relay services and ATM-cell relay services.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(A) Basic Channel Description (Cont'd)(2) DS3 High Capacity/44.736 Mbps Services (Cont'd)

(D)

(D)

DS3 channels can be connected at the wire center serving that premises to individual terminating DS3 channels, individual DS3 channels for multiplexing at designated Hubs, or to other DS3 services for multi-DS3 premises-to-premises connections. DS3 Channel Mileage is provided on an individual DS3 channel basis. The DS3 to DS1 multiplexing function is available in Telephone Company Hubs as indicated in the Exchange Carrier Association Tariff F.C.C. No. 4.

(D)

The customer also has the option of ordering DS3 High Capacity channels with a DS3 Premises Multiplexer for multiplexing to individual DS1 High Capacity channels at a customer designated premises. All of the derived DS1 High Capacity channels must terminate at that customer designated premises.

(D)

(D) Optional Features and Functions(1) Automatic Loop Transfer

The Automatic Loop Transfer provides protection on a 1xN basis against failure of the facilities between a customer designated premises and the wire center serving that premises. Protection is furnished through the use of a switching arrangement that automatically switches to a spare channel when a working channel fails. The spare channel is not included as a part of the option. This option requires compatible equipment at both the serving wire center and the customer premises. The customer is responsible for providing the equipment at its premises. Equipment at the customer premises will be provided under tariff only if it existed in the Telephone Company inventory as of November 18, 1983. This feature is not available with channels utilizing the clear channel capability (B8ZS) Line Code.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(2) Transfer Arrangement

An arrangement that affords the customer an additional measure of flexibility in the use of their access channel(s). The arrangement can be utilized to transfer a leg of a Special Access Service to either a spare or working channel that terminates in either the same or a different customer premises. A key activated or dial up control service is required to operate the transfer arrangement. A spare channel, if required, is not included as part of the option.

(3) Central Office Multiplexing(a) DS3 to DS1

An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

(b) Reserved.

(C)

(D)

(D)

(c) DS1 to Voice

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services. A channel(s) of this DS1 to the Hub can also be used for WATS Access Line Services.

(d) DS1 to Digital

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with individual digital data circuits to the Hub at speeds of 2.4, 4.8, 9.6, 19.2, 56, or 64 Kbps. A channel(s) of this DS1 to the Hub can also be used for WATS Access Line or Voice Grade Services.

(Issued under Transmittal No. 1385)

Issued: November 30, 2018

Effective: December 15, 2018

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(3) Central Office Multiplexing (Cont'd)(e) DS1 to DS0

An arrangement that converts a 1.544 Mbps channel to 23 56 kbps channels utilizing digital time division multiplexing. Where an existing arrangement is modified for use with DS0 to Subrate equipped with Secondary Channel, a conversion charge shall apply.

(f) DS0 to Subrate

An arrangement that converts a 56 kbps channel to subspeeds of up to twenty 2.4 kbps, ten 4.8 kbps, or five 9.6 kbps channels using digital time division multiplexing. This arrangement is only available in conjunction with item (e) above.

The Secondary Channel (SC) option as described in Section 7.2.8(D)(3) preceding is only available on new orders for service. The addition of SC to an existing DS0 to Subrate arrangement will be treated as a disconnect and new connection.

(4) Clear Channel Capability (CCC)

- (a) CCC is an arrangement that allows a customer to transport 1.536 Mbps information rate signals over a 1.544 Mbps High Capacity channel or a 1.544 Mbps High Capacity channel subtending from a multiplexed 44.736 Mbps High Capacity channel with no constraint on the quantity or sequence of ones (mark) and zero (space) bits. This arrangement requires the customer signal at the channel interface to conform to Bipolar with Eight Zero Substitution (B8ZS) line code as described in Technical References GR-54-CORE, Issue 1, and GR-342-CORE, Issue 1.

(C)(x)  
(C)(x)

- (x) GR-342-CORE, Issue 1, replaces PUB 62508 in its entirety.  
GR-54-CORE, Issue 1, replaces TR-NPL-000054 in its entirety.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(6) Shared Network Arrangement

- (a) A Shared Network Arrangement is a service offering that enables a customer (the "Service User") to connect subtending services to the multiplexed High Capacity service\* or IntelliMux® service of another customer (the "Host Subscriber"), with the Telephone Company maintaining separate records and billing for each. Each customer will be billed for those rate elements associated with his own portion of the service configuration. Under no circumstances will the rates or charges for individual rate elements be split. This offering is limited to service configurations where a Service User obtains either subtending Voice Grade or Digital Data Service circuits from a Host's multiplexed DS1 service, or DS1 circuits from a Host's multiplexed DS3 service. (T)
- (b) Under the Shared Network Arrangement, the Telephone Company may share with the host subscriber record information pertaining to the services of other users of the shared network. Such disclosure will be under the sole discretion of the Telephone Company as is necessary to perform billing reconciliations and/or other functions required in connection with maintaining account records.
- (c) Section 7.4.14 contains rate regulations specific to Shared Network Arrangements.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions(7) Alternate Serving Wire Center

- (a) Alternate Serving Wire Center (ASWC) is an optional feature which provides a transmission path for a High Capacity Service between the customer's designated premises and a serving wire center separate from the normal serving wire center.
- (b) The Telephone Company will designate the serving wire center to be used as the alternate. The ASWC feature is available where contiguous wire centers with adjacent fiber feeder routes exist. Where facilities are not available, Special Construction rates and regulations may apply as set forth in the appropriate Special Construction tariff. Where service is available, provisioning is based on a Negotiated Interval as described in 5.2.1(B) preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(8) DS3 Premises Multiplexer

(a) At the option of the customer, a DS3 High Capacity Service may be ordered with a DS3 to DS1 multiplexer located at a customer designated premises (DS3 Premises Multiplexer). The DS3 Premises Multiplexer will be provided by the Telephone Company and will be located within the Telephone Company's communications facilities (i.e., within the Telephone Company's network) and on the Telephone Company's side of the Point of Termination as defined in Section 2.6 preceding. The DS3 Premises Multiplexer allows up to twenty-eight (28) DS1 channels to be derived from the DS3 High Capacity facility. The DS1 channels derived from the DS3 Premises Multiplexer will extend beyond the DS3 Premises Multiplexer to a Point of Termination (as defined in Section 2.6 preceding). The Telephone Company will commence billing for the DS3 High Capacity Service and DS3 Premises Multiplexer on the Service Date for the multiplexed DS3 facility. Individual DS1 channels derived from the multiplexed DS3 High Capacity facility may only be ordered and installed subsequent to the installation of the facility to the DS3 Premises Multiplexer.

(b) The rates and charges for the DS3 Premises Multiplexer optional feature as set forth in Section 7.5.9(C)(6) following apply in addition to the applicable DS3 channel termination rates and charges at the customer designated premises where the DS3 Premises Multiplexer is located. DS1 channel termination rates and charges do not apply at the customer designated premises where such DS1 channels are derived from a DS3 Premises Multiplexer. (T)

(c) The DS3 Premises Multiplexer optional feature cannot be located at a Virtually or Physically Collocated Interconnection Service as set forth in Section 19 following.

(d) When a DS3 High Capacity Service is multiplexed at a customer designated premises, such configuration is not a Telephone Company Hub for purposes of administering the terms and conditions of this tariff.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.10 Lightwave Facilities

\*Note: In accordance with Special Permission Number 94-659 and the decision of the U.S. Court of Appeals for the D.C. Circuit in Southwestern Bell Telephone Co., et al. v. FCC, Case No. 91-1416, decided April 5, 1994, beginning on June 8, 1994, the Telephone Company will only provide those Lightwave Facilities which are in service as of such date, and such arrangements will be continued pending the outcome for the remand proceeding resulting from such Court of Appeals decision. Also beginning on such date, the Telephone Company will not provide any new Lightwave Facilities nor will it provide any changes, additions, moves or rearrangements of existing Lightwave Facilities. The Telephone Company will provide service for all ASRs received prior to the effective date of this tariff (i.e., June 8, 1994)

(A) Basic Description

Lightwave Facilities shall be installed using single mode fiber optic facilities suitable for provisioning point-to-point communications, transmitting at customer specified bandwidths between customer premises. Lightwave Facilities are not available for termination in telephone company hub offices. These fiber optic facilities are available only where conduit exists. Any requirement to construct new conduit will be governed by the regulations, rates and charges for special construction as set forth in the tariffs as defined in Section 1, preceding. These special construction rates and charges will be in addition to the regulations, rates and charges specified in this section.

(B) Technical Specifications

The type of facility and the route of the facility will be determined by the Telephone Company. The Telephone Company makes no guarantee or warranty of the suitability of the lightwave facilities for the purposes intended by the customer.

Lightwave Facilities are only offered in capacities of four (4) strands of optic cable or twelve (12) strands of optic cable terminating on a standard optical patch panel. Since the customer provides the electronics on each end of the facility, and there are no telephone company amplifiers or repeaters on the facilities, the Telephone Company cannot test and monitor the facilities. Consequently, the Telephone Company makes no representations or guarantees regarding suitable operating performance of the facility. Lightwave facilities are not recommended for interoffice distances in excess of 20 miles.

(C) Facility Interface

The following channel interface is the only one available for lightwave facilities: 01FCF.X

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service#

(T)

## (A) General

LAN (Local Area Network) Extension Service (LES) provides fiber transport connectivity between:

- (1) two customer designated premises (one of which must be a service provider's point of presence with the other being one of the service provider's end user); or
- (2) a customer designated premises and a customer's equipment in a Verizon Collocated Interconnection Service (CIS) arrangement, as set forth in Section 19 following; or
- (3) a customer designated premises (must be a service provider's point of presence) and a wire center where connection to a Telephone Company-provided Transparent LAN Service (TLS) Network-to-Network Interface (NNI) Port Only Connection occurs; or
- (4) a customer's equipment in a CIS arrangement and another wire center (i.e., other than the wire center where the CIS arrangement is provided) where connection to a Telephone Company-provided TLS NNI Port Only Connection occurs.

LES may also be connected to Telephone Company provided switched Ethernet service, where such connections are technically and operationally feasible, as determined by the Telephone Company.

(N)

# Effective May 31, 2007, orders for new LES are no longer permitted. The Telephone Company will continue to provide LES pursuant to this Section 7.2.11 on any existing LES that is in-service as of May 31, 2007, or any order for LES that is placed with the Telephone Company prior to May 31, 2007 (collectively, Existing LES), subject to the following conditions:

- a. For any Existing LES that is currently subscribed to a term plan (i.e., commitment periods of 3- and 5-years), the Telephone Company will continue to provide Existing LES for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer replaces the Existing LES with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Moves, additions, and/or changes are not permitted.
- b. For any Existing LES whose term plan expired prior to May 31, 2007, but the Existing LES continued on a month-to-month basis at prevailing rates, the Telephone Company will continue to provide Existing LES purchased on a month-to-month basis until November 30, 2007, or until the customer replaces the Existing LES with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Moves, additions, and/or changes are not permitted.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service# (Cont'd)

(T)

## (B) Service Description

LES is a point-to-point service, offered with a 10Mbps, 16Mbps Token Ring\*, 100Mbps, 1Gbps Ethernet or 1Gbps Extended Distance interface connection, available where facilities and conditions permit. Where suitable facilities and conditions are not available to provide LES, facilities may be specially constructed subject to the provisions set forth in Sections 2.1.4, Provision of Services, and 5.1.3, Special Construction, preceding.

(M)

LES is provisioned over two dedicated fiber strands between the two locations involved where service is delivered over the network interface specified by the customer. The LES network interface converts the optical signal to an electrical Ethernet signal at speeds of 10 Mbps, 16 Mbps Token Ring\* or 100 Mbps. The 1 Gbps network interface enables LES to be delivered as an optical signal.

(M)

When LES is delivered to a CIS arrangement, service will be cross-connected to the physical or virtual CIS arrangement as described in Section 19, following. The provision of LES at 100Mbps, 1Gbps or 1Gbps Extended Distance may include the use of dense wave division multiplexing technology, where available.

When LES connects to a TLS NNI Port Only Connection or Telephone Company provided switched Ethernet service network-to-network interface port only connection, it is offered only with a 1 Gbps Ethernet or 1 Gbps Extended Distance interface. Regulations, rates and charges for TLS NNI Port Only Connection are set forth in Section 16.11 of this Tariff for service provided in the State of New Jersey and in The Verizon Telephone Companies Tariff F.C.C. No. 20, Section 5, Part I, Section 5.3 for service provided in all other Telephone Company jurisdictions.

(C)

|  
(C)

The Company's equipment at the customer-designated premises must be on conditioned power circuits (surge protected); the Company recommends an uninterrupted power supply (UPS).

No credit allowance for a service interruption is provided with LES.

Service intervals for LES are specified in Section 5.2.1 preceding.

\* Service is limited to existing customers of record as of February 11, 2003. Customers who are already subscribing to LES with a 16Mbps Token Ring interface as of February 11, 2003, may continue with the service, add additional circuits or move service as needed.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service# (Cont'd)

(T)

(C) Technical Specifications

LES requires the use of single mode, fiber optic facilities that meet the following specifications:

1310nm with a loss of 20dB or less for 10Mbps Ethernet  
1310nm with a loss of 26dB or less for 100Mbps Ethernet  
1310nm with a loss of 18dB or less for 1Gbps Ethernet  
1550nm with a loss of 26dB or less for 1Gbps Ethernet  
(extended distance)

The dB loss is measured to include the special transport facility when applicable and any local and intra-building fibers used in the provision of LES.

(D) Responsibilities and Rights of the Telephone Company

- The Telephone Company will provide the necessary fiber converter at the customer's designated premises to meet the interface requirements specified on the order for service.
- The Telephone Company is responsible for service up to and including the network interface. The Telephone Company's responsibility is limited to the furnishing of communications facilities suitable for LES.
- LES will not be available during those times when the Telephone Company must perform software updates and other maintenance. The Telephone Company will provide customers reasonable and timely notification to minimize impacts to the customer's service. The Telephone Company reserves the right to temporarily interrupt LES at other times in emergency situations.
- All other general regulations pertaining to the responsibilities and rights of the Telephone Company as specified in Section 2, preceding also apply.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service# (Cont'd)

(T)

(E) Responsibilities of the Customer

- The customer is responsible for all wiring and connections of its local area network to the customer side of the network interface or fiber distributing frame, as applicable.
- The LES customer is responsible for the installation, operation and maintenance of any customer provided equipment.
- The customer must provide a protected path for all network fibers on private property, sufficient AC or DC power to network interface equipment, access to all sites as needed by the Telephone Company personnel to perform services, and a secure environment for the network equipment.
- The customer must provide a relay rack or wall space for mounting of the network interface device.
- The customer must provide connecting facility assignment (CFA) to which LES will be cross-connected in a CIS arrangement.
- The customer is responsible for any damage to the Company's network equipment resulting from problems with power provided by the customer at its locations. With the exception of connecting customer provided equipment to the network interface device, the customer may not attempt to modify, adjust or otherwise change Company owned facilities or network equipment used in the provision of service. The Telephone Company reserves the right to discontinue the provision of LES to a customer who tampers with Telephone Company owned equipment and/or facilities.
- The Telephone Company does not monitor the LES circuit. The customer may perform its own monitoring using surveillance equipment within its own network.

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service# (Cont'd)

(T)

## (F) Rate Regulations

- (1) The rates and charges for LES apply as channel terminations and channel mileage. The LES channel termination provides the transmission path to connect a customer designated premises to the associated serving wire center. Included as part of the LES channel termination is a converter interface arrangement which defines the technical characteristics and transmission rate of the service. LES channel terminations apply as a monthly recurring rate and nonrecurring charge for each termination provided. LES channel mileage applies as a recurring monthly charge for the airline distance between the serving wire centers associated with the locations involved. Channel mileage recurring monthly rates apply as a fixed and per mile rate element.

When LES connects a customer designated premises and a customer's equipment in a CIS arrangement, as set forth in Section 7.2.11(A)(2) preceding, an LES Channel Termination rate element will not apply at the CIS arrangement end of the service.

When LES connects to a TLS NNI Port Only Connection, as set forth in Section 7.2.11(A)(3) preceding, the NNI Port Only Connection rate element will apply in lieu of an LES channel termination at the TLS end of the service.

When LES connects a customer's equipment in a CIS arrangement to a TLS NNI Port Only Connection in another wire center, as set forth in Section 7.2.11(A)(4) preceding, an LES Channel Termination rate element will not apply at the CIS arrangement end of the service and an NNI Port Only Connection rate element will apply in lieu of an LES channel termination at the TLS end of the service. LES channel mileage will apply for the airline distance between the serving wire centers associated with the locations involved.

When LES connects to a Telephone Company provided switched Ethernet service network-to-network interface port only connection, the LES channel termination will not apply at the switched Ethernet service end of the service.

(N)

When LES connects a customer's equipment in a CIS arrangement to a switched Ethernet service network-to-network interface port only connection in another wire center, an LES Channel Termination rate element will not apply at either the CIS arrangement end of the service or the switched Ethernet service end of the service. LES channel mileage will apply for the airline distance between the serving wire centers associated with the locations involved.

(T)

## (F) Rate Regulations

## (2) LES Term Plans

- (a) LES is provided with a term plan of 3 or 5 years at rates set forth in Section 7.5.23 following. The customer must specify the term plan selected in its order for service. Rate elements associated with terminating LES at a Collocation arrangement are set forth in Section 19 following. (See Note below.)
- (b) At any time during the term commitment period, the customer may replace LES with LES of a higher transmission rate without incurring termination liability on the LES being replaced, provided that the term plan of the replacing LES is equal to, or greater than, the term commitment period of the plan being replaced.
- (c) At any time during the term commitment period, the customer may convert to a new LES term plan of the same or different term commitment, subject following:
  - No time-in-service credit will be granted for the period of time the replaced term commitment period was in effect.
  - Termination liability will not apply to the plan being replaced, provided that the term commitment period of the replacing plan is equal to or longer than the term commitment period being replaced.

Note: See Section 19 following for further information.

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.11 LAN Extension Service# (Cont'd)

(T)

(F) Rate Regulations (Cont'd)(2) LES Term Plans (Cont'd)

- (d) All rate elements associated with LES must be under the same term plan with the same term commitment period.
  - (e) At expiration of the term commitment period, the prevailing rates for the current plan will continue until the customer cancels service or requests a new term plan.
  - (f) If service is disconnected in whole or in part prior to the end of the selected term commitment period, termination liability equal to the applicable monthly rate for the service multiplied by the number of months remaining in the unexpired portion of the term plan will apply. Minimum period charges as set forth in Section 5.2.5 preceding may also apply.
  - (g) Termination liability will not apply if the customer disconnects service due to a Telephone Company initiated rate increase. Within sixty calendar days of the rate increase, the customer must notify the Telephone Company in writing of its intent to disconnect service due to the increased rate and must disconnect the service within ninety calendar days of the rate increase.
- (3) Cancellation of an LES order in whole or in part prior to the establishment of service is subject to the cancellation charges set forth in Section 5.2.3 preceding.
  - (4) A move in the point of termination of LES is subject to the regulations set forth in Section 7.4.5 following.
  - (5) The minimum period for LES is 36 months.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service(A) General

IntelliMux® Service enables customers, through the use of the IntelliMux® host computer, to reconfigure, in real-time, specific Special Access voice grade, DDS, and/or individual channels within a 1.544 Mbps or 44.736 High Capacity Service connected at digital cross connect systems. Customers gain access to the IntelliMux® host computer through the use of a CPE terminal at their premises without going through normal service order procedures.

(B) Service Description

IntelliMux® Service allows customers management and network reconfiguration capability of their voice grade, DDS, and/or individual channels within a 1.544 and/or 44.736 Mbps High Capacity Special Access Service. The reconfiguration is accomplished by either Telephone Company or customer access of the IntelliMux host computer. Access is gained by a customer from a dial-up line from a customer-provided terminal at their premises to access the intelligent controller - the IntelliMux® host computer. The IntelliMux® host computer assures that the services to be connected together for a given customer application have compatible characteristics to ensure proper operations and functions. Once the host computer validates the customer's commands, the instructions are communicated to the digital cross-connect system(s) (DCSs) associated with the customer's services to effect the reconfiguration. The DCSs interface at a DS1 or DS3 signal level and switch internally at a DS0, DS1, or DS3 level regardless of the type of access connection.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service (Cont'd)(B) Service Description (Cont'd)

IntelliMux® Service is available at those Hubs identified in National Exchange Carrier Association (NECA) Tariff F.C.C. No. 4. IntelliMux® Service configurations may utilize multiple Hubs within a LATA. However, they must be interconnected using 1.544 Mbps/DS1 or 44.736/DS3 High Capacity interoffice facilities. IntelliMux® Service utilizing DDS can only be provisioned from Hubs which provide both IntelliMux® and DDS.

Customers can reconfigure their special access networks from their premises or they can have the Telephone Company perform the reconfiguration.

(C) IntelliMux® Reconfiguration Options

Two network reconfiguration options are available to IntelliMux® Service customers:

- Real Time
- Reservation

The real time option will make immediate changes to the network, while the reservation option will be executed at a specified time designated by the customer. Both types of reconfigurations are available whether the customer performs the reconfigurations or requests the Telephone Company to perform them.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service (Cont'd)(D) Technical Specifications

Access to IntelliMux® Service is through the use of dial-up services.

Services capable of being cross-connected by IntelliMux® Service must have identical technical characteristics to ensure compatibility and proper operation, e.g., data to data, voice to voice. IntelliMux® Service specifications are delineated in Technical Reference TR-TSY-000366, Issue 2.

(C)(x)

If the Telephone Company determines that the requested technical specifications are not compatible, the customer will be advised and given the opportunity to change the order.

IntelliMux® Service is available twenty-four hours a day except during the performance of routine maintenance of Telephone Company facilities and equipment used to provide IntelliMux® Service. The following is the schedule for routine maintenance:

Scheduled Maintenance

Sunday	12:00 a.m. - 6:00 a.m.
Monday	12:00 a.m. - 3:00 a.m.
First Sat./Month	12:00 a.m. - 2:00 a.m.

In addition to the routine downtime, unscheduled or emergency circumstances may limit availability.

Service Exclusions

The following types of service terminations and options are not supported with the IntelliMux® offering:

1. Centrex
2. Switched Access Services
3. Shared Use High Capacity Services
4. Secondary legs of a multi-point bridging arrangement
5. DDS Secondary Channel Capability
6. Integrated Channel Service

(x) TR-TSY-000366, Issue 2, replaces Pub TR-TSY-000366 in its entirety.

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service (Cont'd)(E) IntelliMux® Service OptionsEnd Link and Interoffice Facility Compatibility Verification

System verification of compatibility of the customer specified end links in the cross-connect reconfiguration request. Each end link is verified to ensure technical compatibility for directionality, signaling type, bandwidth and service group.

DS0 Circuit Reconfiguration

The system allows point-to-point rerouting of customer DS0 facilities.

DS1 Circuit Reconfiguration

The system allows point-to-point rerouting of customer DS1 facilities at the DS0 or DS1 level.

DS3 Circuit Reconfiguration

The system allows point-to-point rerouting of customer DS3 facilities at the DS1 or DS3 level.

Real Time Capability

The customer, using demand service requests, can reconfigure their network on a real-time basis.

Reservation Capability

The customer, using reservation service requests, can schedule reconfiguration for a future time on a confirmed basis. Reservations can be scheduled on a continuous or cyclical basis.

Network Model Capability

Customers can define a predetermined network configuration of multiple two-point cross-connects and initiate the large scale network reconfiguration with one command. This capability supports daytime/nighttime or weekday/weekend networks.

Basic Routing Capabilities

The customer can define facility routes or paths to be used by the system to connect access facilities in prespecified, user-defined tables.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service (Cont'd)(F) IntelliMux® Service Configuration

IntelliMux® provides customer-management capability of Special Access Service Networks as specified in (A) preceding. IntelliMux® is provided from IntelliMux® Hubs that are identified in the NECA Tariff No. 4.

Applicable rate elements with monthly rates are:

- IntelliMux® VG/DDS Port\*
- IntelliMux® DS1 Port
- IntelliMux® DS3 Port
- VG/DDS Channel Terminations (one per premises)
- VG/DDS Channel Mileage (as applicable)
- DS1 Channel Termination (one per premises)
- DS3 Channel Termination (one per premises)
- DS1 Channel Mileage (as applicable between the customer's serving wire center and IntelliMux® Hub and between IntelliMux® Hubs)
- DS3 Channel Mileage (as applicable between the customer's serving wire center and IntelliMux® Hub and between IntelliMux® Hubs)

- \* IntelliMux® Service and DDS service can only be provided in Hub offices that support both services.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.12 IntelliMux® Service (Cont'd)(G) Rate Element Description(1) Service Establishment

The Nonrecurring Service Establishment charge applies per initial customer database setup. Included in this charge are the activities associated with installing the customer's network information in the IntelliMux® Database, training the customer's personnel and providing training materials.

(2) Database Modification

This nonrecurring charge applies whenever the customer requests Bell Atlantic to make a subsequent modification in their IntelliMux® Database. A modification can be a change in security requirements or a change in administrative information (e.g. customer contact names and numbers, addition/deletion of authorized users).

(3) Telephone Company Performed Reconfiguration

This nonrecurring charge is applicable when the customer chooses to have Telephone Company personnel perform the reconfiguration activities. The Telephone Company reconfigures the customer's network based upon customer provided instructions.

This service is charged in increments of thirty (30) minutes for each occasion.

(4) Port Charges

Nonrecurring and monthly port charges apply per port termination of the DCS at the IntelliMux® Hub office. There are three types of charges:

- Voice Grade/DDS Port Charge - Channel Port Termination for all voice grade and DDS service
- DS1 Port Charge - 1.544 Mbps Channel Port Termination
- DS3 Port Charge - 44.736 Mbps Channel Port Termination

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services

## (A) General

The Telephone Company's IntelliLight Services are a family of optional Special Access High Capacity services provided using SONET-based technology. IntelliLight Services include the following Special Access services:

- IntelliLight Shared Dual Path (ISDP), as set forth in (C)(2) following
- IntelliLight Shared Assurance Network (ISAN), as set forth in (C)(3) following
- IntelliLight Optical Transport Services (IOTS), as set forth in (C)(4) following
- IntelliLight Entrance Facilities (IEF), as set forth in Section 7.2.15 following
- IntelliLight Broadband Transport (IBT), as set forth in Section 8.2 following
- IntelliLight Shared Single Path (ISSP), as set forth in Section 8.3 following
- Verizon Dedicated SONET Ring (DSR), as set forth in Section 23.1 following

IntelliLight services are designed to meet customer requirements for reliable and survivable networks.

IntelliLight services are provided on SONET facilities except where a service is extended on an "off-net" facility, i.e., ISAN. There are no provisions within the SONET standard for asynchronous DS1 to DS3 multiplexing. Therefore, IntelliLight services are only guaranteed for the following interface to interface combinations:

OC3 W/ DS1 mapping - DS1	DS1 - DS1
OC3 w/ DS3 mapping - DS3	DS3 - DS3
STS1 w/ DS1 mapping - DS1	STS1 - STS1
STS1 w/ DS3 mapping - DS3	OC3 - STS1
OC3c - OC3c	OC3 - OC3
OC12 - DS1, DS3, OC3,	OC12c - OC12c
OC3c, & OC12	OC48c - OC48c
OC48 - STS1, DS3, OC3, OC3c	
OC12, OC12c, & OC48	

Not all interface combinations are available for all IntelliLight services.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (B) Definitions

Add/Drop Multiplexing, (ADM): a multiplexing function that allows lower level signals to be added or dropped from an optical carrier channel.

Customer Access Ring, (CAR): a survivable fiber ring that is constructed through at least two Central Offices/Wire Centers. Cars utilize unidirectional path-switched ring ADMs, typically operating at OC3 and OC12 rates.

Enhanced DSR node: See also the definition of Node following. An enhanced DSR node, available after March 20, 2003, provides additional feature functionality that is not available with the existing first-generation DSR nodes. Enhanced DSR nodes are capable of supporting DS1 and Gigabit Ethernet ports at the OC12, OC48 and OC192 levels. (T)

Fiber path diversity: the provision of service using at least two fibers placed on physically separate paths, i.e., different conduit runs that do not pass through the same manhole(s). The cable paths are separated by at least 25 feet.

High Speed Interface: a DSR or IOTS rate element on a partial ring service that allows high speed interconnection of the Company's facilities to the facilities of the customer or of a third party. High speed interconnection is provided at a fiber meet location that is mutually agreed upon by the Company and the customer. (T)

Node: a DSR rate element and a designation of either a customer location or Company wire center on a SONET ring that has ADM capability. It is also the address of where a channelized (lower speed) service originates or terminates on a ring. Generally, the ring capacity determines the type of node. For DSR, see also Enhanced DSR node. (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(B) Definitions

Optical Carrier Rate, (OC #): a SONET transmission signal/speed, line rate, or service. The rates are in multiples of an OC1, which is equivalent to an STS1 (51.84 Mbps), SONET's basic rate.

<u>OC(#) Rate</u>	<u>Bandwidth Capacity</u>
3	155.52 Mbps
12	622.08 Mbps
48	2.488 Gbps
192	9.952 Gbps

Optical Carrier Rate Concatenated, (OC#c): a "clear channel" SONET transmission using only one framing format. Generally, an OC3 signal provides three STS1s frame formats with 3 overheads for a total capacity of 2268 bytes per Synchronous Payload envelope (SPE) frame; in an OC3c signal, one STS3c frame format is used with one overhead, increasing the total payload capacity to 2340 bytes per SPE frame.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (B) Definitions (Cont'd)

OC12/3, (OC12 over 3): a node designation that denotes a ring line rate of OC12, but with port interface capability and capacity equal to OC3. An OC12 DSR could have one, some or all OC12/3 nodes.

OC12+3, OC48+3, OC192+3, OC192+12, and OC192+48: designations for nodes in ring-on-ring designs; the higher speed ADM is part of the true ring, and the lower speed ADM is connected for the purpose of mapping lower speed services onto the STS1s of the OC12, OC48 or OC192. Both nodes, the lower and higher speed node, of a ring-on-ring arrangement must be located in the same customer premises or wire center.

Port: a DSR rate element that denotes the interface at which a channelized or lower speed service terminates or originates at a DSR node.

Port Node: an arrangement on a DSR that interconnects the main DSR ring with a subtending DSR ring. (N)

SONET, (Synchronous Optical NETwork): an international standard for the transmission of high capacity bandwidth over optical facilities. This synchronous transmission platform utilizes a modular multiplexing approach. Because of the large bandwidth, some of the payload is used to monitor, protect, manage and improve the transmission of the signal.

Subtending Ring: a DSR Service that subtends (interconnects with) a DSR main ring. (N)

Synchronous Transport Signal Level, (STS1): a 51.84 Mbps signal that is the electrical equivalent of the OC1 or a DS3 with additional Mbps devoted to SONET overhead information. An STS1 can carry a DS3 or 28 DS1s when specifically formatted (Mapped). These DS1s may be accessed off-ring using the tariffed DS3 to DS1 multiplexing optional service or at an enhanced node via a DS3 Transmux port.

Transmuxing: the function of a DSR DS3 Transmux port that performs a DS3 to DS1 conversion at a DSR Enhanced Node. The DS3 to DS1 conversion allows a single DSR DS3 Transmux port (which includes a DS3 Transmux Facility to which the DS1 circuits are mapped) to be a facility associated with up to twenty-eight (28) VT1.5 mapped DSR DS1 ports. Such DS3 Transmux Facility will be provisioned upon ordering the associated DS1 Transmux port. Transmuxing within the DSR network retains DS1 visibility allowing for full, proactive maintenance capability of the DS1 signals.

Virtual Tributary, (VT): A SONET structure designed for transport of sub-STS1 payloads. A DS1 is mapped into the SONET format using a VT1.5 as a packaging mechanism that is internal to the SONET signal.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight<sup>SM</sup> Services (Cont'd)(C) Service Descriptions (Cont'd)(2) IntelliLight® Shared Dual Path

IntelliLight® Shared Dual Path, ISDP, is an optional feature that provides High Capacity Special Access customers with a fully diverse and redundant transmission path through another wire center as a standby facility should there be a wire center fault at the customer's serving wire center (SWC), or should there be a cable cut between the customer's premises and the serving wire center or between wire centers.

ISDP may terminate at a Hub where the underlying service may be multiplexed to higher or lower speed services. Also, multiplexing may be provided at the customer's premises and will be charged additionally as a network interface conversion. These rates are listed in 7.5.20(E) and (F).

ISDP will provide a Special Access High Capacity customer a near-100% protected connection from point-to-point when both designated premises and SWCs are on the same or interconnected SONET rings.

(a) Terms and Conditions

IntelliLight® Shared Dual Path will only be available as an end-to-end service between customer premises located where Bell Atlantic has multi-wire center SONET-based fiber rings deployed in its local loop and IOF, Inter-Office Facilities.

ISDP may also be provided on a portion of the circuit path as end-to-hub service, in cases where full SONET facilities do not exist or are not required.

ISDP service at the customer premises will consist of a fiber ring routed through at least two wire centers, one of which is the customer's SWC. Interoffice rings connecting multiple wire centers will provide transport between customer premises rings or to wire center Hubs.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(2) IntelliLight Shared Dual Path (Cont'd)(a) Terms and Conditions (Cont'd)

ISDP service is available for the same term plan periods offered for DS1, DS3, and IEF services. When ordered on an existing service, the ISDP optional service is assigned the same expiration period as the underlying service.

