SYMBOLS

The following are the only symbols used for the purposes indicated below:

- (C) - To signify changed regulation.
- (D) - To signify discontinued rate or regulation.
- (I) - To signify increased rate.
- (M) - To signify a move in the location of text.
- (N) - To signify new rate or regulation.
- (R) - To signify reduced rate.
- (S) - To signify reissued matter.
- (T) - To signify a change in text but no change in rate or regulation.
- (Z) - To signify a correction.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

APPLICATION OF TARIFF

This tariff contains regulations, rates and charges applicable to Interstate Access Services, including Switched Access Service, End-User Access Service, Transit Service, and other related services, hereinafter referred to as Access Services, provided to Customers by the issuing carrier of the tariff, hereinafter referred to as the Company.

Regulations, rates and charges as specified in this tariff apply to Access Services and shall not serve as a substitute for interexchange carrier tariff offerings of services to End-Users. The provision of such Access Services by the Company as set forth in this tariff does not constitute a joint undertaking with an interexchange carrier or other provider. Nothing in this tariff constitutes a change of ownership in any Company-owned or leased facilities used in the provision of services hereof.

PARTIAL TARIFF INVALIDITY

If any provision, rate or term of this tariff shall be held to be invalid or unenforceable, such invalidity or unenforceability shall not invalidate or render any other provision, rate or term of this tariff unenforceable, but rather this tariff shall be construed as if not containing the invalid or unenforceable provision, rate or term.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the sheet. Pages are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between existing pages with whole numbers, a decimal is added. For example, a new page added between pages 34 and 35 would be page 34.1.
- B. Page Revision Numbering - Revision numbers also appear in the upper right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, 4th Revised Page 14 cancels the 3rd Revised Page 14. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).1
 - 2.1.1.A.1.(a).1.(i)
 - 2.1.1.A.1.(a).1.(i).(1)
- D. Check Sheet - When a tariff is filed with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the tariff pages, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS

1.1 Definitions

Access or Access Service: Services and facilities provided for the origination or termination of any telecommunications.

Access Tandem: A switching system that provides traffic concentration and distribution functions for originating or terminating traffic as a competitive tandem provider and/or an intermediate carrier between other switching facilities that originate or terminate calls to or from an End-User.

Authorized User: A person, firm, corporation or other entity that either is authorized by the Customer to use Access Services or is placed in a position by the Customer, either through acts or omissions, to use Access Services.

Call: An attempt for which the complete address code (e.g., 10 digits) is provided to the serving dial tone office.

Carrier or Common Carrier: Provider of telecommunications services for hire.

Central Office: A telephone company switching center.

CMRS: Commercial Mobile Radio Service

Commission: The Federal Communications Commission

Company: West Telecom Services, LLC, unless specifically stated otherwise.

Customer (or Customers): The person, firm, corporation, partnership, association, joint-stock company, governmental agency, or other entity which orders, including through a Constructive Order, the Company's service or receives the Company's service, including but not limited to an Interexchange Carrier, End-User, telecommunications carrier, communications service provider, wireless provider, enhanced service provider, conference calling service provider, Voice over Internet Protocol ("VoIP") service provider or other provider originating or terminating Toll VoIP-PSTN traffic.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Disconnect: To render inoperable or to disable circuitry thus preventing outgoing and incoming toll or transit communications service.

End Office (or End Office Switch): A switching system, switching system office, or serving wire center or its equivalent, established to provide local exchange service, Access Services, or the equivalent of local exchange and/or Access Services.

End Office Switching (or End Office Local Switching): The switching system or call switching activity (or equivalent system or activity) used by the Company or by a Provider to originate or terminate local exchange service or Access Services (or the equivalent of local exchange or Access Service) for the benefit of End-Users that generate and/or receive toll calls.

End-User (or End-User Customer): Any customer of a telecommunications service or communications service that is not a carrier except that a carrier shall be deemed to be an "End-User" when such carrier uses a telecommunications service for administrative purposes and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "End-User" if all resale transmissions offered by such reseller originate on the premises of such reseller. An End-User may include a resident, business or enhanced service provider including, but not limited to, conference calling provider, Voice over Internet Protocol ("VoIP") service provider, or other entity.

Exchange Carrier: Any person, partnership, association, joint-stock company, trust, governmental entity or corporation engaged in the provision of local exchange telephone service, or its functional equivalent.

Full Service Relief Metropolitan Statistical Area (MSA): MSA's in which the relevant ILEC has qualified for Phase II pricing flexibility for all elements of service, i.e., local channels (channel terminations) between LEC end offices and customer (End-User) premises; entrance facilities; dedicated interoffice facilities; local channels (channel terminations) between an interexchange carriers' point of presence and a serving wire center.

Holiday: For the purposes of this tariff recognized holidays are New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Incomplete: Any call where voice transmission between the Calling and Called station is not established.

Individual Case Basis (ICB): A service arrangement in which the regulations, rates and charges are developed based on the specific circumstances of the Customer's situation.

Interexchange Carrier (IXC) or Interexchange Common Carrier: Any person, partnership, association, joint-stock company, trust, governmental entity or corporation engaged in interstate or foreign communication for hire by wire or radio between two or more exchanges.

InterMTA (Major Trading Area): For purposes of this tariff, InterMTA refers to telecommunications traffic exchanged between a LEC and a CMRS, PCS or wireless provider that originates and terminates in different Major Trading Areas as used by the FCC to define coverage for certain services.

Internet Protocol (IP): The method or protocol by which data is sent from one computer to another on the Internet.

Internet Protocol (IP) Signaling: A packet data-oriented protocol used for communicating call signaling information.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Interstate: The regulatory jurisdiction of services used for communications between locations located in different states within the United States or between one or more location in the United States and one or more international locations.

IntraMTA (Major Trading Area): For purposes of this tariff, IntraMTA refers to telecommunications traffic exchanged between a LEC and a CMRS, PCS or wireless provider that originates or terminates within the same Major Trading Area as used by the FCC to define coverage for certain services.

Intrastate: The regulatory jurisdiction of services for communications between locations within the same state or services which are not jurisdictionally interstate.

LATA: A local access and transport area established pursuant to the Modification of Final Judgment entered by the United States District Court for the District of Columbia in Civil Action No. 82-0192 for the provision and administration of communications services.

Local Switching Center: The switching center where telephone exchange service station channels are terminated for purposes of interconnection to each other and to interoffice trunks.

Meet Point Billing: The arrangement through which multiple exchange carriers involved in providing Access Services divide the ordering, rating, and billing of such services on a proportional basis so that each exchange carrier involved in providing a portion of the Access Service agrees to bill under its respective tariff.

Mobile Telephone Switching Office: Location where the wireless Customer maintains a facility for purposes of interconnecting to the Company's network.

Non-Authorized Traffic: Traffic that is not Switched Access Service traffic or Tandem Transit traffic; Non-Authorized Traffic includes 911, 411, 976, 311, 611, 500, 950, other-than 411 Directory Assistance, Operator Services including 0+Local and 0+Operator, international pay-per-call and other such non-Switched Access, non-Tandem Transit calls.

Nonrecurring Charges: The one-time initial charges for services or facilities, including but not limited to charges for construction, installation, or special fees, for which the Customer becomes liable at the time the Service Order is executed.

Out of Band Signaling: An exchange access signaling feature which allows Customers to exchange call control and signaling information over a communications path which is separate from the message path.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Percent Interstate Usage (PIU): The proportion of Switched Access minutes of use allocated to the interstate jurisdiction.

Point of Presence: Location where the Customer maintains a facility for purposes of interconnecting to the Company's network.

Premises: The space occupied by an individual Customer in a building, in adjoining buildings occupied entirely by that Customer, or on contiguous property occupied by the Customer (except railroad right-of-way) not separated by a public thoroughfare.

Provider: A Carrier, Common Carrier, CMRS service provider, Exchange Carrier, Local Exchange Carrier, telecommunications provider, communications service provider, enhanced service provider, VoIP service provider, or any other entity that originates or terminates toll or transit calls that traverse the Company's network.

Rate: Money, charge, fee or other recurring assessment billed to Customers for services or equipment.

Recurring Charges: The monthly charges to the Customer for services, facilities and equipment, which continue for the agreed upon duration of the service.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Service Order: The written request for the Company's services executed by the Customer and the Company in a format devised by the Company; or, in the alternative, the submission of an Access Service Request by the Customer in the manner specified in this tariff.

Shared Customer: Any entity included within the definition of Customer above, that receives services from and is under obligation to the Company and one or more Customers simultaneously.

