ACCESS SERVICE5. Access Ordering (Cont'd)5.4 Charges Associated with Access Ordering (Cont'd)5.4.1 Access Order Charge (Cont'd)

The Access Order Charge does not apply (Cont'd)

- When an ETS customer orders an ETS-MM-VCC. (N)
- When an ETS Term Discount Plan customer transfers in-service ETS Term Discount Plan Committed Ports to individual ETS Port Term Discount Plan term commitments.
- When an ETS customer establishes a new ETS Port Term Discount Plan or makes any changes to an existing ETS Port Term Discount Plan.
- When an ETS Port Term Discount Plan customer establishes a new or discontinues an existing ETS Port Term Discount Plan Volume Discount Plan.
- When an ETS Port Term Discount Plan customer establishes a new or discontinues an existing ETS Fixed Rate Option.
- When the ETS Port Protection optional feature is ordered in conjunction with the ordering of the Primary ETS Basic Port as set forth in Section 16.4.4(A)(6)(e), following.
- When a customer requests a change of trunks from tandem-switched transport to direct-trunked transport or from direct-trunked transport to tandem-switched transport or requests to rearrange switched access service between lower capacity and higher capacity facilities (e.g. voice grade to/from DS1 or DS1 to/from DS3), providing:
 - the change is ordered no later than July 1, 1994 , and
 - the change is completed no later than October 1 , 1994, and
 - the orders to disconnect existing trunks and to connect the new trunks are placed at the same time, and
 - the number of installed trunks does not exceed the number of trunks disconnected. If the number of installed trunks exceeds the number of trunks disconnected, the Access Order Charge will apply unless the customer provides justification based upon standard engineering methods to show that the additional capacity is required to maintain the same level of service .

ACCESS SERVICE**8. Digital Subscriber Line Access Services**

Where offered under this tariff, Digital Subscriber Line Access Services provide transmission services over local exchange service facilities that can be used for simultaneous voice and data communications. Service is provided, where available, between customer designated premises and designated Telephone Company Serving Wire Centers.

8.1 Asymmetric Digital Subscriber Line Access Service

The Telephone Companies below will offer ADSL Access Service under the provisions specified in Section 8.1:

<u>Telephone Company</u>	<u>Study Area Code</u>	<u>Non-WRP/WPP</u>	<u>Wholesale Rate Plan (WRP)*</u>	<u>Wholesale Pricing Plan (WPP)**</u>
Chesnee Telephone Company, Inc. d/b/a Chesnee Communications	240515		X	
Gearheart Communications Company, Inc. d/b/a Coalfields Telephone Company	260408		X	
Skyline Telephone Membership Corp.	230501			X
Yadkin Valley Telephone Membership Corporation	230511		X	

(D)

*DSL Access Services Wholesale Rate Plan (WRP) regulations are at Section 8.3 following. For the Telephone Companies above indicated as offering ADSL under the WRP, the WRP regulations at Section 8.3 apply in addition to the regulations herein at Section 8.1.

**DSL Access Services Wholesale Pricing Plan (WPP) regulations are at Section 8.4 following. For the Telephone Companies above indicated as offering ADSL under the WPP, the WPP regulations at Section 8.4 apply in addition to the regulations herein at Section 8.1.

Transmittal No. 223

Issued: June 17, 2019

Effective: July 2, 2019

President
7852 Walker Drive, Greenbelt, Maryland 20770

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions(a) DSL Access Service Connections

Where available, ETS Basic or Interconnection Ports may be equipped with the DSL Access Service Connection function. The function provides for the interconnection of ETS with ADSL Access Service as described in Section 8.1, preceding, provided by the Telephone Company under this tariff. The function also provides for the interconnection of ETS with a wireline broadband Internet transmission service provided on a non-tariffed, common carrier basis. This optional function allows the ETS customer to receive ADSL and/or wireline broadband Internet transmission service data traffic from and transmit ADSL and/or wireline broadband Internet transmission service data traffic to its end user customers.

The speed of the DSL Access Service Connection function ordered by the ETS customer must equal the speed of the associated ETS Port.

As described in Section 8.1, preceding, the DSL Access Service Connection Point may be located within the serving territory of the Telephone Company, or in the serving territory of another telephone company when used in conjunction with ETS.

(C)

Transmittal No. 223

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(a) DSL Access Service Connections (Cont'd)

In the above example, the Telephone Company would bill the ETS customer for one ETS MM-VCC nonrecurring charge specified in Section 17, following, and one Access Order Charge specified in Section 17.4.1(A), following. The monthly recurring rate for this ETS MM-VCC would be calculated at four times the 10 Mbps increment rate specified in Section 17, following.

Monthly and nonrecurring charges apply to each ETS MM-VCC established by the Telephone Company. As specified in Section 5.4.1, preceding, an Access Order Charge does not apply to establish an ETS MM-VCC. The ETS customer may order multiple ETS MM-VCCs to multiple end users' locations on a single Access Order. The applicable nonrecurring charge for each ETS MM-VCC established would apply. The ETS MM-VCC charges apply in addition to the nonrecurring charge for equipping the ETS Port with the DSL Access Service Connection function. Rates and charges are specified in Section 17 following.