ISDP service intervals are negotiated as described in 5.2.1(B) preceding.

When STS1 signals are transmitted, the customer must specify how the signal is mapped, VT or DS3-mapped (see definition of Virtual Tributary in 7.2.14(B)).

Extended Superframe Format (ESF) is required on all DS1 services in order to ensure performance objectives.

The Company will determine the other wire center(s) included in provisioning ISDP.

The Company will determine the type (e.g., bidirectional) of self healing ring that will be utilized and the path of the primary and secondary signals within interconnected rings.

Standby mileage for ISDP is the same as the per mile measurement for the main or underlying service.

The customer will be billed additional charges for any charges levied the Telephone Company for space and power required for the ADMs on the Company's side of the network interface.

## (C) Service Descriptions (Cont'd)

## (3) IntelliLight Shared Assurance Network, ISAN#

(T)

IntelliLight Shared Assurance Network, ISAN, is a special access offering that provides a LATA-wide network that maximizes fault tolerance and disaster recovery capabilities. ISAN blends the design and survivability features of Verizon Dedicated SONET Ring (DSR), IntelliLight Shared Dual Path (ISDP), and IntelliLight Entrance Facilities (IEF) services along with asynchronous services to provide transport links with high capacity, performance and reliability levels. The Company will ensure performance and reliability levels with 24-hour network surveillance.

ISAN consists of transmission facilities that are ordered and provisioned from end to end. ISAN service and billing components are entrance rings, and DS1, DS3, OC3 and OC3c transport channels.

The ISAN entrance ring is provided at customer designated Points of Presence (POPs). POPs are primary customer locations where traffic within the LATA is aggregated or from which traffic is distributed in the LATA. The ISAN POP Entrance Ring is a high speed SONET access ring with a minimum capacity of 12 STS1s. This dedicated, self-healing, diverse fiber path SONET ring will have at least 3 access points or nodes, the POP and two wire centers, a Serving Wire Center (SWC) and an alternate Wire Center. At the customer's option, an ISAN POP Entrance Ring may include a fourth node, an additional POP node.

With ISAN, the customer's traffic is transported across the Telephone Company's network from a POP entrance ring at the customer's primary point of presence (POP) to a secondary customer designated premises (a.k.a., end user or EU), and from the Telephone Company Hubs to customer POPs. These channels are rated and charged dependent on interoffice (IOF) mileage and on how much of the end to end channel is on-net or off-net.

- # Effective December 4, 2007, orders for new ISAN Entrance Rings or additional capacity for existing ISAN Entrance Rings are no longer permitted. The Telephone Company will continue to provide ISAN pursuant to this Section 7.2.14(C)(3) on any existing ISAN that is in-service as of December 3, 2007, or any order for ISAN that is placed with the Telephone Company prior to December 4, 2007 (collectively, Existing ISAN), subject to the following conditions:

(N)

For any Existing ISAN that is currently subscribed to a 5-year term plan or that is within a 60-day extension period immediately after expiration of a 5-year term plan, the Telephone Company will continue to provide the Existing ISAN for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer discontinues service, whichever comes first. Subject to availability of facilities and equipment, ISAN Transport Channels may be added up to the total capacity of the Existing ISAN Entrance Rings. Effective December 4, 2007, moves and rearrangements will no longer be permitted.

(N)

(3) IntelliLight Shared Assurance Network# (Cont'd) (T)

on-net: that part of the network containing survivable service capability, i.e. provisioned over diverse fiber path SONET ring(s). On-net rate elements are provisioned over diverse fiber path SONET facilities end to end.

off-net: that part of the ISAN transport that is asynchronous high capacity transport or is SONET transport without fiber path diversity. Off-net rate elements have components that are either asynchronous or has SONET transport without fiber path diversity.

ISAN is available only in those locations where SONET architecture is capable of providing specified levels of performance and reliability.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(a) Terms and Conditions

ISAN is a LATA wide service.

ISAN requires a minimum service commitment of the greater of either 1) a minimum of 336 equivalent DS1 transport circuits within the LATA or 2) 90% of the customer's embedded base of high capacity special access within the LATA. The minimum service commitment must be met within the first eighteen months of service, i.e., within the conversion period.

The 90% commitment level is for the total DS1 equivalency of all DS1 and DS3 High Capacity Special Access circuits (as defined in Section 7), and 90% of each service category of OC3 and above (as defined in Sections 7 and 8). The effective date of the customer's agreement letter with the Company will serve as the date the count is determined.

ISAN is available for a minimum commitment period of 5 years. The contract date will be the date the first new ISAN Transport Channel is installed or existing Special Access Circuit is converted to ISAN.

All ISAN Transport Channels are provided with the same contract date regardless of when implemented, and may be ordered and provisioned up to the contract date.

A customer's primary POP(s) must access the Telephone Company's network via ISAN POP Entrance Ring(s) with OC12 network interfaces. The customer must purchase a minimum of 4 STS3s of POP Entrance Ring capacity.

Additional capacity at each POP Entrance Ring can be further supplemented in increments of one STS3 as needed.

# Service availability limited. Refer to # footnote on Page 7-116. (N)

(This page filed under Transmittal No. 876)

Issued: November 19, 2007

(T)  
(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(a) Terms and Conditions (Cont'd)

The Company will design and size entrance ring(s) and select the wire center nodes on entrance ring(s).

As an option, the customer may add a second POP to the ISAN POP Entrance Ring. The second POP must be for restoral only.

Dual entrances at customer premises and Company wire centers are not considered a standard feature but may be provisioned in accordance with special construction tariffs and rates.

The available POP to EU interface combinations are:

<u>POP</u>	<u>EU</u>
OC12	DS1
OC12	DS3
OC12	OC3
OC12	OC3c

The customer has responsibility of providing CFA (connecting facility assignment) at the POP.

The Company will manage the transport network between the customer's CFA at the POP wire center(s) and the secondary premises, thus eliminating the need for intermediate DS3 Hubs.

# Service availability limited. Refer to # footnote on Page 7-116. (N)

(This page filed under Transmittal No. 876)

Issued: November 19, 2007

Effective: December 4, 2007

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(a) Terms and Conditions (Cont'd)

ISAN includes the connection of off-net services that are DS1 and higher capacity services. Services below DS1 are available from Section 7 of this tariff and must be multiplexed to a DS1 level. The customer is responsible for managing DS1 Hubs and must deliver multiplexed/hubbed DS1 circuits to an on-net wire center.

ISAN Transport Channels are available at two (2) levels of service, basic and premium.

Basic service provides automatic protection switching (APS) against fiber failures for the on-net portions of DS1 and higher capacity channels. On-net fiber path diversity provides fiber survivability with full redundancy from the customer's secondary premise (end user premise or EU) to the POP (i.e., working and protect fiber path diversity).

Premium service provides APS against fiber failure and failure of intermediate electronics. Its dual path survivability provides near 100% fiber and Wire Center (intermediate electronics) survivability with full redundancy from the EU to the POP.

# Service availability limited. Refer to # footnote on Page 7-116. (N)

(This page filed under Transmittal No. 876)

Issued: November 19, 2007

Effective: December 4, 2007

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(a) Terms and Conditions (Cont'd)

The customer may add additional services (entrance ring capacity and transport channels) to ISAN at any time up to and including the expiration date of the contract period.

The ISAN contract period is for 5 years. Sixty days prior to contract expiration, the Company will notify the customer of pending expiration. If on the expiration date, the Company has not received any notice from the customer, the Company will continue to bill the customer at the current rate for the next sixty (60) days. The existing minimum commitment levels and termination liabilities will remain in effect for the 60-day extension period. If at the end of the sixty days, the Customer has not notified the Company to disconnect or renew service, the Customer's ISAN service will automatically be renewed at the currently effective 5 year rate and new service commitment levels will be established as of the new contract date.

Moves and rearrangements of services are subject to the same nonrecurring charges as a new installation.

ISAN, including off-net arrangement specified in Section 7.2.14 preceding, is provided with a one minute Special Access Service Guarantee; see Section 2.4.4(B)(8)(a).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(b) Deployment and Availability

ISAN is available based on negotiated intervals as described in Section 5.2.1(B) preceding.

ISAN is only available where there is sufficient SONET technology in the network to meet the performance requirements for ISAN service.

The Company is solely responsible for ISAN deployment and design.

ISAN is scheduled to be available in the following areas and time frames:

Washington Metro LATA	- 3rd Quarter 1998
Pittsburgh PA	- 4th Quarter 1998
Baltimore, MD	- 1st Quarter 1999
Philadelphia, PA	- 1st Quarter 1999

(c) Conversions

The ISAN minimum service commitment as defined in (7.2.14(C)(3)(a)) must be met within an eighteen (18) month conversion period. The ISAN conversion period begins on the date of receipt of the first ISAN order following the completion of Inter-operability Testing (see 7.2.14(C)(3)(f)).

Conversion of existing Telephone Company Special Access high capacity services to ISAN is done without termination liability on the existing service(s). Any ISAN nonrecurring charges will apply.

During the conversion process, embedded services are charged the existing rate until converted. Services converted are charged the ISAN rates immediately.

# Service availability limited. Refer to # footnote on Page 7-116. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(d) Rate Regulations

Monthly recurring charges apply for the POP entrance rings and for the transport channels. Additional monthly charges apply for the two POP entrance ring options and for additional fiber mileage in the entrance ring.

- The POP Entrance Ring is rated per STS3 with a minimum of 4 STS3s and to include up to 10 air miles of fiber in the rings circumference. In addition, the rate includes low speed cards to be provisioned as needed.

Entrance rings over 10 miles in circumference are billed an additional charge for each mile over 10 for each group of 16 STS3s (16 STS3s is the marker used to determine when to build another or new ring).

The optional two POP entrance ring has the same rate structure as the standard one POP ISAN entrance ring.

- The ISAN Transport Channels are rated based on capacity, service level and how much of the circuit is on-net. The banded flat rate includes IOF mileage and the local loop to the end user. The rate bands are mileage sensitive.

The two levels of service are basic and premium.

The optical carrier channels (OC3 and OC3c) are differentiated as to whether the EU network interface is two fiber (2F) or four fiber (4F). The four fiber interface includes a second card for 1+1 protection.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(e) Termination Liability

During the conversion period, the customer may terminate its commitment for ISAN service without termination liability if the total number of in-service DS1 equivalent transport services is less than one hundred (100).

In all other instances, ISAN is subject to termination liabilities if the entire service is terminated or individual services are disconnected during the commitment period as follows.

During the conversion period, termination liability applies as follows:

- If the full ISAN contract is terminated prior to the customer satisfying the minimum service commitment (i.e., 336 equivalent DS1s or the 90% commitment level, whichever is greater), the termination charge is 100% of the monthly rate for each Transport Channel that is in service as of the cancellation date and 100% of the monthly rate for the minimum 4 STS3s at the POP Entrance Ring for each month remaining in the conversion period; plus, a charge of 25% of the monthly rate for the minimum service commitment (Entrance ring and Transport Channels) for month nineteen (19) through the remainder of the 5 year service period. The monthly charge for the shortfall in Transport Channels will be assessed at the 0-3 Mile Band rate.
- If the contract is terminated and the minimum service commitments have been met, the termination liability is 100% of the monthly recurring charges for all of the transport channels and entrance ring STS3s in service on the cancellation date for the first 18 months plus 25% of the monthly charges for the remainder of the five year contract period.

# Service availability limited. Refer to # footnote on Page 7-116. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)(C) Service Descriptions (Cont'd)(3) IntelliLight Shared Assurance Network# (Cont'd) (T)(e) Termination Liability (Cont'd)

- If individual ISAN POP Entrance Ring STS3s or ISAN Transport Channels are disconnected during the conversion period, no termination liability is assessed.

After conversion but prior to contract expiration, liability applies as follows:

- If the entire ISAN contract is cancelled, the liability charge is 25% of the monthly rate for the minimum service commitments (i.e., 4 STS3s and the greater of either 336 equivalent DS1s or the 90% commitment level count for DS1s and DS3s; and for each transport channel category of OC3 and above) for each month remaining in the contract period.
- If individual ISAN POP Entrance Ring STS3s and ISAN Transport Channels are disconnected after the conversion period but prior to contract expiration, no termination liability charges apply. The minimum monthly charge may apply.

The customer may reduce the 90% commitment count by paying termination liability on the amount of circuits by which it reduces the commitment count. However, the commitment level can never be reduced below 336 equivalent DS1s. Termination liability is described above.

Termination liability will be forgiven and the 90% commitment level will be reduced without penalty if the customer's reduction is due to the loss of a federal government contract (e.g., FTS 2001).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)#

(T)

## (a) General

IntelliLight Optical Transport Service (IOTS) provides managed optical transport of multiple protocols that are transmitted over a single fiber optic pair. IOTS is configured in a diversely routed ring architecture or topology and can be arranged as a full (closed) ring or as a partial ring. The ring architecture allows for point-to-point optical services of varying wavelengths to be multiplexed on or off of the ring.

IOTS allows for the native transmission of multiple high-speed protocols of various wavelengths over a single customized network. The wavelengths are arranged in a channelized format such that the protocol transmitted over each channel is independent of every other channel on the IOTS ring. The customer must specify, by channel, the interface that defines the transmission speed and protocol being transmitted over the associated wavelength.

# Effective February 15, 2007, orders for new IOTS rings (including both partial and full rings) are no longer permitted. The Telephone Company will continue to provide IOTS pursuant to this Section 7.2.14(C)(4) on any existing IOTS that is in-service as of February 15, 2007, or any order for IOTS that is placed with the Telephone Company prior to February 14, 2007 (collectively, Existing IOTS), subject to the following conditions:

(N)

- a. For any Existing IOTS that is currently subscribed to a term plan (i.e., commitment periods of 3-, 5-, and 7-years), the Telephone Company will continue to provide the Existing IOTS for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer discontinues service, whichever comes first. Subject to availability of facilities and equipment, certain moves, additions and/or changes to the Existing IOTS are permitted provided that such moves, additions and/or changes do not require a new commitment period or an extension to an existing commitment period.
- b. For any Existing IOTS whose term plan expired prior to February 15, 2007, but the Existing IOTS continued on a month-to-month basis at prevailing rates, the Telephone Company will continue to provide the Existing IOTS until August 16, 2007, or until customer discontinues service, whichever comes first. Moves, additions, and/or changes are not permitted.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (b) Terms and Conditions

An IOTS full (closed) ring provides connectivity to multiple customer designated locations (nodes). A full ring must have a minimum of three nodes at different locations or two nodes at different locations with a network optimization mid-span amplifier. At least one of the devices (node or amplifier) must be located in a Telephone Company Central Office (CO) and one must be located at a customer's designated premises.

An IOTS partial ring connects multiple customer designated locations (nodes) between fiber-meet locations at which high-speed interconnection of the Telephone Company's backbone network facilities to the customer's facilities or the facilities of a third party occurs. Partial ring service may only be interconnected to (1) another partial ring provided by the Telephone Company or (2) ring facilities provided by the customer or a third party. The portion of the ring provided by the customer or third party must use vendor equipment that matches the equipment used by the Telephone Company and must maintain the same vintage in software release as the Telephone Company. Upon written notice by the Telephone Company, the customer or third party will have sixty (60) days in which to complete the change-out of any software release deployed by the Telephone Company. A fiber-meet may occur at a customer's designated premises, in a Telephone Company CO, or at a location that is mutually agreeable to both the customer and the Telephone Company. Such location will be designated as a premises for the purpose of administering the general regulations set forth in this tariff.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (b) Terms and Conditions (Cont'd)

When the fiber-meet occurs at a customer's designated premises, the point of interconnection between the Telephone Company's facilities and the facilities of the customer or of a third party shall be a node.

When the fiber-meet occurs in a Telephone Company CO, high-speed interconnection from the device (node or amplifier) occurs at a Collocation arrangement via fiber cross-connects between the Telephone Company's fiber optic facilities and the customer's or third party's facilities.

When the fiber-meet occurs at a mutually agreed upon location, the point of interconnection shall be a high-speed (pass-through) interface as set forth in (c)(4) following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (b) Terms and Conditions (Cont'd)

The fiber-meet is subject to the regulations set forth in (b)(1) through (b)(5) following. A partial ring must have a minimum of two devices (nodes or amplifiers) one of which must be a node. Additionally, at least one of the devices (node or amplifier) must be located in a Telephone Company CO. When the fiber-meet occurs via a high-speed (pass-through) interface at a mutually agreed upon location, that interface is provided in lieu of the device (node or amplifier) at that location.

The Telephone Company's network design will define the optical parameters at the fiber-meet locations. The Telephone Company is responsible for the quality and integrity of the high-speed optical signal at the fiber-meet where its facilities are interconnected to the facilities of the customer or of the third party. The Telephone Company bears no responsibility for the optical parameters beyond the fiber-meet (i.e., in the facilities of the customer or of the third party). The customer or third party is responsible for engineering its portion of the jointly provided ring. At their option, the Telephone Company will engineer the customer or third party's portion of the ring within the LATA subject to Additional Engineering as set forth in Section 13.1 following.

The IOTS ring is comprised of nodes, ring mileage, network optimization (amplification), high-speed (pass-through) interfaces (certain partial ring configurations only), and optical transport channels. These elements are described in (c) following and are provided at the rates set forth in Section 7.5.24 following.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (b) Terms and Conditions (Cont'd)

The customer will be billed additional charges for any charges levied the Telephone Company for space and power required to place nodes on the Company's side of the network interface.

Connection of DSR to an IOTS ring is provided over an equal speed, unprotected optical transport channel (e.g. a 155.52 Mbps unprotected channel would connect to an OC3 DSR node). Each node on the DSR ring must be located at the same customer designated premises or in the same Telephone Company CO as its corresponding IOTS node. All other applicable DSR regulations as set forth in Section 23.1 following apply to the derived DSR Service.

Connection of IntelliLight Broadband Transport (IBT) to an IOTS ring is provided over an equal speed OC3/OC3c, OC12/OC12c, OC48/OC48c, or OC192/OC192c protected or unprotected optical transport channel as described in (c)(5) following.

Connection of a Verizon Optical Networking OC3c or OC12c Ethernet-to-SONET mapped service is provided over an equal speed SONET OC3c or OC12c protected optical transport channel as described in (c)(4) following.

Connection of a Verizon Optical Networking 1 Gbps Ethernet Full Rate service is provided over a Gigabit Ethernet optical transport channel.

An IOTS ring may also be connected to a Telephone Company provided dedicated SONET ring, Telephone Company provided point-to-point SONET service or Telephone Company provided ethernet private line service, provided that such connections are technically and operationally feasible, as determined by the Telephone Company.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

## (b) Terms and Conditions (Cont'd)

The use of a multi-port interface card requires that all channels on a single card be interrupted during periods when the Telephone Company is performing maintenance on that card. No credit for such periods of interruption will apply.

The customer is responsible to ensure that its facilities and equipment meet any applicable technical requirements or limitations for the protocol being transmitted over the optical transport channels.

The Telephone Company is responsible for the overall design and configuration of the IOTS ring. Construction of the ring will not begin until such design and configuration are mutually agreeable to both the customer and the Telephone Company.

Credit for service interruption of IOTS is set forth in Section 2.7.1.1(B)(13) preceding.

The technical specifications for IOTS are delineated in Technical References GR-2918-CORE, Issue 6; GR-2979-CORE, Issue 5; GR-1312-CORE, Issue 3; ITU-T G.959.1; and ITU-T G.692. Technical specifications for the underlying protocols transmitted over the IOTS ring are specified in (c)(4) following.

(C)(x)  
(T)

- (x) GR-2918-CORE, Issue 6, replaces GR-2918-CORE, Issue 4, in its entirety.  
GR-2979-CORE, Issue 5, replaces GR-2979-CORE, Issue 3, in its entirety.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (b) Terms and Conditions (Cont'd)

When IOTS is provided in a partial ring configuration, the following applies.

- (1) The customer must provide the Telephone Company with its fiber optic facility requirements (i.e., whether it will use single mode fiber or multi-mode fiber) prior to the Telephone Company ordering the necessary devices (nodes and amplifiers) to provide the requested service. The customer may utilize its own fiber optic facilities or the facilities of a third party.
- (2) The customer must provide, at no cost to the Telephone Company, suitable and secure space, suitable environmental conditions, an uninterrupted power supply, building entrance facilities, and conduit for placement of the facilities and network equipment at its locations as necessary to provide the service.
- (3) Interconnection to IOTS partial ring services may occur (i) at the customer's designated premises for which interconnection will occur via a node, (ii) in a Telephone Company CO for which a node or amplification device and fiber cross-connects to a collocation arrangement within that CO (as described in Section 19) will apply, or (iii) at a mutually agreed upon location via a high-speed (pass-through) interface as described in (c)(4) following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (b) Terms and Conditions (Cont'd)

(4) Interconnection to IOTS partial ring service is limited to high-speed fiber interconnection of the Telephone Company's backbone network fiber optic facilities and the fiber optic facilities of the customer or of a third party. Except as allowed under (c)(4) following, interconnection to other Telephone Company services may not occur at a premises which the customer has designated at its fiber-meet location.

(5) When ordering a transport channel that originates at and terminates to devices that are not within the partial ring provided by the Telephone Company, the customer must provide the Telephone Company with a copy of the order. This order provides the Telephone Company with authority to perform the necessary mapping of the channel through the partial ring to ensure continuity of the signal over the jointly provided ring. A Channel Mapping nonrecurring charge will apply for each channel mapped through the Telephone Company provided partial ring. Channel mapping charges do not apply when ordering point-to-point or point-to-meet-point optical transport channels. Channel mapping is further described in (c)(5) at the charge set forth in 7.5.24(G).

# Service availability limited. Refer to # footnote on Page 7-128.1. (N)

(Issued under Transmittal No. 771)

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (c) Service Components

- (1) Nodes are Dense Wave Division Multiplexing (DWDM) devices located at customer designated premises or Telephone Company wire centers from which optical transport channels are multiplexed on or off of the IOTS ring. The type of node that is deployed at each location is determined by the number of optical transport channels that will be multiplexed on or off of the IOTS ring at that location.

4 Channel Node

Placement of a 4 channel node at a location enables up to 4 protected optical transport channels to be deployed. Each protected optical channel may be replaced by two unprotected optical channels up to a maximum of 8 possible channels on the node. A 4 channel node may be utilized as the primary node at a location or as an expansion node to expand the capacity of a 16 channel primary node. 4 channel nodes are subject to the availability of suitable facilities and equipment to provide such device. No more than one 4 channel node will be provided at a location.

16 Channel Node

Placement of a 16 channel node at a location enables up to 16 protected optical transport channels to be deployed. Each protected optical channel may be replaced by two unprotected optical channels up to a maximum of 32 possible channels on the primary node.

# Service availability limited. Refer to # footnote on Page 7-128.1. (N)

(Issued under Transmittal No. 771)

Issued: January 31, 2007

Effective: February 15, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (c) Service Components (Cont'd)

## (1) (Cont'd)

The capacity of a 16 channel primary node may be increased through the addition of an expansion node at the same location. A 4 channel expansion node enables up to 20 protected optical transport channels (i.e., 16 on the primary node and 4 on the expansion node) to be deployed at a single location. Each protected optical channel may be replaced by 2 unprotected optical channels up to a maximum of 40 possible channels at that location. A 16 channel expansion node enables up to 32 protected optical transport channels (i.e., 16 on the primary node and 16 on the expansion node) to be deployed at a single location. Each protected optical channel may be replaced by two unprotected optical channels up to a maximum of 64 possible channels at that location.

The maximum number of optical transport channels that can be deployed at a single location is dependent upon the specific configuration of the IOTS ring and the type of optical transport channels being deployed from that location.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (c) Service Components (Cont'd)

- (2) For full ring service configurations, IOTS Ring Mileage is the total of airline distances between devices (nodes and amplifiers) rounded up to the nearest mile. The mileage rate is based on total ring capacity and not on individual services between devices. For example, the mileage charge for a five device ring with two mid-span amplifiers and a distance of 4.3 miles between each device (21.5 total miles) would be calculated by multiplying the mileage rate in Section 7.5.24 following by 22 miles.

For partial ring service configurations, IOTS Ring Mileage is the total of linear airline distances between fiber-meet locations (customer designated premises, CO or mutually agreed upon location, as applicable) and each device (node or amplifier) on the partial ring. The total mileage is then rounded up to the nearest mile.

The mileage between devices (e.g., an initial node and an expansion node or an At-Node amplifier, as applicable) located at the same customer designated premises or Telephone Company CO is zero. This mileage calculation applies regardless of the number of services on the ring.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (c) Service Components (Cont'd)

- (3) Network Optimization provides for amplification of the signal to ensure acceptable optical levels. When required, amplification is performed at the node (primary node or expansion node) or in a Telephone Company CO when mid-span amplification of the signal is required between nodes. Node amplification occurs in one or two directions (East to West and/or West to East). Amplification in two directions requires the use of two at-node amplifiers. Mid-span amplification occurs simultaneously in both directions (East to West and West to East). The Telephone Company shall have sole responsibility in determining when amplification is required and the quantity and type of amplification necessary to maintain acceptable optical levels.
- (4) A high-speed (pass-through) interface is a device placed at a mutually agreed upon fiber-meet location where interconnection between the facilities of the Telephone Company and those of the customer or of a third party provider occurs. The high-speed (pass-through) interface will not be utilized when such interconnection occurs within a Telephone Company CO (for which a node or amplification device and fiber cross-connects apply) or at a customer's designated premises for which interconnection via a node occurs. Connection to other Telephone Company services is prohibited at locations utilizing a high-speed (pass-through) interface.

# Service availability limited. Refer to # footnote on Page 7-128.1. (N)

(Issued under Transmittal No. 771)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (c) Service Components (Cont'd)

- (5) Optical transport channels allow for optical services to be multiplexed on to or off of the IOTS ring at locations equipped with an IOTS node. An optical interface at the node allows for connection of the applicable protocol to the customer's equipment.

Optical transport channels are provided on a node-to-node (i.e., point-to-point) basis or between a location equipped with an IOTS node and a fiber-meet location. These channels are provided on a point-to-fiber-meet basis. When a channel that originates at and terminates to devices which are not within the partial ring, the Telephone Company must map that channel through the partial ring to ensure continuity of the signal over the jointly provided ring. A Channel Mapping nonrecurring charge as set forth in Section 7.5.24(G) following applies in lieu of the rates and charges for a point-to-point or point-to-fiber-meet transport channel.

Optical Transport Channels are available on a protected or unprotected basis depending on the protocol being transmitted and the level of redundancy required for the optical channel. These channels may be ordered using a single-port interface (each a single channel per interface card) or using a multi-port interface. A multi-port interface is a facility capable of supporting up to 4 multi-port channels of ESCON, Fibre Channel, FDDI, Fast Ethernet, D1 Video, or any combination of these multi-port channels. A multi-port optical transport channel provides a two-point facility over the IOTS ring for the purpose of aggregating multiple optical channels over a single wavelength.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (c) Service Components (Cont'd)

## (4) (Cont'd)

Some protocols have facility distance limitations and may affect the design or availability of the IOTS ring or its optical transport channels. The multi-port interface is provided with a short reach, 2-fiber interface with a 1310nm signal.

A protected optical channel allows for a single signal from the customer to be duplicated and sent over separate diverse routes (working and protect) within the IOTS network.

An unprotected optical channel provides minimum protection of the signal from the customer. End-to-end protection is provided by the protection inherent in the connecting service provided by the Telephone Company (e.g., IDSR), as applicable.

Optical transport channels are delivered over a single-port interface or multi-port interface unless otherwise specified. The use of a multi-port interface and the type of optical transport channels that can be provided over a single-port or multi-port interface are subject to the availability of suitable equipment to provide the requested service.

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (c) Service Components (Cont'd)

## (5) (Cont'd)

All signals generated by customer provided equipment and delivered to the Telephone Company for multiplexing on to IOTS must meet industry standards and specifications for the underlying protocol. The customer is responsible to perform any error detection and error correction of the data generated by its equipment. The Telephone Company assumes no responsibility for the quality of the signal generated by the customer or any customer provided equipment and will deliver the signal to the receiving location in the same format and condition as generated by the customer.

The Telephone Company will transmit the following protocols over IOTS optical transport channels:

SONET OC3 - for transmission of 155.52 Mbps synchronous optical data transmission capability. SONET OC3 is delivered over a single-port interface only.

SONET OC3c - for transmission of concatenated 155.52 Mbps synchronous optical data transmission capability. SONET OC3c is delivered over a single-port interface only.

SONET OC12 - for transmission of 622.08 Mbps synchronous optical data transmission capability. SONET OC12 is delivered over a single-port interface only.

SONET OC12c - for transmission of concatenated 622.08 Mbps synchronous optical data transmission capability. SONET OC12c is delivered over a single-port interface only.

# Service availability limited. Refer to # footnote on Page 7-128.1.

## (5) (Cont'd)

SONET OC48 - for transmission of 2.488 Gbps synchronous optical data transmission capability. SONET OC48 is delivered over a single-port interface only.

SONET OC48c - for transmission of concatenated 2.488 Gbps synchronous optical data transmission capability. SONET OC48c is delivered over a single-port interface only.

SONET OC192 - for transmission of 9.953 Gbps synchronous optical data transmission capability. SONET OC192 is delivered over a single-port interface only.

SONET OC192c - for transmission of concatenated 9.953 Gbps synchronous optical data transmission capability. SONET OC192c is delivered over a single-port interface only.

10 Gigabit Ethernet LAN-PHY - 10GBASE-R (LAN PHY) interfaces offer an effective line rate of 10.3125 Gbps (10 Gbps of data traffic encoded in a 64B/66B protocol compared to the traditional 8B/10B protocol of Gigabit Ethernet). 10 Gigabit Ethernet LAN-PHY is delivered over a single-port interface only.

10 Gigabit Ethernet WAN-PHY - 10GigE data rate and format compatible with the SONET OC192c transmission format defined by ANSI. 10 Gigabit Ethernet WAN-PHY is delivered over a single-port interface only.

## (5) (Cont'd)

ESCON\* - for transmission of one 200 Mbps Enterprise Service CONnection channels between the same two IOTS nodes used for computer-to-computer data exchange. An ESCON signal is limited to a maximum distance of 43km (physical route kilometers) between the locations involved. ESCON is delivered over a multi-port interface only.

FICON\* - for transmission of 1 Gbps and 2 Gbps Fibre CONnection among mainframes, storage devices and peripherals on a single channel. A FICON signal is limited to a maximum distance of 100km (physical route kilometers) between the locations involved. FICON is delivered over a single-port interface only.

Fibre Channel\* - for transmission of 2.125 Gbps, 1.0625 Gbps, 531 Mbps, 266 Mbps, and 133 Mbps signals in a serial link between supercomputers, mainframes, workstations, desktop computers, storage devices, displays and other peripherals. A Fibre Channel signal is limited to a maximum distance of 100km (physical route kilometers) between the locations involved. Fibre Channel signals at transmission speeds of 2.125 Gbps, 1.0625 Gbps, 531 Mbps, 266 Mbps, and 133 Mbps are delivered over a single-port interface. Fibre Channel signals at transmission speeds of 266 Mbps and 133 Mbps may also be delivered over a multi-port interface.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (d) Application of Rates and Charges

- (1) IOTS is available for 3, 5 and 7 year commitment periods for the nodes, ring mileage, network optimization at-node amplification (subject to (C)(4)(d)(11)(c) following), network optimization mid-span amplification, partial ring high-speed (pass-through) interfaces, and optical transport channels.
- (2) Nodes, network optimization mid-span amplification, and SONET optical transport channels added subsequent to the initial installation may be coterminous to the expiration date of the IOTS at the rates and charges specified for the term plan on the existing IOTS or may require an extension to the existing plan as follows. If the addition is prior to the 21st month for an existing 3-year plan, prior to the 36th month for an existing 5-year plan, or prior to the 50th month for an existing 7-year plan, the addition will be coterminous to the expiration date of the IOTS. If the addition is after the aforementioned periods, the customer must extend the commitment period of its existing plan for an additional one-year for a 3-year plan, an additional 2-years for a 5-year plan, or an additional 3-years for a 7-year plan.
- (3) Effective August 16, 2005, separate rates and charges for network optimization at-node amplification apply subject to (C)(4)(d)(11) following.
- (4) Termination liability for IBT is described in Section 8.2(C) following. Termination liability for DSR is set forth in Section 23.1 following.
- (5) Data optical transport channels added subsequent to the initial installation will be coterminous to the expiration date of the IOTS at the rates and charges specified for the term plan on the existing IOTS. These channels are subject to a minimum service period of three months. Data optical transport channels are available in (C)(4)(c)(5) preceding.
- (6) The addition of SONET and/or Data optical transport channels subsequent to the initial installation of service may also require the addition of an expansion node(s) and/or network optimization device(s) to accommodate the increase in channels. The addition of an expansion node or network optimization is subject to the conditions set forth above.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (d) Application of Rates and Charges (Cont'd)

- (7) Monthly recurring rates apply for the nodes, ring mileage, network optimization mid-span amplification, network optimization at-node amplification subject to (C)(4)(d)(11) following, partial ring high-speed (pass-through) interfaces (certain partial ring configurations only), and optical transport channels. The monthly rate for a point-to-point optical transport channel applies for the entire node-to-node connection. The monthly rate for a point-to-fiber meet optical transport channel applies for the entire node to fiber meet (collocation arrangement in a CO, customer premises or mutually agreed upon location, as applicable) connection. Once a term period expires, the prevailing rates of the current plan will continue at Category I or Category II rates, as determined in (C)(4)(d)(10) following, until the customer cancels service or requests a new term plan.
- (8) The rates and charges for optical transport channels delivered over a single-port or multi-port interface are set forth in 7.5.24(D) following. When the optical transport channel is provided with a multi-port interface, rates and charges apply for the multi-port facility and for each multi-port channel riding the multi-port facility.
- (9) Nonrecurring charges for IOTS apply for the initial installation of service and for any subsequent node, network optimization mid-span amplification, or optical transport channel that is added at any time after the initial installation of service. A nonrecurring charge also applies to upgrade a 4 channel primary node to a 16 channel primary node or a 4 channel expansion node to a 16 channel expansion node.
- (10) Additionally, a Channel Mapping nonrecurring charge as set forth in Section 7.5.24(G) following applies for each channel which the Telephone Company must map over the partial ring. Only channels that originate at and terminate to devices that are not within the partial ring require mapping.

