

**CONSOLIDATED COMMUNICATIONS COMPANIES
CONSOLIDATED COMMUNICATIONS OF MINNESOTA COMPANY – MANKATO AND
MIDCOM STUDY AREAS**

FCC No. 6

September 16, 2019

Transmittal No. 96

Description and Justification

DESCRIPTION

In connection with the September 16, 2019 MidYear Filing, Consolidated Communications Companies (CCI) hereby submits its Tariff Review Plan (TRP) to the Federal Communications Commission ("FCC") for its Consolidated Communications of Minnesota Company (Mankato and Midcom Study Areas - SAC 361427 and SAC 361375) that have previously converted business data services (BDS) to Incentive Regulation pursuant to §61.50 of the Commission Rules with the required supporting documentation. This information is being filed in accordance with the Commission's 2019 TRP Notices released May 1, 2019 (DA19-313) and April 4, 2019 (DA19-246) and fulfills the requirements established in Sections §61.41 through §61.49 of the Commission Rules. Exhibit 1 lists the Consolidated Communications operating companies and the associated study areas included in this filing.

This information is an update from the filing made on June 17th, 2019 and is being adjusted to reflect the updated TRS, Regulatory Fee and NANPA orders. Accordingly, the filing will reflect the new rates inherent with the exogenous changes between its original June 17 filing and today.

As part of its mid-year filing, Consolidated Communications is proposing changes to the Consolidated Communications FCC #6 that will collapse rate bands A and B into one rate group in the tariff. Previous to the June 17th 2019 filing, Consolidated always filed a combined Special Access TRP and the rates for rate bands A and B were identical. Consolidated would now have to adjust the rates between bands A and B differently due to Special Access revenue and exogenous cost weightings which would create slight differences between the two bands. Consolidated would realize billing economies in keeping these rates in unison by collapsing the two rate groups into one. There are also proposed rate changes associated with the Federal Universal Service Fund (FUSF) Factor.

JUSTIFICATION

A. RATES

The January 1, 2019 rate elements were used as the starting point to move the rate development into the incentive regulation TRP.

The rates were then imported into the TRP and the adjustment for inflation and productivity were applied to the rates.

Demand

Demand data for the regulated special access rate elements reflect the period January 1 through December 31, 2018 and is used in the calculations of the *Price Cap Index* (PCIs), *Actual Price Index* (APIs), and *Service Band Index* (SBIs).

PCI Development

PCIs for each basket are calculated in accordance with Commission Rules. A GDP-PI factor of 2.114% was used in calculating the PCIs and is based on the percentage change in the Gross Domestic Product Price Index (GDP-PI) between the

quarter ending December 31, 2018 and the corresponding quarter of 2017. Pursuant to FCC 18-146, a productivity offset equal to 2% was applied in calculating PCIs for the special access basket. Information on the GDP-PI calculation is provided in Exhibit 2.

B. Compliance with Indices

In this filing, the Commission requires Consolidated Communications to compute the appropriate adjustments to the current indices for each Price Cap basket. The adjustments to the Indices are set forth in the Tariff Review Plan, form IND-1. As no exogenous changes we're filed in the original June 17th annual filing, the combining of the tariff rates will have no impact on previous indices.

C. Exogenous Cost Allocations

Consolidated Communications proposes the following general exogenous cost adjustments: 1) Regulatory Fee, 2) Telecommunications Relay Service (TRS), and 3) North American Number Plan Administration. Each of the incremental exogenous cost amounts in this filing is allocated based on Incentive Regulation revenues. The Regulatory Fee and TRS expense are allocated to Common Line and Special Access baskets based on the 499A Interstate revenues. The NANPA expense is calculated on the Total 499A Interstate revenues. Consolidated Communications has also adjusted the exogenous amounts to reflect any shift in revenue growth. No exogenous adjustment is made if the support rate has not changed. In other words, the rate per dollar of revenue remains unchanged if the factor is unchanged. The revenue requirement utilized to determine the current rates in the TRP filed in July contain exogenous costs at the previous factors; based on 2017 revenue data and therefore, unlike the Price Cap Carriers, no incremental exogenous costs were included in that filing. Consolidated Communications now reconciles that difference with updated factors, based on 2018 revenue data in this filing.

D. Rate Detail & Revenue Impact Summary

Included with the filing is a rate detail schedule. This detail shows the current and proposed rates in EXCEL spreadsheet format. In addition to the rate detail schedule, a revenue impact summary is provided to ensure that the rate detail calculations agree with the SUM-1 and the RTE-1. Exhibit 3 contains the Revenue Impact Summary.

E. FUSF Rates

The proposed changes to the FUSF rates are attributed to the change in the FCC prescribed contribution factor between the 2nd quarter and the 3rd quarter 2019 from 0.244 to 0.25 per CC Docket No. 96-45 (rel. September 12, 2019). FCC Tariff Nos. 6 applies the new factor to all eligible interstate revenues.

CONCLUSION

The Consolidated Communications Companies hereby submits for FCC Tariff No. 6 the accompanying TRP and exhibits consistent with the Commission's Incentive Regulations for local exchange carriers. The proposed adjustments are supported as just and reasonable.

TARIFF SUPPORT MATERIAL

The Consolidated Communications Companies provides the necessary detail to support the calculations of indices, and exogenous costs in various workpapers and files. The following is the index of such work papers and files.