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(a) DSL Access Service Connections (Cont'd)

Where suitable facilities exist, an ETS customer that requires the ability to transmit and receive low speed data using virtual local area network tagged frames may also order an ETS Low Bit Rate Virtual Circuit Channel (ETS LBR-VCC) between its CDP and the premises of its end user customer, provided such end user customer's premises is equipped with ADSL Access Service provided by the Telephone Company under this tariff as described in Section 8.1, preceding. This optional function allows the customer to transmit and receive tagged frames which were formatted by the customer's CPE in conformance with the standards specified in Technical Reference, IEEE Std 802.1Q – 2018, Sections 5 through 12 and Annexes E and G. ETS LBR-VCCs are only available when the ETS customer's CDP, the ETS customer's end user premises and the Telephone Company's DSL Access Service Connection Point SWC are all located within the serving territory of the Telephone Company. ETS LBR-VCCs do not increase the bandwidth capacity of ETS CTs, ETS Ports, ETS EVCs and/or Special Access Service Channel Terminations, Channel Mileage Facility and Channel Mileage Terminations used by the ETS customer to connect its CDP to the DSL Access Service Connection Point SWC.

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(f) ETS Bandwidth Add-On (ETS BAO)

Where suitable facilities exist, an ETS customer that requires additional bandwidth capacity may order the ETS Bandwidth Add-On (ETS BAO) feature. This optional feature enables the ETS customer to order additional bandwidth capacity in 10 Mbps or 500 Mbps increments to be added to ETS Basic Ports, ETS CTs, ETS EVCs, ETS E-EVCs and ETS I-EVCs.

(C)

The ETS BAO 10 Mbps increment is available for speed options of 50 Mbps, 100 Mbps, 200 Mbps, 250 Mbps, 300 Mbps, 400 Mbps, 500 Mbps 600 Mbps, 700 Mbps, 750 Mbps, 800 Mbps, and 900 Mbps. The maximum speed possible using 10 Mbps increments is 1 Gbps.

(N)

The ETS BAO 500 Mbps increment is available for speed options of 1 Gbps, 2.5 Gbps, and 5 Gbps. The maximum speed possible using 500 Mbps increments is 10 Gbps.

(N)

The ETS BAO feature is only available on the above listed ETS rate elements and speed options when provided within the serving territory of the Telephone Company.

For each ETS BAO feature, the ETS customer may order one 10 Mbps increment, one 500 Mbps increment, multiple 10 Mbps increments or multiple 500 Mbps increments. The ETS BAO feature may be added to an eligible ETS rate element at the same time the underlying ETS rate element is initially installed or subsequently added to an existing ETS rate element. An ETS BAO feature would be ordered for each eligible ETS rate element and speed option combination based upon the ETS customer's bandwidth needs.

Transmittal No. 223

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(f) ETS Bandwidth Add-On (ETS BAO) (Cont'd)

When an ETS BAO feature is added at the same time as the underlying ETS rate element is initially installed, an Access Order Charge and nonrecurring charge associated with the underlying ETS rate element would apply. When an ETS BAO feature is subsequently added to an existing ETS rate element, an ETS Design Change Charge would apply per ETS BAO feature established by the Telephone Company as described in Section 16.4.4(B)(2)(d), below.

When ordering an ETS BAO feature, the ETS customer must specify on its Access Order: 1) each eligible ETS rate element and speed option combination to be supplemented using the ETS BAO feature and 2) the total number of 10 Mbps or 500 Mbps increments to be included in each ETS BAO feature. For example, an ETS customer requires an additional 20 Mbps of bandwidth capacity on its existing 50 Mbps ETS Interswitch EVC. On its Access Order to the Telephone Company, the ETS customer would identify the ETS Basic Ports between which the existing 50 Mbps ETS Interswitch EVC exists and order one ETS BAO feature made up of two 10 Mbps increments for that ETS EVC.

ACCESS SERVICE16. Public Packet Data Network (Cont'd)16.4 Ethernet Transport Service (Cont'd)16.4.4 Rate Regulations (Cont'd)(A) Rate Categories (Cont'd)(6) Optional Features and Functions (Cont'd)(f) ETS Bandwidth Add-On (ETS BAO) (Cont'd)

In addition to the applicable monthly charge for the underlying ETS rate element, a monthly charge applies for each ETS BAO feature established by the Telephone Company. The monthly charge is based upon the total number of 10 Mbps or 500 Mbps increments included in each ETS BAO feature ordered by the ETS customer. For example, an ETS customer orders two ETS BAO features to provide an additional 1 Gbps of bandwidth capacity on its existing 1 Gbps ETS Basic Port and associated 1 Gbps ETS CT. In addition to the monthly charges for the underlying 1 Gbps ETS Basic Port and associated 1 Gbps ETS CT, the Telephone Company would bill the ETS customer one ETS BAO feature monthly charge equal to two times the 500 Mbps increment ETS BAO feature ETS Basic Port rate and a second ETS BAO feature monthly charge equal to two times the 500 Mbps increment ETS BAO feature ETS CT rate. The ETS customer would also be billed two ETS Design Change Charges for the two ETS BAO features established by the Telephone Company since the two ETS BAO features were being added to existing ETS rate elements.

ACCESS SERVICE

16. Public Packet Data Network (Cont'd)

16.4 Ethernet Transport Service (Cont'd)

16.4.4 Rate Regulations (Cont'd)

(B) Types of Rates and Charges (Cont'd)

(2) Nonrecurring Charges (Cont'd)

(d) ETS Design Changes (Cont'd)

The ETS Design Change Charge will apply per ETS EVC when the ETS customer elects to: (1) change the bandwidth capacity of an existing CoS level; (2) add an additional CoS level with another type of CoS level; or (4) remove an existing CoS level from the associated ETS EVC. Only one ETS Design Change Charge will apply when more than one of the above changes is made to the same associated ETS EVC at the same time on the same access order.

(C) Minimum Periods

The minimum period for ETS service elements provided to an ETS customer and for which charges are applicable is:

- Twelve months for ETS Basic Ports and ETS Interconnection Ports, ETS Channel Terminations, and
- One month for all other ETS elements.