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (d) Application of Rates and Charges (Cont'd)

- (11) Rates and charges for IOTS nodes, ring mileage, network optimization at-node amplification, network optimization mid-span amplification, high speed pass-through interfaces, and optical transport channels which are in-service as of, or ordered prior to, are subject to Category I rates, unless the customer has converted to Category II rates under (C)(4)(d)(11)(c) following.

Rates and charges for IOTS nodes, ring mileage, network optimization mid-span amplification, high speed pass-through interfaces, and optical transport channels which are ordered on or after August 16, 2005 are subject to Category II rates. Category II rates also apply to IOTS which are converted to Category I under (C)(4)(d)(11)(c) following.

- (a) Category I rates are grandfathered as of August 16, 2005 and apply to each of the following (i) IOTS that is in-service as of, or ordered prior to, August 16, 2005 under Section 6.8.25(C)(6) preceding, or under this Section 7.2.14(C)(4), or (ii) each IOTS subscribed under Contract Tariff Option 5, 6, 11 or 13 as set forth in Section 21 following, which is in effect as of August 16, 2005; unless in each case above, the customer elects to convert IOTS billing to Category II rates in accordance with (C)(4)(d)(11)(c) following. Category I rates include separate rates and charges for network optimization at-node amplification.
- (b) Category II rates apply to each IOTS which is ordered on or after August 16, 2005 under Section 6.8.25(C)(6) or under this Section 7.2.14(C)(4) following. Category II rates also apply to nodes, network optimization, mileage, and optical transport channels which are ordered on or after August 16, 2005 as an addition to an existing IOTS, regardless of whether or not such existing IOTS is subject to Category I or Category II rates. When the Telephone Company's network design for such addition to an existing IOTS requires that a network optimization at-node amplifier be added to an existing node that is billed at Category I rates, the billing for such node will be converted to the Category II node rate element, which node rate element includes amplification at the node.

Notwithstanding anything to the contrary in any applicable Contract Tariff Options, any reduction or discount to Special Access rates offered under Contract Tariff Option 5, 6, 11 or 13 of Section 21 following will not be applied to Category II rates.

# Service availability limited. Refer to # footnote on Page 7-128.1.

(N)

(Issued under Transmittal No. 771)

Issued: January 31, 2007

Effective: February 15, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (d) Application of Rates and Charges (Cont'd)

## (11) (Cont'd)

## (b) (Cont'd)

Category II rates also apply to IOTS that are converted from Category I rates to Category II rates in accordance with (C)(4)(d)(11)(c) following. Category II rates do not include separate rates and charges for network optimization at-node amplification which is provided as part of the node rate element on or after August 16, 2005.

(c) A customer subject to Category I rates under (C)(4)(d)(11)(a) preceding may convert to Category II rates subject to the following:

- (1) The customer must submit an access order for the conversion to Category II rates.
- (2) Separate rates and charges applicable to network optimization at-node amplification under Category I rates shall cease coincident with the date that billing at Category II rates commences.
- (3) A new commitment period commences with the conversion from Category I rates to Category II rates. The customer must select a new commitment period from those offered under (d)(1) preceding. The new commitment period must be equal to, or longer than, the original commitment period for the IOTS that was subject to the Category I rates. For example, an IOTS under a 5-year commitment period at Category I rates may only convert to a new 5-year commitment period or a new 7-year commitment period upon conversion to Category II rates.
- (4) There can be no physical work activity (e.g., moves, additions, changes) associated with the conversion to Category II rates. Upon conversion, all terms and conditions of this tariff shall apply to the converted IOTS service, including any applicable termination liability and minimum period obligations.

# Service availability limited. Refer to # footnote on Page 7-128.1. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

(4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

(d) Application of Rates and Charges (Cont'd)

(11) (Cont'd)

(c) (Cont'd)

- (5) When the conversion is ordered between the period beginning August 16, 2005 and ending November 16, 2005, the conversion will not be subject to minimum period and/or termination liability as they may otherwise apply for early termination of the Category I term plan, provided that the conditions set forth in (1) through (4) preceding are met.

Conversion from Category I rates to Category II rates that is ordered after November 16, 2005 is subject to all minimum period and/or termination liability as they apply for early termination of the Category I term plan. Additionally, conversion to Category II rates ordered after November 16, 2005 is subject to the requirements set forth in (1) through (4) preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (d) Application of Rates and Charges (Cont'd)

(12) A change in the type (e.g., Fiber Channel to FICON) or optical carrier rate (e.g., OC3 to OC12) of optical transport channel is treated as a discontinuance of the existing channel and an installation of a new optical transport channel. Optical transport channels ordered on or after August 16, 2005 are provided at Category II rates.

(13) When an optical transport channel is ordered to connect with DSR or IBT, the optical channel will be billed to the DSR or IBT customer, as applicable.

(14) When an optical transport channel is delivered over a multi-port interface, the multi-port facility and each multi-port channel riding the multi-port facility must be billed to the same customer who subscribes to the IOTS ring.

(15) When an optical transport channel is ordered to connect to a Telephone Company provided dedicated SONET ring or a Telephone Company provided point-to-point SONET service, the optical channel will be billed to the dedicated SONET ring or point-to-point SONET service customer, as applicable. (T)

## (e) Termination Liability

- (1) Termination liability applies to IOTS and is charged per monthly rate element on all nodes, network optimization, partial ring high-speed (pass-through) interfaces, optical transport channels and network management methods. Termination liability for IBT is described in Section 8.2(C) following. Termination liability for DSR is set forth in Section 23.1 following. Data optical transport channels as set forth in Section 7.2.14(C)(4) preceding are not subject to termination liability, however, such channels are subject to a minimum service period of three-months.

A separate termination liability charge is assessed for each rate element associated with the disconnected IOTS or a Network Management Method. For example, assume that the customer subscribes to an IOTS ring that is arranged with the Direct TL1 Monitoring Optional Feature, as set forth in 7.2.14(C)(4)(k)(2) following. Further, assume that the customer disconnects the IOTS ring along with the Direct TL1 Monitoring Optional Feature prior to the end of the commitment period. Then, the customer shall pay termination liability on the nodes, network optimization, partial ring high-speed interfaces, optical transport channels and the Direct TL1 Monitoring Optional Feature monthly recurring rate elements as set forth in this section.

- (2) IOTS or a Network Management Method may be canceled without termination liability when cancellation of the IOTS or Network Management Method occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on any rate applicable to the IOTS service or Network Management Method.
- (3) Termination liability will not apply on any IOTS service or Network Management Method if (1) a customer changes its term plan to a longer commitment period; (2) a 4 channel primary node is upgraded to a 16 channel primary node; (3) a 4 channel expansion node is upgraded to a 16 channel expansion node; or (4) a term plan subject to Category I rates is converted to a new term plan subject to Category II rates, when such conversion satisfies the conditions in (C)(4)(d)(11)(c) preceding and is ordered on or before November 16, 2005.

# Service availability limited. Refer to # footnote on Page 7-128.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (e) Termination Liability (Cont'd)

- (4) Termination liability will apply when the conditions above are not met and the customer cancels service prior to expiration of the plan period. If the cancellation occurs within the first two years of a term plan, termination liability is equal to 100 percent (100%) of the monthly charges for the unexpired portion of the first two years, and 25 percent (25%) of the monthly charges for the remainder of the plan. If the customer cancels after the first two years of service, then termination liability is equal to 25 percent (25%) of the monthly charges for the remaining life of the term.

- (5) For IntelliLight Optical Transport Service with a commitment period which was extended under (i) following, termination liability is calculated as the difference between the monthly rates for the highest Term Pricing Plan commitment period that could have been satisfied prior to disconnection of the service or cancellation of the plan and the monthly rates already paid for the expired commitment period and the extended commitment period for the period of time the service was in effect.

## (f) Conversions

- (1) Customers who wish to move or convert existing Special Access DSR or High Capacity Special Access services to IOTS may do so without conversion charges (termination liability and installation charges) as long as the total capacity of Special Access services or DSR purchased by the customer does not decrease.
- (2) Customers who wish to convert existing IOTS under a term plan with Category I rates to a new term plan with Category II rates may do so without conversion charges (minimum period obligations, termination liability, and installation charges) as long as the requirements set forth in (C)(4)(d)(11)(c) are met and is ordered on or before November 16, 2005.

## (g) Deployment and Availability

Since IOTS is a dedicated high capacity customized network, it is deployed upon customer request. Where suitable facilities are not generally available, rates and charges as set forth in Interstate Special Construction Tariffs may apply.

IOTS is available based on negotiated intervals as described in 5.2.1(B) preceding.

## (i) Extension of a Commitment Period

- (1) The customer has the option, within sixty (60) days prior to the expiration date for its commitment period, to extend its expiring Term Pricing Plan to a plan with a longer commitment period, for which time-in-service credit will be allowed for the expiring plan. The commitment period selected for the extended plan must be longer than the commitment period of the expiring plan as follows:
  - An expiring 3-Year Term may be extended to either a 5-Year or 7-Year Term Plan.
  - An expiring 5-Year Term may be extended to a 7-Year Term Plan.
- (2) Time-in-service credit on the expiring plan will be granted and applied towards the new extended plan. For example, an expiring 3-Year term plan will allow for 3 years of time-in-service credit towards the extended plan.
- (3) A Category I term plan that is converted under (C)(4)(d)(11)(c) preceding to a Category II term plan is not eligible for time-in-service credit on the Category II term plan.
- (4) The customer may also extend the commitment period in order to install additional nodes, network optimization devices or SONET optical channels as described in (C)(4)(D)(11)(d) preceding.
- (5) The rate for the longer commitment period will apply effective with the first bill day following expiration of the commitment period for the existing plan and continue through the remainder of the commitment period associated with the extended plan. No adjustment for the increased discount associated with the extended plan will be made to the monthly rates already billed on the expiring plan.
- (6) Extension of a term pricing plan under Category I rates will be extended at Category I rates. However, nodes, network optimization, ring mileage, and optical transport channels added during the period of extension are subject to Category II rates unless otherwise specified.
- (7) Extension of a term pricing plan under Category II rates will be extended at Category II rates.

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (k) Network Management Methods

The customer has the option of purchasing one of the following Network Management Methods for use with an IOTS Special Access service provided by the Telephone Company in accordance with this Section 7.2.14. Only one method may be provided on a single IOTS. Network Management Methods will be available subject to compatibility of the current release of the Network Management Methods software with the IOTS equipment deployed for the customer's network.

- Customer Service Management Optional Feature, as set forth in 7.2.14(C)(4)(k)(1) following
- Direct TL1 Monitoring Optional Feature, as set forth in 7.2.14(C)(4)(k)(2) following

## (1) Customer Service Management Optional Feature (CSM)

## (a) Description

CSM provides a customer with real-time information about the operational status of its IOTS network. CSM provides a network view of real-time detection and reporting of network alarm conditions within the customer's IOTS network. In addition, CSM provides the customer with the ability to generate basic network performance reports for its IOTS network. The customer may also request network performance reports that are customized to meet their specific needs.

## (b) Application of Rates and Charges

- (i) A CSM monthly recurring charge applies, per full or partial ring, for each IOTS provided with the CSM optional feature.
- (ii) A Node Setup charge applies, per primary or expansion node, for each node that is equipped with CSM at the time that CSM is initially established on the IOTS.
- (iii) An Initial CSM Setup charge applies for establishment of the customer's initial CSM database partition. The initial CSM database partition includes setup for up to six (6) users.

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

(k) Network Management Methods (Cont'd)

## (1) Customer Service Management Optional Feature (CSM) (Cont'd)

## (b) Application of Rates and Charges (Cont'd)

- (iv) A Setup of Additional Users charge applies for the setup of up to six (6) additional users beyond those users included with the setup of initial or additional database partitions.
- (v) A Setup of Additional Partition charge applies for the setup of an additional CSM database partition created for the same customer. Each additional CSM database partition provides for the setup of up to six (6) additional users.
- (vi) An Add/Remove Node charge applies, per primary and expansion node, for each node that is added to, or removed from, an IOTS ring equipped with CSM subsequent to the initial establishment of CSM.
- (vii) A Consultation and Support charge applies for each thirty (30) minutes or fraction thereof that the customer requests Telephone Company consultation and support of its CSM network. This charge does not apply during initial setup of CSM.
- (viii) A Change in Network Management Method charge applies, per primary and expansion node, when the customer requests a change in Network Management Method (e.g., from CSM to DTM).

## (c) Rate Regulations

- (i) CSM is provided under a term plan of 3 years, 5 years or 7 years, as described following.
  - The duration of the term plan for CSM must be the same duration as the term plan for the IOTS nodes provided with CSM. At the expiration of its 3, 5 or 7 year term plans for CSM, the customer has the option of extending CSM with a coterminous end date as described following.

# Service availability limited. Refer to # footnote on Page 7-128.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.14 IntelliLight Services (Cont'd)

## (C) Service Descriptions (Cont'd)

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd)

(T)

## (k) Network Management Methods (Cont'd)

## (1) Customer Service Management Optional Feature (CSM) (Cont'd)

## (c) Rate Regulations (Cont'd)

## (i) (Cont'd)

- The expiration date of each CSM added subsequent to the initial installation must be coterminous to the expiration date of the associated IOTS, provided the addition is prior to the 21st month for a 3-year plan, prior to the 36th month for a 5-year plan, or prior to the 50th month for a 7-year plan. A CSM added after the aforementioned periods requires extension of the commitment period for the associated IOTS in accordance with 7.2.14(C)(4)(i) preceding. Such extension results in the establishment of a new plan that includes both the IOTS and the CSM under the same plan with the same expiration date.

- (ii) The customer may retrieve basic reports containing performance-monitoring information on its IOTS network. Basic reports are available at no additional charge to the customer. The customer may also request that a report be customized to meet its particular needs. Rates and charges for customized reports are provided on an individual case basis (ICB) only.

- (iii) CSM is subject to termination liability if the service is disconnected prior to completion of the existing commitment period. The terms and conditions in 7.2.14(C)(4)(e) preceding apply to termination of CSM prior to completion of the existing commitment period. Changes in Network Management Method (e.g., from CSM to DTM) will be made without termination liability subject to the Change in Network Management Method charge set forth in (1)(b)(viii) preceding.

## (4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

## (k) Network Management Methods (Cont'd)

## (1) Customer Service Management Optional Feature (CSM) (Cont'd)

## (d) Terms and Conditions

(i) The customer must utilize Internet web access to connect its customer-provided terminal equipment to the Telephone Company's CSM management system. Access to the internet and any associated rates and charges are the responsibility of the customer. The customer is also responsible for obtaining communications software that is compatible with the software the Telephone Company utilizes to provide CSM. The Telephone Company will work cooperatively with the customer to determine compatibility of its communications software.

(ii) CSM is provided only when the Telephone Company provides all nodes on the ring.

(iii) Subject to the restrictions set forth in 7.2.14(C)(4)(k)(1)(c)(i) preceding, CSM is provided coincident with the installation of the associated IOTS ring or may be added to an existing ring.

## (2) Direct TL1 Monitoring Optional Feature (DTM)

## (a) Description

DTM provides a customer with near real-time information about the operational status of its IOTS network over a TL1 connection. A TL1 connection is a machine-to-machine communication language protocol. The connection allows a customer to monitor its IOTS network via a limited set of executable TL1 commands in order to query alarm and performance criteria.

(4) IntelliLight Optical Transport Service (IOTS)# (Cont'd) (T)

(k) Network Management Methods (Cont'd)

(2) Direct TL1 Monitoring Optional Feature (DTM) (Cont'd)

(a) Description (Cont'd)

(i) DTM enables the following:

- Near real-time access to system-generated alarm and performance messages originating from the customer's IOTS network elements.
- Query and response capability that enables two-way communications with the capability to poll and retrieve messages, such as command alarms and performance messages.
- Access to ring inventory information that will enable the customer to maintain its own inventory database containing network element configurations and usage records for active service channels.
- Notification that a power failure has occurred at an IOTS network element and that the affected network element has reverted to battery backup.
- Ability to monitor the ring, as well as all service channels riding the ring.

(b) Application of Rates and Charges

- (i) A DTM monthly recurring charge applies, per full or partial ring, for each IOTS provided with the DTM optional feature.
- (ii) A Node Setup charge applies, per primary or expansion node, for each node that is equipped with DTM at the time that DTM is initially established on the IOTS.
- (iii) A DTM Setup charge applies for establishment of the customer's DTM database partition.

(T)

## (k) Network Management Methods (Cont'd)

## (2) Direct TL1 Monitoring Optional Feature (DTM) (Cont'd)

## (b) Application of Rates and Charges (Cont'd)

- (iv) An Add/Remove Node charge applies, per primary and expansion node, for each node that is added to, or removed from, an IOTS ring equipped with DTM subsequent to the initial establishment of DTM.
- (v) A Consultation and Support charge applies for each thirty (30) minutes or fraction thereof that the customer requests Telephone Company consultation and support of its DTM network. This charge does not apply during initial setup of DTM.
- (vi) A Change in Network Management Method charge applies, per primary and expansion node, when the customer requests a change in Network Management Method (e.g., from DTM to CSM).

## (c) Rate Regulations

- (i) DTM is provided under a term plan of 3 years, 5 years or 7 years, as described following.
  - The duration of the term plan for DTM must be the same duration as the term plan for the IOTS nodes provided with DTM. At the expiration of its 3, 5 or 7 year term plans for DTM, the customer has the option of extending DTM with a coterminous end date as described following.
  - The expiration date of each DTM added subsequent to the initial installation must be coterminous to the expiration date of the associated IOTS, provided the addition is prior to the 21st month for a 3-year plan, prior to the 36th month for a 5-year plan, or prior to the 50th month for a 7-year plan. A DTM added after the aforementioned periods requires extension of the commitment period for the associated IOTS in accordance with 7.2.14(C)(4)(i) preceding. Such extension results in the establishment of a new plan that includes both the IOTS and the DTM under the same plan with the same expiration date.

- (ii) Termination liability will apply if DTM is removed prior to completion of the existing commitment period. The terms and conditions in 7.2.14(C)(4)(e) preceding apply to termination of DTM prior to completion of the existing commitment period. Changes in Network Management Method (e.g., from DTM to CSM) will be made without termination liability subject to the Change in Network Management Method charge set forth in (2)(b)(vi) preceding.

## (d) Terms and Conditions

- (i) The customer must order two (2) special access services, provided by the Telephone Company under this Section 7 or provided by another carrier, in order to ensure secure, dedicated private line access and enable full redundancy for DTM. These special access lines must originate at the customer's designated premises and terminate at a DTM site designated by the Telephone Company with the terms and conditions of this tariff. The customer is responsible for procuring any additional services that may be necessary to connect the special access service to the customer's designated premises.
- (ii) When requested by the customer, and where technically feasible to do so, the Telephone Company will provide encryption capabilities on the Special Access Services used to access DTM. The Telephone Company will specify any equipment or software required to provide encryption. Obtaining such equipment or software is the responsibility of the customer. The customer is also responsible for:
  - security of any equipment, servers, systems or other facilities provided by the customer and which have access to the DTM network; and
  - monitoring access to the DTM service using the facilities, systems, equipment or servers provided by the customers.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)#

IntelliLight Entrance Facilities, IEF, provides customers with high capacity access between their premises and their Serving Wire Center over a self-healing SONET ring. The SONET ring will pass through the customer's serving wire center and one other wire center as determined by the Telephone Company. The customer is assured continuity of communication between the customer premises and the Serving Wire Center (SWC) even if there is a fiber facility failure between the premises and the SWC.

## (A) Definitions

Add/Drop Multiplexing, (ADM): a multiplexing function that allows lower level signals to be added or dropped from an optical carrier channel.

Fractional OC# Interface: a feature of IEF that provides either an OC3 or OC12 optical network interface at the customer's premises. Fractional capacity equal to or less than the OC# level can be activated by the customer. Capacity is ordered and billed in increments of STS1, STS3, or STS12.

(x)

(x)

# Effective August 30, 2007, new orders for IEF utilizing (i) Terminations other than STS1/51.84 Mbps Terminations; or (ii) Interfaces other than STS1 Electrical Interfaces, DS3 Electrical Interfaces or DS1 Electrical Interfaces are no longer permitted. The Telephone Company will continue to provide IEF pursuant to this Section 7.2.15 on any existing IEF that is already in-service as of August 30, 2007, or on any order for IEF that is placed with the Telephone Company prior to August 30, 2007 (collectively, Existing IEF), subject to the following conditions:

- a. For any Existing IEF that is currently subscribed to a term plan (i.e., commitment periods of 3- and 5-years), the Telephone Company will continue to provide Existing IEF for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer replaces the Existing IEF with a comparable Telephone Company provided service, or discontinues service, whichever occurs first. Orders involving additions and/or changes to Existing IEF are not permitted after August 30, 2007. (x)
- b. For any Existing IEF whose term plan expired prior to August 30, 2007, but the Existing IEF continues on a month-to-month basis at prevailing rates, the Telephone Company will continue to provide the Existing IEF until February 29, 2008, or until the customer replaces the Existing IEF with a comparable Telephone Company provided service, or discontinues service, whichever occurs first. Orders involving additions and/or changes to such Existing IEF are not permitted after August 30, 2007. (x)

(x) Issued under authority of Special Permission No. 08-019 of the Federal Communications Commission to withdraw material pending under Transmittal No. 952 and to reinstate material currently in effect

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

## (A) Definitions (Cont'd)

(x)

(x)

Grooming: the aggregation of multiple DS1s at a wire center and the formatting or packaging of the services using wire center equipment so as to connect the DS1s to a VT1.5 mapped STS1 IEF Termination.

IntelliLight Service: a Telephone Company family of SONET based services that have a high level performance guarantee.

Optical Carrier Rate, (OC#): A SONET Transmission signal/speed, line rate, or service.

<u>OC Rate</u>	<u>Bandwidth Capacity</u>
3	155.52 Mbps
12	622.08 Mbps
48	2.488 Gbps

IntelliLight Entrance Facilities, (IEF): an alternative service that enhances channel termination survivability.

Synchronous Optical Network, (SONET): an international standard for the transmission of high capacity bandwidth over optical facilities.

# Service availability limited. Refer to # footnote on Page 7-129.

(x) Issued under authority of Special Permission No. 08-019 of the Federal Communications Commission to withdraw material pending under Transmittal No. 952 and to reinstate material currently in effect

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

## (A) Definitions (Cont'd)

Synchronous Transport Signal Level, (STS1): a 51.84 Mbps signal that is the electrical equivalent of the OC1 or a DS3 with additional Mbps devoted to SONET overhead information. An STS1 can carry a DS3 or 28 DS1s when specifically formatted (Mapped). However, DS1s within a DS3 are not accessible within SONET and their performance cannot be guaranteed for this reason. These DS1s may be accessed off-ring using the DS3 to DS1 multiplexing, a High Capacity optional service. Multiple STS1s, i.e. STS3 and STS12, equal 155.52 and 662.08 Mbps respectively.

Virtual Tributary, (VT): A SONET structure designed for transport of Sub-STs1 payloads. A DS1 is mapped into the SONET format using a VT1.5 as a packaging mechanism that is internal to the SONET signal. An IEF service with VT1.5 mapping may be comprised of Grouped VT1.5s or Separated VT1.5s.

Grouped VT1.5: each VT1.5 in the IEF service is connected to the network at the same wire center (i.e., have the same path on the network) and have identical features, e.g. all VT1.5s have the service option IntelliLight Shared Dual Path.

Separated VT1.5: a VT1.5 in an IEF service that has a path or feature different from the other VT1.5s in the IEF service.

## (B) Service Description

IEF is provisioned over a Telephone Company self-healing SONET ring that passes through the Telephone Company wire centers and the customer's location. One of the wire centers must be the customer's SWC; the other wire center(s) is chosen by the Telephone Company.

IEF service consists of IntelliLight Entrance Facilities and an Interface when applicable. Technical Specifications for IEF service are the same as for IntelliLight Service; see Section 7.2.14(A).

The IEF Termination is a rate category that provides STS1 bandwidth or at least an STS1 aggregate of bandwidth between the customer's designated premises and the SWC of that premises. It can also be provided in multiples of STS1, i.e. STS3 or STS12.

# Service availability limited. Refer to # footnote on Page 7-129.

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

## (B) Service Description (Cont'd)

Each IEF Termination requires the customer to specify the type of electrical or SONET optical interface.

The electrical IEF Interface defines the type of Special Access service that is to be provided. Three electrical Interface types are available: DS1 (1.544 Mbps), DS3 (44.736 Mbps) and STS1 (51.84 Mbps). If the customer orders a DS3 or STS1 Interface, there will be one Interface per Termination; if the customer orders DS1 Interface, then up to 28 DS1 Interfaces can be accommodated per IEF Termination.

Three optical interfaces are available: OC3 (155.52 Mbps), OC12 (622.08 Mbps), and OC48 (2.488 Gbps). The OC3 and OC12 optical interfaces are provided in a manner that allows fractional capacity to be activated in increments of STS1s. Fractional optical interface Terminations can be connected to lower speed Special Access services as well as Special Access and advanced data services that are equal to the bandwidth of the interface. IEF provided with interfaces at STS1, OC3, and OC12 can also be connected to Verizon Optical Networking STS1, OC3c, and OC12c Ethernet-to-SONET mapped services as described in 7.2.16 following.

The entire bandwidth of the OC48 interface, which is provisioned using one Company ADM at the customer's SWC and a fiber interconnection (mid-span meet) at the customer's designated premises, is completely committed to the customer. It operates in a terminal/linear mode with diversely routed fiber between the SWC and the customer's premises. To ensure network security, the Data Communications Channel in the SONET overhead will be turned off. The handoff, mid-span meet-point, at the customer's premises will be at a site mutually agreed upon that provides access to both the Company and the customer. The handoff will be a 4 fiber, 1 x 1 protection.

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

(B) Service Description (Cont'd)

Each IEF Termination can be connected to other Special Access service channel terminations or to advanced data services via the Telephone Company's interoffice facilities (IOF) and Hubs. Three STS1s or a STS3 can be connected to either an IBT OC3 or OC3c service. Twelve STS1s or an STS12 can be connected to either an IBT OC12 or an OC12c. Forty-eight STS1s can be connected to an IBT OC48 service. The connecting IOF transport for OC48 will be over DS3, STS1 (VT1.5 and DS3 mapped), OC3/OC3c and OC12/OC12c. Grooming is required to aggregate DS1 services on to an IEF Termination. Additionally, IEF provided with interfaces at STS1, OC3 and OC12 can be connected to multiplexed IBT services. Connection to an IBT OC3 and OC12 multiplexing node can only occur from an IEF OC48 arrangement.

IEF may also be connected to the following Telephone Company provided services, provided that such connections are technically and operationally feasible, as determined by the Telephone Company:

- point-to-point SONET service
- Ethernet private line service
- dedicated SONET ring service

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

(C) Optional Features and Functions

Survivability from the IEF SWC to other network service locations can be obtained through the purchase of one or two service options. IntelliLight Shared Dual Path (ISDP) service is an option which provides a high level of service survivability (see Section 7.2.14(C)(2)). Another option which enhances survivability through diversity is Alternate Serving Wire Center, ASWC; see High Capacity Service Optional Features and Functions, Section 7.2.9(D)(7).

An optional feature known as grooming may be purchased. Grooming allows multiple DS1 circuits to be "groomed" (aggregated) at a wire center in order to be connected to a common IEF Termination. This option requires that the IEF Termination contain VT 1.5 (DS1) mapping.

DS1s multiplexed into DS3 occurs outside the SONET network, and requires DS3 to DS1 multiplexing at the wire center; see High Capacity Service Optional Features and Functions, Section 7.2.9(D)(3). DS1s mapped as VT1.5s in an ISSP service can be demultiplexed with the optional STS1/DS1 Multiplexing feature at designated wire centers. STS1/DS1 Multiplexing is described in Section 8.2.2(B).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)(D) Terms and Conditions

IEF is available for 3 and 5-year commitment periods.

Once the term period expires, the rate of the expiring selected rate plan will continue until the customer cancels service or requests a new rate plan.

The customer may add additional IEF Interfaces and Terminations to an existing IEF service plan. However, in order to add additional Interfaces and Terminations to an existing IEF Service plan, there must be at least 1 year remaining in the term of the commitment plan. IEF plans with less than 1 year remaining in the commitment period will not be eligible for additional Interfaces or Terminations. Where additional Interfaces or Terminations are added subject to the criteria specified preceding, they must remain in service to the end of the commitment period of the IEF service plan to which they are added or termination liability will apply.

Customers who order an STS1 Interface must specify how the signal is mapped, VT1.5 or DS3-mapped (see definitions for Virtual Tributary and SONET).

The Customer, when purchasing the OC48 Interface service, is solely responsible for the installation and maintenance of its SONET transmission equipment. The customer's equipment must conform to the technical standards as previously cited

Asynchronous multiplexing of DS1s into a DS3 occurs outside the SONET network and requires DS3 to DS1 Multiplexing at a Telephone Company Hub at the existing tariff rates.

(C)

Synchronous mapping of DS1s as VT1.5s occurs inside the SONET network and requires STS1 to DS1 multiplexing at the tariffed rates.

Service is available based on negotiated intervals, as described in 5.2.1(B) preceding.

If the customer premises (i.e., interexchange carrier Point of Presence, or end user location) is located in the same building as one of the connecting wire centers, the diversity between the wire center and the customer premises may be limited by the physical paths available to connect the wire center and the premises.

# Service availability limited. Refer to # footnote on Page 7-129.

(Issued under Transmittal No. 1103)

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd) (T)(D) Terms and Conditions (Cont'd)

The customer will be billed additional charges for any charges levied the Telephone Company for space and power requirements at the customer premises to place ADMs on the Company's side of the network Interface.

IEF service may be used in conjunction with IntelliLight Shared Dual Path (ISDP), IBT or multiplexed IBT services, advanced data services or the Special Access High Capacity service option of Alternate Serving Wire Center, ASWC. IEF DSIs with these features are rated depending on whether the DSIs are "Grouped" or "Separated".

IEF service may be included in, and concurrently subscribed to, under a Commitment Discount Plan as specified in Section 25.1 following and/or under a National Discount Plan as set forth in Section 25.3 following.

If a customer establishes a Commitment Discount Plan (CDP) for at least one (1) service type listed in Section 25.1.1 following and subscribes to other services listed in Section 25.1.1 following at any time that a CDP is in effect, the customer may not establish or maintain a term plan for any services that are eligible for inclusion in CDP with the limited exception of IEF services as set forth in Section 25.1 following.

# Service availability limited. Refer to # footnote on Page 7-129. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

(E) Termination Liability

IEF service may be canceled without termination liability when cancellation of the IEF service occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on the customer's recurring rates (i.e., if the customer's combined charge for the IEF Termination and its associated Interface(s) should increase). Additionally, any existing IEF customer that experienced an increase in its recurring rates for service between June 1, 1999 to January 11, 2000 may also exercise this option. The customer must notify the Telephone Company of its intent to exercise this option by February 10, 2000.

Termination liability will not apply for conversions to a longer term commitment period plan.

Termination liability will not apply if the customer meets the requirements for portability. Portability is the replacement of an IEF Termination with another for the balance of the commitment period. Portability requirements are as follows:

- The replacement Termination must not already be in a term plan.
- The orders to accomplish the replacement are placed with the Telephone Company at the same time with the due dates within 90 days of each other, and are related by a related purchase order number.
- The aggregate interface quantities associated with the Termination replacement are equal to or greater than the disconnected service.
- The service may be moved to another location in the Telephone Company region, provided the service was maintained in the initial location for one year.
- The replacement service is subject to applicable nonrecurring charges.

# Service availability limited. Refer to # footnote on Page 7-129.

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

(E) Termination Liability (Cont'd)

Other than these above exceptions, a customer must fulfill his term plan for the entire capacity, or be subject to termination liability for that portion of capacity that was not in place the entire term. In addition to the one year minimum period on services subsequently added, termination liability is calculated as follows:

If a customer disconnects service during the first year, termination liability will be calculated at 100% of the monthly charges for the unexpired portion of the first year, and at 15% of the remainder of the term. If the disconnection takes place after the first year, termination liability is calculated at 15% of the monthly charges for the remainder of the term.

(T)  
(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

(T)

## (F) Conversions

Customers who wish to convert existing High Capacity Special Access services to IEF may do so without termination liability as long as the total capacity of Special Access service at their premises does not decrease. A new contract period is begun with the conversion; no credit is given for time-in-service on the new term plan. Applicable nonrecurring charges for new installations, rearrangements, or moves will apply.

(M)

If customers want to convert an IEF service to a Verizon Dedicated SONET Ring (DSR), there will be no termination liability as long as the total capacity of Special Access services at the premises does not decrease. Credit for time-in-service will not be given for a conversion from IEF to DSR. Applicable nonrecurring charges for DSR service will apply.