Switched Access Service: Access to the switched network of an Exchange Carrier or other Provider intended for the primary purpose of originating and/or terminating toll and/or interMTA communications.

Switching: For the purpose of any context or use-case within this tariff (e.g., stand-alone "switching," switching system," Switching center," etc.), the term "switching" shall include Time Division Multiplexing ("TDM")-based circuit switching as well as packet-based switching ("packet switching").

TDM – Time Division Multiplexing: A method of transmitting and receiving voice signals over the Public Switched Telephone Network (PSTN).

Terminating Provider: A Provider, as defined above, whose service is provided in the terminating direction.

Toll VoIP-PSTN Traffic: The term Toll VoIP-PSTN Traffic denotes a Customer's interexchange voice traffic exchanged with the Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. Toll VoIP-PSTN Traffic originates and/or terminates in IP format when it originates from and/or terminates to an End-User customer of a service that requires IP-compatible customer premises equipment.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Transit or Transit Service: Transit Service means all Section 251(b)(5) Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic (not delivered to an IXC), and/or CMRS IntraMTA Traffic. A Transit rate element applies to all MOUs transited over the Company's network. The originating Interconnected Carrier is responsible for payment of the applicable charges under this tariff unless otherwise specified in this tariff. Transit Service does not include 911, 411, 976, 311, 611, 500, 950, Directory Assistance, 0+ local, and 0+ operator services or other Non-Authorized Traffic.

Transit Call (or Transit Traffic): Section 251(b)(5) Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic (not delivered via an IXC), and/or CMRS IntraMTA Traffic.

Transit Tandem: A Company switching system that provides a distribution function for Transit Service traffic between Providers.

Trunk: A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

United States: - The forty-eight contiguous states and the District of Columbia, Alaska, Guam, Hawaii, American Samoa, Puerto Rico, the Northern Mariana Islands, and the US Virgin Islands.

VoIP Service: Transmission of communication by aid of wire, cable, radio, or other like connection using Voice over Internet Protocol that is originated or terminated in Internet Protocol ("IP") format. VoIP services are those services that require the use of IP compatible customer premises equipment.

Wireless Provider: Any carrier authorized to operate as a provider of cellular, personal communications, paging, CMRS or any other form of wireless transmission.

SECTION 2-RULES AND REGULATIONS

2.1 Undertaking of the Company

- 2.1.1 The Company provides Switched Access telecommunications services to Customers throughout the United States to enable such Customers to access End-User Customers.
- 2.1.2 The Company installs, operates and maintains the telecommunications services provided herein in accordance with the terms and conditions set forth in this tariff. This tariff applies only to the extent that facilities are available. The Access Services provided herein are to be used by Customers for the purpose of originating or terminating interstate communications.
- 2.1.3 The Company's services are provided on a monthly basis, unless otherwise stated in this tariff. Services are available twenty-four (24) hours per day, seven (7) days per week.
- 2.1.4 The Company's customer service representatives for billing and service inquiries may be reached, toll-free, at 1-866-905-1735. Customers wishing to communicate with the Company in writing may send correspondence and Notices to: Vice President, Regulatory and Government Affairs, West Telecom Services, LLC, 3200 W. Pleasant Run Road, Suite 300, Lancaster, TX 75146. All Customer-originated correspondence and Notices must include the name, address and contact information for Customer's Designated Representative as well as Customer's contact name, address and contact information for the issuance of Notices by Company to Customer to the extent different from that of Customer's Designated Representative.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.2 Limitations of Service

- 2.2.1 Service is offered subject to the availability of the necessary facilities or equipment, or both facilities and equipment, and subject to the provisions of this tariff. The obligation of the Company to provide Service is dependent upon its ability to procure, construct, and maintain facilities that are required to provision the Customer's service on an ongoing and economically feasible basis. The Company will make all reasonable efforts to secure the necessary facilities. The furnishing of service under this tariff is subject to the availability on a continuing basis of all the necessary facilities and is limited to the capacity of the Company's facilities, as well as the facilities the Company may obtain from other carriers, from time to time, to furnish service as required at the sole discretion of the Company. Discontinuance of service under this section will follow applicable regulatory notice and other requirements.
- 2.2.2 Service is furnished to the Customer for any lawful purpose. Service shall not be used for any unlawful purpose, nor used in such a manner as to interfere unreasonably with the use of service by any other Customer.
- 2.2.3 The use of the Company's services without payment for service or attempting to avoid payment for service by fraudulent means or devices, false or invalid numbers, or false calling or credit cards is prohibited.
- 2.2.4 The Company's services may be denied for nonpayment of charges or for other violations of the terms and conditions set forth in this tariff.
- 2.2.5 Service temporarily may be refused or limited because of system capacity limitations.
- 2.2.6 Service is subject to transmission limitations caused by natural (including atmospheric, geographic or topographic) or artificial conditions adversely affecting transmission.
- 2.2.7 Service to any or all Customers may be temporarily interrupted or curtailed due to equipment modifications, upgrades, relocations, repairs and similar activities necessary for proper or improved operations.
- 2.2.8 The Company reserves the right to discontinue furnishing service where the Customer is using the service in violation of the law or the provisions of this tariff.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.3 Limitations of Liability

- 2.3.1 Because the Company has no control of communications content transmitted over its system, and because of the possibility of errors incident to the provision and use of its service, service furnished by the Company is subject to the terms, conditions and limitations herein specified.
- 2.3.2 The Company is not liable to Customers for interruptions in service except as set forth in Section 2.5 of this tariff.
- 2.3.3 The liability of the Company for errors in billing that result in overpayment by the Customer shall be limited, unless otherwise ordered by the Commission, to a credit equal to the dollar amount erroneously billed or, in the event that payment has been made and service has been discontinued, to a refund of the amount erroneously billed.
- 2.3.4 Except in instances of gross negligence or willful misconduct, the Company shall not be liable for and the Customer shall indemnify and hold the Company harmless against any claims for loss or damages involving:
- A. any act or omission of: (1) the Customer; or (2) any other entity furnishing service, equipment or facilities for use in conjunction with services or facilities provided by the Company;
 - B. interruptions or delays in transmission, or errors or defects in transmission, or failure to transmit when caused by or as a result of acts of God, fire, war, riots, government authorities or causes beyond the Company's control;
 - C. any unlawful or unauthorized use of the Company's facilities and services;
 - D. libel, slander or infringement of copyright arising directly or indirectly from content transmitted over facilities provided by the Company;
 - E. infringement of patents arising from combining apparatus and systems of the user with facilities provided by the Company;
 - F. claims arising out of any act or omission of the user in connection with service provided by the Company;

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.3 Limitations of Liability, (Cont'd.)

2.3.4 (Cont'd.)

- G. breach in the privacy or security of communications transmitted over the Company's facilities;
- H. changes in any of the facilities, operations or procedures of the Company that: (1) render any equipment, facilities or services provided or utilized by the Customer obsolete; (2) require modification or alteration of such equipment, facilities or services; or (3) otherwise affect use or performance of such equipment, facilities or services except where reasonable notice is required by the Company and is not provided to the Customer;
- I. defacement of or damage to the Customer's Premises or property resulting from the furnishing of services or equipment to such Premises or the installation or removal thereof;
- J. any wrongful act of a Company employee where such act is not authorized by the Company and is not within the scope of the employee's responsibilities for the Company;
- K. any non-completed calls due to network busy conditions; and
- L. any calls not actually attempted to be completed during any period that service is unavailable.

2.3.5 The Customer shall reimburse the Company for all costs, expenses and fees (including reasonable attorneys' fees and costs) incurred by the Company in its defense against claims set forth in Section 2.3.4.

2.3.6 The Company assumes no responsibility for the availability or performance of any facilities under the control of other entities that are used to provide service to the Customer.

2.3.7 Any claim against the Company shall be deemed waived unless presented in writing to the Company within thirty (30) days after the date of the occurrence that gave rise to the claim.

2.3.8 The Company makes no express representations or warranties regarding the service and disclaims any implied warranties, including, but not limited to, warranties of title or implied warranties of merchantability or fitness for a particular purpose. The Company does not authorize anyone to make a warranty of any kind on its behalf and the Customer should not rely on any such statement.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.3 Limitations of Liability, (Cont'd.)

2.3.9 Except in instances of gross negligence or willful misconduct, any liability of the Company for loss or damages arising out of mistakes, omissions, interruptions, delays, errors or defects in the service, the transmission of the service, or failures or defects in facilities furnished by the Company, occurring in the course of furnishing service shall in no event exceed an amount equivalent to the proportionate fixed monthly charge to the Customer for service, during the period of time in which such mistakes, omissions, interruptions, delays, errors or defects in the service, its transmission or failure or defect in facilities furnished by the Company occurred, unless the Commission orders otherwise.

2.3.10 Indemnification for Customer Cancellation of Service

- A. Where a Customer has chosen not to accept access from the Company, thereby canceling its service arrangements with the Company, the Company shall continue to provide service to those End-User Customers who were formerly Shared Customers, so long as such End-User Customers choose to remain Customers of the Company, and cancel their interstate interexchange service arrangements with the Customer.
- B. Where a Customer has chosen not to accept access from the Company, thereby canceling its service arrangements with the Company, and the End-User Customer who was formerly a Shared Customer chooses to maintain its interexchange service arrangements with the canceling Customer, the Company may terminate its service to the End-User Customer, upon thirty (30) days' notice to the End-User Customer. Under such circumstance, the Company bears no liability to the End-User Customer as a result of such termination of service, even where such termination occurs prior to the end of the term specified in the End-User Customer's Service Contract, and the End-User Customer agrees to hold harmless the Company from any liability for any harm or consequences resulting there from.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.3 Limitations of Liability, (Cont'd.)

2.3.11 The Customer accepts all liability associated with efforts by the Customer or by the Customer's patrons to contact or communicate with 911 Public Service Answering Bureaus or the like when the Company is not the Customer's outbound provider, even though the Customer may be using telephone numbers assigned to the Customer by the Company.

2.3.12 From time-to-time, the Company assigns telephone numbers to its Customers who then, in turn, assign the use of those telephone numbers to their patrons. While the Company shall not be held liable for any use of such telephone numbers by Company's Customer's or by Company's Customer's patrons, the Company will notify its Customers of alleged inappropriate uses of such telephone numbers reported to the Company, and the Company will work with law enforcement and with other parties, as the Company determines to be appropriate, to address such alleged situations or other forms of possible fraud.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer

2.4.1 The Customer is responsible for placing any necessary orders and complying with the tariff regulations set forth herein. Customer shall ensure that its traffic that in any way enters the Company's network meets the requirements for classification as either Switched Access Service or Transit Service, and Customer shall be responsible on a continuing and ongoing basis for promptly notifying the Company of any change in the classification of its traffic. The Customer shall ensure compliance with any applicable laws, regulations, orders or other requirements of any governmental entity relating to services provided by the Company to the Customer or made available by the Customer to an End-User. The Customer also is responsible for the payment of charges for all access service used from the Company.

2.4.2 The Customer is responsible for charges incurred for special facilities which the Customer requests and which are ordered by the Company on the Customer's behalf.

2.4.3 If required for the provisioning of the Company's services, the Customer must provide the Company, free of charge, with any necessary equipment space, supporting structure, conduit and electrical power.

2.4.4 Access to Customer Premises

The Customer is responsible for arranging access to its Premises at times mutually agreeable to the Company and the Customer when required for Company personnel to install, repair, maintain, program, inspect or remove equipment associated with the provision of the Company's services.

2.4.5 Indemnification of the Company

The Customer agrees, except where the events, incidents or eventualities set forth in this sentence are the result of the Company's gross negligence or willful misconduct, to release, indemnify and hold harmless the Company against any and all loss, claims, demands, suits or other action or any liability whatsoever, whether suffered, made, instituted or asserted by the Customer or by any other party or person, for any personal injury to or death of any person or persons, or for any loss of or damage to any property, whether owned by the Customer or others. The Customer shall reimburse the Company for all costs, expenses and fees (including reasonable attorneys' fees and costs) incurred by the Company in its defense against such actions.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.6 Forecasts

The Customer shall exchange technical descriptions and forecasts of its interconnection and traffic requirements in sufficient detail necessary to establish the interconnections required to ensure quality traffic completion.

2.4.7 Traffic and Information Exchange

All facilities interconnected to the Company shall be two-way unless otherwise agreed in writing by the Company. Customer and Company shall exchange both originating and terminating traffic. Customer shall provide facilities within its network that are necessary for routing, transporting, measuring and billing of traffic originated or terminated by other customers of the Company, and Customer shall deliver traffic to the Company for termination to its customers and for termination to other parties' networks that are interconnected to the Company's network. Customer shall transmit traffic in the standard format compatible with the Company's network as referenced in Telcordia BOC Notes on LEC Networks Practice No. SR-TSV-002275, and terminate the traffic that it receives from Company in that standard format to the proper address on its network. Customer shall exercise best efforts in responding to requests by the Company to install additional facilities and capacity necessary to achieve and maintain the highest network quality standards. Customer agrees that Company may share certain Customer information with other customers of the Company for the sole purpose of providing service and performing associated necessary and customary functions such as data exchange and billing.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.8 Call Signaling Information Requirements

- A. The Customer shall provide Signaling Data (as defined below) and shall not, directly or indirectly, including in concert with a third party, strip, alter, modify, add, delete, change, mask, manipulate, or incorrectly assign any Signaling Data. Signaling Data shall, at a minimum, include: (a) information that accurately reflects the geographic location of the End-User that originated and/or dialed the call, when including such information is technically feasible, (b) calling party number as defined in 47 C.F.R. Section 64.1600(c) ("CPN"), (c) Automatic Number Identification as defined in 47 C.F.R. Section 64.1600(b) ("ANI"), (d) Charge Number as defined in 47 C.F.R. Section 64.1600(d), (e) Jurisdictional Indicator Parameter ("JIP") and (f) any other signaling data that affects the terminating party's ability to jurisdictionalize traffic. If it is determined that Customer has: (a) directly or indirectly made any such addition, deletion, change, mask, manipulation, alteration, modification, or incorrect assignment, or (b) intentionally or unintentionally failed to provide any Signaling Data, all of Customer's traffic, including prior traffic, will be re-rated to the applicable tariff rate. Upon request, the Company will provide to the Customer available Signaling Data for traffic terminated to the Customer.
- B. Where SS7 connections exist, the Customer will include the original and true Line Information, including the Calling Party Number (CPN), in the information transmitted to the Company for each call.
- C. If the Customer is passing line information but the Company is not properly receiving information, the parties will work cooperatively to correct the problem.
- D. For Transit Traffic, if the original and true CPN is not received from the originating third party, the Company cannot forward the CPN and will not be billed as the default originator.

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.8 Call Signaling Information Requirements, (Cont'd.)

E. Incomplete Call Information

When the call information associated with the originating telephone number or carrier of a call which is passed to the Company by the Customer is inaccurate or incomplete, the Company may associate the call with an identifying number that the Company has assigned to the trunk group through which the call entered the Company's network in order to later determine from whose network the call emanated. This does not absolve the Customer from adherence to the FCC's call-signaling rules and does not affect the application of rates or jurisdiction applicable to the call, which shall comply with relevant sections of this tariff.

F. Jurisdictional Information Parameter Code ("JIP") Requirements

The Customer's originating network should, per ATIS-300011 (SS7) or RFC5503 (SIP), provide originating jurisdictional information in the form of Jurisdiction Information Parameter Code ("JIP"). See Paragraph 2.4.8.A above. Except as otherwise specified herein, the Company will utilize the procedure for determining call jurisdiction as set forth in the following progressive protocol:

Protocol Step 1: For calls emanating from the Customer, including calls that transit the Customer's network without actually originating there, the JIP shall be properly and accurately populated by the Customer and used by the Company to determine call jurisdiction.

Protocol Step 2: For calls emanating from the Customer when the JIP is not properly and accurately populated or is otherwise unavailable, the Company shall use the post-dip LRN (Local Routing Number) of the calling party's NPA-NXX.

Protocol Step 3: For calls emanating from the Customer when the NPA-NXX is indeterminate (such as an originating 8YY TN) and the Company is directly connected to a licensed carrier's class 5 switching office (or equivalent), pursuant to ATIS-300011 the Company shall populate the JIP based on the LRN of the Trunk Group associated with the switching center itself.

Protocol Step 4: When a reliable LRN is unavailable, and/or the interconnection is indirect, gatewayed or aggregated traffic from multiple offices, the Company shall utilize the Customer-reported PIU pursuant to this tariff to determine call jurisdiction.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.8 Call Signaling Information Requirements, (Cont'd.)

F. Jurisdictional Information Parameter Code ("JIP") Requirements, (Cont'd.)

Protocol Step 5: When no reported PIU is available, or when the jurisdiction of the call cannot otherwise be determined through the progressive protocol steps set forth above, the Company shall apply a default PIU of 50 percent, meaning that 50 percent of the traffic shall be billed at interstate rates and the remaining 50 percent of the traffic shall be billed at intrastate rates.