## (G) Deployment

Service is provided where SONET facilities and bandwidth are available that can provide the requested interface. Generally, service will be available in the same service areas as specified for IntelliLight Shared Dual Path Service, as shown in Section 7.2.14(C)(2)(b).

## (H) Rate Regulations

(M)

- (1) Monthly rates, as set forth in Section 7.5.21 following, apply to IEF Terminations. The monthly rates are differentiated by the term plan and IEF Interface selected by the customer. Nonrecurring charges, as set forth in Section 7.5.21(C) following, apply to initial and subsequent installations of IEF Terminations.

(T)

(T)

- (2) Additionally, the monthly rates for IEF Terminations apply on a tapered schedule as set forth in Section 7.5.21(A) following. The monthly rate to be billed for each IEF Termination is based on the total number of IEF Terminations that are in-service on the bill date of each month, and applies on a per customer designated premises and per Billing Account Number (BAN) basis. To determine the total number of IEF Terminations for the bill period, the Telephone Company will count (i) all IEF Terminations; and (ii) all Telephone Company provided SONET entrance facilities that are provided in connection with a Telephone Company provided point-to-point SONET service or ethernet private line service that terminate at such customer designated premises, inclusive of all such IEF Terminations and SONET entrance facilities that are in service and billed under the same BAN.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.15 IntelliLight Entrance Facilities (IEF)# (Cont'd)

## (H) Rate Regulations (Cont'd)

(3) For example, a customer purchases five (5) IEFs that are in-service at three (3) different customer designated premises, with the 5 IEFs being billed under two (2) different BANs.

(a) The first customer designated premises has two (2) IEFs, one with fifteen (15) in-service STS1 IEF Terminations and the other with five (5) in-service STS1 IEF Terminations for a total of twenty (20) STS1 IEF Terminations. Both IEFs are billed under the same BAN. The monthly rate to be billed for each IEF Termination in the 2 IEFs at the first customer designated premises is the monthly rate shown for 20 STS1 IEF Terminations. Monthly rates for STS1 IEF Terminations are set forth in Section 7.5.21(A) following and apply in accordance with Section 14.8 following. (T)

(b) The second customer designated premises has two (2) IEFs, one with twenty (20) in-service STS1 IEF Terminations and the other with twenty-two (22) in-service STS1 IEF Terminations, for a total of forty-two (42) STS1 IEF Terminations. Each IEF at the second customer designated premises is billed under a separate BAN. The monthly rate to be billed for the IEF with 20 STS1 Terminations is the monthly rate shown for 20 STS1 IEF Terminations. The monthly rate to be billed for the IEF with 22 STS1 Terminations is the monthly rate shown for 22 STS1 IEF Terminations. Monthly rates for STS1 IEF Terminations are set forth in Section 7.5.21(A) following and apply in accordance with Section 14.8 following. (T)

(c) The third customer designated premises has one (1) IEF with nine (9) in-service STS1 IEF Terminations billed under the same BAN. The monthly rate to be billed for each such IEF Termination is the monthly rate shown for 9 STS1 IEF Terminations. Monthly rates for STS1 IEF Terminations are set forth in Section 7.5.21(A) following and apply in accordance with Section 14.8 following. (T)

(4) Monthly rates for electrical IEF Interfaces are set forth in Section 7.5.21(B) following and apply in accordance with Section 14.8 following. When a customer orders an IEF with an STS1 IEF Termination and an electrical interface, both the monthly rate for the electrical IEF Interface (as set forth in Section 7.5.21(B) following) and the monthly rate for the STS1 Termination (as set forth in Section 7.5.21(A) following) apply. The monthly rates are differentiated by the term plan selected by the customer. Nonrecurring charges as set forth in Section 7.5.21(C) following apply to each electrical IEF Interface installed. (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking#(A) General

(1) Verizon Optical Networking service provides managed optical transport of data signals of various speeds over the Telephone Company's shared network. Verizon Optical Networking architecture allows for point-to-point transmissions of varying bandwidths between customer designated premises or between a customer designated location and a collocation arrangement where a customer is provided Collocated Interconnection as described in Section 19 following.

(2) Verizon Optical Networking is provided where Telephone Company fiber optic facilities and equipment with sufficient bandwidth capacity permit.

(B) Service Description

(1) Verizon Optical Networking service consists of 3 components, an On-Net Channel Extension, an On-Net Channel Mileage, and an Access Aggregation Port.

(a) On-Net Channel Extension provides the communications path and interface termination from a customer's premises to the serving wire center or between the customer premises and the serving wire center where the customer has Collocated Interconnection Service pursuant to Section 19 following. The On-Net Channel Extension utilizes a Telephone Company optical network element at the customer-designated premises.

# Effective March 30, 2007, orders for new Verizon Optical Networking are no longer permitted. The Telephone Company will continue to provide Verizon Optical Networking pursuant to this Section 7.2.16 on any existing Verizon Optical Networking that is in-service as of March 30, 2007, or any order for Verizon Optical Networking that is placed with the Telephone Company prior to March 29, 2007 (collectively, Existing Verizon Optical Networking), subject to the following conditions:

a. For any Existing Verizon Optical Networking that is currently subscribed to a term plan (i.e., commitment periods of 1-, 3-, 5-, and 7-years), the Telephone Company will continue to provide the Existing Verizon Optical Networking for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer replaces the Existing Verizon Optical Networking with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Effective March 30, 2007, moves, additions and/or changes are not permitted.

b. For any Existing Verizon Optical Networking whose term plan expired prior to March 30, 2007, but the Existing Verizon Optical Networking continued on a month-to-month basis at prevailing rates, the Telephone Company will continue to provide the Existing Verizon Optical Networking until September 30, 2007, or until the customer replaces the Existing Verizon Optical Networking with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Effective March 30, 2007, moves, additions and/or changes are not permitted.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

## (B) Service Description (Cont'd)

(x)

(x)

- (b) On-Net Channel Mileage provides transport between two Telephone Company Serving Wire Centers (SWCs). On-Net Channel Mileage is measured in airline miles between the SWCs involved.
- (c) Access Aggregation Ports support multiple Ethernet, Fibre Channel, and/or FiCON signal(s) that are mapped into SONET at one end of the channel.
- (2) Verizon Optical Networking On-Net Channel Extensions may be available as protected or unprotected.
  - (a) For protected services, the Telephone Company will provision the service over diversely routed, self-healing architecture. Protected services allow for a near 100% availability and restoration in the event of a network failure.
  - (b) For unprotected services, the Telephone Company does not guarantee the service will be provisioned over diversely routed facilities.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (B) Service Description (Cont'd)

(4) The Access Aggregation Port will only be permitted at a customer designated premises. The Access Aggregation Port is not available to a Collocated Interconnection location.

(a) This port must utilize a SONET interface (i.e., OC3, OC12, OC48) at the point of demarcation at the customer designated premises. An Access Aggregation Port can only reside at one end of a Verizon Optical Networking circuit. The end of a Verizon Optical Networking circuit that is not assigned to an Access Aggregation Port must have a native Ethernet hand-off.

(5) Verizon Optical Networking service transmissions are provided in the following protocols/data interfaces:

- Ethernet: transmits Ethernet at 10 Mbps
- Fast Ethernet: transmits at 100 Mbps
- Gigabit Ethernet: transmits at 1 Gbps
- Ethernet Mapped to STS1
- Fast Ethernet Mapped to STS1
- Fast Ethernet Mapped to OC3c
- Gigabit Ethernet Mapped to OC3
- Gigabit Ethernet Mapped to OC12
- Gigabit Ethernet Mapped to OC12c
- Gigabit Ethernet Mapped to OC48
- Gigabit Fibre Channel Mapped to OC48
- Gigabit FiCON Mapped to OC48
- Verizon Optical Networking Services Mapped to OC3 Access Aggregation Port
- Verizon Optical Networking Services Mapped to OC12 Access Aggregation Port
- Verizon Optical Networking Services Mapped to OC48 Access Aggregation Port

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (B) Service Description (Cont'd)

- (5) Verizon Optical Networking services may connect to other Telephone Company services capable of transmitting the specified protocol.
- (a) A Verizon Optical Networking Ethernet mapped to STS1; Fast Ethernet mapped to STS1 and/or OC3c; Gigabit Ethernet mapped to OC3, OC12, OC12c and/or OC48 service may be multiplexed onto a port on a higher speed node of a Verizon Dedicated SONET Ring (DSR) service for transport over the higher bit rate DSR.
  - (b) A Verizon Optical Networking Ethernet mapped to STS1; Fast Ethernet mapped to OC3c; and/or Gigabit Ethernet mapped to OC12c service may be multiplexed on to an IBT service of a higher bit rate for transport.
  - (c) A Verizon Optical Networking Ethernet mapped to STS1; Fast Ethernet mapped to STS1 and/or OC3c; Gigabit Ethernet mapped to OC3, OC12 and/or OC12c service may be connected to an equal speed service of an IntelliLight Entrance Facility (IEF).
  - (d) A Verizon Optical Networking Fast Ethernet mapped to OC3c and/or Gigabit Ethernet mapped to OC12c service may connect to an equal speed Optical Transport Channel of an IntelliLight Optical Transport Service (IOTS) at a node on the IOTS ring.
  - (e) A Verizon Optical Networking Gigabit 50, 150, 300, 450 or 600 Mbps Partial Rate and/or Full Rate Ethernet service may be multiplexed onto a GigE port on a higher speed Enhanced Node of a Verizon Dedicated SONET Ring (DSR) service for transport over the higher bit rate DSR at an equivalent speed GigE.
  - (f) A Verizon Optical Networking Gigabit Full Rate Ethernet service may be connected to Gigabit Ethernet Optical Transport Channel of an IntelliLight Optical Transport Service (IOTS) at a node on the IOTS ring.

# Service availability limited. Refer to # footnote on Page 7-138.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (B) Service Description (Cont'd)

## (5) (Cont'd)

- (g) A Verizon Optical Networking Gigabit Fibre Channel and/or Gigabit FICON service may be connected to a Gigabit Fibre Channel and/or Gigabit FICON Optical Transport Channel via a node on an IntelliLight Optical Transport Service (IOTS) ring.
- (h) Gigabit 50, 150, 300, 450, or 600 Mbps Partial Rate and/or Full Rate Ethernet service may connect where a customer has a Collocated Interconnection arrangement pursuant to Section 19 following.
- (i) Reserved
- (j) A Verizon Optical Networking Full Rate Gigabit Ethernet service may connect, as native Ethernet to native Ethernet only, from a customer designated location to a wire center where connection to a Transparent LAN Service (TLS) Network-to-Network Interface (NNI) Port Only Connection occurs. Regulations, rates and charges for TLS NNI Port Only Connection are set forth in Section 16.11 of this Tariff for service provided in the State of New Jersey and in The Verizon Telephone Companies Tariff F.C.C. No. 20, Section 5, Part I, Section 5.3 for service provided in all other Telephone Company jurisdictions. An Ethernet-to-SONET mapped option is not available on any Verizon Optical Networking circuit which connects to a TLS NNI Port Only Connection.
- (k) A Verizon Optical Networking Full Rate Gigabit Ethernet service may connect, as native Ethernet to native Ethernet only, from a Collocated Interconnection Service (CIS) arrangement, as set forth in Section 19 following, to another wire center (i.e., other than the wire center where the CIS arrangement is provided) where connection to a TLS NNI Port Only Connection occurs. Regulations, rates and charges for TLS NNI Port Only Connection are set forth in Section 16.11 of this Tariff for service provided in the State of New Jersey and in The Verizon Telephone Companies Tariff F.C.C. No. 20, Section 5, Part I, Section 5.3 for service provided in all other Telephone Company jurisdictions. An Ethernet-to-SONET mapped option is not available on any Verizon Optical Networking circuit which connects to a TLS NNI Port Only Connection.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

## (C) Technical Specifications

The technical specifications for the protocols transmitted over Verizon Optical Networking are delineated in the following technical publications:

<u>Protocol</u>	<u>Publication</u>	
SONET	GR-253-CORE, Issue 4	(C)(x)
10Mbps Ethernet	IEEE 802.3-2005/Cor2/D2.0-2007	(C)(x) (C)(x)
100 Mbps Fast Ethernet	IEEE 802.3u-1995	(C)(x)
1 Gbps Gigabit Ethernet	IEEE 802.3z-1998	(C)(x)
1 Gbps Gigabit Fibre Channel	ANSI INCITS 303-1998 (R2003)	(C)(x)
1 Gbps Gigabit FiCON	ANSI INCITS 296-1997 (R2007)	(C)(x)

## (D) Terms and Conditions

- (1) A planning session is required prior to the submission of an order for Verizon Optical Networking. Verizon Optical Networking is available based on negotiated intervals as described in Section 5.2.1 preceding.
- (2) Where distance limitations affect the Telephone Company's ability to engineer end-to-end transport of some protocols, the Telephone Company will notify the customer that it cannot provide the requested service.
- (3) All signals generated by the customer's equipment (CPE/customer provided equipment) must meet industry standards and specifications. See (C) of this section preceding.
- (4) The customer is responsible to ensure that its equipment meets any applicable technical requirements or limitations for the protocol being transmitted.
- (5) The customer is responsible for any error detection and error correction of the data generated by its equipment.
- (6) The Telephone company assumes no responsibility for the quality of the signal generated by CPE and will deliver the signal in the format provided by the customer.

# Service availability limited. Refer to # footnote on Page 7-138.1.

- (x) ANSI INCITS 296-1997 (R2007) replaces ANSI X3.296 in its entirety.  
ANSI INCITS 303-1998 (R2003) replaces ANSI X3.303 in its entirety.  
GR-253-CORE, Issue 4, replaces GR-253-CORE, Issue 3, in its entirety.  
IEEE 802.3-2005/Cor2/D2.0-2007 replaces ANSI/IEEE X3.802.3 in its entirety.  
IEEE 802.3u-1995 replaces ANSI/IEEE X3.802.3U-1995 in its entirety.  
IEEE 802.3z-1998 replaces X3.802.3z in its entirety.

(Issued under Transmittal No. 1037)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (D) Terms and Conditions (Cont'd)

(7) When requested by the customer, one or more Verizon Optical Networking Ethernet, Fast Ethernet, Gigabit Ethernet, Gigabit Fibre Channel, and/or FiCON signal(s) may be mapped into a SONET signal. The options for mapping a single signal are:

(a) The options for mapping a single signal are:

- 10 Mbps Ethernet to STS1
- 100 Mbps Fast Ethernet to STS1 and/or OC3c
- 1 Gbps Gigabit Ethernet to OC3, OC12, OC12c, and/or OC48
- 1 Gbps Fibre Channel to OC48
- 1 Gbps FiCON to OC48

(b) The options for mapping multiple signals are:

- 10 Mbps Ethernet to OC3, OC12, and/or OC48
- 100 Mbps Fast Ethernet to OC3, OC12, and/or OC48
- 1 Gbps Gigabit Ethernet to OC3, OC12, and/or OC48
- 1 Gbps Fibre Channel to OC48
- 1 Gbps FiCON to OC48

(c) Only one end of a Verizon Optical Networking channel may be Ethernet-to-SONET mapped. The mapping of multiple signals requires placement of a Verizon Optical Networking Access Aggregation Port as described in (B)(4) preceding.

(d) An Ethernet-to-SONET mapped option is not available on any Verizon Optical Networking circuit which connects to a Collocated Interconnection arrangement pursuant to Section 19 following. A Verizon Optical Networking circuit which connects to a Collocated Interconnection arrangement is not allowed to connect to any other Telephone Company service. When a Verizon Optical Networking circuit connects to a Collocated Interconnection arrangement, no additional Channel Extension charges apply as a result of the connection to the Collocated Interconnection arrangement. When Verizon Optical Networking connects to a Collocated Interconnection arrangement, the Verizon Optical Networking circuit will be cross-connected to the Collocated Interconnection arrangement, and all rates and charges for such Collocated Interconnection arrangement as set forth in Section 19 following shall apply in addition to any charges for Verizon Optical Networking.

(e) The Aggregation port option is not available where cross-connection to a Collocated Interconnection arrangement occurs.

# Service availability limited. Refer to # footnote on Page 7-138.1.

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (D) Terms and Conditions (Cont'd)

- (8) Where facilities, conditions, and/or sufficient bandwidth capacity permit, the Telephone Company, upon customer request, may provide a diverse fiber path between the customer designated premises and its Serving Wire Center. Rates and charges may apply as specified in the Special Construction tariff.

## (E) Rate Regulations

- (1) Verizon Optical Networking is available for 1, 3, 5, and 7-year commitment periods/term plans.
- (2) The minimum service period for Verizon Optical Networking is one year.
- (3) Upon expiration of a commitment period, the customer may choose to continue service under a new commitment period or cancel service. If the customer does not choose one of these options, the Telephone Company will continue the service at the monthly rate for the original commitment period.

# Service availability limited. Refer to # footnote on Page 7-138.1.

(N)

(Issued under Transmittal No. 784)

Issued: March 15, 2007

Effective: March 30, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (E) Rate Regulations (Cont'd)

- (4) The customer has the option, within sixty (60) days prior to the expiration date for its commitment period, to extend its expiring Plan to a longer commitment period, for which time-in-service credit will be allowed for the expiring plan. The commitment period selected for the extended plan must be longer than the commitment period of the expiring plan, e.g., an expiring 1-Year Term may be extended to either a 3-Year, 5-Year, or 7-Year Commitment period. Time-in-service credit lessens the actual time commitment for the extended plan. For example, Time in Service Credit for an expiring 3-Year term plan applied toward a new 7-year plan equals a new commitment period of 4 years at the 7-year plan rate. The rate for the longer commitment period will apply effective with the first bill day following expiration of the commitment period for the existing plan and continue through the remainder of the commitment period associated with the extended plan. No adjustment for the increased discount associated with the extended plan will be made to the monthly rates already billed on the expiring plan.
- (5) A change in protocol of an On-Net Channel Extension is treated as a discontinuance of service and an installation of both, a new On-Net Channel Extension and the appropriate On-Net Channel Mileage, and will result in termination liability charges applied for the discontinuance of the existing service.
- (6) Monthly recurring charges (MRCs) apply for On-Net Channel Extensions, On-Net Channel Mileage, and Access Aggregation Ports.
- (7) The MRC for the Channel Extension applies per channel extension and at the specified term plan rate. The On-Net Channel Extension charge is also dependent on the type of facility interface provided.
- (8) The MRC for the Channel Mileage applies on a per mile basis for the airline miles between the Serving Wire Centers. When the mileage calculation results in a fraction of a mile, it is rounded up to the next whole mile.

# Service availability limited. Refer to # footnote on Page 7-138.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (E) Rate Regulations (Cont'd)

- (9) The MRC for the Access Aggregation Port applies per port and at the specified term plan rate. The Access Aggregation Port charge is also dependent on the type of facility interface provided.
- (10) Nonrecurring charges (NRCs) apply for the initial installation of On-Net Channel Extensions and Access Aggregation Ports.
- (11) When connecting Verizon Optical Networking services to other Telephone Company provided services, the rates and charges, and terms and conditions of the connecting services also apply.
- (12) The MRCs and NRCs for Verizon Optical Networking are listed in Section 7.5.25.
- (13) When connecting a Verizon Optical Networking circuit to a Collocated Interconnection arrangement pursuant to Section 19 following, the MRC for the Channel Extension that provides the communications path and interface termination from a customer's premises to the serving wire center will apply at the specified term plan rate, as set forth in Section 7.5.25 following. The MRC for the Channel Extension rate element will not apply at the CIS arrangement end of the service. The customer shall also be charged an MRC for the Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the Serving Wire Centers, if applicable. In addition to charges described herein, any other charges associated with connecting Verizon Optical Networking to a Collocated Interconnection arrangement are described in Section 19 following.
- (14) When a Verizon Optical Networking circuit is ordered from a customer designated premises to a wire center where connection to a TLS NNI Port Only Connection occurs, as set forth in Section 7.2.16(B)(5)(j) preceding, the Channel Extension rate element at the customer designated premises will apply at the specified term plan rate, as set forth in Section 7.5.25 following. The NNI Port Only Connection rate element will apply in lieu of the Channel Extension rate element at the TLS end of the service. The customer shall also be charged Verizon Optical Networking Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the Serving Wire Centers, if applicable.

# Service availability limited. Refer to # footnote on Page 7-138.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (E) Rate Regulations (Cont'd)

(15) When a Verizon Optical Networking circuit is ordered to connect a CIS arrangement pursuant to Section 19 following and a TLS NNI Port Only Connection in another wire center, as set forth in Section 7.2.16(B)(5)(k) preceding, the Channel Extension rate element will not apply at the CIS arrangement end of the service. The NNI Port Only Connection rate element will apply in lieu of the Channel Extension rate element at the TLS end of the service. The customer shall also be charged Verizon Optical Networking Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the serving wire centers. In addition to charges described herein, any other charges associated with connecting Verizon Optical Networking to a Collocated Interconnection arrangement are described in Section 19 following.

(16) When a Verizon Optical Networking circuit is ordered from a customer designated premises to a wire center where connection to a Telephone Company provided switched ethernet service network-to-network interface port only connection occurs, the Channel Extension rate element at the customer designated premises will apply. The switched ethernet service network-to-network interface port only connection rate element will apply in lieu of the Channel Extension rate element at the switched ethernet service end of the service. The customer shall also be charged Verizon Optical Networking Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the Serving Wire Centers, if applicable.

(N)

(17) When a Verizon Optical Networking circuit is ordered to connect a CIS arrangement pursuant to Section 19 following and a Telephone Company provided switched ethernet service network-to-network interface port only connection in another wire center, the Channel Extension rate element will not apply at the CIS arrangement end of the service. The switched ethernet service network-to-network interface port only connection rate element will apply in lieu of the Channel Extension rate element at the switched ethernet service end of the service. The customer shall also be charged Verizon Optical Networking Channel Mileage at the specified term plan rate on a fixed and on a per mile basis for the airline miles between the serving wire centers. In addition to charges described herein, any other charges associated with connecting Verizon Optical Networking to a Collocated Interconnection arrangement are described in Section 19 following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.16 Verizon Optical Networking# (Cont'd)

(T)

## (F) Termination Liability

- (1) Termination liability applies to On-Net Channel Mileage, On-Net Channel Extension, and Access Aggregation Port service components and applies when either is disconnected prior to expiration of the commitment period, i.e., term plan.
- (2) The termination liability charge is equal to 25% of the remaining monthly charges for the balance of the commitment period beginning with the date of disconnection or cancellation, and ending with the expiration date of the commitment period.
- (3) Termination liability applies in addition to any charges associated with satisfying the minimum period obligation.
- (4) When the service includes connection to another Telephone Company service, termination liability for the connecting service also applies in accordance with the regulations specified for that connecting service.
- (5) Termination liability will not apply if a customer changes its term plan to a longer commitment period as explained in (E) preceding.
- (6) Termination liability will not apply to the existing service when (1) a Verizon Optical Networking Ethernet service is upgraded to a higher bit rate Verizon Optical Networking Ethernet service, Fibre Channel service, and/or FiCON service (e.g., a Verizon Optical Networking Ethernet 10Mbps service is changed to a Verizon Optical Networking Ethernet 100Mbps service or to a Verizon Optical Networking Ethernet 1Gbps service), and (2) the new term is equal to or of greater length than the term for the terminating service.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Channel Interface and Network Channel Codes

This section explains the Channel Interface codes and Network Channel codes that the customer must specify when ordering Special Access Service. Included is an example which explains the specific characters of the code, a glossary of Channel Interface codes, impedance levels, Network Channel codes and compatible Channel Interfaces.

Example: If the customer specifies a MT Network Channel Code and a 2DC8-3 Channel Interface at the customer's premises, the following is being requested:

MT = Metallic Channel with a Predefined Technical Specification Package (1)  
 2 = Number of physical wires at customer premises  
 DC = Facility interface for direct current or voltage  
 8 = Variable impedance level  
 3 = Metallic facilities (DC continuity) for direct current/low frequency control signals or slow speed data (30 baud)

7.3.1 Glossary of Channel Interface Codes and Options

<u>Code</u>	<u>Option</u>	<u>Definition</u>	
AB -		accepts 20 Hz ringing signal at customer's point of termination	
AC -		accepts 20 Hz ringing signal at customer's end user's point of termination	
AH -		analog high capacity interface	
- B		60 kHz to 108 kHz (12 channels)	
- C		312 kHz to 552 kHz (60 channels)	
- D		564 kHz to 3084 kHz (600 channels)	
CT -		Centrex Tie Trunk Termination	
CX -		Digital Termination on a Switch	(N)
DA -		data stream in VF frequency band at customer's end user's point of termination	
DB -		data stream in VF frequency band at customer's point of termination	
- 10		VF for TG1 and TG2	
- 43		VF for 43 Telegraph Carrier type signals, TG1 and TG2	
DC -		direct current or voltage	
- 1		monitoring interface with series RC combination (McCullon format)	
- 2		Telephone Company energized alarm channel	
- 3		Metallic facilities (DC continuity) for direct current/low frequency control signals or slow speed data (30 baud)	

(Issued under Transmittal No. 347)

Issued: July 31, 2003

Effective: August 15, 2003

Vice President, Federal Regulatory  
 1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Channel Interface and Network Channel Codes (Cont'd)7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

<u>Code</u>	<u>Option</u>	<u>Definition</u>
DD -		DATAPHONE Select-A-Station (and TABS) interface at customer's point of termination
DE -		DATAPHONE Select-A-Station (and TABS) interface at the customer's end user's point of termination
DS -		digital hierarchy interface
- 15		1.544 Mbps (DS1) format per PUB 62411 and Supplement A plus D4
- 15B		1.544 Mbps (DS1) format per PUB 62411 and Supplement A plus D4 with B8ZS clear channel capability
- 15E		8-bit PCM encoded in one 64 Kbps of the DS1 signal
- 15F		8-bit PCM encoded in two 64 Kbps of the DS1 signal
- 15G		8-bit PCM encoded in three 64 Kbps of the DS1 signal
- 15H		14/11-bit PCM encoded in six 64 Kbps of the DS1 signal
- 15J		1.544 Mbps format per Technical Reference GR-54-CORE, Issue 1
- 15K		1.544 Mbps format per Technical Reference GR-54-CORE, Issue 1, plus extended framing format
- 15L		1.544 Mbps (DS1) with SF signaling
- 15S		1.544 Mbps (DS1) with B8ZS clear channel capability per Technical Reference Technical Reference GR-342-CORE, Issue 1, plus extended framing
- 44		44.736 Mbps (DS3)
44A		44.736 Mbps (DS3) unchannelized and C-Bit Parity per GR-342
44I		44.736 Mbps (DS3) with C-Bit Parity format
- 44L		44.736 Mbps (DS3) with SF signaling

(D)

(D)

7.3.2 Impedance

The nominal reference impedance with which the channel will be terminated for the purpose of evaluating transmission performance:

<u>Value (ohms)</u>	<u>Code(s)</u>
110	0
150	1
600	2
900	3+
135	5
75	6
124	7
Variable	8
100	9

- + For those interface codes with a 4-wire transmission path at the customer designated POT, rather than a standard 900 ohm impedance, the code (3) denotes a customer provided transmission equipment termination. Such terminations were provided to customers in accordance with the F.C.C. Docket No. 20099 Settlement Agreement. (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Channel Interface and Network Channel Codes (Cont'd)7.3.3 Digital Hierarchy Channel Interface Codes (4DS)

This interface is available to customers that select the multiplexed four-wire DSX-1 or higher facility interface option at the customer designated premises. Customers who have installed multiplexed DS1 systems to a Facility Hub and are connecting individual facilities to these systems to complete service arrangements will be requested to provide subsequent system and channel assignment data. Customers who request these interfaces in conjunction with other compatible non digital interfaces without system and channel assignment data will be provided service, where facilities permit, on Telephone Company DS1 Facilities Inventory. The various digital bit rates in the digital hierarchy employ the channel interface code 4DS9, 4DS0 or 4DS6 plus the speed options indicated below:

<u>Electrical Interface Code and Speed Option</u>	<u>Nominal Bit Rate (Mbps)</u>	<u>Digital Hierarchy Level</u>	
4DS9-15	1.544	DS1	(D)
4DS6-44	44.736	DS3	(D)

## ACCESS SERVICE

7. Special Access Service (Cont'd)  
7.4 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

7.4.1 Types of Rates and Charges

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. Additionally, certain Special Access rates and charges are applied based on "Price Cap" or "Price Bands". Price Cap rates may be further differentiated by "Rate Zones".

Rate Zones are defined in Section 2.6 and are listed in Section 14.6.

Competitive Counties and Non-Competitive Counties are defined in Section 2.6 and the wire centers within such counties are listed in Section 14.8. In wire centers within a Competitive County, monthly rates and nonrecurring charges for Special Access rate elements are arranged in price bands. The price band for each serving wire center within a Competitive County is specified in Section 14.8 following.

For Interexchange Carrier Point of Presence Channel Terminations, Channel Mileage and certain Optional Features and Functions ordered for such Interexchange Carrier Point of Presence Channel Terminations, including Multiplexing, Price Band rates and charges apply regardless of whether the county is Competitive or Non-Competitive. In cases where Channel Mileage crosses price bands, the charge for the higher numbered price band applies. (C)

For End User Channel Terminations and certain Optional Features and Functions ordered for such End User Channel Terminations (e.g., Bridging), the application of "Price Cap" or "Price Band" is dependent upon whether or not the serving wire center is located in a Competitive County. If the End User Channel Termination and related Optional Features and Functions are in a Competitive County, Price Band rates and charges apply. If the End User Channel Termination and related Optional Features and Functions are in a Non-Competitive County, Price Cap rates and charges apply. (C)

The three types of rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(Issued under Transmittal No. 1357)

Issued: November 16, 2017

Effective: December 1, 2017

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(A) Monthly Rates (Cont'd)

Temporary discount following the Events of September 11, 2001: For the period beginning October 19, 2001 through April 19, 2002, the Telephone Company will apply a ten percent (10%) discount to certain Special Access Services which are provided within the New York and New Jersey Corridor. The Telephone Company will apply the discount from October 19, 2001 or the date of installation whichever is the later date, through April 19, 2002 or until such time as the customer terminates the service or converts to a discount plan, whichever occurs first. The following requirements apply to be eligible for the discount.

- The service must be installed after the attack on New York on September 11, 2001; and
- The service must be ordered on a month-to-month (i.e., non-discounted) basis; and
- The service ordered is a DSO, DS1, or DS3 Special Access Service.

A customer electing to retain service beyond April 19, 2002 will be returned to full, non-discounted billing of its Special Access Service following the temporary discount period. At any time prior to, or after, expiration of the temporary discount period, the customer may elect any discount plan offered by the Telephone Company for the type of service being provided. The customer may also continue with the service on a month-to-month (i.e., non-discounted) basis.

Monthly rates for IntelliLight Optical Transport Service are billed (N)  
at Category I and Category II rates in accordance with (N)  
7.2.14(C)(4)(d)(11) preceding. (N)

---

(Issued under Transmittal No. 605)

Issued: August 1, 2005

Effective: August 16, 2005

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)

## (A) Monthly Rates (Cont'd)

## (1) Channel Termination Monthly Rates

The channel termination rate structure for DS3 High Capacity Services differs based upon whether or not the channel termination is at a Primary or Secondary Premises. A Primary Premises is a customer designated premises where a DS3 High Capacity Service circuit/channel is either originated or terminated. Only one end of the channel can be a Primary Premises. A Secondary Premises is any customer-designated premises other than the Primary Premises.

If one end of a DS3 High Capacity Service channel is either connected to or derived from a higher speed facility (e.g., DSR), the customer location with the DS3 High Capacity channel termination is classified as a Secondary Premises. When a DS3 High Capacity Service channel is provided with the Alternate Serving Wire Center optional feature, the alternately routed channel termination is considered to be at either a Primary Premises or a Secondary Premises, depending on the classification of the customer designated premises of the associated DS3 High Capacity Service channel termination. (T)

Monthly rates for DS3 High Capacity Services channel terminations at a primary premises apply on a tapered schedule as set forth in 7.5.9 following. The rate to be billed for each channel termination is based on a count of the total eligible Switched and Special Access channel terminations that are in service and in billing at the end of the bill period, whether provided on a month-to-month basis, under one or more term pricing plans, or a combination of both.

---

(Issued under Transmittal No. 640)

Issued: November 14, 2005

Effective: November 29, 2005

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005(T)  
(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(A) Monthly Rates (Cont'd)(1) Channel Termination Monthly Rates (Cont'd)

The following Switched and Special Access channel termination rate elements are eligible for inclusion in the Telephone Company's monthly count:

- DS3 High Capacity Special Access Services channel terminations (electrical or optical) at a primary premises as described herein;
- DS3 Switched Access Entrance Facilities channel terminations (electrical or optical) (as described in 6.8.1 preceding); and

Before the first billing period of each month, the Telephone Company will count all eligible DS3 High Capacity Special Access Services that are in service at a primary premises. The Telephone Company will then count all eligible DS3 Switched Access Entrance Facility channel terminations that are in service at that location as specified in 6.8.1 preceding. The results are added to obtain the total count for a particular customer designated premises and determines the applicable rate band. This step is repeated for each customer designated premises.