G. Identification of InterMTA and IntraMTA Traffic

For any CMRS traffic forwarded to the Company's network, the Customer is responsible for providing to the Company information sufficient for the identification of interMTA and IntraMTA traffic, irrespective of any billing implications pursuant to this tariff. Notwithstanding the foregoing, Access Charges shall apply to any traffic routed to the Company that is identified like Switched Access traffic.

H. Non-Native NPA-NXX Transit Traffic Surrogate

If the Customer's End-Users utilize NPA-NXXs from outside of a local market to terminate Transit calls, the Customer, as per ATIS-300011, shall signal the JIP field in SS7 or SIP invite (as per RFC 5506) as to the actual origin of the call being placed. If the equipment being used is unable to produce JIP, the Customer shall report a Non-Native NPA-NXX Traffic Surrogate, which shall be the Customer's estimate of Transit Traffic that appears to be access traffic which the Company will use for originating jurisdiction. An example of which could be a mobility End-User with an NPA-NXX different from those within the market in which the End-User is roaming and terminating a Transit Call or an End-User assigned an NPA-NXX from a market different from the market in which the End-User is terminating Transit Calls but are originating within the same transit market.

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.9 Jurisdictional Reporting

- A. In this section the term "trunk group" shall be assumed to also represent a single line or trunk.
- B. The Customer is required to report the expected jurisdictional use of service because the Company cannot determine the actual jurisdiction of the Customer's usage from every type of call detail recording. In some cases the Company cannot record the Customer's usage of the service at all. The information reported by the Customer will be used by the Company in an effort to determine the appropriate charges, as forth in this tariff. The Customer must always report this information for those services or portions or service for which the actual jurisdictional use cannot be determined by the Company. Pursuant to the Federal Communications Commission order FCC 85-145 released April 16, 1985, interstate usage is to be developed as though every call that enters a Customer network at a point within the same state as that in which the called station (as designated by the called station number) is situated is an intrastate communication and every call for which the point of entry is in a state other than that where the called station (as designated by the called station number) is situated is interstate in nature.
 1. When a Customer orders new Access Service(s), or upon receipt of the first bill from the Company after utilizing the Company's service, the Customer shall state in its order or provide to the Company (to the address provided on initial bill) the proportion of the service which is to be provided for interstate use. This proportion is the Percent for Interstate Use or PIU. The Customers can either specify one general PIU for the service usage or the Customer can specify an 8YY PIU and a residual PIU. All PIUs shall be stated as whole number percentages. If the Customer chooses to report one general PIU, then the general PIU will be the Customer's best estimate of the percentage of the total use of the trunk group that will be interstate in nature. If the Customer chooses to provide a separate 8YY PIU, then that PIU will be the Customer's best estimate of the percentage of the total 8YY use of the trunk group usage that will be interstate in nature. The residual PIU would then be the Customer's best estimate of the percentage of the total trunk group usage that will not be 8YY usage and will be interstate in nature. The reported Percentage(s) for Interstate Use PIU(s) will be used in the determination of all interstate and intrastate charges for the trunk group, as forth below, as well as for the associated monthly recurring and nonrecurring charges for transport, port charges, and optional features. The PIU(s) remains in effect until it is superseded by a revised PIU(s), as forth in paragraph 2, following.

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.9 Jurisdictional Reporting, (Cont'd.)

B. (Cont'd.)

2. Effective on the first of January, April, July and October of each year the Customer should update its interstate and intrastate jurisdictional report. The Customer should forward to the Company, to be received no later than 15 days after the first of each such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June, and September, respectively, for each service arranged for interstate use, based solely on the traffic originating from or terminating to the Company. The revised report will serve as the basis for the next three months billing and will be effective on the bill date for that service. No prorating or back billing will be done based upon the report. If the Customer does not supply the reports for those services as requested, the Company will assume the percentage to be the same as that provided previously. For those cases in which a quarterly report has never been received from the Customer, the Company will assume the percentages to be the same as those provided in the protocol listed above.
3. When the Customer determines that any currently effective PIU(s) for one or more trunk groups is no longer accurate, the Customer shall report a revised PIU(s) for each trunk group. The Customer can report the new PIU(s) to the Company in writing. The report must clearly identify each trunk group, the account number under which it is billed, and both the current and revised PIU(s). The revised PIU(s) will become effective on the first day of the next monthly billing period that begins at least 15 business days after the day on which the Customer reports the revised PIU(s) to the Company. No revisions to bills preceding the effective date of the revised PIU(s) will be made based on this report.
4. If no PIU is submitted as specified herein, than the PIU will be set on a default basis of 50 percent interstate traffic and 50 percent intrastate traffic.
5. The Company may request detailed information in support of the projected interstate percentage reported annually and retains the right to retroactively adjust the Customer's most recent bills covering the preceding eleven months if a substantial discrepancy is found to exist. If an audit of the reported percentages reveals a substantial deviation from the Customer's previously reported PIU for the period upon which audit was based, the call detail records may be requested more than once annually.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.10 Jurisdictional Audits

- A. The Customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained and, upon request of the Company, shall make the records available for inspection as reasonably necessary for purposes of verification of the percentages. The Company reserves the right to conduct an audit at any time during the year. The Customer, at its own expense, has the right to retain an independent auditing firm. If a billing dispute arises or a regulatory commission questions the PIU, the Company will ask the Customer to provide the data the Customer uses to determine the PIU. The Customer shall supply the data within 15 days of the Company request. The Customer shall keep records of call detail, including not altering directly or indirectly with a third party call origination or termination data from which the Call Classification can be ascertained. Upon request of the Company, Customer shall make the records available for inspection as reasonably necessary for purposes of verification. Requests for verification shall be limited to no more than two per year, except in extreme circumstances. Audits may be conducted by independent auditors if the Company and the Customer or the Customer alone is willing to pay the expenses of the audit. The Customer must maintain these records for 24 months from the date the report became effective for billing purposes.
- B. Initiation of an audit will be at the sole discretion of the Company. An audit may be initiated by the Company for a single Customer no more than once per year. The Customer shall supply required data within 30 calendar days of the Company request.
- C. In the event that an audit reveals that any Customer reported PIU was incorrect, the Company shall apply the audit result to all usage affected by the audit. The Customer shall be back billed for a period retroactive to the date that the incorrect percentage was reported, but not to exceed 24 months. Back billed amounts are subject to a late payment penalty and payment shall be made in immediately available funds, within 31 days from receipt of bill or by the following bill date, whichever is shorter period.
- D. Should an audit reveal that the misreported percentage(s) of use has resulted in an underpayment of Access charges to the Company of five percent or more of the total switched Access Services bill, the Customer shall reimburse the Company for the cost of the audit. Proof of cost shall be the bills, in reasonable detail submitted to the Company by the auditor.
- E. Within 15 days of completion of the auditor's report, the Company will furnish a copy of the audit results to the person designated by the Customer to receive such results.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.11 Identification and Rating of Toll VoIP-PSTN Traffic

A. Scope

VoIP-PSTN Traffic is the traffic exchanged in Time Division Multiplexing ("TDM") format that originates and/or terminates in Internet Protocol ("IP") format. This section governs the identification and billing of VoIP-PSTN Traffic pursuant to the FCC's Intercarrier Compensation Report and Order in WC Docket Nos. 10-90, et. al., FCC No. 11-161 (Nov. 18, 2011) ("FCC ICC Order"). Pursuant to the FCC ICC Order, the Company shall apply interstate access charges to VoIP-PSTN Traffic. Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the Customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC ICC Order in a symmetrical manner.

B. Methodology Options

Unless otherwise negotiated, the Customer may elect an approach from the following options to identify the relevant Toll VoIP-PSTN Traffic that is subject to the FCC ICC Order:

1. Option 1 – Self-Reporting: Self-Report Percent VoIP Usage pursuant to Section 2.4.8.E, following, or
2. Option 2 – Call Signaling: Properly populate the Originating Line Indicator ("OLI") field of the call signaling stream to reflect that the call originated as a VoIP call, which shall be through the use of the digit-code 40 or other digit pair mutually agreed upon in writing by Customer and Company's Chief Technical Officer, or
3. Option 3 – Trunk Group Segregation: Properly segregate the calls that originate as VoIP calls and exchange such calls through a trunk group established solely for the completion of VoIP-originated calls.

C. Rating of Toll VoIP-PSTN Access Traffic

The relevant Toll VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company's applicable tariffed interstate switched access rates as specified in Section 4.1, of this tariff.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.11 Identification and Rating of Toll VoIP-PSTN Traffic, (Cont'd.)