When a facility carries both Special Access and Switched Access Service under a Shared Use Arrangement as set forth in 7.4.8 following, each channel termination will be counted as either Special Access or Switched Access, but the total number of such circuits will be counted in determining the rate band charged.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(A) Monthly Rates (Cont'd)(1) Channel Termination Monthly Rates (Cont'd)

For example, the Telephone Company's total DS3 count for a customer taken before the first billing period of the month is 16. A customer has ten eligible DS3 High Capacity Special Access Services channel terminations and six eligible DS3 Switched Access Entrance Facilities in service at its premises. The applicable rate band for each category (Special or Switched) is band 16. During the month, each of the ten DS3 High Capacity Special Access Services is billed at the then effective rate under band 16 (for Special Access) and each of the six DS3 Switched Access Entrance Facilities is billed at the then effective rate under band 16 (for Switched Access).

The rate band determined by the last count taken shall be used to calculate all charges incurred by and credits due to the customer for DS3 High Capacity Special Access Services channel terminations established or discontinued during the preceding billing period. The count will not be adjusted for any reason for service order activity occurring after the count is made, including services that were installed prior to the count but were not in billing when the count was taken.

A secondary premises channel termination monthly rate applies to channel terminations at secondary premises locations.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(B) Daily Rates

Daily rates are flat recurring rates that apply to each 24 hour period or fraction thereof that a Video (Basic, SCVS and DVTs) Special Access Service is provided for part-time or occasional use. For purposes of applying daily rates, the 24 hour period is not limited to a calendar day. (D)

The application of daily rates for Video service during a consecutive 30 day period is as follows. Daily rates will be topped at an amount equal to the monthly rate (i.e., the charge to the customer for usage billed at daily rates will not exceed the monthly rate). For each day or part day of usage after the daily rates have been topped, a charge equal to 1/30th of the monthly rate will apply. (D)

Part-time or occasional Serial Component Video Service (SCVS) and/or Digital Video Transport Service (DVTs) provided within a consecutive 30-day period will be charged either the daily rate for each day provided or the monthly rate whichever is the lesser charge.

---

(Issued under Transmittal No. 1363)

Issued: December 18, 2017

Effective: January 2, 2018

Vice President, Federal Regulatory (T)  
1300 I Street, NW, Washington, DC 20005 (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation, change or rearrangement to an existing service). The types of nonrecurring charges that apply for Special Access Service are: installation of service, installation of optional features and functions, service changes, and service rearrangements. (D)

The nonrecurring charge rate structure applicable to the installation of access service may consist of "first" and "additional" charges, except for DS3 Service Entrance Facilities and Channel Termination, where only one rate applies. For each rate element ordered, the "first" charges apply to the first rate element (e.g., port or channel termination) specified on the service order. The "additional" charges will apply to each additional same-type rate element specified on the same service order, with the same date due, and at or between (A) the same end points, or (B) between or within the same-type multiplexed high capacity systems located in the same wire center and at or between the same end points. (D)

(Issued under Transmittal No. 1385)

Issued: November 30, 2018

Effective: December 15, 2018

Vice President, Federal Regulatory (T)  
1300 I Street, NW, Washington, DC 20005 (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(1) Installation of Service

For part-time Video Services, nonrecurring charges also apply for a Telephone Company technician to oversee the operation of service during an event for which the customer has ordered part-time Video Service and requested that a technician be present. The charge for a Telephone Company technician to oversee the operation of a part-time service during an event will be the same as the charge for Stand By Labor. The charge for Stand By Labor will apply per customer. When a single Telephone Company technician oversees the operation of part-time service(s) for more than one customer, the total charge to perform Stand By Labor will be divided equally between the customers involved. Stand By Labor charges are set forth in Section 13.2.6(B) following.

The nonrecurring charges apply to each rate element of the service installed. The nonrecurring charges for the installation of service are set forth in 7.5, 8, and 19.7 following as nonrecurring charges for Channel Termination, Termination, Transport Channel, Port Node Entrance Ring, Collocated Interconnection Cross-Connect Service or SPOT Bay Frame and Terminations rate elements, etc. (See Note below.)

When a newly installed service is added to a Commitment Discount Plan, or the National Discount Plan (as specified in Section 25.3 following), the Channel Termination nonrecurring charge which applies to such installed service is \$1.00.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(2) Installation of Optional Features and Functions

Separate nonrecurring charges apply for the installation of some of the optional features and functions available with Special Access Service. Except for SVS Video Bridging, the charge applies whether the feature or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service. The charge for SVS Video Bridging applies only when the optional feature or function is installed at any time subsequent to the installation of service.

Some optional features for which separate nonrecurring charges apply are:

- Voice Grade Data Capability
- SVS Video Bridging
- DS3 Premises Multiplexer

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Changes

Service changes are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.5 preceding (e.g., change from one type of Special Access Service to another or a change from one type of channel termination to another) or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service (i.e. type of service termination), Collocated Interconnection Cross-Connect Service or SPOT Bay Frame and Terminations, or in the type of High Capacity multiplexer (i.e., DS1 to Voice to DS1 to Digital) are treated as disconnects and starts. Changes in the physical location of the point of the termination at the customer premises are treated as moves and are described and charged for as set forth in 7.4.5 following. Certain changes in the physical location of the point of termination in a wire center are treated as rearrangements and are described and charged for as set forth in 7.4.1(C)(4) following. (C)

The charge to the customer for a service change is dependent on whether the change is administrative only in nature or involves actual physical change to the service.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(c) Nonrecurring Charges (Cont'd)(3) Service Charges (Cont'd)

Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same customer (i.e., same customer remains responsible for all outstanding indebtedness for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name -- e.g., AT&T-Long Lines to AT&T Communications),
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number),
- Change of agency authorization,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number,
- Change of jurisdiction, and
- Change of customer-designated circuit identification at customer's request.

All other service changes will be charged for as follows:

- If the change involves the addition of another leg to an existing multipoint service, the nonrecurring change charge for the channel termination rate element will apply. The charge will apply only for the leg that is being added.
- If the change involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.

---

(Issued under Transmittal No. 23)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Changes (Cont'd)

- If the change involves changing the type of signaling on a Voice Grade service, a charge equal to the Voice Grade channel termination rate element first nonrecurring change charge will apply. The charge will apply per service termination affected.
- If the change involves the addition of B8ZS and/or ESF options to an existing high capacity DS1 service, or the addition of a B8ZS to an existing high capacity DS3 service, a charge equal to the channel termination first non-recurring change charge will apply for each channel termination converted. This rate application does not apply when either of these options are initially ordered with the service.
- A change from a two-point Special Access Service without bridging to multipoint service or from a multipoint to two-point Special Access Service without bridging will be treated as discontinuance and installation of service.

(D)

|  
|  
|

(D)

- For all other changes, including the addition of optional features without separate nonrecurring charges, a charge equal to a channel termination rate element first nonrecurring change charge will apply. Only one such charge will apply per service, per charge.
- For changes involving the screening, or other end office features, associated with WATS Access Line Service, the following charge applies:

<u>Rate</u>	<u>USOC</u>
The rearrangement	NRBCX
charge specified in	
6.8.1(C)(3) preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(4) Service Rearrangements

Rearrangement charges apply as specified in 7.5 on a per-termination basis for the following service rearrangements: (C)(X)

- a) rearranging an existing subtending service from one port to another in the same multiplexer;
- b) rearranging an existing subtending service from one multiplexer to another like multiplexer in the same wire center;
- c) rearranging an existing service into a high capacity service multiplexer in the same wire center;
- d) rearranging an existing service into IntelliMux<sup>sm</sup> Service, in the same wire center;
- e) rearranging an existing service to a Collocated Interconnection Cross-Connect Service or SPOT Bay Frame and Terminations in the same wire center; (C)(X)
- f) rearranging a Collocated Interconnection Cross-Connect Service or SPOT Bay Frame and Terminations to a full point-to-point Special Access Service in the same wire center; and (C)(X)
- g) rearranging an existing service from a facility of one service provider to a like facility of another service provider in the same wire center, even when a change in the customer of record is necessary. (C)(X)

When services are rearranged as described above, the "Additional" level of price for the Rearrangement Charges may apply to all such rearranged services beyond the first without regard to their end-point locations, so long as they are all of the same service type, have the same date due, and are all being rearranged to the same multiplexer or IntelliMux<sup>sm</sup> Service as the service which is incurring the associated "First" Rearrangement Charge.

Certain regulations previously found on this page can now be found on Page No. 7-176.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(6) Coordinated Retermination

For 1.544 Mbps/DS1 High Capacity or 44.736 Mbps/DS3 High Capacity (excluding Short-Term DS3) moves of a primary circuit termination from one Telephone Company Central Office to another Telephone Company Central Office, the customer may pay a Coordinated Retermination Charge in lieu of treating the move as a discontinuance and start of service. The Coordinated Retermination Charge applies per circuit or DS1/DS3 equivalent circuit reterminated. The Telephone Company will coordinate the work activities required in order to minimize the length of time the service being moved is unavailable. Monthly rates will apply as if the circuit remained in service with no disruption. There will be no change in minimum period requirements. No termination liabilities will apply except where the retermination eliminates chargeable services such as IOF mileage or primary premises Channel Terminations for which specific termination liabilities exist.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service(A) General

Special access services provided under this tariff may be subject to the monthly Special Access Surcharge.

(B) Application

- (1) The Special Access Surcharge will apply to each interstate Special Access Service that terminates on an end user's PBX or other device where, through a function of the device, the Special Access Service interconnects to the local exchange network. Interconnection functions include but are not limited to wiring and software functions, bridging, switching or patching of calls or stations. The Surcharge will apply irrespective of whether the interconnection function is performed in equipment located at the customer's premises or in a Centrex Co-type switch.
- (2) Special Access Service will be exempted from the Surcharge by the Telephone Company upon receipt of the customer's written certification for the following Special Access Service terminations:
  - (a) an open-end termination in a Telephone Company switch of an FX line, including CCSA and CCSA-equivalent ONALs; or
  - (b) an analog channel termination that is used for radio or television program transmission; or
  - (c) a termination used for TELEX service; or
  - (d) a termination that by the nature of its operating characteristics could not make use of Telephone Company common lines; or
  - (e) a termination that interconnects either directly or indirectly to the local exchange network where the usage is subject to Carrier Common Line charges\* such as, where the private line facility access only FGA and no local exchange lines, or private line facility between customer points of termination, or private line facility connecting CCSA or CCSA-type equipment (inter-machine trunks); or

\* Resellers of WATS Access Line Service may be exempted from paying CCL Charges during the transition period of June 1, 1986 to January 1, 1987. However, they must certify for exemption of the Special Access Surcharge on the WAC.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(B) Application (Cont'd)

(f) a termination that the customer certifies to the Telephone Company is not connected to a PBX or other device that has not been blocked by either hardware or software partitioning restrictions from connecting the private line facility to a local exchange subscriber line.

(g) A termination of WATS Access Line Service which is used for resold WATS.

(C) Exemption of Special Access Service

(1) Special Access Services which are terminated as set forth in 7.4.2(B) preceding will be exempted from the Special Access Surcharge if the customer provides the Telephone Company with written exemption certification. The certification may be provided to the Telephone Company (1) at the time the Special Access Service is ordered or installed; (2) at such time as the service is reterminated to a device incapable of interconnection to local exchange facilities, or (3) at such time as the service becomes associated with a Switched Access Service that is subject to Carrier Common Line Charges.

(2) The exemption certification is to be provided by the customer ordering the services. The certification must be signed by the customer or authorized representative and include the category of exemption, as set forth in 7.4.2 (B) (3) preceding, for each termination, and the date which the exemption is effective.

(3) The customer shall also notify the Telephone Company when an exempted Special Access Service is changed or reterminated such that the exemption is no longer applicable.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(C) Exemption of Special Access Service (Cont'd)

- (4) The Telephone Company will work cooperatively with the customer to resolve any questions regarding the exemption certification. However, the Telephone Company reserves the right to request additional information from the customer, when necessary, to assure qualifications for exemption of the Surcharge are met. In addition, the Telephone Company may withhold exemption of the service until the dispute is resolved.
- (5) Any WATS resellers who had WATS lines in service as of March 13, 1986 will be exempted from the Special Access Surcharge for those lines only during the transition period of June 1, 1986 to January 1, 1987.

(D) Rate Regulations

- (1) The Surcharge applies to each channel of a Special Access Service and per voice grade equivalent service derived from a Special Access Service as shown in the following example:

<u>Special Access Service</u>	<u>Voice Grade Equivalent</u>	<u>Surcharge</u>	<u>Monthly Charge</u>
DS1	24	X \$25	= \$600.00

One Surcharge will apply for each termination of a multipoint Special Access Service at a customer's designated premises.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(D) Rate Regulations (Cont'd)

(2) The Telephone Company will bill the appropriate Special Access Surcharge to the ordering customer for each interstate Special Access Service installed unless exemption certification is provided as set forth in 7.4.2 (C) preceding.

(3) If a written certification is not received at the time the Special Access Service is obtained, the Surcharge will be applied. Exempt status will become effective on the certification date indicated by the customer, subject to the regulations set forth in (4) following.

## (4) Crediting the Surcharge

Payment of any Special Access Surcharge billed on WATS Access Lines, in service as of June 1, 1986, may be deferred, without penalty, for up to ninety (90) days from the date of the first bill rendered for the Special Access Surcharge.

If appropriate exemption certification is not received by the Telephone Company by the end of the ninety (90) days deferral period, the billed Special Access Surcharges will become due. These charges, if unpaid, will be subject to a late payment charge as set forth in Section 2.4.1 (B)(2) preceding.

The Telephone Company will cease billing the Special Access Surcharge when certification, as set forth in 7.4.2 (C) preceding, is received. If the status of the Special Access Service was changed prior to receipt of the exemption certification, the Telephone Company will credit the customer's account, not to exceed ninety (90) days, based on the effective date of the change as specified by the customer in the letter of certification.

When the customer orders DS3 Premises Multiplexer as set forth in Section 7.2.9(D)(8) preceding, the Special Access Surcharge will apply to the DSIs that are derived from the DS3 Premises Multiplexer unless written certification is provided in accordance with this Section 7.4.2. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.3 Message Station Equipment Recovery Charge

The Message Station Equipment Recovery Charge is a charge to recover that portion of message station equipment that is assigned to Special Access Service.

Pursuant to CC Docket No. 83-1145 Memorandum Opinion and Order adopted by the Federal Communications Commission on November 8, 1984 and released on November 9, 1984, this charge is assessed only to those customers to which the Special Access Surcharge applies. The rate for the Message Station Equipment Recovery Charge is set forth in 7.5.13 following.

Payment of any Message Station Equipment Recovery Charge billed on WATS Access Lines, in service as of June 1, 1986, may be deferred, without penalty, for up to ninety (90) days from the date of the first bill rendered for the Message Station Equipment Recovery Charge.

If appropriate exemption certification is not received by the Telephone Company by the end of the ninety (90) days deferral period, the billed Message Station Equipment Recovery Charge will become due. These charges, if unpaid, will be subject to a late payment charge as set forth in Section 2.4.1 (B)(2) preceding.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.4 Minimum Periods

- (A) The minimum service period for all services except part-time and occasional Video, Multichannel Video, Serial Component Video Service, Digital Data Service, LAN Extension Service, and DS1 and DS3 High Capacity is one month. (D)
- (1) The minimum service period for part-time and occasional Video (Basic, SCVS and DVTS) services is one day (i.e., a continuous 24-hour period, not limited to a calendar day).
- (2) The minimum service period for Multichannel Video service, Serial Component Video Service, and Video Switch arrangements is one year.
- (3) The minimum service period for DVTS is three months except when 45 Mbps DVTS includes the optional CODEC, then the minimum service period for the 45 Mbps DVTS is one year.
- (4) The minimum service period for Digital Data Service and DS1 High Capacity services is two months.
- (5) The minimum service period for a DS3 High Capacity service or an ISSP that is provided under a month-to-month payment plan is one year. (D)  
(D)
- (6) The minimum service period for LAN Extension Service is 3 years. (T)
- (B) The minimum service periods for IntelliLight services are set forth as stated below:

<u>Service</u>	<u>Section</u>
DSR	23.1
ISDP	7.2.14(C)(2)(a)
ISAN	7.2.14(C)(3)(a)
IOTS	7.2.14(C)(4)(d)
IEF	7.2.15(E)
IBT	8.2(C)(1)
ISSP	8.3(C)(1)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.5 Moves

A move involves a change in the physical location of the customer's premises which also involves a connection to a different rate demarcation point.

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

(A) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the first nonrecurring (i.e., installation) charge for the service termination affected. There will be no change in the minimum period requirements.

(B) Moves To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period and/or Service Discount Plan requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period and/or termination liability charges for the discontinued service except as specified in 25.2.5 following.

Certain material previously found on this page can now be found on Original Page 7-178.1.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.6 Mileage Measurement(A) General

The mileage to be used to determine the monthly rate for the Channel Mileage is calculated on the airline distance between the locations involved, i.e., the serving wire centers associated with two customer designated premises, a serving wire center associated with a customer designated premises and a telephone Company Hub\* or two Telephone Company Hubs\*. The serving wire center associated with a customer designated premises is the serving wire center from which the customer designated premises would normally obtain dial tone unless Alternate Serving Wire Center is also provided as described in 7.2.9(D)(7) preceding.

(C)

Mileage is shown in 7.5 following in terms of a per mile structure. To determine the rate to be billed, first compute the mileage using the V&H coordinates method, as set forth in the Exchange Carrier Association Tariff F.C.C. No. 4, and apply the rates. When the calculation results in a fraction of a mile, always round up to the next whole mile before applying the rates.

When Hubs\* are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., customer designated premises serving wire center to Hub, Hub to Hub and/or Hub to customer designated premises serving wire center. However, when any service is routed through a Hub for purposes other than customer specified bridging, multiplexing or IntelliMux<sup>SM</sup> Service (e.g., the Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the customer designated premises.

(C)

\* Includes connection to or between locations where IntelliLight Broadband Transport (IBT) multiplexing capability occurs as described in Section 8.2(B)(3) following.

(T)

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs\*

A customer has the option of ordering Voice Grade facilities or analog or digital high capacity facilities (i.e., Group, Supergroup, Mastergroup, DS1 or DS3) to a facility Hub for distributing or channelizing to individual services requiring lower capacity facilities (e.g., Voice, etc.), except for Video which are always ordered to a hub although they do not require multiplexing. (D)

When analog or digital high capacity facilities are provided between a customer premises and a facility Hub, the facility will not be considered an end-to-end service until an associated channelized service is installed. The facility Hub will not be considered as a customer premises.

Different locations may be designated as Hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. When ordering the customer will specify the desired multiplexing Hub(s) selected from the Exchange Carrier Association Tariff F.C.C. No. 4. This Tariff identifies the type(s) of multiplexing functions which are available and the serving wire centers at which they are available. Locations that provide multiplexing of IntelliLight Broadband Transport (IBT) Services are described in Section 8.2(B)(3) following.

When a DS3 High Capacity Service is multiplexed at a customer designated premises, such configuration is not a Telephone Company Hub for purposes of administering the terms and conditions of this tariff.

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a Hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Voice Grade, not High Capacity.

\* Includes connection to or between locations where IntelliLight Broadband Transport (IBT) multiplexing capability occurs as described in Section 8.2(B)(3) following.

(Issued under Transmittal No. 1385)

Issued: November 30, 2018

Effective: December 15, 2018

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs\* (Cont'd)

(C)

The Telephone Company will commence billing the monthly rate for the facility to the Hub on the date specified by the customer on the service order. Additional individual services utilizing these facilities may be installed coincident with the installation of the facility to the Hub, or may be ordered and/or installed at a later date, at the option of the customer. The customer who orders the High Capacity Service must order all associated individual Access Channelized Services. The customer will be billed for a Voice Grade or a high capacity analog or digital Channel Termination, Channel Mileage (when applicable), and the multiplexer at the time the facility is installed. Additional individual service rates (by service type) will apply for a Channel Termination and for additional Channel Mileage (as required) for each subsequent channelized service. These will be billed to the customer as each individual service is installed.

Cascading multiplexing occurs when a high capacity analog or digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a Supergroup facility is de-multiplexed to five Group facilities and then one of the Group facilities is further de-multiplexed to individual Voice Grade channels.

When cascading multiplexing is performed whether in the same or a different Hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different Hubbing locations, Channel Mileage Charges also apply between the Hubs.

In the cascading multiplexing arrangements described above, specific NCI codes may be used in conjunction with the individual multiplexed services at the Hub in order to identify the technology hierarchy employed in the total service arrangement.

\* Includes connection to or between locations where IntelliLight Broadband Transport (IBT) multiplexing capability occurs as described in Section 8.2(B)(3) following. (N)

(T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs\* (Cont'd)

Although not requiring multiplexing, the Telephone Company will designate certain Hubs for Video Services. Full-time service will be provided between a customer designated premises and a Hub and billed accordingly at the monthly rates forth in 7.5.4 and 7.5.5 following for a Channel Termination, Optional Features and Functions, and Channel Mileage, as applicable. The customer may order part-time and occasional Video services as needed between that Hub and a second customer designated premises. The rate elements required to provide the part-time or occasional service (i.e., Channel Termination, Optional Features and Functions, and Channel Mileage, as applicable) will be billed at daily rates for the duration of the service requested. (D)

\* Includes connection to or between locations where IntelliLight Broadband Transport (IBT) multiplexing capability occurs as described in Section 8.2(B)(3) following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use Digital High Capacity Services

(D)

Shared use occurs when Special Access Service and Switched Access Service are provided over the same High Capacity Special Access Service through a common interface. The facility will be ordered, provisioned and rated as Special Access Service (i.e., Channel Termination, Channel Mileage as appropriate, and Multiplexer and a terminating channelized individual service by Channel Type, and Channel Mileage, as appropriate) until such time as the customer chooses to use a portion of the available capacity for providing Switched Access Service. In certain Shared Used cases, the customer for the Special Access Service and Switched Access Service may be different. A Switched Access customer may, with proper authorization, order Switched Access directly to the Special Access customer's DS1 to VG multiplexer. In situations where the Switched Access order consists of 24 same Line-side or Trunk-side Switched Access connections between the same End Office and/or Tandems, the Switched Access customer may, with proper authorization, order directly to a DS1 port on a DS3 multiplexer.

(D)

When individual channels on a DS3 Service Arrangement are activated for Switched Access Service, the rates for DS1 Channel Terminations, DS3 Standard Channel Terminations, IntelliLight Entrance Facilities, IEF Interfaces (DS1, DS3 and STS1), and the associated mileage and Multiplexing services will be reduced, based on their rates and capacity, accordingly (e.g., 1/24th for a DS1 service, 1/672nd for DS3 service or ISSP service, etc.). All of the above DS3 service rate elements are subject to the provisions of Section 7.4.13 (E), following. This reduction provision does not apply to channels used to provision WATS Access Line Service since it is Special Access.

In the case of IOTS as specified in 7.2.14(C)(4) preceding, the monthly rate for the Special Access IOTS Service ring mileage, node, and network optimization rates will be reduced accordingly based on the total channel capacity of the IOTS ring and the monthly rate for the equivalent Switched Access ring mileage, node and network optimization rate elements will apply. The total channel capacity for an IOTS ring is measured in terms of the total number of optical transport channels that can be transported over the ring.

When a Special Access DS1 Service or Special Access DS3 Service is part of a Shared Use Arrangement, and such service is also included in a National Discount Plan (NDP) as set forth in Section 25.3 following, the NDP discounts as set forth in Section 25.3.5 following must be applied before any rates are reduced or applied under this Section 7.4.8.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use Digital High Capacity Services (Cont'd)

Switched Access Service rates and charges as set forth in 6.8 preceding will apply for each channel of the shared use facility that is used to provide Switched Access Service. Where Special Access Service is provided utilizing a channel of the shared facility to the Hub or High Capacity rates and charges will apply for the facility to the Hub as set forth preceding and individual service rates and charges will apply from the Hub to the customer designated premises. The rates and charges that will apply to the portion from the Hub to the customer designated premises will be dependent on the specific type of Special Access Service that is provided (e.g., Voice Grade, etc.) The applicable rates and charges will include a Channel Termination rate and Channel Mileage, if applicable. Rates and charges for optional features and functions, if any, will apply as set forth in 7.5 following. The customer must place an order for each individual Switched or Special Access Service utilizing the Shared Use Facilities and specify the channel assignment for each such service. (D)

Should the customer displace (reduce) the entire capacity of the Special Access High Capacity Service with Switched Access Service, the Special Access Service will, for billing purposes, be considered disconnected. Any future capacity due to a customer's disconnect of Switched Access Service will be considered Telephone Company inventory. Should the customer subsequently order Special Access Service, this will be treated as a new order and full rates and charges for the Special Access Service type ordered, as set forth in 7.5 following will apply.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.10 Special Access Rate Exceptions

When providing the Special Access portion of an FX/ONAL service to connect a customer to the FX/ONAL dial tone office, for jointly provided corridor service, only the channel mileage rate element, a single channel termination and optional features and functions will apply. Regulations as specified in 2.4.7 apply in determining the percent of channel mileage applicable in the dial tone office LATA. In addition, and where appropriate, all other rate elements normally applicable to Special Access Service(s) as specified in this tariff may apply.

Services provided by the Telephone Company to connect a customer location to an Internet Protocol Routing Service Concentrator or Packet Data Network Switch will be rated as channel termination and, when the customer is normally served by a different serving office, channel mileage applies from the normal serving office to the concentrator or the switch serving office. No channel termination applies at the switch serving office. (D)

Services provided by the Telephone Company to connect a customer location to an Interim Exchange Access Switched Multi-Megabit Data Service Switch (I-XASMDS) and a Interexchange Access Frame Relay Switch (XA-FRS) will be rated as a channel termination. A channel termination at the I-XASMDS and the XA-FRS switch serving office and channel mileage from the customer serving wire center to the I-XASMDS and XA-FRS switch are not applicable under the provisions of this service. (D)

Certain terms and conditions and rates associated with the provision of Telephone Company services may be waived or excepted. These individual instances of terms and/or conditions exemptions are contained in Section 7.4, following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services(A) Payment Plans and Minimum Periods

Recurring charges for DS3 Services are rated and charged monthly for all commitment plans; Month-to-Month, 3 and 5-year Term Pricing Plans (TPPs). TPPs are provided with Base Rates as described in Section (B) following and as set forth in 7.5.9 following.

The minimum service period for DS3 is 12 months.

(D)

Additionally, the DS3 to DS1 Central Office Multiplexing and DS3 Premises Multiplexer optional features and functions are also available on a 3 or 5-year Term Pricing Plan. When ordered, a 3 or 5 year TPP for the multiplexing feature must have the same term period as the associated service, and it is always assigned an expiration date that is coterminous with the associated service.

At the end of a term plan, the customer will not be eligible to receive discounted monthly charges unless the TPP commitment is renewed. Customers with TPPs that have expired prior to December 2, 1999, will be able to retain their service at the prevailing rates for as long as the customer retains the service.

Should a customer terminate service prior to completing the minimum period or the plan term period, termination liability may be applicable. Termination liability is assessed on channel terminations, fixed and per mile mileage, and multiplexing rate elements. Liability for terminations at a primary premises is calculated based upon the rate band determined by the last count taken. A customer who downgrades a term plan to shorter duration, changes the system configuration (i.e., Optical to Electrical) or disconnects the service will be treated as having terminated the service.

In addition to TPP, a customer may select (i) a Commitment Discount Plan (CDP), subject to the terms and conditions set forth in Section 25.1 following; or (ii) a National Discount Plan (NDP), subject to the terms and conditions set forth in Section 25.3 following.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services(B) Base Rates

The rates charges under 3-Year and 5-year TPPs are based upon Base Rates as specified in Section 7.5.9 following. Such rates may change during the commitment period, but in no case will the Base Rate exceed the non-discounted monthly rate for the service. In order to calculate the rates the customer will pay, the following discount percentages are applied to the Base Rates Monthly Rate Per CT for 3-Year and 5-Year TPPs for DS3 High Capacity Channel Terminations, Channel Mileage, and Optional Features and Functions. Discount percentages are not applied to nonrecurring rates.

3-Year	10%
5-Year	35%

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services (Cont'd)(C) Discontinuance Without Liability

A customer may discontinue a term plan without penalty by entering the same system configuration into a new term plan of equal or greater length prior to the expiration of the plan.

A customer may discontinue a term plan without liability if the service is upgraded (changed to a higher bandwidth/capacity service or to a higher speed service) through aggregation of existing services or service additions, and agrees to a new term plan of equal or greater length. Any additional services or circuits added to make up the upgrade will be subject to all applicable nonrecurring charges.

Termination liability will not apply when a customer meets the requirements for "portability". Portability is the replacement of a service under a DS3 Term Pricing Plan (TPP) with another service for the balance of the TPP commitment period. Portability requirements are as follows:

- The TPP service to be discontinued must have been in service for a minimum of 1 year.
- The replacement service must be of the same speed or type, and must not already be in a Term Pricing Plan.
- The orders to accomplish the replacement are placed with the Telephone Company at the same time with due dates within 90 days of each other, and are related by a Related Purchase Order Number.
- The quantities associated with the replacement are equal to or greater than the disconnected service.
- The replacement service is subject to any applicable nonrecurring charges.
- A request to disconnect DS3 High Capacity Service in order to replace it with a Replacing Service pursuant to the Technology Migration regulations set forth in Section 2.9 preceding. (N)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services (Cont'd)(C) Discontinuance Without Liability (Cont'd)

In the event that the Telephone Company initiates a rate increase and the total discounted monthly rate for the affected service increases by eight percent (8%) or more, the customer may cancel its TPP for the affected service without termination liability. The customer must exercise its option to cancel the TPP for the affected service within thirty (30) days of the date of the effective rate increase. Additionally, any existing TPP customer that experienced an increase in its total discounted monthly rate for a service between June 1, 1999 to January 11, 2000 may also exercise this option. The customer must notify the Telephone Company of its intent to exercise this option by February 10, 2000.

A customer may cancel a term plan on its DS3 High Capacity Services without penalty in order to include such DS3 High Capacity Services in a Commitment Discount Plan (as set forth in Section 25.1 following) or the National Discount Plan (as set forth in Section 25.3 following).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services (Cont'd)(D) Discontinuance With Liability

For service discontinued prior to completion of the minimum service period, the customer will be liable for 100% of the total monthly charges for the unexpired portion. Total monthly charges are calculated based upon the rate band determined in the last count taken.

(M)

DS3 Term Pricing Plans are provided in conjunction with an Early Termination Provision (ETP) agreement. ETP is calculated using either of the following options that provides the customer with the lowest termination liability.

Option I

- In addition to the minimum period liability of 100%, the customer will be liable for 15% of the total monthly charges for the remaining portion of the term plan.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 DS3 High Capacity Services (Cont'd)(D) Discontinuance With Liability (Cont'd)Option II

In addition to the minimum period liability of 100%, the following applies:

- Where there is neither a basic Month-to-Month rate nor a TPP period less than the actual time the service has been in effect, Option 1 applies.
- Where there is no TPP period less than the actual time the service has been in effect, the termination liability charge will be the difference between the full basic Month-to-Month rate and the selected TPP monthly rate for the period the plan has been in effect after the minimum period.
- Where there is a TPP period less than the actual time the service has been in effect, the termination liability charge will be the difference between the monthly rate for the highest TPP period that could have been satisfied prior to discontinuation of the service and the monthly rate for the selected commitment period multiplied by the actual number of months the plan has been in effect after the minimum period.

(D)

(D)

(E) Shared Use

DS3 service arrangements in shared use situations must have at least one channel of Special Access service to be billed as a Special Access facility.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.14 Shared Network Arrangement

Each customer entering into a Shared Network Arrangement is solely responsible to Bell Atlantic for charges associated with that customer's portion of the shared network. Disconnection of service by the host subscriber does not relieve another user of the network of any obligation to pay access charges associated with the portion of the shared network to which that user subscribes. Billing for services and facilities will continue until a disconnect request from the service user has been received by Bell Atlantic. The host subscriber is solely responsible for notifying the connecting service user in the event of disconnection of the host service which affects that portion of the shared network service to which the user has subscribed.

For administrative purposes, one "Arrangement" under the Shared Network Arrangement offering shall be limited to the agreement between one Host Subscriber and one Service User permitting the Service User to connect a specified number of subtending circuits to one specified multiplexer on the Host's service. Agreements between one Host Subscriber and two (or three, etc.) Service Users shall be deemed to comprise two (or three, etc. respectively) separate "Arrangements." However, an agreement to expand the scope of an existing Arrangement by subsequently increasing the number of subtending circuits on the same multiplexed shall not constitute a new or separate "Arrangement."

A Shared Network Arrangement shall be established between a Host Subscriber and a Service User upon the completion of the service order for the first circuit(s) in the arrangement. No Shared Network Arrangement shall be deemed to be in effect until at least one subtending circuit has been installed for the Service User. A Shared Network Arrangement shall be deemed cancelled when the last subtending circuit has been disconnected.

A Processing Charge does not apply for Service User Integrated Optical Service Rider order(s) processed for a Shared Billing Arrangement. A Processing charge will apply for handling all other service orders in a Shared Network Arrangement. The Processing Charge is contained in Section 7.5.9(D), and applies in addition to all other applicable rates and charges.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.15 Lightwave Facilities

## (A) Service Period

Lightwave Facilities are offered only on a month-to-month basis with a one year minimum service period. A customer who moves their facility to another premises, changes from a 4 fiber service to a 12 fiber service or the reverse, or changes the facility to a service (i.e., Lightwave Facilities to a high capacity DS3 service) will be treated as having terminated as having terminated the facility.

For service discontinued prior to the end of the one year service period, the customer will be liable for 100% of the total monthly charges at the then-prevailing rate for the unexpired portion of the minimum service period.