D. Calculation and Application of Percent-VoIP-Usage Factor

For the Customer that selects Option 1 – Self Reporting, the Company will determine the number of Relevant VoIP PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection C, above, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU exchanged between a the Company and the Customer. By default, the effective PVU will be equal to the total number of incumbent LEC and non-incumbent LEC VoIP subscriptions in the State divided by the sum of those reported VoIP subscriptions plus incumbent LEC and non-incumbent LEC switched access lines, based on the FCC's Local Competition Report, as released periodically. If the Customer proposes to use a different PVU, it must be derived and applied as follows:

1. The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the whole number percentage of the total access MOU that the Customer exchanges with the Company in the State, that (a) is sent to the Company and that originated in IP format; or (b) is received from the Company and terminated in IP format. This PVU-A shall be based on information that is verifiable by the Company such as traffic studies, actual call detail, or other relevant and verifiable information.
2. The Company will, likewise calculate a factor (the "PVU-B") representing the whole number percentage of the Company's total access MOU in the State that the Company originates or terminates in IP format. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on the FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.11 Identification and Rating of Toll VoIP-PSTN Traffic, (Cont'd.)

D. Calculation and Application of Percent-VoIP-Usage Factor, (Cont'd.)

3. The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the whole number percentage of total access MOU exchanged between the Company and the Customer that is originated and/or terminated in IP format, whether at the Company's end, at the Customer's end, or at both ends. The effective PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor).
4. The Company will apply the effective PVU factor to the total intrastate access MOU exchanged with the Customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1:

The PVU-B is 10% and the PVU-A is 40%. The effective PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 2:

The PVU-B is 10% and the PVU-A is 0%. The effective PVU factor is $0\% + (100\% \times 10\%) = 10\%$. The Company will bill 10% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 3:

The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

5. The Customer shall not modify their reported PIU factor to account for VoIP-PSTN Traffic.

FACILITIES FOR INTERSTATE ACCESS

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.11 Identification and Rating of Toll VoIP-PSTN Traffic, (Cont'd.)

E. Initial PVU Factor

If the PVU factor cannot be implemented by December 29, 2011, once the factor is available and can be implemented, the Company will adjust the Customer's bills to reflect the PVU retroactively to December 29, 2011, provided that the Customer provides the factor to the Company no later than April 15, 2012; otherwise, the initial PVU will be set as specified above.

F. PVU Factor Updates

Customers selecting Option 1 – Self Reporting may update the PVU-A factor quarterly using the method set forth in subsection D.1, above. If the Customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January, April, July and/or October of each year, a revised PVU-A factor based on data for the prior three months, ending the last day of December, March, June and September, respectively, along with supporting documentation for the prior three month period. The verified revised PVU factor will apply prospectively and serve as the basis for billing until superseded by a new verified PVU factor.

G. PVU Factor Verification

Not more than four times in any year, the Company may ask the Customer to verify the PVU-A factor furnished to the Company. The Customer is subject to auditing and verification by the Company and the Customer is obligated to support all self-reported figures with traffic studies or other reasonable analyses upon the Company's written request. The Customer shall comply with such requests, and shall reasonably provide the records, including information used to determine the PVU-A factor and other information contained in Company's written requests.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.12 Network Contingency Planning and Cooperation

The Customer shall cooperate with the Company in coordinating and planning steps and activities to be taken to maintain optimal network capability in the standard course of business and following network events and disaster situations.

2.4.13 Database Updates

The Customer shall populate and keep current, as appropriate, the Local Exchange Routing Guide ("LERG"), Number Portability Administration Center ("NPAC") and other routing and administrative databases of the communications industry to help ensure appropriate provisioning of NPA-NXX codes. Further, Customer shall update routing tables to include Company updates containing information pertaining to a new interconnected Provider or changes associated with an existing interconnected Provider, including but not limited to NPA-NXX and LRN information, the opening of a new exchange or LRN, and number ports. Customer shall remain responsible for updating its routing tables and internal databases to accurately reflect changes to the Company's profile and terminations.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.17 Client Relationship Management

The Customer is solely responsible for interfacing with and servicing its clients, including the Customer's End-User clients, carrier clients, provider clients, and other clients of any form.

2.4.18 Non-Authorized Traffic

The Customer shall not send to Company's network any Non-Authorized Traffic, i.e., traffic that is not Switched Access or Tandem Transit traffic. Non-Authorized Traffic includes 911, 411, 976, 311, 611, 500, 950, other-than 411 Directory Assistance, Operator Services including 0+Local and 0+Operator, and other such non-Switched Access or non-Tandem Transit calls. The Company may not complete any Non-Authorized Traffic transported to the Company by the Customer, and the Customer shall be solely liable for any damages and costs associated with Non-Authorized Traffic that the Customer transports to the Company. The Customer shall not send to the Company's network any local or intraMTA traffic that is destined to the network of a third-party provider with which the Customer does not have authority and direct financial arrangements to exchange such traffic.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.4 Obligations of the Customer, (Cont'd.)

2.4.19 Customer Cancellations

Except in cases addressed in Section 2.3.10 above, the Customer seeking to cancel service for the Customer's traffic that terminates to the Company's network has an obligation to cease sending such traffic to the Company's network. The Customer that purports to cancel service but continues to send traffic to the Company's network shall remain responsible for all such traffic financially and from a liability perspective, and such Customer shall remain bound to all relevant sections of this tariff. The Customer remains responsible for completing traffic originating from Company's network so long as the Customer accepts such traffic onto their networks.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.5 Allowances for Interruptions in Service

2.5.1 General

- A. A service is interrupted when it becomes unusable to the user, e.g., the user is unable to transmit or receive communications due to the failure of a component furnished by the Company under this tariff.
- B. An interruption period begins when the Customer reports the service to be inoperative and releases it for testing and repair. An interruption period ends when the service is operative.
- C. If the Customer reports a service to be inoperative but declines to release it for testing and repair, the service, facility or circuit is considered to be impaired but not interrupted. No credit allowances will be made for a service considered by the Company to be impaired.
- D. The Company will make every reasonable effort to prevent interruptions of service and shall work to clear 85% of all out-of-service troubles within twenty-four (24) hours of the time the report is received by the Company, unless the Customer specifically requests a later date.
- E. The Company's service objective is to maintain service so that the average rate of Customer trouble reports in a local exchange does not exceed eight (8) reports per one hundred (100) access lines per month.

2.5 Allowances for Interruptions in Service, (Cont'd.)

2.5.2 Application of Credits for Interrupted Services

- A. At the Customer's request, when the Customer's access to the Company's network is unavailable and remains unavailable a period of six (6) hours or more, after being found or reported to the Company, the Company shall refund to the Customer an amount to be determined by the Company on a case-by-case basis, and dependent upon the length of the interruption period. In no event shall such a refund exceed an amount equivalent to the proportionate recurring charge to the Customer for the period of service during which the event that gave rise to the claim for a credit occurred.
- B. Any such interruption will be measured from the time it is reported to or detected by the Company, whichever occurs first.
- C. In the event the Customer is affected by such interruption for a period of less than six (6) hours, no adjustment will be made. No adjustments will be earned by accumulating non-continuous periods of interruption.

<u>Length of Interruption</u>	<u>Interruption Period To be Credited</u>
Less than 6 hours	None
6 hours up to but not including 9 hours	2/5 Day
9 hours up to but not including 12 hours	3/5 Day
12 hours up to but not including 15 hours	4/5 Day
15 hours up to but not including 24 hours	1 Day

- D. When an interruption exceeds twenty-four (24) hours, the length of the interruption will be measured in twenty-four (24) hour days. A fraction of a day consisting of less than twelve (12) hours will not be credited and a period of twelve (12) hours or more will be considered an additional day.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.5 Allowances for Interruptions in Service, (Cont'd.)

2.5.3 Limitations on Allowances

- A. No credit allowance will be made for any interruption of service:
1. due to the negligence of, or noncompliance with the provisions of this tariff by any person or entity other than the Company, including but not limited to the Customer or other entities or carriers connected to the service of the Company;
 2. due to the failure of power, equipment, systems or services not provided by the Company;
 3. due to circumstances or causes beyond the control of the Company;
 4. during any period in which the Company is not given full and free access to the its facilities and equipment for the purpose of investigating and correcting the interruption;
 5. during any period in which the Customer continues to use the service on an impaired basis;
 6. during any period in which the Customer has released service to the Company for maintenance purposes or for implementation of a Customer order for a change in service arrangements; and
 7. that was not reported to the Company within one (1) day of the date that service was affected.
 8. that was not requested by the Customer to the Company in writing within six (6) months of the service interruption.
- B. Adjustments for the quantity of service established or discontinued in any billing period beyond the minimum period set forth for services in other sections of this tariff shall be prorated to the number of days, or major fraction of days, based on a thirty (30) day month. The Company will, upon written request and if available, furnish such detailed information as may reasonably be required for the verification of any bill.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.6 Applications for Service

The Company will accept both affirmative orders and constructive orders for Access Services. The Company does not require a written service order for the initiation of switched Access Services to Customers.