Notice of discontinuance must be given by the customer at least thirty days prior to actual discontinuance. Monthly charges will apply for a period of thirty days from the date the Telephone Company receives discontinuance notification or until the requested discontinuance date, whichever period is longer.

## (B) Discontinuance Without Liability

All Lightwave Facilities termination charges shall be waived and no charges or penalties shall apply if the Lightwave Facilities offering is withdrawn from the tariff by the Telephone Company.

## (C) Rate Categories

There are only two basic rate categories which will apply to Lightwave Facilities: 1) a nonrecurring installation charge applied per point of termination and 2) a Per Mile-Channel Mileage charge which is based on actual facility route miles, or fraction thereof, and is measured from premises to premises. Calculations resulting in a fraction of a mile will be rounded up to a whole number. These rates are as shown in 7.5.10, following. Actual provisioning of end-to-end Lightwave Facilities may differ from the description of rate categories as stated in Section 7.1.2, preceding.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.15 Lightwave Facilities (Cont'd)

## (D) Rate Application

Lightwave Facilities are only provisioned in point-to-point configurations which connect two customer designated premises.

## (E) Facilities Conversion

ICB dark fiber facilities which are converted to Lightwave Facilities will not be re-engineered or modified in any way. Currently existing multimode ICB dark fiber facilities will be left in-place and not replaced. Existing multimode facilities which remain in service after the expiration of their associated ICB will be rated at the general Lightwave Facilities rates and will be subject to the same terms and conditions.

Currently existing dark fiber offerings which are converted will be charged based upon the number of fibers involved; e.g., existing customers having three (3) fibers or less will be rated at the four strand fiber rates. New orders for Lightwave Facilities will be permitted in quantities of four and twelve fiber arrangements, or multiples thereof, only.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Video Service Arrangements

## (A) Minimum Service Period

Multichannel Video Service and Advanced Video Switching provisioned as a dedicated switching arrangement are only offered on a long term basis, 5 and 10-year term plans. The minimum service period is one year for all service periods and all are subject to termination liability. (D)

At the expiration of an existing term or payment plan, customers will be automatically converted to a new one year minimum service period at the then prevailing rate unless the customer gives written notice within 90 days of the expiration of the existing plan period to the telephone company of its intention to terminate service. After the expiration of an existing service period, contracts can only be renewed for minimum one year term period.

Advanced Video Switching provisioned through a shared switching arrangement is offered on a month-to-month basis or under 1-year, 3-year, and 5-year term plans. The minimum service period for month-to-month service is one month. The minimum service period for term plans is one year and service provided under a term plans is subject to termination liability.

## (B) Terms and Conditions

For a Multichannel Video Service, the customer must specify the number of channels per service arrangement. Premises to premises arrangements are available in 3 to 8 channel arrangements; premise to Hub arrangements are available in 4 to 8 channel arrangements.

A customer must maintain the minimum number of channels per Multichannel Video Service arrangement or disconnect the service. Additional channels may be added or deleted during the life of the contract subject only to a one year minimum service guarantee for that particular channel (see termination liability following). All channels associated with a given arrangement are in the same term plan.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.16 Video Service Arrangements (Cont'd)

(B) Terms and Conditions

A change from Basic Video Service to Multichannel Video Service or vice versa requires a complete disconnect and a new service order for installation.

A move of any video service to another video hub/TVOC will be treated as a disconnect and new service orders.

(C) Termination Liability

Term plans for Multichannel Video and Advanced Video Switching are subject to termination liability for early discontinuance. (D)

(This page filed under Transmittal No. 1357)

Issued: November 16, 2017

Effective: December 1, 2017

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Video Service Arrangements (Cont'd)

## (C) Termination Liability (Cont'd)

With the exception of Advanced Video Switching provisioned through a shared switching arrangement on a month-to-month basis, notice of discontinuance must be given by the customer at least three months prior to actual discontinuance. Monthly charges will apply for a period of three months from the date the Telephone Company receives discontinuance notification or until the requested discontinuance date, whichever period is longer.

## (1) Five and Ten-year Term Plans

For contracts discontinued prior to the first year of the initial five or ten year period, the customer will be liable for 100% of the total monthly charges at the then-prevailing rate for the unexpired portion of the first year. In addition the customer will be responsible for 15% of the total monthly charges for the remaining portion of the 5-year period, or 10% of the total monthly charges for the remaining portion of the 10-year period.

For contracts discontinued beyond the first year of the initial contract period, the 5 year plan customer will be liable for 15% and the 10 year plan customer will be liable for 10% of the total monthly charges for the remaining portion of the initial period or of the one-year renewal period as is applicable.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Video Service Arrangements (Cont'd)

## (D) Discontinuance Without Termination Liability

A customer may discontinue a 5 or 10-year term plan for a Multichannel Video Service and/or Advanced Video Switching without termination liability should the applicable tariff rates increase more than 8% in any year and the customer provides notice of discontinuance within thirty (30) days after the effective rate increase. (T)

A change to a new Video Service term plan of equal or greater value in revenue than the remainder of the present Multichannel Video term plan will not be subject to termination liability. (T)

Customers who upgrade to a larger Video Switch Arrangement will not be subject to termination liability. However, the upgrade is subject to all applicable nonrecurring charges, and a new service period.

Advanced Video Switching customers who change from a shared switching arrangement to a dedicated switching arrangement will not be subject to termination liability. However, the change is subject to all applicable nonrecurring charges, and a new service period. (N)

Advanced Video Switching customers may at any time prior to the expiration of a 5-year term plan, change to a longer-term plan without termination liability. Time in-service credit for the old/cancelled plan is applied to the new extended plan. The rate for the new longer commitment period applies effective with the first bill date following extension of the commitment period and continue through the remainder of the commitment period of the new term plan. No adjustment for the increased discount associated with the extended plan will be made to the monthly rates already billed on the old/cancelled plan. (T)

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services#

(T)

(A) Basic Service

The minimum service period for basic Digital Data Service (DDS) and DS1 High Capacity Service (DS1) is two months. When service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the two-month minimum period.

Customers may, at any time, change their basic DS1 High Capacity service payment option to a DS1 Term Payment Plan without assessment of the minimum period service charge. (C)

(B) Term Pricing Plans (TPP) Description

Term Pricing Plans are pricing options available to customers who subscribe to specific longer term commitment periods in exchange for reduced monthly rates.

(1) TPPs for Digital Data Services are available in 2, 3, and 5-year commitment periods. DS1 High Capacity Services are available in 2, 3, 5, and 7-year commitment periods.

(2) Customers have the option of purchasing channel terminations under one plan and channel mileage under another plan, or under the basic service plan. TPPs are available subject to the following:

- Digital Data Service plans are applicable to channel terminations and channel mileage. The fixed and per mile rate elements for a given circuit must be included in the same individual Term Pricing Plan.

# Effective November 16, 2018, orders for new Digital Data Service TPPs are no longer permitted. The Telephone Company will continue to provide Digital Data Service TPPs pursuant to this Section 7.4.17(B) on any existing Digital Data Service TPP that is in-service as of November 16, 2018, or any order for Digital Data Service TPP that is placed with the Telephone Company prior to November 16, 2018 (collectively, Existing DDS TPPs), subject to the following conditions: (N)

- The Telephone Company will continue to provide Existing DDS TPPs for the selected commitment period until (i) the customer discontinues service; (ii) the customer converts to a DDS provided on a month to month basis under Section 7.4.17(A); or (iii) the current commitment period expires, whichever comes first. Upon expiration of the commitment period, if the customer has taken no action, the Telephone Company will convert the customer to basic DDS service offered under Section 7.4.17(A).
- Renewal of an Existing DDS TPP is not permitted.
- Moves and changes are permitted provided that they do not require a new commitment period.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services# (Cont'd) (T)(B) Term Pricing Plans (TPP) Description (Cont'd)

## (2) (Cont'd)

- Multiple Digital Data Services must be of the same speed in order to be in the same individual Term Pricing Plan.
- DS1 High Capacity Service plans are applicable to channel terminations, associated DS1 Multiplexers (DS1 to Voice, DS1 to Digital, and DS1 to DS0), and channel mileage, fixed and per mile. The fixed and per mile rate elements for a given circuit must be included in the same TPP; the channel termination and associated multiplexer must also be included in the same plan.

- (3) Rates for Term Pricing Plans are detailed in Section 7.5.16. Term Pricing Plans do not include optional features except for associated DS1 multiplexing in the DS1 TPPs. Other optional features are available at Basic Service rates.

Term Pricing Plans are not applicable to services in other rate plans, nor are Federal Telecommunications Access Services eligible for TPPs.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services# (Cont'd) (T)(C) TPP Terms and Conditions

- (1) When requesting a Term Pricing Plan, the customer must specify the length of the desired commitment period and the services which are to be included in the plan.
- (2) When requesting any Term Pricing Plan activity regarding channel terminations, the customer must specify by billing account and circuit identification number which circuits are to be affected.
- (3) When ordering Term Pricing Plan services, related rate elements must be ordered under the same plan. For example, both channel terminations and any DS1 associated multiplexing for a given circuit must be in the same plan and have the same service date. Similarly, both rate elements for channel mileage, fixed and per mile, must be in the same plan and have the same service date.
- (4) At the end of a TPP commitment period, the service(s) will be billed at the basic rate unless the DS1 High Capacity Service customer subscribes to a new TPP. (C)
- (5) Termination liability is assessed on channel terminations, fixed and per mile mileage, and multiplexing rate elements.
- (6) In the event that the Telephone Company initiates a rate increase and the total discounted monthly rate for the affected service increases by eight percent (8%) or more, the customer may cancel its TPP for the affected service without termination liability. The customer must exercise its option to cancel the TPP for the affected service within thirty (30) days of the date of the effective rate increase. (D)

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services# (Cont'd)

(T)

(D) TPP Termination Liability (Cont'd)

- (4) The termination liability charge is calculated as set forth in (a) or (b) following: when calculating termination liability charges, the Telephone Company will apply the option which provides the customer with the lowest termination liability charge.

(a) Option I

For services discontinued within the first year, the customer will be liable for 100% of the total monthly charges for the unexpired portion of the initial 12 months, and 15% of the total monthly charges for the remainder of the TPP commitment period.

For services discontinued after the first 12 months of a plan, customers will be liable for 15% of the total monthly charges for the remaining portion of their Term Pricing Plan commitment period.

(b) Option II

For services discontinued within the first year and prior to the end of the selected commitment period, the termination liability charge will be the difference between the full Basic monthly rates and the TPP monthly rates for the period the plan has been in effect.

For services discontinued after the first 12 months of a plan but prior to the end of the selected commitment period, the following applies:

- Where there is no TPP period less than the actual time the services have been in effect the termination liability charge will be the difference between the full Basic monthly rates and the selected TPP monthly rates for the period the plan has been in effect.

# Service availability limited. Refer to # footnote on Page 7-209.

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services# (Cont'd)

(T)

(D) TPP Termination Liability (Cont'd)

## (4) (Cont'd)

(b) Option II (Cont'd)

- Where there is a TPP period less than the actual time the services have been in effect, the termination liability charge will be the difference between the monthly rates for the highest TPP period that could have been satisfied prior to discontinuation of the service and the monthly rates for the selected commitment period multiplied by the actual number of months the plan has been in effect.

For example, if a customer subscribes to a 5-year TPP and disconnects service during the thirty-seventh month, the highest TPP period that could have been satisfied is three years. The customer's termination liability would be calculated as follows: (3-year monthly TPP rate - 5-year monthly TPP X 37 months).

## (5) Termination liability will be computed as follows:

At the end of the 12 months, 100% of the total monthly charges will be applied to the difference between the commitment level and the 12 month average of the actual channel terminations or miles.

# Service availability limited. Refer to # footnote on Page 7-209.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.17 Digital Data and DS1 High Capacity Services# (Cont'd) (T)(E) TPP Termination Without Liability

- (1) Termination liability will not apply when cancellation of a Term Plan occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on any rate applicable to the Term Plan.

(D)

(D)

- (2) For DS1 High Capacity Services, a request to change to a longer commitment period will nullify the current termination liability. All terms and conditions associated with the new TPP will apply.

(C)

- (3) Termination liability is not applicable if the customer requests to upgrade service to a higher capacity (e.g., DDS to DS1, DS1 to DS3) service and meets all of the following conditions:

(D)

- The new service is purchased under a long-term agreement equal to or greater than the commitment period of the service being disconnected.
- The orders for the disconnect of the existing TPP rate elements and the new connect are received by the Telephone Company at the same time, with due dates within 90 days of each other, and are related together by a Related Purchase Order Number (RPON).
- The total bandwidth (in kbps) of the service is greater than or equal to the bandwidth of the discontinued service(s).

- (4) Termination liability will not apply when a DS1 High Capacity Service customer meets the requirements for "portability". Portability is the replacement of a service under a TPP with another service for the balance of the TPP commitment period. Portability requirements are as follows: (C) (C)

- The replacement service must be of the same speed or type, and must not already be in a Term Pricing Plan.
- The orders to accomplish the replacement are placed with the Telephone Company at the same time with due dates within 90 days of each other, and are related by a Related Purchase Order Number.
- The quantities associated with the replacement are equal to or greater than the disconnected service.
- A request to disconnect DS1 High Capacity Service in order to replace it with a Replacing Service pursuant to the Technology Migration regulations set forth in Section 2.9 preceding.

- (5) A customer may cancel a term plan on its DS1 High Capacity Services without penalty in order to include such DS1 High Capacity Services in a Commitment Discount Plan (as set forth in Section 25.1 following) or the National Discount Plan (as set forth in Section 25.3 following).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.18 Voice Grade Service Term Pricing Plans#

(T)

(A) Description

Term Pricing Plans, TPPs, are pricing options available to customers who subscribe to specific longer term commitment periods in exchange for reduced monthly rates.

- (1) TPPs for Voice Grade Services are available in 3 and 5-year commitment periods.
- (2) The channel termination and the channel mileage (fixed and per-mile) rate elements are applicable for Voice Grade Service TPPs.
- (3) A customer may purchase channel terminations under one term plan and channel mileage under another plan.
- (4) Customers have the option of designating the channel terminations, channel mileage (fixed and per-mile), or both on a circuit-by-circuit basis.
- (5) Voice Grade Term Pricing Plans do not include optional features. Optional features for Voice Grade Services in TPPs are available at basic service rates.
- (6) Term Pricing Plans are not applicable to services in other rate plans, nor are Federal Telecommunications Access Services eligible for TPPs.
- (7) Rates for Term Pricing Plans are detailed in Section 7.5.3. The nonrecurring rates for TPPs are the same as for Basic Service.

(B) Terms and Conditions

- (1) When requesting a Term Pricing Plan, the customer must specify the length of the desired commitment period and the services which are to be included in the plan.

# Effective November 16, 2018, orders for new Voice Grade Service TPPs are no longer permitted. The Telephone Company will continue to provide Voice Grade Service TPPs pursuant to this Section 7.4.18 on any existing Voice Grade Service TPP that is in-service as of November 16, 2018, or any order for Voice Grade Service TPP that is placed with the Telephone Company prior to November 16, 2018 (collectively, Existing VG TPPs), subject to the following conditions:

- The Telephone Company will continue to provide Existing VG TPPs for the selected commitment period until (i) the customer discontinues service; (ii) the customer converts to a Voice Grade Service provided on a month to month basis under Section 7.2.3; or (iii) the current commitment period expires, whichever comes first. Upon expiration of the commitment period, if the customer has taken no action, the Telephone Company will convert the customer to basic Voice Grade Service offered under Section 7.2.3.
- Renewal of an Existing VG TPP is not permitted.
- Moves and changes are permitted provided that they do not require a new commitment period.

(T)

(C) TPP Termination Liability (Cont'd)

## (3) (Cont'd)

(b) Option II (Cont'd)

For example, if a customer subscribes to a 5-year TPP and disconnects service during the thirty-seventh month, the highest TPP period that could have been satisfied is three years. The termination liability would be calculated as follows: 3-year monthly TPP rate - 5-year monthly TPP rate X 37 months.

(D) TPP Termination Without Liability

- (1) Termination liability will not apply when cancellation of a Term Plan occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on any rate applicable to the Term Plan. Additionally, any existing TPP customer that experienced an increase in its total discounted monthly rate for a service between June 1, 1999 to January 11, 2000 may also exercise this option. The customer must notify the Telephone Company of its intent to exercise this option by February 10, 2000.

## U.S. Department of Defense - Information Technology Agency

Provision of Unprotected OC192 Optical Transport Channel service in LATA 236 as an extension of Washington Interagency Telecommunications System 2001 (WITS 2001) as set forth in Section 10.9.5 preceding. These Unprotected OC192 Optical Transport Channels are for the exclusive use of the U. S. Department of Defense and are not available in any other LATA or to any other branch of the Federal Government. The service is being provided for a term of five (5) years. Termination liability as set forth in Section 7.2.14(C)(4)(e) preceding applies in the event that service is discontinued prior to the end of the 5 year term. At the end of the 5 year term, the customer may discontinue service or continue with the service on a month-to-month basis at the rates and charges set forth below.

The monthly rate for each Unprotected OC192 Transport Channel service applies as a single recurring rate for the entire end-to-end channel, regardless of the underlying protocol being transmitted.

A nonrecurring installation charge applies for each Unprotected OC192 Transport Channel service installed. An initial installation nonrecurring charge applies for each channel installed in conjunction with initial delivery of the service to the customer. Each channels installed subsequent to the initial delivery of service is subject to a subsequent installation nonrecurring charge.

## ACCESS SERVICE

8. SONET Special Access Services8.1 General

SONET Special Access Services are Special Access/private line services provided with SONET technology.

(A) Definitions

**Add/Drop Multiplexer, (ADM):** an item of equipment that enables a SONET signal to be terminated or originated; it also allows lower level signals to be added or dropped from an optical carrier channel.

**IntelliLight Service:** a Telephone Company family of SONET based services that have a high level performance guarantee.

**Inter-office (IOF) Mileage:** a rate category that covers the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center and a Company Hub, between a serving wire center and an IBT multiplexing location, between two Company Hubs, between two IBT multiplexing locations, or between a customer designated premises and an IOTS Protected or Unprotected Optical Transport Channel. IOF mileage rates are comprised of a fixed rate element and a per mile rate element. (T)  
(C)

**Optical Carrier Rate, (OC #):** a SONET transmission signal/speed, line rate, or service. The rates are in multiples of an OC1, which is equivalent to an STS1 (51.84 Mbps), SONET's basic rate.

<u>OC Rate</u>	<u>Bandwidth Capacity</u>
3	155.52 Mbps
12	622.08 Mbps
48	2.488 Gbps
192	9.953 Gbps

(Issued under Transmittal No. 631)

Issued: October 13, 2005

Effective: October 28, 2005

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.1 General (Cont'd)(A) Definitions (Cont'd)

**Optical Carrier Rate Concatenated, (OC#c):** a "clear channel" SONET transmission using only one framing format. For example, an OC3 signal provides three STS1 frame formats with 3 overheads for a total capacity of 2268 bytes per Synchronous Payload envelope (SPE frame) in an OC3c signal, one STS3c frame format is used with one overhead, increasing the total payload capacity to 2340 bytes per SPE frame.

**PORT:** a rate element that denotes the standard interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the Point of Termination (POT).

**Synchronous Digital Hierarchy:** denotes the European equivalent of SONET for the transmission of high capacity bandwidth over optical facilities.

**SONET, (Synchronous Optical NETwork):** the North American standard for the transmission of high capacity bandwidth over optical facilities. This synchronous transmission platform utilizes a modular multiplexing approach. Because of the large bandwidth, some of the payload is used to monitor, protect, manage and improve the transmission of the signal.

**Synchronous Payload Envelope (SPE):** the portion of the SONET transmission that contains the customer information.

**Synchronous Transport Module Level (STM#):** the European equivalent of a SONET STS3 (155.52 Mbps) signal.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.1 General (Cont'd)(A) Definitions (Cont'd)

**Synchronous Transport Signal - Level, (STS1):** a 51.84 Mbps signal that is the electrical equivalent of the OC1 or a DS3 with additional bits devoted to SONET overhead information. The STS1 signal consists of overhead and a SPE. The overhead part of the signal is used for controlling, framing and maintaining the signal. An STS1 can carry a DS3 or 28 DS1s when specifically formatted (Mapped). However, individual DS1s within a DS3 are not accessible within SONET and their performance cannot be guaranteed for this reason. These DS1s may be accessed using the Special Access DS3-to-DS1 multiplexing optional service.

**Termination:** an IBT rate element that provides for the communication path between a customer designated premises and the serving wire center of that premises.

**Virtual Tributary, (VT):** a SONET structure designed for transport of sub-STS1 payloads; a subchannel of 1.728 Mbps within an STS1. A DS1 is mapped into the SONET format using a VT1.5 as a packaging mechanism that is internal to the SONET signal.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)#

(T)

(A) General Description

IntelliLight Broadband Transport, IBT, provides high speed synchronous optical fiber-based full duplex data transmission capabilities. IBT is provisioned over the Telephone Company's shared SONET network and provides customers SONET based broadband access transport with the following capacities:

OC3, OC3c  
& STM1                      Transmission services operating at the  
terminating bit rate of 155.52 Mbps

OC12 &  
OC12c                      Transmission services operating at the  
terminating bit rate of 622.08 Mbps

OC48 & OC48c              Transmission services operating at the  
terminating bit rate of 2.488 Gbps

OC192 & OC192c          Transmission services operating at the  
terminating bit rate of 9.953 Gbps.

IBT services are provided where SONET facilities are available with sufficient bandwidth capacity to meet the customer's request. Generally, service is available in the same areas as noted for IntelliLight Shared Dual Path Service as described in Section 7.2.14(C)(2)(b). IBT may be substituted for certain High Capacity Switched Access Entrance Facilities.

# The following footnote is not applicable to the DS1 Port, DS3/STS1 Port or Node Mapping Rearrangement Charge rate elements of IBT. Effective March 30, 2007, orders for new IBT are no longer permitted. The Telephone Company will continue to provide IBT pursuant to this Section 8.2 on any existing IBT that is in-service as of March 30, 2007, or any order for IBT that is placed with the Telephone Company prior to March 29, 2007 (collectively, Existing IBT), subject to the following conditions:

(N)

a. For any Existing IBT that is currently subscribed to a term plan (i.e., commitment periods of 3- and 5-years), the Telephone Company will continue to provide the Existing IBT for an additional six (6) months beyond the expiration date of the customer's current commitment period, or until the customer replaces the Existing IBT with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Subject to availability of facilities and equipment, certain changes to the Existing IBT are permitted provided that such changes do not require a new commitment period or an extension to an existing commitment period.

b. For any Existing IBT provided on a month-to-month basis, the Telephone Company will continue to provide the Existing IBT until September 30, 2007, or until the customer replaces the Existing IBT with a comparable Telephone Company provided service, or discontinues service, whichever comes first. Changes are not permitted.

(N)

(Issued under Transmittal No. 783)

Effective: March 30, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(A) General Description (Cont'd)

IBT services consist of ports, terminations, interoffice (IOF) mileage, and multiplexers. With an IBT service, the same payload content is maintained throughout the transmission path, i.e., if DSIs are mapped at one end, than they must also be mapped at the other end. DS1 and DS3/STS1 IBT ports may also be used in combination with Telephone Company provided point-to-point SONET service.

(N)  
|  
(N)

IBT services may be used to connect:

- a customer designated premises to another customer designated premises; i.e., a point-to-point service arrangement which consists of a port and a termination at each end/customer premises and IOF mileage when applicable.
- a customer designated premises to an equal speed OC3/OC3c, OC12/OC12c, or OC48/OC48c port of a Verizon Dedicated SONET Ring (DSR). This arrangement is not available with STM1 service.
- a customer designated premises to an equal speed OC3, OC12 or OC48 port or enhanced port of an DSR as an off-ring extension of the DSR. This arrangement requires purchase of the Multiplexing Capability. When multiplexed IBT service is ordered as an off-ring extension of DSR, applicable DSR terms, conditions, rates and charges apply in place of IBT port and termination charges for that portion of the service.
- a customer designated premises with an IntelliLight Entrance Facilities (IEF) termination. When multiplexed IBT service is ordered with an IEF termination, applicable IEF terms, conditions, rates and charges apply in place of IBT port and termination charges for that portion of the service.
- a customer designated premises to a Collocated Interconnection arrangement as described in Section 19.2 following or a customer designated premises or Collocated Interconnection arrangement and a wire center where connection to an advanced data service occurs. IBT ports are not provided at a Collocated Interconnection arrangement. STM1 is not available in a collocated arrangement or in conjunction with advanced data services.

# Service availability limited. Refer to # footnote on Page 8-6.

(N)

(Issued under Transmittal No. 783)

Issued: March 15, 2007

Effective: March 30, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd) (T)(A) General Description (Cont'd)

- one or both customer designated premises may be connected to an IOTS ring or Telephone Company provided DWDM ring service over an equal speed OC3/OC3c, OC12/OC12c, OC48/OC48c or OC192/OC192c Protected or Unprotected Optical Transport Channel. For each connection to an IOTS or Telephone Company provided DWDM ring service Optical Transport Channel, the IOTS Optical Transport Channel rate element, described in Section 7.5.24 preceding, or Telephone Company provided DWDM ring service Optical Transport Channel rate element applies in lieu of the IBT Termination and IBT Port rate elements. The IBT Fiber Path Diversity optional feature is required when IBT service is connected to an IOTS or Telephone Company provided DWDM ring service Protected Optical Transport Channel. (C)
- two Physically Collocated Interconnection arrangements, two Virtually Collocated Interconnection arrangements, or a combination of both. IBT may only be used to connect Collocated Interconnection arrangements that are located in different wire centers. Except as set forth in Section 18 following, IBT will not be provided between Collocated Interconnection arrangements that are located within the same wire center. IBT channel mileage as set forth in Section 8.2(E)(3) following will apply based on the airline distance between the wire centers in accordance with the regulations set forth in Section 8.2(D) following. (C)
- IBT may also be connected to the following Telephone Company provided services, where such connections are technically and operationally feasible, as determined by the Telephone Company: (T)
  - dedicated SONET ring service (N)
  - DWDM ring service (N)
  - optical hubbing service
  - SONET entrance facility service (N)
  - Ethernet private line service |
  - point-to-point SONET service (N)

IBT connections may be direct between the locations involved, provided through an IBT multiplexing node or between IBT multiplexing nodes where multiplexing to Switched Access, Special Access, or SONET Service of a lesser capacity occurs. An IBT multiplexing node may be located in a Telephone Company wire center or at a customer designated premises.

# Service availability limited. Refer to # footnote on Page 8-6. (N)

(Issued under Transmittal No. 783)

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(A) General Description (Cont'd)

IBT services may be configured in any of the following ways:

OC3	3 STS1 channels which each contain: - a DS3 that is STS1 mapped - up to 28 DS1s that are VT-mapped - an STS1 channel without constraint to payload mapping
OC3c	A single concatenated STS3c channel
STM1	A SDH channel of 155.52 Mbps
OC12	12 STS1 channels which each contain: - a DS3 that is STS1 mapped - up to 28 DS1s that are VT-mapped - an STS1 channel without constraint to payload mapping  4 concatenated STS3c channels  1 STS3c channel combined with 9 STS1 channels; or 2 STS3c channels combined with 6 STS1 channels; or 3 STS3c channels combined with 3 STS1 channels. These STS mapping options are subject to the utilization of the total OC12 capacity and require that each STS3 is contained within the same triplet (i.e., an STS3c must begin on STS1 timeslot 1, 4, 7, or 10).
OC12c	A single concatenated STS12c channel
OC48	48 STS1 channels which each contain: - a DS3 that is STS1 mapped - up to 28 DS1s that are VT mapped - an STS1 channel without constraint to payload mapping; or - 16 separate concatenated STS3c channels; or - 4 separate concatenated STS12c channels; or - any combination of the above configurations up to the total OC48 capacity
OC48c	A Single concatenated STS48c channel.

# Service availability limited. Refer to # footnote on Page 8-6.

(N)

(Issued under Transmittal No. 783)

Issued: March 15, 2007

Effective: March 30, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)  
 8.2 IntelliLight Broadband Transport (IBT)# (Cont'd) (T)  
 (A) General Description (Cont'd)

IBT services may be configured in any of the following ways:  
 (Cont'd)

OC192                    192 STS1 channels which each contain:  
                          - a DS3 that is STS1 mapped  
                          - up to 28 DS1s that are VT mapped  
                          - an STS1 channel without constraint to  
                              payload mapping; or  
                          - 64 separate concatenated STS3c channels; or  
                          - 16 separate concatenated STS12c channels; or  
                          - any combination of the above configurations  
                              up to the total OC192 capacity

OC192c                  A single concatenated STS192c channel.

(B) Optional Features and Functions

The following optional features and functions are available  
 for IBT services:

(1) **Four Fiber 1 + 1 Port Protection**

Four Fiber 1+1 Port Protection provides a standby  
 protection card for automatic protection from a fault in  
 the working card. It is only available with compatible  
 CPE and is ordered per port.

Four Fiber 1+1 Port Protection is not available for IBT  
 services that terminate at a customer premises served by  
 an IOTS or Telephone Company provided DWDM ring service  
 Protected or Unprotected Optical Transport Channel. (C)

(2) **Fiber Path Diversity**

This option provides additional loop survivability with  
 the diverse routing of the working fiber pair and protect  
 fiber pair. Fiber Path Diversity (FPD) with 1 X 1  
 protection will insure survivability from fiber faults  
 except where common entrances exist. Fiber Path  
 Diversity is available for terminations and IOF mileage.  
 If FPD is desired, each termination and IOF mile of the  
 service is ordered with this feature. Services with FPD  
 have a 1 hour Special Access Service Guarantee (SASG).

Dual entrances at customer premises and Company wire  
 centers are not considered a standard feature of this  
 option, but may be provided where facilities are  
 available. In instances where the customer premises and  
 the serving wire center are in the same building, a  
 customer may purchase this option in order to secure the  
 1 hour SASG; however, there may not be physical diversity  
 in the building.

#        Service availability limited. Refer to # footnote on Page 8-6. (N)

(Issued under Transmittal No. 783)

Issued: March 15, 2007

Effective: March 30, 2007

Vice President, Federal Regulatory  
 1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd) (T)(B) Optional Features and Functions (Cont'd)(2) **Fiber Path Diversity** (Cont'd)

Fiber Path Diversity is not available for IBT services that terminate at a customer premises served by an IOTS or Telephone Company provided DWDM ring service Unprotected Optical Transport Channel. (C)  
(C)

(3) Multiplexing Capability

Multiplexing of IBT can occur at either designated Telephone Company serving wire centers or at customer designated premises. When multiplexing occurs at designated Telephone Company serving wire centers, National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4 identifies those serving wire centers where multiplexing options are available. When multiplexing occurs at a customer designated premises, all channels derived from the IBT facility must terminate at that premises.

End-to-end services may be provided on channels of these facilities to the multiplexing node. The transmission performance for the end-to-end service provided between the locations will be that of the lower capacity or bit rate. Multiplexing capability will not be provided on an IBT that is connecting to IOTS or Telephone Company provided DWDM ring service. (C)  
(C)

The Telephone Company will commence billing the monthly rate for the facility to the IBT multiplexing node on the date specified by the customer on the service order. Individual services utilizing these facilities may be ordered and/or installed subsequent to the installation of the facility to the multiplexing node. The customer will be billed for the channel termination, channel mileage, and IBT multiplexing node at the time the facility is installed. IBT port charges do not apply when IBT is provided as a facility to a Collocated Interconnection arrangement. Individual service rates (by service type) will apply for the channel termination, channel mileage, any optional features associated with the service, and the low speed port necessary to drop the lower capacity service from the IBT multiplexing node. These services will be billed as each individual service is installed.

# Service availability limited. Refer to # footnote on Page 8-6. (N)

(Issued under Transmittal No. 783)

Issued: March 15, 2007

Effective: March 30, 2007

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(B) Optional Features and Functions (Cont'd)(3) Multiplexing Capability (Cont'd)

Cascade multiplexing occurs when an IBT channel is de-multiplexed to channels of a lesser capacity, and one of the lesser capacity channels is further de-multiplexed. For example, an IBT OC3 is de-multiplexed to three DS3 channels and then one of the DS3 channels is further de-multiplexed to DS1 channels. When cascade multiplexing is performed, a charge for the additional multiplexing unit also applies. When cascade multiplexing occurs at different locations, interoffice mileage also applies between the multiplexing arrangements. Cascade multiplexing may not occur at the customer's designated premises.

The following IBT multiplexing nodes are available.

(a) OC3 Multiplexing node

An arrangement that converts an OC3 (155.52 Mbps) channel to one of the following combinations.

- three groups of 28 DS1 channels
- one group of 28 DS1 channels and 2 DS3/STS1 channels
- two groups of 28 DS1 channels and 1 DS3/STS1 channel
- 3 DS3/STS1 channels

(b) OC12 Multiplexing node

An arrangement that converts an OC12 (622.080 Mbps) channel to one of the following combinations.

- 12 DS3/STS1 channels
- 9 DS3/STS1 channels and 1 OC3/OC3c channel
- 6 DS3/STS1 channels and 2 OC3/OC3c channels
- 3 DS3/STS1 channels and 3 OC3/OC3c channels
- 4 OC3/OC3c channels

# Service availability limited. Refer to # footnote on Page 8-6.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(B) Optional Features and Functions (Cont'd)(3) Multiplexing Capability (Cont'd)(c) OC48 Multiplexing Node

An arrangement that converts an OC48 (2.488 Gbps) channel to one of the following combinations.