2.6.1 Service Orders

The signing of a Service Order by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this tariff, but the duration of the service is calculated from the Service Commencement Date. Should a Customer use the Company's Access Service without an executed Service Order, the Company may, at its option, request that the Customer submit a Service Order. The Company may accept the Service Order either by submitting Billing Name and Address ("BNA") information to the Customer at the request of the Customer or by the Customer accepting PIC requests by End-User Customers that request the Customer as their PIC.

2.6.2 Affirmative Service Order

The Customer may affirmatively request the Company's Access Services either by placing a written request for the Company's service, by sending traffic to and/or accepting traffic from Company End-User Customers and then submitting BNA requests to the Company, or by allowing Company End-User Customers to choose the Customer as their PIC and once processed, allowing Company End-User Customers to utilize the Customer as their primary IXC.

2.6.3 Constructive Order

Delivery of calls to the Company or acceptance of calls from the Company constitutes a Constructive Order by the Customer to purchase Access Services as described herein, irrespective of whether the calls enter or exit the Company's network directly or indirectly. Similarly the selection by a Company's End-User of the Customer as the presubscribed IXC constitutes a Constructive Order of Access Services by the Customer.

2.7 Installation of Service

All installation is subject to the availability of services and facilities purchased from other Carriers for the provision of service to a Customer, as well as to the full compliance by the Customer with all pertinent tariff requirements.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services

2.8.1 Customer Termination of Service

A. General

The Customer may terminate access and access-related service with the Company only through adherence to the procedures set forth herein. Requests for termination may not be unreasonably discriminatory and must otherwise comply with requirements of the Communications Act of 1934, as amended, and with all other applicable laws, policies and regulations.

In deference to the unique nature of the relationship between the Company and the Customer, and in acknowledgement of the legitimate interests that the Company has with respect to Shared Customers, strict adherence by the Customer to the Access Services Termination Procedures contained herein is mandatory. Failure on the part of the Customer to follow these procedures, or deviation from such procedures, may be construed by the Company, at its sole option, as part of on-going negotiations between the Company and the Customer, and not as a final position by the Customer. The Customer shall compensate the Company for any and all traffic exchanged during any on-going negotiations, or until such time as the Customer cancels its service arrangements in full accordance with the Access Service Termination procedures set forth herein.

B. Term of Service

At the expiration of the initial term specified in each Service Order, or in any extension thereof, service shall continue on a month-to-month basis at the then-tariffed rates for Access Services, unless terminated by either party upon thirty (30) days' written notice to the other party, or in accordance with the timeframes set forth in Sections 2.8.2.A, 2.9.2.A, and 2.9.2.B, whichever is applicable.

Service will continue to be provided to the Customer until terminated by the Customer or the Company in accordance with this Section.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services, (Cont'd.)

2.8.1 Customer Termination of Service, (Cont'd.)

C. Access Service Termination Procedures

In order to comply with the Company's Access Service Termination Procedures, the Customer must fulfill certain obligations, including, but not limited to the following:

1. To the extent permissible under Federal and State laws and rules, the Customer must block (or arrange to have the Company block) all Access Services traffic originating from or terminating to (or originating from and terminating to) the Shared Customer.
2. The Customer must notify the Company of its intention to cancel Access Services arrangements with the Company in the requisite timeframe set forth in Sections 2.9.2.A. and 2.9.2.B, and in such format and including such information as determined and required by the Company. Any such termination notice provided by the Customer must be stated in reasonably explicit and unequivocal terms. No request for termination will be accepted by the Company where the termination notice is equivocal or where the Customer acts in a manner inconsistent with the termination notice. Such acts include, but are not limited to, the following:
 - (a) continued acceptance by the Customer of the Company's Access Services traffic;
 - (b) entering into new negotiations with the Company;
 - (c) failure to specify the exact service to be cancelled;
 - (d) failure to block the Company's Access Services traffic in accordance with the procedures set forth herein; or
 - (e) failure to initiate talks with the Company regarding the manner in which to notify Shared Customers of the Customer's termination of service with the Company.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services, (Cont'd.)

2.8.1 Customer Termination of Services, (Cont'd.)

C. Access Services Termination Procedures, (Cont'd.)

3. The Customer must notify the Shared Customer of the Customer's intent to cancel Access Services arrangements with the Company, in the requisite timeframe, and in such format and including such information, as determined and required by the Company.
4. The Customer must pay the Company for all charges and costs for services associated with the permissible blocking of traffic and the transfer of the Shared Customer to an alternate interstate interexchange provider.
5. The Customer must unequivocally authorize the Company to prohibit End-User Customers from selecting the Customer as their interLATA PIC.
6. Any termination by the Customer does not relieve its obligation to pay the Company for all charges incurred under either the Service Order or this tariff prior to termination. The rights and obligations that by their nature extend beyond the termination of the term of the Service Order shall survive the termination of service.

2.8 Termination of Access Services, (Cont'd.)

2.8.1 Customer Termination of Service, (Cont'd.)

D. Notice to Shared Customers

The Company is not responsible for notifying Shared Customers of the Customer's cancellation of the Company's Access Services; notifying the Shared Customers is the solely the responsibility of the Customer. The Customer must provide to the Company, for the Company's prior approval, the language and format which it proposes to use to notify the Shared Customers of its intent to cancel Access Services arrangements with the Company. Such notice must conform to the following information:

1. the Customer must specifically state that, due to the Customer's termination of its Access Services arrangements with the Company, the Shared Customer will not be able to maintain its existing service arrangements with both the Company and the Customer;
2. the Customer must specifically state that, due to the Customer's termination of its access arrangements with the Company, the Shared Customer will be placed in a "NO-PIC" status for all interLATA toll dialing until such time as the Shared Customer or a submitting carrier informs the Company of the Shared Customer's new interLATA PIC. The Customer also must state that it will be responsible for any PIC change charge assessed on the End-User Customer by the Company or another carrier as a result of the Customer's blocking of the Shared Customer's traffic;
3. the Customer must sign a statement releasing affected Shared Customers from any and all liabilities or damages flowing from that Shared Customer's subsequent and resulting choice to terminate service arrangements with the Customer, including breach of contract and liquidated damage provisions;

2.8 Termination of Access Services, (Cont'd.)

2.8.1 Customer Termination of Service, (Cont'd.)

D. Notice to Shared Customers, (Cont'd.)

4. the Customer may not disparage the Company to the Shared Customer in any manner, and is prohibited from suggesting alternate providers of local exchange services to the Shared Customer. In the event that it is determined that the Customer has done so, it shall be subject to the imposition of both actual and punitive damages, where permissible; and
5. the Customer agrees that it will offer no discounts or marketing incentives to any Shared Customer potentially affected by the Customer's cancellation of Access Services arrangements with the Company for a period of sixty (60) days prior to the date on which the Customer notifies the Company of its intent to cancel Access Services arrangements, and extending to sixty (60) days after Access Services are blocked. The Customer agrees to copy the Company on any correspondence with any Shared Customer during this sixty (60) day time period.

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services, (Cont'd.)

2.8.2 Company Termination of Service

- A. The Company may terminate service for any of the following reasons, by giving the Customer at least thirty (30) business days' written notice via first class mail:
1. for non-compliance with the Company's tariffed rules or Commission regulations after the Company has made a reasonable effort to obtain Customer compliance;
 2. for the Customer's refusal to provide the Company with reasonable access to its equipment and property;
 3. for Customer non-compliance with state, local or other codes; or
 4. for nonpayment of bills when due and after the Company has provided the Customer with a termination notice mailed at least thirty (30) business days' before termination.

In the event that the Company is compelled to terminate Access Service to a Customer for any of the forgoing reasons, the Customer must notify the Shared Customer of such termination using the script language set forth in Section 2.9.1

FACILITIES FOR INTERSTATE ACCESS

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services, (Cont'd.)

2.8.2 Company Termination of Service, (Cont'd.)

- B. The Company may terminate (or suspend) service without notice for any of the following reasons:
1. in the event of a condition determined to be hazardous to the Company's equipment, to the public, or to employees of the utility ("dangerous conditions");
 2. in the event of the Customer's illegal use of equipment or service provided by the Company; or
 3. in the event that any actions of the Customer create harm or potential harm to the Company's network.

Where the Company terminates or suspends service for any of the above-referenced reasons, the Customer shall be liable for all related costs as well as any reconnection charges.

- 2.8.3 The Customer is responsible for all charges incurred as a result of availing itself of the Company's Access Services, regardless of which Party (the Customer or the Company) terminates the service. The Customer shall reimburse the Company for all costs, expenses and fees (including reasonable attorneys' fees and costs) incurred by the Company in collecting such charges.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.9 Blocking of Access Traffic

When a Customer terminates its access arrangements with the Company, it is mandatory that the Customer ensure that all End-User traffic, both originating and terminating, between the Customer and the Company is blocked. The Customer shall have the option of blocking the traffic itself, or arranging for the Company to block the traffic and paying all charges and related costs to compensate the Company for blocking the traffic. Where the Customer elects to block the access traffic itself, the Customer will have full responsibility to compensate the Company, at the Company's then-currently tariff rates, for any End-User traffic allowed to pass along the discontinued Access Services route.

Where a Customer terminates its access arrangements with the Company, and the End-User is a Shared Customer, the Customer also must adhere to the following requirements:

2.9.1 Script Recordings

The Customer must record a script to inform the Shared Customer that its interexchange service has been blocked at the request of the Customer. All recorded scripts must be submitted to the Company for prior approval. The script recording must state the following and there can be no deviation from or additions to this script:

"Your access to [Customer's] long distance services has been blocked by your long distance provider, [Customer], and not by your local service provider, West Telecom Services, LLC. Because [Customer] has chosen to block your access to its long distance services, you may no longer dial 1+ to use [Customer's] long distance service. Instead, you must now either dial an access code to reach a long distance service provider of your choice to handle your long distance calls, or contact another long distance service provider of your choice to handle your long distance calling needs on a 1+ basis. For more information, please contact [Customer's] customer service representatives at [Customer's toll-free number]."

In the script recording, the Customer in no way may slander the Company or use any language intended to incur bad will between the Shared Customer and the Company. The Customer may not use the script recording to encourage the Shared Customer to terminate its service with the Company. The script recording may not be used by the Customer as an opportunity to market its services. In the event that it is determined that the Customer has done so, it shall be subject to the imposition of both actual and punitive damages.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.9 Blocking of Access Traffic, (Cont'd.)

2.9.2 Notification Requirements

A. Customer Blocking

Where the Customer elects to block the access traffic from the Shared Customer itself, it must provide the Company with written notice of such intent at least thirty (30) days prior to the blocking of such traffic.

The following information must be included in any such notice submitted to the Company:

1. Customer name and address(es);
2. Customer contact name(s) and telephone number(s);
3. a clear indication of each type of Access Services that Customer intends to cancel. In the event of that the Company is uncertain as to the type(s) of Access Services requested to be discontinued by the Customer, the Company shall continue to provide the Access Services, and the Customer shall continue to pay any resulting charges at the Company's then-tariffed rate for such continued service, until the Customer clarifies unequivocally and in a manner deemed satisfactory to the Company the precise type(s) of Access Services that it seeks to have discontinued; and
4. a complete listing of all access lines and End-User Customers that will be affected by the service cancellation.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.9 Blocking of Access Traffic, (Cont'd.)

2.9.2 Notification Requirements, (Cont'd.)

B. Company Blocking

Where the Customer chooses to have the Company block access traffic to the Customer, the Customer must provide to the Company written notice of such intent at least one hundred-twenty (120) days prior to the blocking of such traffic. In addition to the information provided in Section 2.9.2.A, such notice must also include the following information:

1. all relevant Billing Name and Address ("BNA") information;
2. all relevant Automatic Number Identification ("ANI") information;
3. general call record detail; and
4. a statement unequivocally authorizing the Company to prohibit an End-User Customer from selecting the Customer as their Presubscribed Interexchange Carrier ("PIC"), and absolving both the Company and the End-User Customer from any relating liability to the Customer.

Additionally, the Customer must certify to the Company, in writing, that any such blocking is consistent with the Customer's tariff, the Communications Act, the rules and policies of the FCC and the Commission, and any relevant contractual obligations that exist between the Customer and the Shared Customer.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.10 Effect on Interstate Interexchange Carrier Presubscription

Where the Customer affirmatively has terminated its Access Services arrangements with the Company, and has blocked or arranged for the Company to block the Shared Customer from its interstate interexchange service, where permissible, the Company will place the Shared Customer in a "NO-PIC" status for all interstate toll dialing until such time as the Shared Customer or a submitting carrier informs the Company of the End-User Customer's new PIC.

The Customer will be responsible for any PIC change charge assessed on the End-User Customer by the Company or another Carrier.

2.11 Payment of Charges

2.11.1 The Customer is responsible for payment of all charges for services and facilities furnished by the Company to the Customer or its Joint or Authorized Users. The Customer must pay the Company for all services provided regardless of whether the Customer submitted an order to the Company to provide such services. Restrictive endorsements or statements on checks accepted by the Company will not be binding upon the Company.

2.11.2 The Customer terminating its access arrangements with the Company is responsible for compensating the Company for all costs of blocking (where blocking is requested by the Customer), the PIC change charge, if any, incurred by the Company as a result of the Customer's termination of service to that Shared Customer, and any all additional costs associated with this process.

2.11.3 The Company reserves the right to assess late payment charges for Customers whose account(s) carries principal owing from the prior billing period. Any charges not paid in full by the due date indicated on the billing statement may be subject to a late fee of 1.5% per month.

2.11.4 Recurring monthly charges may be invoiced one month in advance. Invoicing cycles are approximately thirty (30) days in length.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.12 Disputed Charges

- 2.12.1 All bills are presumed accurate, and shall be binding unless written notice of a good faith dispute is received by the Company. For the purposes of this Section, "notice of a good faith dispute" is defined as written notice to the Company's contact within a reasonable period of time after the invoice has been issued, containing sufficient documentation to investigate the dispute, including the account number under which the bill has been rendered, the date of the bill, and the specific items on the bill being disputed, and requires full compliance with Section 2.12.2 below. After an initial dispute notice has been issued, a separate letter of dispute must also be submitted for each and every individual invoice that is being disputed. Additional dispute notices relating to the same subject may refer to the basis for the dispute provided in the earlier letter, but must specifically state the volume of traffic that is being disputed on the invoice, the amounts that are being paid under protest, and the amounts that are being paid that are not subject to the dispute. The requirement for a separate letter of dispute with this detail is a material term and adherence to this requirement is necessary for the Company to efficiently investigate and resolve disputes.
- 2.12.2 This is a pay and dispute tariff which provides, generally, that an entity that has sent or received intrastate telecommunications traffic to the Company should pay the invoiced charges, rather than engage in self-help withholding. Therefore, payment for any undisputed amounts shall be tendered without delay. Further, charges corresponding to the volume of intrastate telecommunications traffic sent to or received from the Company's network shall also be tendered without delay, reduction, or offset. Thus, withholding is only permitted by this tariff if a good faith dispute alleges that the Company has billed charges for a volume of intrastate access traffic that exceeds the volume of intrastate access traffic actually originated to or terminated by the Company's network during the billing period. Under this limited circumstance, the entity submitting the dispute must pay for the amount of intrastate traffic it acknowledges sending to or receiving from the Company's network, but may withhold the amount related to the alleged excess volumes while Company investigates and works to resolve the dispute. Other bases for disputing, including, but not limited to, contentions that the tariff does not apply to certain types of intrastate interexchange traffic or that certain entities sending or receiving traffic, are not acceptable bases for withholding payment from the Company, and payment is required to file a good faith dispute on these grounds.
- 2.12.3 The Company will evaluate the Customer's dispute and notify the Customer in writing of its determination of whether the dispute has been resolved in favor of or against the Customer. If the Company does not respond to the Customer's notice of dispute within 60 days after receiving such notice, the dispute will be deemed rejected. Customer has the right to pursue any and all legal remedies if dissatisfied with Company's determination.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.12 Disputed Charges, (Cont'd.)