- 48 DS3/STS1 channels
- 4 OC3/OC3c channels and 36 DS3/STS1 channels
- 8 OC3/OC3c channels and 24 DS3/STS1 channels
- 16 OC3/OC3c channels
- 1 OC12/OC12c channels, 4 OC3/OC3c channels and 24 DS3/STS1 channels
- 1 OC12/OC12c channels, 8 OC3/OC3c channels and 12 DS3/STS1 channels
- 2 OC12/OC12c channels and 24 DS3/STS1 channels
- 2 OC12/OC12c channels and 8 OC3/OC3c channels
- 4 OC12/OC12c channels

When establishing IBT under a Shared Network Arrangement, the regulations set forth in Section 5.2 preceding apply.

(d) OC192 Multiplexing Node

Multiplexing capability is not available for OC192.

(C) Terms and Conditions

(M)

- (1) IBT is available for term periods of Month-to-Month, 3-year and 5-year. However, the minimum service period for IBT service is one year. When Verizon Optical Networking or Telephone Company provided Ethernet private line service customers under a three or five-year commitment period connect their Verizon Optical Networking or Telephone Company provided Ethernet private line service Ethernet-to-SONET mapped service to IBT, the IBT port must be provided under the same length commitment period. When Verizon Optical Networking or Telephone Company provided Ethernet private line service customers under a one-year commitment period connect their Verizon Optical Networking or Telephone Company provided Ethernet private line service Ethernet-to-SONET mapped service to IBT, the IBT port will be provided at month-to-month rates. When Verizon Optical

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(C) Terms and Conditions (Cont'd)

## (1) (Cont'd)

Networking or Telephone Company provided Ethernet private line service customers under a seven-year commitment period connect their Verizon Optical Networking or Telephone Company provided Ethernet private line service Ethernet-to-SONET mapped service to IBT, the IBT port will be provided subject to five-year plan rates, and the commitment period for the IBT Port may be extended to be coterminous with the Verizon Optical Networking or Telephone Company provided Ethernet private line service commitment period. When IBT service connects to an IOTS or Telephone Company provided DWDM ring service Optical Transport Channel, the IBT port and the IOTS or Telephone Company provided DWDM ring service Optical Transport Channel must be provided under the same length commitment period (i.e., either 3 year or 5 year term plan).

(C)

(C)

(C)

(C)

- (2) At the expiration of a 3 or 5-year plan, the rates for the expiring term plan will continue until the customer either cancels service or requests a new term plan for its IBT services.
- (3) All rate elements of a point-to-point service must be in the same rate plan.
- (4) OC3/OC3c, STM1, OC12/OC12c and OC48/OC48c point-to-point IBT service arrangements (without the Multiplexing Capability described in Section 8.2(B)(3)) are provided subject to standard intervals. All other IBT service arrangements are available based on negotiated intervals as described in 5.2.1(B) preceding.
- (5) Additional charges may be billed the customer when the Company is levied charges for space and power required to place ADMs on the Company's side of the network interface.
- (6) The customer is responsible to specify in its order for service what service configuration is to be contained in each service connection. For multiplexed services, the customer must also specify the IBT multiplexing location involved. Any Switched Access, Special Access, or SONET Service derived from the IBT facility to the Collocated Interconnection arrangement is subject to the terms and conditions and rates and charges for the type of service involved.

Certain material previously found on this page can now be found on 2<sup>nd</sup> Revised Page 8-9.3.

Note: See Section 19 following for additional information.

# Service availability limited. Refer to # footnote on Page 8-6.

(N)

1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

## (C) Terms and Conditions (Cont'd)

- (7) IBT services are covered by a Special Access Service Guarantee, SASG, which is described in Section 2.7.1.1 (B)(11). (T)
- (8) A change in port or termination is treated as a discontinuance and new installation of service and will be assessed a new nonrecurring charge, if applicable.
- (9) Connections of IBT service to a physical or virtual collocation arrangement must be either a 2-fiber or 4-fiber connection. Rates and charges for Collocation Fiber Optic Cross-Connect Service and SPOT Bay Frame and Terminations are set forth in Sections 19.7.1 and 19.7.2 following. (See Note below.)
- (10) IBT STM1 service is only provided when both customer designated premises use STM transmission. It is not available as a connection to a DSR, a Telephone Company provided dedicated SONET ring service or a collocated arrangement.
- (11) For a rearrangement of an IBT service that is terminated with a 2-fiber interface into an IBT service that is terminated with a 4-fiber interface or vice versa, a Fiber Interface Rearrangement Charge as set forth in (E)(5)(a) for SONET Special Access and (E)(10)(a) for SONET Switched Access applies.
- (12) For a rearrangement of the manner a multiplexing node of IBT service is configured which involves a DS1 Port and/or a DS3/STS1 Port, a Node Mapping Rearrangement Charge as set forth in (E)(5)(b) for SONET Special Access and (E)(10)(b) for SONET Switched Access following applies. An example of a change in service configuration would be the rearrangement of an STS1 channel of IBT OC3 that contains a DS3 that is STS1 mapped to an STS1 channel that contains up to 28 DS1s that are VT mapped. Service configuration options for IBT channels are delineated in 8.2(A) preceding. The Node Mapping Rearrangement Charge applies for each multiplexing node of the IBT service configured and not on a per channel basis within the IBT service.

# Service availability limited. Refer to # footnote on Page 8-6.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

## (C) Terms and Conditions (Cont'd)

(13) IBT services are subject to termination liability.

If a customer disconnects service during the first year, termination liability will be calculated at 100% of the monthly charges for the unexpired portion of the first year, and 15% of the remainder of the term. If the disconnect occurs after the first year, termination liability is calculated at 15% of the monthly charges for the remainder of the plan period.

Termination liability will not apply:

- when cancellation of the IBT service occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on any rate applicable to IBT service. Additionally, any existing IBT customer that experienced an increase in its total discounted monthly rate for a service between June 1, 1999 to January 11, 2000 may also exercise this option. The customer must notify the Telephone Company of its intent to exercise this option by February 10, 2000.
- when the service is changed to an IBT plan with a longer commitment period.
- when the service is converted to a Verizon dedicated ring product as set forth in Section 23-1 following.
- when service is changed to an IBT service of a higher bit rate (e.g., IBT OC3/OC3c to IBT OC12/OC12c, IBT OC48/OC48c or IBT OC192/OC192c).
- when the service is changed to/from a 2-fiber interface to a 4-fiber interface.
- when the service is changed from a point-to-point IBT service to a multiplexed IBT facility.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT)# (Cont'd)

(T)

(D) Rate Categories

Monthly recurring rates apply for Terminations, Ports, IOF Mileage (fixed and per mile), and Multiplexing Capability.

Nonrecurring charges apply for the installation of any Termination, Port, and Multiplexing Capability.

IBT rate elements are as follows:

- (1) Termination - basic service that carries a 4 hour SASG
- (2) Termination with Fiber Path Diversity (FPD) - carries a 1 hour SASG
- (3) Port - a two fiber network interface of the full service bandwidth
- (4) Port with 4 Fiber 1+1 Protection (4F 1+1) - a 4 fiber interface consisting of 2 cards, one working and a second for standby
- (5) IOF Fixed Mileage - one charge per service when mileage is applicable
- (6) IOF Per Mile Mileage - basic transport service
- (7) IOF Per Mile Mileage with Fiber Path Diversity (FPD) - carries the 1 hour SASG
- (8) Multiplexing Capability - an optional feature enabling IBT to be de-multiplexed to channels of a lesser capacity.
- (9) Fiber Interface Rearrangement Charge - one charge per service when rearrangement is applicable
- (10) Node Mapping Rearrangement Charge - one charge per multiplexing node of service configured when rearrangement is applicable

# Service availability limited. Refer to # footnote on Page 8-6.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.3 ISSP Service(A) General Description

ISSP, IntelliLight Shared Single Path, is an STS1 (Synchronous Transport Signal Level 1) channel for the SONET transmission of 51.84 Mbps of data. The signal consists of overhead and a Synchronous Payload Envelope (SPE). The overhead portion of the signal is used for controlling, framing and maintaining the signal. The SPE contains the customer information.

ISSP is provisioned over the Company's shared SONET network using an ADM operating in a ring mode and diversely routed fiber between the SWC and the customer's premises, or a Collocated Interconnection arrangement as described in Section 19.2 following. ISSP channel service may be configured in a two point arrangement (i.e. both ends of the service are ISSP channel terminations) or with an ISSP channel termination connected to an IEF termination or an ISSP hubbed to an STS1/DS1 multiplexer.

ISSP is provided with either an STS1 interface or a DS3 interface. The network channel interfaces define the bit rates that are available. Network Channel interfaces and codes are described below:

<u>Interface</u>	<u>Codes</u>
DS3	O4DS6.4
STS1	O4ST6.A

ISSP service may be transported through IOF (Interoffice facilities) as STS1, STS1 with VT1.5 mapping or STS1 with DS3 mapping.

ISSP services are provided where SONET facilities are available with sufficient bandwidth capacity to meet the customer's request.

(B) Optional Features and Functions

ISSP service can be multiplexed. DS1s mapped as VT1.5 within an ISSP can be multiplexed with the optional feature of STS1/DS1 multiplexing.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.3 ISSP Service (Cont'd)(C) Terms and Conditions

- (1) ISSP is available month-to-month, or as a 3-year or 5-year term plan.
- (2) The minimum service period for ISSP is twelve months.
- (3) Term Plan services and optional features must remain in service to the end of their commitment period(s) or termination liability will apply.
- (4) Customers who order an ISSP must specify how the signal is to be mapped, i.e., VT1.5 or DS3 mapped (see definitions for Virtual Tributary and SONET in Section 8.1(A) preceding).
- (5) ISSP channel terminations, channel mileage and optional features are subject to the guarantees set forth in Section 2.7.1.1 (B)(10) preceding for service interruptions. (T)
- (6) All connections of ISSP service to a physical or virtual collocation arrangement must be a 2-fiber connection. Rates and charges for Collocated Interconnection Fiber Optic Cross-Connect Service and SPOT Bay Frame and Terminations are set forth in Sections 19.7.1 and 19.7.2 following. (See Note below.)

Note: See Section 19 following for additional information.

Effective: September 21, 2007

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.3 ISSP Service (Cont'd)(D) Termination Liability

ISSP service may be cancelled without termination liability when cancellation of the STS1 service occurs within thirty (30) days of the effective date of a Telephone Company initiated rate increase of eight percent (8%) or more on any rate applicable to ISSP service. Additionally, any existing ISSP customer that experienced an increase in its total discounted monthly rate for a service between June 1, 1999 to January 11, 2000 may also exercise this option. The customer must notify the Telephone Company of its intent to exercise this option by February 10, 2000.

Termination liability does not apply for conversions to a longer term plan or changes.

Termination liability does not apply when the service is changed to a higher bandwidth SONET service with a commitment period that is equal or longer in length than the current term plan.

Termination liability does not apply if the customer meets the requirements for portability which is defined as the replacement of an ISSP rate element with a like rate element for the balance of the commitment period. Portability requirements are as follows:

- (1) The replacement ISSP rate element must not already be in a term plan.
- (2) The orders to accomplish the replacement are placed with the Company at the same time with due dates which are within 90 days of each other, and are related by a related purchase order number.
- (3) The service may be moved to another location in the same Company operating territory, provided that the service was maintained in the initial location for one year.
- (4) The replacing ISSP rate element is subject to all applicable nonrecurring charges and minimum period requirements.

(T)

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.3 ISSP Service (Cont'd)(D) Termination Liability (Cont'd)

Termination liability will not apply when the jurisdiction of ISSP is changed from interstate to intrastate, provided that the following requirements are met.

(N)

- The intrastate ISSP is provided from the Telephone Company's intrastate Access Service or general exchange service tariff or as an individual case based arrangement;
- the intrastate service is provided with a term commitment that is equal to, or longer than, the time remaining in the interstate commitment period;
- if the interstate service is provided with a service volume commitment, the number of services provided under the intrastate arrangement must be equal to, or greater than, the number of services provided under the interstate service tariff;
- the intrastate service is subject to revenue commitments, shortfall liability and/or early termination liability, as applicable; and
- the same customer locations are maintained with no changes to the operational characteristics of the service.

(N)

Except as set forth above, the customer must fulfill its term plan for the entire capacity, or be subject to termination liability for that portion of the capacity that was not in place for the entire term. Termination liability charges are in addition to any charges associated with the customer satisfying the minimum service requirement of one year on its ISSP services.

(M)

(M)

(M) Certain material currently appearing on this page formerly appeared on Page No. 8-19.

## ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.3 ISSP Service (Cont'd)(D) Termination Liability (Cont'd)

Termination charges are calculated as follows:

- If the disconnect occurs during the first year of service, termination liability is calculated at 100% of the monthly charges for the unexpired portion of the first year, and at 15% of the monthly charges for the remainder of the term plan.
- If the disconnect occurs after the first year of service, termination liability is calculated at 15% of the monthly charges from the date of disconnection through the remainder of the term plan.

(E) Rate Regulations

ISSP service rate elements are channel termination and Channel Mileage.

The Channel Termination rate element provides for the communications path between a customer designated premises and the SWC (serving wire center) of that premises. Included, as part of the Channel Termination is a standard interface. ISSP is provided with either a DS3 or STS1 interface.

The Channel Mileage provides transport between SWCs and through the IOF. The rates and charges for ISSP include channel mileage, which consist of a Fixed rate and a rate Per Mile. The manner in which the Channel Mileage rate element is measured and applied is in accordance with the regulations set forth in Section 7.4.6 preceding for Special Access Service mileage measurement.

The STS1/DS1 Multiplexing rate element applies when the optional feature of ISSP to DS1 Multiplexing is ordered.

The rates and charges for any other Special Access basic or SONET service connected to ISSP are subject to the rates and charges for the specific service being provided.

Nonrecurring charges apply for the installation of each Channel Termination and for the installation of STS1/DS1 Multiplexing.

## ACCESS SERVICE

9. Directory Assistance Service

The Telephone Company will provide Directory Assistance (DA) Service to a customer from Directory Assistance Service locations (DA location).

9.1 General Description

DA Service provides Directory Access Service to DA locations, use of DA access equipment, and use of DA automated and/or live operator services to provide telephone listings. In addition to Standard Directory Assistance Service, DA Service is available with the following options: a) Customized Branding; b) Live Operator Response, and c) Live Operator Response with Customized Branding.

9.1.1 Service DescriptionStandard Directory Assistance

Calls from the customer's end user are answered by an automated voice recording and response system. The listing is located by an operator before release to a voice response unit which allows the end user to hear the listing. No branding is provided and live operator intervention occurs only as needed to complete the call.

Standard with Customized Branding

The identity of the ordering customer is announced on all DA calls before the automated operator query is heard by the end user. The customer provides information required by the Telephone Company for inclusion in this customized front end branding announcement.

Live Operator Response

Calls from the customer's end users are answered by an operator who queries the customer before releasing the requested listing to an automated voice response unit which allows the end user to hear the listing.

Live Operator Response with Customized Branding

Live operator response is provided to customer's end users as described above and the identity of the customer is announced on all DA calls before the customer hears the live operator query.

DA Service is available on a month-to-month basis or 3 and 5 year Term Pricing Plan (TPP) basis.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company

- (A) A Telephone Company DA operator, when furnished a name and locality, will provide or attempt to provide the telephone number listed in the Telephone Company DA records associated with the name given at the rates and charges as set forth in 9.6 following. The Telephone Company's contact with the customer's end user shall be limited to that effort necessary to process a customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a customer's end user call to any other location for any purpose other than provision of DA Service.
- (B) A maximum of two (2) requests for telephone numbers will be accepted per call to the DA operator.
- (C) A telephone number which is not listed in DA records will not be available to the customer's end user.
- (D) The Telephone Company will specify the DA location which provides the DA Service for each numbering plan area code (NPA). The DA locations are as shown in Exchange Carrier Association Tariff F.C.C. No. 2.

When it becomes necessary, as determined by the Telephone Company, to change a DA location, the Telephone Company will notify the involved customers six months prior to the change. For such changes, the regulations as set forth in 2.1.7 preceding apply.

- (E) When DA Service is ordered, Directory Access Service will be provided between the customer premises and the DA location by the Telephone Company at rates and charges as set forth in 9.6 following, as follows.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(1) General

Each Directory Access Service will consist of the following:

- An Interface Group equipped with an available Premises Interface Code at the customer's premises.
- Directory Transport between the premises of the ordering customer and the DA location.

When required by the Telephone Company, a separate Directory Access Service trunk group will be provided for DA Service for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information.

Further, when an access tandem is available and is provided, the Directory Access Service will be provided, at Telephone Company choice, either as a separate Directory Access Service trunk group or in combination with Trunkside BSA-950 Option or Trunkside BSA-101XXXX Option Switched Access Service. (D)

(2) Interface Group and Premises Interface Code

Interface Groups 2 through 10 as set forth in 6.1.2(A)(1) preceding are available for Directory Access Service. When only Directory Access Service is provided, only the following Premises Interface Codes are available:

4DS9-15	6EA2-E	4AH5-B
4DS9-31	6EA2-M	4AH6-C
4DS0-63	4SF3	4AH6-D
4DS6-44	4RV2-0	
4DS6-27		

(Issued under Transmittal No. 1156)

Issued: August 10, 2011

Effective: August 25, 2011

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

(T)  
(T)

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(2) Interface Group and Premises Interface Code (Cont'd)

Such Premises Interface Codes are described in 6.1.2(A)(1) preceding. When Directory Access Service is combined with Trunkside BSA-950 Option, Trunkside BSA-101XXXX Option and Feature Group B or D Switched Access Service, the Premises Interface Code for combination will be the available Premises Interface Code provided for the Trunkside BSA-950 Option, Trunkside BSA-101XXXX Option and Feature Group B or D Switched Access Service ordered by the customer. Except as set forth in 9.4(A) following:

The Interface Groups and Premises Interface Codes provided under a Special Order for Directory Access Service are subject to the order conditions as set forth in 5. preceding. For purposes of applying the order regulations, a DA location is considered to be a customer end user serving wire center.

(Issued under Transmittal No. 1156)

Issued: August 10, 2011

Effective: August 25, 2011

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

(T)  
(T)

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(3) Directory Transport

Directory Transport provides the transmission facilities and transport termination between the premises of the ordering customer and the DA location. For purposes of determining Directory Transport mileage, distance will be measured from the wire center that normally serves the customer premises to the DA location(s).

Directory Transport is a two-way voice frequency transmission path composed of facilities determined by the Telephone Company. The two-way voice frequency path transports calls in the terminating direction (from the premises of the ordering customer to the DA location). The voice frequency transmission path may be comprised of any form or configuration of plant capable of and typically used in the telecommunications industry for the transmission of voice and associated telephone signals within the frequency band width of approximately 300 to 3000 Hz.

The Telephone Company will determine whether the Directory Access Service is to be routed directly to a DA location or through an access tandem switch appropriately equipped for DA measurement and served by DA trunks to the DA location when such an access tandem switch is available. The combination of Trunkside BSA-950 Option, Trunkside BSA-101XXXX Option and Feature Group B or D Switched Access Service with DA Service will only be provided at such available and appropriately equipped access tandem switches. If the customer desires the traffic routing to be other than that selected by the Telephone Company, it may request a cooperative effort to determine if customer specified traffic routing can be used in lieu of the Telephone Company selected traffic routing.

(T)

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(3) Directory Transport (Cont'd)

When Directory Transport is provided using a direct route to the DA location, no address signaling is provided. When Directory Transport is provided with the use of an access tandem switch, wink start-start pulsing signaling is provided at the access tandem switch. The customer will be notified by the Telephone Company when access tandem routing is provided and the customer shall address each call to the DA location using 411, NPA + 555 + 1212 or, when required by the Telephone Company, 555-1212. Only NPA codes handled by the DA location served by the access tandem switch will be processed.

The number of Directory Transport transmission paths provided is based on the customer's order and is determined by the Telephone Company in a manner similar to Switched Access transmission paths as set forth in 6.6.5 preceding.

Directory Transport may, at the option of the customer, be provided for both interstate and intrastate communications. When the customer requests such mixed access, the interstate Directory Transport charges will be determined by the Telephone Company using the data furnished by the customer as set forth in 2.3.14 preceding.

Except as set forth in 9.4(A) following, Directory Transport provided under a Special Order is subject to the order conditions as set forth in 5 preceding.

Directory Transport is provided with a Local Transport Interface Group as set forth in 6.1.2(A)(1) preceding. Only Local Transport Interface Groups 2-10 will be provided.

(4) Special Facilities Routing

A customer may request that Directory Access Service be provided via Special Facilities Routing. The regulations, rates and charges for Special Facility Routing (Avoidance, Diversity and Cable Only) are set forth in 11 following.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(5) Design Layout Report

The Telephone Company will provide to the customer the makeup of the facilities and services provided under this section as Directory Access Service. This information will be provided in the form of a Design Layout Report similar to that as set forth in 6.1.5. Design Layout Reports for Directory Access Service will be provided only when specifically requested by the customer. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever the facilities provided for the customer's use are materially changed.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(6) Transmission Specifications

Directory Access Service is provided with either Type A or B Transmission Specification. The specifications associated with the parameters are guaranteed to the DA location, whether routed directly or via an access tandem. Type B Transmission Specification is provided with Interface Groups 2 through 10 when routed direct to a DA location. Type A Transmission Specification is provided with Interface Groups 2 through 10 when routed via an access tandem switch.

When DA Service is combined with Trunkside BSA-101XXXX Option and Feature Group D Switched Access Service, Type A Transmission Specification is provided. When DA Service is combined with Trunkside BSA-950 Option and Feature Group B Switched Access Service, Type B Transmission Specification is provided for Interface Group 2 through 10. Type A and B Transmission specifications are set forth in 6.5.1 preceding.

(D)

- (7) The acceptance testing and testing capabilities for Directory Access Service traffic routed through an access tandem are the same as those for the associated Trunkside BSA-101XXXX Option and Feature Group D end office switching. The acceptance testing for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth in 6.1.6 preceding. The testing capabilities for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth for cooperative scheduled testing or manual scheduled testing in 13 following.

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

- (F) Trunk side switching is provided at the DA Service access location. The DA Service access location will provide trunk answer and disconnect supervisory signaling.
- (G) The Telephone Company will distribute the calls received over the Directory Access Services to the DA operators using the DA location access equipment.
- (H) In the event that the telephone number is unavailable to the DA operator, no credit applies for the charge for the call to the DA operator. When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided, a credit as set forth in 9.4(I) following will apply. (T)
- (I) DA Service may, at the option of the customer, be provided for interstate and intrastate communications. When the customer requests such mixed access, the interstate DA Service charges will be determined by the Telephone Company using the data furnished by the customer as set forth in 2.3.14 preceding.

9.3 Obligations of the Customer

- (A) The customer shall specify the number of trunks and interface type of Directory Access Services it needs for DA Service. Customers ordering Standard Directory Assistance must provide transmission facilities directly to the DA location designated by the Telephone Company or through an access tandem switch appropriately equipped for DA measurement and served by DA trunks to the designated DA location. Customers ordering customized branding and/or live operator response options must provide transmission facilities directly to the designated DA location rather than through a tandem access switch. In addition, for 3 and 5 year TPP rates, the customer must screen and deliver NPA 555-1212 calls to specifically designated DA locations or access tandems prior to the commencement of the term.

(T)

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.3 Obligations of the Customer (Cont'd)

- (B) For month-to-month DA Service, the customer must order the service for at least six months. Thereafter, additional service may be ordered for a minimum of six months. Not later than three months prior to the end of the six months period, the customer shall notify the Telephone Company if the service is to be discontinued at the end of the six month period. If no notice is received from the customer, the Telephone Company will automatically extend the service for another six months and all appropriate charges as set forth in 9.6 following for another six months will apply.

For 3 year and 5 year Term Pricing Plans, the customer shall provide notice of renewal or discontinuance not later than three months prior to the end of the selected TPP term. If no notice is received, the customer's DA Service subscription will automatically extend for another six months under the rates, charges, and other conditions applicable to month-to-month Service. If the customer discontinues or reduces service during the TPP term, the customer will pay termination liability as specified in Section 9.4(C) following.

- (C) The customer facilities at the premises of the ordering customer shall provide the necessary on-hook and off-hook supervision.
- (D) When requested by the Telephone Company, the customer shall order a separate trunk group for DA Service for each NPA. The conditions when the customer will be requested to order separate trunk groups for each NPA are set forth in 9.2(E)(1) preceding.
- (E) When the customer bills its end users, the customer shall be responsible for all contacts and arrangements with its end users concerning the provision and maintenance of, and the billing and collecting of charges, for DA service furnished to its end users. When the Telephone Company bills the customer's end users at the request of the customer, contacts and arrangements with customer end users concerning the billing and collecting of charges will be as set forth in 8.2 preceding.
- (F) The customer understands that DA Operators will only respond to two (2) telephone number requests per call and will not transfer, forward or redial the call to another location for any purpose other than the provision of DA Service.

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements(A) Minimum Periods

For month-to-month service the minimum period for which DA Service and the Directory Access Service is provided and for which charges apply is six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs. Such costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs less estimated net salvage.

For 3 and 5 year TPPs, the term selected by the customer will be the minimum period and termination liability as specified in Section 9.4(C) following will apply.

(B) Minimum Monthly Charge

For month-to-month service, DA service is subject to a minimum monthly charge. The minimum monthly charge for Directory Assistance Service calls is the charge as set forth in 9.6 following for the actual usage for the month.

(C) TPP Minimum and Termination Liability

- (1) Except as set forth in (D) following, termination liability payment shall apply when a customer cancels or reduces service in full or in part prior to the end of the selected term period or when the customer fails to comply with the conditions required for a 3 or 5 year Term Pricing Plan.
- (2) A customer's minimum call volume shall be the number of Directory Assistance calls the customer delivered to the Telephone Company in the twelve month period immediately preceding the selected TPP term. If the customer has not previously delivered DA calls to the Telephone Company in that twelve month period, the minimum call volume shall be determined upon the conclusion of the twelfth consecutive month of delivering DA calls to the Telephone Company.

If the customer discontinues service prior to the conclusion of a twelve month period necessary to establish the minimum call volume, the call volume will be determined by multiplying the monthly average for the number of months the customer had service by twelve.

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(C) Termination Liability (Cont'd)

- (3) The quantity of calls subject to termination liability is based on the minimum call volume. When the customer's actual usage in any year of the term falls below the customer's minimum call volume, the customer has the option of either (a) or (b) following:

- (a) Reducing the original minimum call volume and paying for the difference between the minimum and reduced call volumes at the month-to-month per call rates.

For example, a customer with a minimum call volume of 1000 calls elects to reduce the minimum call volume to 900 calls. Customer will pay the difference (1000-900) multiplied by the month-to-month rate.

- (b) Remaining with the original minimum call volume and paying for a missed commitment level using the following calculation:

100% of the TPP per call charges is applied to the difference between 90% of the minimum call volume and the actual call volume.

For example, a customer with a minimum call volume of 1000 calls for the previous year elects to maintain that 1000 call commitment level in the following year. If the actual call volume was 800 calls, this customer will pay 100% of the TPP charges for 100 calls; [i.e., 90% of 1000 (minimum volume) = 900 (adjusted minimum) - 800 (actual volume) = 100 calls].

- (4) The termination liability charge is calculated as follows:

(a) First Year

For services discontinued within the first year, the customer will be liable for the total charges for the minimum call volume for the first year at month-to-month rates and 15% of the total charges for the remainder of the term commitment period based on the minimum call volume at month-to-month rates. Amounts previously paid by customers for the Telephone Company calls handled in the first year shall be applied as a credit to the total due the Telephone Company.

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(C) Termination Liability (Cont'd)

## (4) (Cont'd)

(b) Subsequent Years

For services discontinued after the first 12 months of a plan, customers will be liable for the difference between the rate actually paid and the lowest rate that would have applied based on the term of customer's actual usage (adjusted rate) in addition to 5% of the total charges for the remaining portion of their term commitment period.

For example, if a customer in a 5-year term plan disconnects at the end of 36 months, the highest TPP period that could have been satisfied is three years. The termination liability would be calculated as follows: 3-year monthly term rate minus 5-year monthly term rate X calls handled, plus 5% X 2 remaining years X minimum call volume X 3 year rate.

(D) TPP Termination Without Liability

- (1) A TPP may be canceled without liability should the tariff rates applicable to the customer increase.

---

(Issued under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(D) TPP Termination Without Liability (Cont'd)

- (2) Termination liability specified in 9(4)(C)(4) will not apply if the customer subscribes at the same minimum call volume to another Telephone Company Directory Assistance term plan of equal or greater length than the unexpired portion of the current term. The rates of the new term plan shall apply to the remainder of the new term plan.

If the customer fails to provide the Telephone Company at least seven months advance notice before the conversion to the alternative Telephone Company Directory Assistance term plan, then the customer is liable for any non-recoverable nonrecurring costs associated with converting a TPP to another Telephone Company Directory Assistance Service. Such costs include the non-recoverable costs of equipment and material ordered, provided, or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, force reductions, supervision, transportation, rights-of-way, and other associated costs less estimated net salvage.

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(E) Cancellation of A Special Order

A customer may cancel a Special Order for DA Service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the customer that the Special Order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

When a customer cancels a Special Order for DA Service after the order date but prior to the start of service, the appropriate charges as set forth in 5. preceding apply for the Directory Access Service cancelled. In addition, a charge equal to any unrecoverable capital costs incurred by the Telephone Company will apply to the customer.

(F) Changes to Special Orders

When a customer requests changes to a pending order for DA Services, such changes will be undertaken if they can be accommodated by the Telephone Company. The appropriate charges as set forth in 5. preceding apply for the Directory Access Service changed. In addition, a charge equal to any other costs incurred by the Telephone Company because of the change will apply.

(G) Moves

A move involves a change in the physical location of the point of termination at the customer premises or of the customer premises. Moves will be treated as set forth in 6.8.7 preceding and all associated nonrecurring charges will apply. Minimum period requirements will be established at the new location as set forth in 6.8.7 preceding. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

(H) DA Service Rearrangements

Nonrecurring charges apply for service rearrangements. Service rearrangements are as set forth in 6.8.1(C)(2) preceding. The Service Rearrangement Charges are as set forth in 6.8.1(C)(2) for the type of change provided by the Telephone Company.

2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(I) Credit Allowance For DA Service

- (1) When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided and a customer DA call has been answered or forwarded to a DA operator, a credit allowance for a call answered or forwarded to the DA operator equal to the rate for a Directory Assistance Service Call as set forth in 9.6 following plus the rate for a Directory Transport call will be applied to the customer's charges. The rate for a Directory Transport call will be the average of the Directory Transport rates per call as set forth in 9.6 following.
- (2) In addition to the credit as set forth in (1) preceding, when a DA operator or DA equipment provides an incorrect number for a call and the customer reports such occurrences to the Telephone Company, a credit allowance for such DA call will apply. The credit will be as set forth in (3) following. When the customer reports such a call and the number requested, the number provided and the reason the number provided is incorrect, the number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.
- (3) When a DA call is not completed due to the failure of Directory Access Service to DA locations, DA access equipment or DA operator activities, a credit allowance for the Switched Access Service portion in the originating LATA of such DA call will apply. When the customer reports such a call and DA number dialed, time of the call and the date of the call, the number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer. The credit will be as set forth following:
  - (a) Credit per call when Switched Access Service is billed using Transitional rates (.0050)\*
  - (b) Credit per call when Lineside BSA, Trunkside BSA - 950 Option, or Feature Group A or B Switched Access Service is billed using Premium per minute rates (.0100)\*
  - (c) Credit per call when Trunkside BSA-101XXX Option, or Feature Group D Switched Access Service is billed using Premium per minute rates (.0100)\*

\* ( ) equals a negative amount.

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(I) Credit Allowance For DA Service (Cont'd)

- (4) Credit allowances for other service interruptions will be provided as set forth in Section 2.7.1.1 preceding. (T)

9.5 Rate Regulations

- (A) The Directory Assistance service call charge, as set forth in 9.6 (A) following, applies for each call to DA Service. A call is a call which has been answered by or forwarded to a DA operator. The charge applies whether or not the DA operator provides the requested telephone number. The number of calls answered or forwarded to DA operators will be accumulated by Telephone Company measuring equipment. A credit for the provision of an incorrect telephone number will be applied as set forth in 9.4(I) preceding. (T)

The Directory Transport rate is comprised of the Tandem-Switched Transmission rate, the Tandem-Switching rate, a Tandem-Multiplexing rate and an Interconnection Charge.

- (B) The mileage for Directory Transport is measured from the serving wire center for the premises of the ordering customer to the DA location. Title Page notwithstanding, these two wire centers may be in different LATAs. In addition, the premises of the ordering customer must be in the LATA where DA service is requested or in the LATA where the DA location is located. The measurement will be performed as set forth in 6.8.13 preceding.
- (C) The charge per call for Directory Transport, as set forth in 9.6 (B) following, applies for each call to DA Service. A call is as set forth in (A) preceding. The number of calls will be accumulated as set forth in (A) preceding.

## ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.8 Operator Services-Automatic Call Distribution ServiceA) General

The Telephone Company will use Nortel's Telephone Operator Position System (TOPS™) to provide Operator Services-Automatic Call Distribution (OS-ACD) Service. (TOPS™ is a Nortel registered trademark.) OS-ACD Service will provide operator distribution functionality to customers who deliver calls to the Telephone Company's network. The Telephone Company will queue, route, and manage calls to customer-provided operator terminals that are compatible with Nortel's Open Position Protocol (OPP). Each call can be branded with a customized announcement as an optional feature of OS-ACD Service. The number of positions served and the call processing capacity of OS-ACD Service is engineered based on the customer's requirements and the Telephone Company's available capacity.

- 1) The customer is responsible for transport facilities required to transport calls to the designated OS-ACD switch.
- 2) The customer is responsible for interconnecting facilities between the designated OS-ACD switch and the customer's OSP.

B) Availability

OS-ACD Service is available at switch locations designated by the Telephone Company and as identified in National Exchange Carrier Association (NECA) Tariff F.C.C. No. 4. Effective August 18, 2001, OS-ACD Service will be available to customers in the state of Pennsylvania. Additional switch locations will be added, and will be published in the NECA Tariff F.C.C. No. 4, as facilities become available.

C) Technical Requirements

Nortel's Open Position Protocol (OPP) is used as the network interface between OS-ACD Service and the customer's OSPs. The OPP network interface is defined in Nortel Document No. Q214-1. Compatible customer provided equipment (CPE) and software will also be required.

(S) Reissued material filed under Transmittal No. 77 and scheduled to become effective August 18, 2001.

(X) Filed under authority of Special Permission No. 01-091 of the Federal Communications Commission.

## ACCESS SERVICE

10. Federal Government Access Services10.1 General

This section covers Access Services that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government. Services provided to state emergency operations centers are included. These services provide for command and control communications, including communications for national security, emergency preparedness and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security. In addition, this section covers the Telecommunications Service Priority (TSP) System service and procedures as set forth in 10.8.1(D) since it is administered by the Federal Government.

Services for command and control communications and for national security and emergency preparedness may sometimes be provided under non-emergency conditions for a short duration to determine network assurance. However, the Telephone Company reserves the right to limit or to decline participation in these non-emergency condition requests for service.

10.2 Emergency Conditions

These services will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

- (A) State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters").

---

(This page filed under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.2 Emergency Conditions (Cont'd)

- (B) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad. (Includes space vehicle recovery and protection efforts.)
- (C) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- (D) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.
- (E) Political unrest in foreign countries which affect the national interest.
- (F) Presidential service.

10.3 Intervals to Provide Service

Certain services provided under the provisions of this section of the tariff are provided on an individual case basis. Therefore, orders for such service shall be placed under the negotiated Interval provisions set forth in 5.2.1.(B) preceding.

---

(This page filed under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President  
2980 Fairview Park Drive, Falls Church, Virginia 22042

## ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.4 Facility Availability

In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service as set forth in Section 10.8.1(D) and 10.8.2.(D), following.

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities, when necessary to provide service.

10.5 Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

10.6 Mileage Application

Mileage, when used for rate application between two customer designated premises, shall be determined by the V and H Coordinates Method as set forth in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4 for WIRE CENTER INFORMATION (V and H coordinates).

10.7 Move Charges

When service is moved to a different building, the nonrecurring charge applies; when moved to a new location in the same building, a charge of one-half the nonrecurring charge applies.

(D)

(C) Special Routing Access Service

Special Routing Access Service is a specialized service for use by carriers authorized to provide their service for an agency or branch of the Federal Government. This service provides the customer's end users the ability to originate and terminate calls to or from the customer's premises.

(This page filed under Transmittal No. 1385)

Issued: November 30, 2018

Effective: December 15, 2018

Vice President, Federal Regulatory (T)  
1300 I Street, NW, Washington, DC 20005 (T)

## ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(C) Special Routing Access Service (Cont'd)

This service is an optional service which operates in conjunction with Trunk Side Premium Access Service furnished under other provisions of this tariff.

The Telephone Company will manually record Special Routing Access Service Active Mode Trunk Usage, and will bill the customer in accordance with these records. The hours for each trunk ordered will be summed and then rounded to the nearest half hour, except that when the initial activation total is less than one hour, one hour will be used to determine the charge.

(D) Telecommunications Service Priority (TSP) System

- (1) Priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook (T)  
National Communications System (NCS) H 3-1-2", (T)  
and "Telecommunications Service Priority (TSP) (T)  
System for National Security Emergency Preparedness (NSEP) Service User Manual, (T)  
National Communications System (NCS) M 3-1-1". (T)

The TSP System is a service, developed to meet the requirements of the Federal Government, as specified in the Service Vendor's Handbook and Service User's Manual which provides the regulatory, administrative and operational framework for the priority installation and/or restoration of NSEP telecommunications services. These include both Switched and Special Access Services. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

- (2) The TSP System's applicability is limited to Access Services which the Telephone Company can discreetly identify for priority provisioning and/or restoration.

(Issued under Transmittal No. 1037)

Issued: August 27, 2009

## ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System  
(Cont'd)

- (3) Some of the elements required for the TSP System are included in other sections of this tariff as general service offerings. They have been referenced in this section to reflect the complete TSP System with appropriate references to those other sections of the tariff for regulations, rates and charges.
- (4) The customer for TSP System Service also must be the same customer for the Access Service with which it is associated.
- (5) Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service(s) of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action to be taken. Credit allowance for such service preemption shall be made in accordance with the provisions set forth in 2.4.4(E) preceding concerning Temporary Surrender of a Service.
- (6) The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the Federal Government, as specified in the TSP Service Vendor Handbook, in order for the Government to maintain and administer its overall TSP System. This customer service record information will include only TSP Authorization Code and Telephone Company Circuit/Service ID.
- (7) When Priority Restoration Maintenance and Administration, as defined in the TSP Service Vendor Handbook, is discontinued (Revocation of Assigned Restoration Priority), and the associated Access Service is continued in service, the charge specified in 10.8.2(D)(2)(C) will not apply for such a discontinuance.

## ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System  
(Cont'd)

(8) Credit allowance for service interruption for Priority Restoration Maintenance and Administration shall be the same as for the Access Service with which it is associated as set forth in Section 2.7.1.1 preceding. (T)

(9) Certain activities performed by the Telephone Company in association with the TSP System are as follows:

(a) Priority Installation Invocation includes System Implementation, Verification, Confirmation, and Preemption.

(b) Priority Restoration Level Implementation includes System Implementation, Verification, and Confirmation.

(c) Priority Restoration Level Change includes Verification and Confirmation.

(d) Priority Restoration Maintenance and Administration includes Reconciliation and Preemption.

(10) The customer, in obtaining a Priority Restoration, recognizes that quoting charges and obtaining permission to proceed with the installation or restoration of certain Access Services will cause unnecessary delays. In subscribing to Priority Restoration service the customer recognizes this condition and grants the Telephone Company the right to quote charges after the restoration has been completed.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Service and Arrangements10.9.2 Government Emergency Telecommunications-Alternate Carrier Routing Service (GETS-ACR)

GETS-ACR is an emergency telecommunications service offered by the United States Government Office of the Manager, National Communications System (OMNCS). Access to GETS-ACR is accomplished through the use of the 710 non-geographical Numbering Plan Area (NPA) code activated in end offices and tandem switching office systems, and by an Interexchange Carrier (IC) designated by the OMNCS as a GETS-ACR designated IC. GETS-ACR Access is available in the entire Telephone Company service area. The GETS-ACR 710 non-geographical NPA code will be opened in all areas serviced by the Telephone Company.

GETS-ACR allows the GETS universal access number 710-NCS-GETS or 1 plus the GETS access number, to be treated uniquely within the public network. GETS-ACR routes the call alternately to three pre-selected Interexchange Carriers (ICs), identified by their Carrier Identification Codes (CICs). Calls are routed based on a predetermined sequence:

- Primary IC
- Alternate IC
- Second Alternate IC

GETS-ACR facilities are designed to be used only for emergency government telecommunications and for testing of government emergency systems and may not be used by unauthorized end users. The Telephone Company will work cooperatively with the customer to provide service at the customer's request where facilities are available. In cases where facilities are not available, the Telephone Company will provide service to the customer as soon as reasonably possible.

(A) Rates and Charges

		Monthly USOC      Rate	Nonrecurring Charge
GETS-ACR Code Activation			
- per end office	ARFPE	\$30.00	\$1,000.00
GETS-ACR Rearrangement			
- per occurrence	NRBGY		150.00

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Service and Arrangements10.9.2 Government Emergency Telecommunications-Alternate Carrier Routing Service (GETS-ACR) (Cont'd)10.9.2.2 Government Emergency Telecommunications Service High Probability of Completion/Enhanced Alternate Carrier Routing (T)  
(T)

Government Emergency Telecommunications Service High Probability of Completion/Enhanced Alternate Carrier Routing (GETS HPC/EACR) is an emergency telecommunications service offered by the United States Government Office of the Manager, National Communications System (OMNCS). Access to GETS HPC/EACR provides a greater likelihood that callers using this special arrangement will complete their calls during periods when the Telephone Company network is congested. GETS calls will be marked with a special "high probability of completion" (HPC) designation, which elevates the class of a call above its normal level.

GETS HPC/EACR is available in all end offices and tandem switches in the Telephone Company service area where technically feasible.

GETS HPC/EACR facilities are designed to be used for emergency Federal government telecommunications only and may not be used by unauthorized end users.

(A) Rates and Charges

	Monthly USOC      Rate	Nonrecurring Charge
GETS HPC/EACR Service		
- Per End Office	\$35.00	\$2,778.71
- Per Access Tandem	39.01	3,723.94

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Service and Arrangements10.9.2 Government Emergency Telecommunications-Alternate Carrier Routing Service (GETS-ACR) (Cont'd)10.9.2.4 GETS Expanded High Probability of Completion (GETS Expanded HPC) and Office Wide Call/Egress Queuing/

(N)

GETS Expanded HPC enables suitably equipped offices to recognize any 10 digit number with the 710 NPA code (710-XXX-XXXX) and apply the HPC feature.

GETS Office Wide Call/Egress Queuing (OWCQ/OWEQ) provides a greater likelihood that GETS callers will complete their HPC calls during periods when the Telephone Company network is congested. When all trunks in a public trunk group are busy, Office Wide Call Queuing enables a call to be placed in queue on any member of the trunk group to wait its turn to be passed on through the network to the called destination. When all trunks in a private trunk group (PBX system) are busy, Office Wide Egress Queuing enables a call to be placed in queue until the next trunk is available.

Expanded HPC and OWCQ/OWEQ is available in all end office and tandem switches in the Telephone Company area where technically feasible.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS, (DTS-C)(A) General

Provision of custom designed high bandwidth transmission services for the exclusive use of the Interexchange Carrier (IXC) selected by the Department of Defense's Defense Information Systems Agency (DISA) to provide the Defense Information Systems Network (DISN) in the Continental United States (CONUS). DISN-C (aka: DISN-CONUS, DISN and DTS-C) will provide SONET special access transport between specific customer designated IXC locations and Sonet and asynchronous connections between the IXC locations and DISA end user locations.

DTS-C service is provided pursuant to a contract arrangement, commencing with the tariff effective date, also known as the contract or anniversary date. The services provided are the same as those services described in Sections 7 and 8 of this tariff and are subject to the general regulations of this tariff unless otherwise stated.

(B) Service Components(1) DTS-C Transport Service

DTS-C Transport Services are high bandwidth SONET services (combination of IEF and IBT) in capacities of OC3 and OC3c or OC12 and OC12c provided and rated for four specific routes of concentrated traffic. These routes are between Serving Wire Center(s) of the selected IXC and customer designated locations; specifically they are:

1. ARTNVACK - 2100 Reston Parkway, Reston, VA
2. BLTMMDC - 2606 Carsins Run Rd., Aberdeen, MD
3. PHLAPASL - 460 N 6th St., Philadelphia, PA
4. WASHDCSW - 1133 19th St., NW, Washington, DC

DTS-C Transport Services will be provided and rated in increments of STS3 (155 Mbps). The available Network Interfaces (NIs) are OC3, OC3c, OC12, and OC12c, and are provided as follows:

OC3 to OC3  
OC3c to OC3c  
OC12 to OC12  
OC12c to OC12c

Alternate Serving Wire Center (ASWC) service is a service option available to the IXC for DTS-C Transport Services. With this option the Company will choose a wire center other than the normal serving wire center to serve all of that premises' traffic. Special construction rates will apply when fiber feeder routes and other facilities are not available.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS (DTS-C) (Cont'd)(B) Service Components (Cont'd)(1) DTS-C Transport Services (Cont'd)

Fiber path diversity is not a customer option, but is provided where available without a special guarantee. This feature is described in Section 8.

(2) DTS-C Delivery Services

DTS-C Delivery Services are SONET and asynchronous transmissions that provide distribution throughout the network except for the four specific concentrated routes listed above. DTS-C Delivery Services are provided in capacities of OC12, OC12c, OC3, OC3c, DS3 and DS1. Also available for OC3, OC3c, OC12, and OC12c as a service option is Four Fiber 1 + 1 Port Protection. These services are provisioned the same as Special Access DS1 and DS3 services, and IntelliLight Broadband Transport (IBT) services, described in Sections 7 and 8 respectively, except that DTS-C rate plans apply.

Any current optional feature for these services will be provided at the standard tariff rates.

Material formerly appearing on this page now appears on 1st Revised Page 10-28.1.

(Issued under Transmittal No. 533)

Issued: January 5, 2005

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, D.C. 20005

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS (DTS-C) (Cont'd)(C) Terms and Conditions

- (1) The contract/commitment period for DTS-C is 3 years and may be renewed twice in 3-year increments for a maximum of nine years. The contract renewal will be at the same or lower rates.

Renewal for a third 3-year period will result in a 15% discount applied to the monthly recurring rates for all SONET DTS-C Transport and Delivery Services. The discount will apply for the duration of the 3-year extension for these SONET services. The discount for the first 24 months of the new 3-year commitment period will be calculated using the rates in effect on the day the contract was renewed, and it will be applied as a lump sum adjustment to the customer's bill no later than the first bill period following the date of renewal. Beginning on month 25 and continuing through the end of the commitment period, the discount will be applied as a monthly adjustment to the customer's bill.

For customers who renewed for a third 3-year period and convert their DTS-C Transport and Delivery Services to Contract Tariff Option 19 as set forth in Section 21.20 following, the following applies.

- (a) The 15% discount as described in this Section 10.9.3(C)(1) will cease on the date that the applicable DTS-C Transport and Delivery Services are converted to Contract Tariff Option 19.

- (b) The customer must return any unearned portion of the lump sum adjustment for the period of time beginning with the date of conversion to Contract Tariff Option 19 and ending twenty-four months after the date that DTS-C was renewed for a third 3-year period. For example, assume that the customer renewed for a third 3-year period on April 1, 2003 and received a lump sum adjustment for the first 24 months of that renewal. The lump sum adjustment was calculated as 15% of the recurring monthly charges that were in effect on April 1, 2003 for the period of time beginning April 1, 2003 and ending 24 months later on March 31, 2005. Also assume the customer subsequently converts to Contract Tariff Option 19 on February 1, 2005. Based on these assumptions, the customer had an unearned portion of the lump sum adjustment for the period of time beginning February 1, 2005 (date of conversion to Contract Tariff Option 19) and ending March 31, 2005 (last day of the first 24 months of third 3-year renewal) that must be returned.

- (2) Any nonrecurring charges applicable for this service are guaranteed not to exceed \$1.00 for the life of the contract including renewal life.

Material formerly appearing on this page now appears on 3rd Revised Page 10-29.

Certain material currently appearing on this page previously appeared on 1st Revised Page 10-28.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Transmission Service - CONUS,  
(DTS-C) (Cont'd)(C) Terms and Conditions (Cont'd)

- (3) Any rearrangements of services will be treated as disconnects and new connects.
- (4) DTS-C services are not subject to any Special Access Service Guarantee credits, but are subject to the standard credits for service outages as described in Section 2 of this tariff.
- (5) The DTS-C IXC is not subject to termination liability in the first year of the contract, nor for any services disconnected at the request of DISA during the life of contract.
- (6) DTS-C services are subject to termination liability in years 2 and 3 of the initial/base contract period and in years 1 through 3 for each renewal period. Termination liability is separated by service categories, i.e., Delivery and Transport.

(M)

(M)

Termination liability for DS1 and DS3 Delivery Services is based on maintenance of a commitment level of 65% of 100% of the DS1 equivalency for all DS1 and DS3 services in place at the end of Year One. Year One is the first year of the base contract period and ends on January 27, 1998. Anytime that a delivery service is disconnected after Year One, termination liability will be equal to 6 months revenue for the total quantity of DS1 equivalent services which fall below the 65% level quantified at the end of Year One.

Termination liability for SONET Delivery Services and all Transport Services is equal to 15% of the recurring monthly charges remaining in the contract period; i.e., a maximum of 24 months revenue in the base contract period or 36 months revenue in either renewal contract period.

- (7) In the event that a SONET DTS-C service is disconnected within the first 24 months of the third 3-year contract period, the customer will be billed the pro-rated portion of the lump sum adjustment as described in (C)(1) preceding from the date of disconnection through the balance of the initial 24 months. This is in addition to any termination liability that may be applied under the terms and conditions of this contract.

Certain material now appearing on this page formerly appeared on Original Page 10-28.1.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS (DTS-C) (Cont'd)(C) Terms and Conditions (Cont'd)

- (8) Termination liability for DTS-C Transport and Delivery Services will be waived when discontinuance of such services is associated with conversion to IEF Service under Contract Tariff Option 19 as set forth in Section 21.20 following, provided that the following conditions are met. (N)
- (a) The customer satisfies the minimum STS1 Termination requirement for each replacing IEF Service in accordance with the regulations set forth in Section 21.20.2(A) of Contract Tariff Option 19 following; and
- (b) The customer provides the Telephone Company with the circuit identification numbers of the DTS-C Transport and Delivery Services to be converted to IEF Services under Contract Tariff Option 19 at the time of ordering such IEF Services. (N)

(D) Rate Elements(1) DTS-C Transport Service

DTS-C Transport service has three rate elements, terminations, ports, and per mile mileage. Each rate element is discounted based on quantity. The discounts on ports and terminations are based on the quantity per location. Terminations are provided and rated in increments of STS3. OC3/OC3c and OC12/OC12c ports are provided and rated per increment of STS3 over the interface. Mileage is rated per mile for the distance between SWCs and/or ASWCs of the designated locations.

(2) DTS-C Delivery Services

The delivery service rate elements are terminations, ports, and mileage, fixed and per mile, for the SONET services. Channel terminations and fixed and per mile mileage rate elements are applicable for the asynchronous DS1 and DS3 services. Detailed explanations of these basic service rate elements are provided in Sections 7 and 8.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.6 FAA Telecommunications Infrastructure (FTI)(A) General

The FAA Telecommunications Infrastructure (FTI) is a uniquely rated and designed program providing certain Special Access services for the Federal Aviation Administration (FAA), with Harris Corporation as agent for the FAA. FTI provides Voice Grade Service, Digital Data Service, High Capacity Services (DS1 and DS3), and IntelliLight Broadband Transport (IBT).

(B) Terms and Conditions

- (1) FTI is provided pursuant to a five-year contract and may be renewed up to ten times in one-year increments. The service will continue until terminated for up to a 15-year period.
- (2) Except as otherwise stated in this section, the services provided are the same as those services described in Sections 7 and 8 preceding of this tariff. The services are subject to the general regulations of this tariff unless otherwise stated.
- (3) FTI is available from every wire center in all operating territories under this tariff, subject to the availability of suitable facilities.
- (4) FTI allows connectivity to other Telephone Company services and to any other Interexchange Carrier point of presence (POP) through Collocated Interconnection as described in Section 19 following.
- (5) The rates and charges for FTI are specified in (C) following and apply in lieu of the rates, charges and term plans specified in Sections 7 and 8 for the specific service involved
- (6) Service connections will utilize the following Network Channel Interface codes.

<u>Service</u>	<u>NC</u>	<u>NCI</u>	<u>SECNCI</u>	(C)

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.7 Federal Markets High Capacity Services

(N)

(A) General

Provision of uniquely rated High Capacity Services that are provided to a customer for use only by agencies and branches of the Federal Government and other users authorized by the Federal Government. Federal Markets High Capacity Services are available in all end offices in the Telephone Company service area, subject to the availability of suitable facilities.

A High Capacity channel is a channel for the digital transmission of 1.544 or 44.736 Mbps isochronous serial data. The actual bit rate and framing format is a function of the channel interface selected by the customer. High Capacity channels are provided between customer designated premises or between a customer designated premises and a Telephone Company Hub at 1.544 and 44.736 Mbps transmission.

## (1) DS1 High Capacity/1.544 Mbps Service

DS1 service (a 1.544 Mbps facility) is provided with an electrical interface.

## (2) DS3 High Capacity/44.736 Mbps Services

DS3 service is available in standard channel termination configurations and is provided with an electrical interface.

## (3) Central Office Multiplexing

(a) DS3 to DS1 Multiplexing

An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

(b) DS1 to DS0 Multiplexing

DS1 to Voice - An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services.

DS1 to DS0 - An arrangement that converts a 1.544 Mbps channel to 24 56 kbps channels utilizing digital time division multiplexing.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.7 Federal Markets High Capacity Services (Cont'd)(B) Terms and Conditions

- (1) Except as otherwise stated in this section, the services provided are the same as those services described in Section 7 preceding of this tariff.
- (2) Except as otherwise noted, the regulations stated herein are in addition to other applicable regulations contained in other sections of this tariff for the underlying services, including credit allowances, and when applicable, rearrangement charges.
- (3) The minimum service period for Federal Markets High Capacity Services is one month.
- (4) Technical specifications for DS1 service are delineated in Technical Reference ANSI T1.403-1999 (R2007) for the carrier interface Network Interface (NI). Technical specifications for DS3 service are delineated in Technical Reference ANSI T1.404-2002 (R2006). (C)(x)  
(C)(x)  
(C)(x)
- (5) The monthly rates and installation nonrecurring charges for Federal Markets High Capacity Services are specified in (C) following and apply in lieu of the monthly rates, installation nonrecurring charges and term plans specified in Section 7 for the specific service involved.
- (6) Federal Markets High Capacity Services customers are not eligible for any additional discounts or to enroll/subscribe in any term, volume or discount plan under any other sections of this tariff.

(x) ANSI T1.403-1999 (R2007) replaces ANSI T1.403-1999 in its entirety.  
ANSI T1.404-2002 (R2006) replaces ANSI T1.404-2002 in its entirety.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.8 Washington Interagency Telecommunications System 3(A) General

Washington Interagency Telecommunications System 3 (WITS 3) is a uniquely rated and designed data telecommunications switching and transport service arrangement for the General Services Administration (GSA). WITS 3 provides Dedicated Transmission Services (DTS) and Tariffed Service Components. WITS 3 is designed for the exclusive use of GSA, various federal agencies, and other designated end users, and provides transmission services between and among them and their designated interexchange carriers and/or information service providers.

(B) Terms and Conditions

WITS 3 is provided pursuant to an eight-year contract arrangement (a four-year base period and four one-year options), commencing with the tariff effective date (a.k.a., anniversary or contract date). In addition, one service period extension option is also provided in order to extend the contract arrangement to May 30, 2020. Except as otherwise stated in this section, the services provided are the same as those services described in Sections 7 and 23 of this tariff. The services are subject to the general regulations of this tariff unless otherwise stated.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.8 Washington Interagency Telecommunications System 3 (Cont'd)(C) Service Components(1) Dedicated Transmission Services (DTS)

DTS provides a fiber-based network of special access point-to-point transmission paths of various bandwidths. The analog and digital transmissions provided are listed below with the standard special access name in parenthesis if different.

- Analog 4 kHz (Voice Grade) # (T)
- Subrate DS0: 4.8, 9.6, & 19.2 kbps (DDS)# (T)
- DS0: 56 & 64 kbps (DDS)
- T1: 1.544 Mbps (DS1)

Fractional: DS1 interface for use in providing simultaneous two-way transmission of isochronous bipolar serial data signals and is limited to groupings of N x 56 kbps or N x 64 kbps where N = 2, 4 or 6.

(D)  
(D)

Unchannelized: a channel with an information payload of 1.536 Mbps.

- T3: 44.736 Mbps (DS3)

Channelized: 28 separate DS1 channels of 1.536 information payload.

Unchannelized: a signal with 43.008 Mbps of information payload.

Fractional: DS3 interface for use in providing simultaneous two-way transmission of isochronous bipolar serial data signals and is limited to groupings of N x 1.536 Mbps where N = 3.

# Effective December 31, 2015, orders for new Analog 4 kHz and Subrate DS0 DTS are no longer permitted. The Company will continue to provide Analog 4 kHz and Subrate DS0 DTS pursuant to this Section 10.9.8C on any existing Analog 4 kHz and Subrate DS0 DTS that are in-service as of December 31, 2015, or any orders that are placed for Analog 4 kHz and Subrate DS0 DTS that are placed with the Company prior to December 31, 2015 (collectively, Existing Analog 4 kHz and Subrate DS0 DTS) until the expiration of the contract arrangement. Moves, additions and changes to Existing Analog 4 kHz and Subrate DS0 DTS are permitted.

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.8 Washington Interagency Telecommunications System 3 (Cont'd)

(N)

(C) Service Components (Cont'd)(2) Tariffed Service Components

The Tariffed Service Components offered in this Section 10.9.8(C)(2) can only be used to connect to Telephone Company provided dedicated SONET ring service.

## (a) Ports

Ports allow lower level signals to be transported over Telephone Company provided dedicated SONET ring service. Ports are available in the following arrangements:

DS1 at OC3 or OC12/3 node  
DS3 at OC3 or OC12/3 node  
DS3 at OC12  
DS3 at OC48  
DS3 at OC192

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.8 Washington Interagency Telecommunications System 3 (Cont'd)(D) Rate Applications

The WITS 3 services are uniquely rated to meet GSA requirements. In addition, the service components and rate elements are rated based on specific NPA NXX areas (wire center serving areas within a Numbering Plan Area). These rate groups are described below:

Group 1: services provided by all of the Central Offices (COs) in the District of Columbia.

Group 2: services provided by all of the COs in the State of Maryland.

Group 3: services provided by all of the COs in the State of Virginia within the operating territory of Verizon Virginia LLC.

(T)

The WITS 3 rate elements are very similar to those for the generic services described in other sections of this tariff. Following is a list by service type of the WITS 3 rate elements. Full descriptions are provided when the rate element/service is unique to WITS 3 or different from those in the generic offering:

(1) Dedicated Transmission Services (DTS)

Local Access: same as a Special Access Channel Termination but billed by rate group for the terminating and originating locations. This service element has a one-time charge for installation and a monthly recurring charge. Other nonrecurring charges may apply for other service activities.

Local Transport: has both a fixed and per mile element that equates to Special Access Mileage. Both per mile and fixed elements have a monthly recurring rate.

(2) Tariffed Service Components

Ports: Billed by rate group. This service element has a monthly recurring charge. Nonrecurring charges may apply for other service activities.

Effective: February 23, 2012

Vice President, Federal Regulatory  
1300 I Street, NW, Washington, DC 20005

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.8 Washington Interagency Telecommunications System 3 (Cont'd)

(N)

(D) Rate Applications (Cont'd)(3) Other Nonrecurring Charges

In addition to an installation charge, many of the WITS 3 services also may be subject to a nonrecurring Hard Change Charge. A Hard Change Charge is incurred when a change in service requires the dispatch of a technician to the customer's site to make changes in facilities or equipment (e.g., a service is moved from one location to another).

## ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.9 Enterprise Infrastructure Solutions (EIS)

(N)

(A) Federal Universal Service Fund (FUSF) Surcharge

EIS customers who are assessed a Subscriber Line Charge (SLC) as specified in Section 4.1.7(A) preceding will be assessed a monthly FUSF Surcharge as specified herein in lieu of the FUSF Surcharges set forth in Section 4.1.7(D)(2) and 4.1.7(D)(4) through 4.1.7(D)(6) preceding. The SLC is included in the EIS customer's rate.

The FUSF Surcharge applicable to EIS will be determined by multiplying an FUSF Surcharge Factor, as set forth in Section 4.1.7(D)(14) preceding, by the SLC portion of the monthly recurring charge applicable to the EIS customer for each of the following services:

- ISDN BRI
- ISDN PRI
- Single Line Business
- Multi-Line Business

## ACCESS SERVICE

11. Special Facilities Routing of Access Services11.1 Description of Special Facilities Routing of Access Services

The services provided under this tariff are provided over such routes and facilities as the Telephone Company may elect. Special Facilities Routing is involved when, in order to comply with requirements specified by the customer, the Telephone Company provides Switched Access Service, Special Access Service or Special Federal Government Access Service in a manner which includes one or more of the following conditions:

11.1.1 Diversity

Two or more services must be provided over not more than two different physical routes.

11.1.2 Avoidance

A service must be provided on a route which avoids specified geographical locations.

11.1.3 Cable-Only Facilities

Certain Voice Grade services are provided on Cable-Only Facilities to meet the particular needs of a customer.

Service is provided subject to the availability of Cable-Only facilities. In the event of a service failure, restoration will be made through the use of any available facilities as selected by the Telephone Company.

## ACCESS SERVICE

11. Special Facilities Routing of Access Services (Cont'd)11.1 Description of Special Facilities Routing of Access Services (Cont'd)

In order to avoid the compromise of special routing information, the Telephone Company will provide the required routing information for each specially routed service to only the ordering customer. If requested by the customer, this information will be provided when service is installed and prior to any subsequent changes in routing.

The offering of Special Facilities Routing of Access Services contemplates the use of existing facilities. Should facilities not be available, it may be necessary to construct such facilities, either as (1) normal or (2) Special Construction. If Special Construction is involved, the regulations, as set in the appropriate Special Construction tariff as identified in Section 1.5 will apply. However, the applicable rates and charges shall be filed in this section of this tariff, not the Special Construction tariff. In either case of (1) or (2) preceding, the rates and charges for any specific items of cost directly attributable to the provision of this service shall be filed in this section.

The rates and charges for Special Facilities Routing of Access Services as set forth in 11.2 following are in addition to all other rates and charges that may be applicable for services provided under other sections of this tariff.

11.2 Rates and Charges for Special Facilities Routing of Access Service

The rates and charges for Special Facilities Routing of Access Services are as follows:

11.2.1 Diversity

For each service provided in accordance with 11.1.1 preceding.

	<u>USOC</u>	<u>Monthly Rate</u>
Administration - per circuit	DVA	\$ 5.00
Special Facilities - Other	SYD++	<u>Rates and Charges</u> ICB rates and charges apply

ICB Rates and charges are filed in 11.2.5 following.

## ACCESS SERVICE

12. Specialized Service or Arrangements12.1 General

Specialized Service or Arrangements may be provided by the Telephone Company, at the request of a customer, on an individual case basis if such service or arrangements meet the following criteria.

- (A) The requested service or arrangements are not offered under other sections of this Tariff.
- (B) The facilities utilized to provided the requested service or arrangements are of a type normally used by the Telephone Company in furnishing its other services.
- (C) The requested service or arrangements are provided within a LATA.
- (D) The requested service or arrangements are compatible with other Telephone Company services, facilities, and its engineering and maintenance practices.
- (E) This offering is subject to the availability of the necessary Telephone Company personnel and capital resources.

12.2 Move Charges

- (A) When service without a maximum termination liability charge associated with it is moved to a different building, the nonrecurring charge applies; when moved to a new location in the same building, a charge of one-half the nonrecurring charge applies.
- (B) When service with a maximum termination liability charge associated with it is moved and is reinstalled at a new location, the customer may elect:
  - to pay the unexpired portion of the maximum termination liability charge for the service, if any, with the application of a nonrecurring charge and the establishment of a new maximum termination liability charge for such service at the new location, or
  - to continue service subject to the unexpired portion of the maximum termination liability charge, if any, and pay the estimated costs of moving such service, provided that the customer requests these charges be quoted prior to ordering the service move. Charges for moving such service will be based on estimated costs attributable to the move.

## ACCESS SERVICE

12. Specialized Service or Arrangements (Cont'd)12.3 Rates and Charges (Cont'd)District of Columbia (Cont'd)

National Broadcasting Company, Inc.

Provision of an analog matrix video switching arrangement. The switch is to be located in the Telephone Company Audio/Video Operations Center (AVOC) at 730 12th Street, NW, Washington, DC. The arrangement will consist of a 128 x 128 frame that will be initialized as a 96 x 80 matrix switch. Included in the initial arrangement is 12 control interface ports; one for the Telephone Company's administration and maintenance activity, and eleven for NBC. NBC shall provide for control circuits between the AVOC and NBC's 30 Rockefeller Plaza, New York location.

In addition to the initial matrix, the video switch may be expanded in increments of 16 ports to its full capacity of 128 X 128. Additional control interface ports, up to a maximum of 50, may also be ordered.

NBC will be credited 50% of the monthly rate for the full arrangement, the initial order and any in service expansion, whenever there is a service outage/service interruption of thirty or more consecutive minutes. Total monthly credits will not exceed the monthly charge.

The contract period for this arrangement is 120 months and is subject to early termination liability. The maximum termination liability charge, MTL, for the 96 x 80 matrix arrangement is \$160,200.00. The MTL is applicable for the first twenty-four months of this service arrangement and will decrease by 1/96th per month (\$1,670.00/mo) for each subsequent month this arrangement remains in service. Termination liability is not applicable for an upgrade in capacity or functionality of the switch.

The voice grade data control circuit(s) and video transmissions are not a part of this arrangement. They are to be supplied by the customer and may be purchased from the Telephone Company at the rates specified in Section 7 of this tariff. Case No. 1922-95B.