- 2.12.4 If the dispute is resolved in favor of the Customer, and the Customer has withheld the disputed amount (provided that it was entitled to do so consistent with its obligations in Section 2.12.2 above), no interest credits or penalties will apply.
- 2.12.5 If the dispute is resolved in favor of the Company and the Customer has withheld the disputed amount, any payments withheld pending settlement of the disputed amount shall be subject to the late payment penalty as set forth in 2.11.3.
- 2.12.6 If the dispute is resolved in favor of the Customer and the Customer has paid the disputed amount, the Customer will receive an interest credit from the Company for the disputed amount times a late factor as set forth in 2.11.3.
- 2.12.7 If the dispute is resolved in favor of the Company and the Customer has paid the disputed amount on or before the payment due date, no interest credit or penalties will apply.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.13 Taxes and Fees

State and local sales, use and similar taxes are billed as separate items and are not included in the quoted rates for service. The Customer shall pay to the Company all taxes and fees that are associated with the Customer's lease, use or purchase of the services, or any other transaction under this tariff, including but not limited to any sales, use, federal excise, or similar taxes, franchise fees, rights of way fees, license fees and surcharges. All such taxes and fees shall be stated separately on the Customer's invoices. To the extent that the Customer claims exemption from any tax or fee, or portion thereof, Customer must provide to the Company, in advance, a valid exemption certificate and must demonstrate sufficiently to the Company the applicability of the requested exemption before any such exemption may be applied by the Company. The burden is on the Customer to demonstrate the applicability of any exemption, and the Customer understands that it and solely it shall be responsible for the payment of all taxes and fees until the time when an exemption is sufficiently demonstrated to and accepted by the Company and any relevant taxing authority(ies). The Customer agrees to pay and hold the Company harmless from and against any penalty, interest, additional tax or other charge or fee that may be levied or assessed as a result of a delay or failure of the Customer, for any reason, to pay any tax or fee charged to the Customer by the Company.

2.13.1 Federal Universal Service Fee

Interstate telecommunications services provided by the Company (exclusive of taxes) are subject to an undiscountable monthly Federal Universal Service Fund (FUSF) Fee, payable by the Customer.

The FUSF Fee will be listed as a separate line item on the Customer's bill. The FUSF Fee will not be applied to services sold by the Company to a Customer for resale, for which the Customer has on file with the Company a current Universal Service Fund Contributor Certification Form, which must be updated annually. This Certification Form must meet FCC requirements for exemption. The percentage at which the FUSF Fee is assessed is subject to change to reflect the current Federal Universal Service Fund contribution factor.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.14 Attorney's Fee and Costs

In the event that the Company pursues and prevails on a claim in court or before any regulatory body arising out of the Customer's refusal to make payment pursuant to this tariff, the Customer shall be liable for the payment of the Company's reasonable attorney's fees and costs incurred in the Company's efforts to enforce collection of the unpaid amounts.

2.15 Rounding of Charges

When a rate in this tariff reflects more than two decimal places, the charges will be determined using the rate exactly as reflected in the tariff. The resulting amount will then be rounded to two decimal places in order to achieve the nearest penny.

2.16 Ordering, Rating and Billing of Access Services Where More Than One Provider is Involved

2.16.1 When a Dedicated Service is ordered by the Customer where one end of the service is in the operating territory or network area of an Exchange Telephone Company, ILEC, CLEC, Interconnected VoIP Services Provider, or other provider of such services ("Provider") and the other end of the service is in the operating territory or network area of another Provider, each Provider involved must receive from the Customer a copy of the service order and must fulfill its portion of the service order in order for the overall service to become functional. The Customer shall be responsible for the issuance of all relevant orders to the relevant Providers, for the coordination among the different Providers, for the payment to each Provider of that Provider's charges, for the management and oversight of each Provider's portion of the service, and for any liability associated with each Provider's segment of the total service.

2.16.2 Access Services shall be provided on a Meet Point basis, with each Provider billing its services separately in accordance with its applicable tariffs.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Timing of Calls

- 3.1.1 The Customer's monthly usage charges for the Company's Access Services are based upon the total number of minutes the Customer uses.
- 3.1.2 Customer traffic to the Company's end offices will be measured (i.e. recorded or assumed) by the Company at end office switches or access tandem switches. Originating and terminating calls will be measured (i.e. recorded or assumed) by the Company to determine the basis for computing chargeable access minutes. In the event that End-User Customer message detail is unavailable because the Company has lost or damaged tapes or experienced recording system outages, the Company will estimate the volume of lost Customer access minutes of use based upon previously known values.
- 3.1.3 For originating calls, usage measurement and chargeable time begins when the originating switch receives the first wink supervisory signal forwarded from the Customer's point of origination. The measurement of originating call usage ends when the originating switch receives disconnect supervision from either the originating End-User's end office, indicating the originating End-User has disconnected, or the Customer's point of termination, whichever is first recognized by the switch.
- 3.1.4 For terminating calls, the measurement of access minutes begins when the terminating switch receives answer supervision from the terminating End-User's end office, indicating that the terminating End-User has answered. For terminating calls, the measured minutes are chargeable access minutes. Where assumed minutes are used, the assumed minutes are the chargeable access minutes. The measurement of terminating call usage ends when the terminating switch receives disconnect supervision from either the terminating End-User's end office, indicating the terminating End-User has disconnected, or the Customer's point of termination, whichever is recognized first by the switch.
- 3.1.5 For billing purposes, access or transit minutes, or fractions thereof (the exact value of the fraction being a function of the switch technology where the measurement is made), are accumulated over the billing period for each end office and then are rounded up to the nearest access minute for each end office and billed in increments of one (1) minute.

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.2 Service Commencement Date

The date on which a Customer first sends or receives traffic from the Company's End-User Customer or the date specified on the Service Order, whichever occurs first and whichever is applicable.

3.3 Service Cancellation Date

The date on which a Customer notifies the Company, in writing, of its intention to terminate its access arrangements with the Company, or the date on which the Company notifies the Customer, in writing, of its intention to terminate Access Services to the Customer. Such dates must conform to the effective dates for cancellation of service or notification of the Customer's intention to block or have the Company's access traffic blocked, as set forth in Sections 2.9.2.A, 2.9.2.B, and 2.8.2.A.

In the event that the Company terminates service without notice for the reasons set forth in Section 2.8.2.B, the Service Cancellation Date shall be the date that the Company terminates service with the Customer.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings

Where technically and economically feasible, the Company offers local exchange telecommunications services to business Customers pursuant to contractual arrangements, as well as Access Services set forth in this tariff to Customers. For Customers having unique circumstances, the Company may, where possible, be able to offer certain Access Services on a nondiscriminatory Individual Case Basis ("ICB"). The Customer's total monthly use of the Company's service is charged at the applicable rates of this tariff, in addition to any monthly recurring charges. All facilities installed for provisioning Access Services are bi-directional, two-way in nature, unless otherwise agreed in writing between the Customer and the Company. The Customer ordering Access Services shall accept additional facilities to accommodate actual and projected traffic volumes based on reasonable fill rates. The Customer must be authorized to send traffic to third-party interconnected Providers prior to delivering traffic to such parties through the use of Access Services, and the Customer is responsible for compliance with all third-party traffic termination arrangements including primary toll carrier agreements and optional or extended calling area plans and the like. In the event that the Customer sends traffic through the Company to a Provider for which the Customer does not have a traffic exchange agreement, then the Customer will indemnify the Company against any and all charges levied by such third-party interconnected Provider, including but not limited to any charges related to such traffic and any attorney's fees and expenses. The Company will bill its respective charges to the Customer and, pursuant to 3.4.2.G below, the Company will not be required to function as a billing intermediary or clearinghouse. The Terminating Provider shall not bill the Company for terminating any of the Customer's traffic, and the relationship between the Customer and the Terminating Provider will remain between the Customer and the Terminating Provider without involving the Company except to the extent that the Company's network is used by the Customer to pass the Customer's traffic to the Terminating Provider, and then the only role of the Company is to pass such traffic to the Terminating Provider on behalf of Customer without other Company involvement of any form. The presence or absence of Calling Party Number (CPN) in the Customer's call flow does not have any effect on the existence of the sole relationship between the Customer and the Terminating Provider without the Company involvement other than to forward the call to the Terminating Provider. Except for Toll VoIP-PSTN Traffic addressed in 3.4.7 below, for all other Access Services traffic routed to or from non-Carriers, the Company will generally function as an End Office provider rather than as an Access Tandem provider.

Access Service usage is assessed based on each minute of use. Originating 8YY Access Service includes the delivery of 8YY traffic that is initiated by a Wireless Provider's End User and is delivered from a CMRS Mobile Telephone Switching Office to the Company switch and then to a Customer. The Company will charge for all elements of service that it provides in routing such traffic.

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings

Access Services Diagrams

The following Access Services Diagrams depict the functions and corresponding rate elements that may be applied in various scenarios, depending on the services and functions provided by the Company or its VoIP partner(s). Not all elements apply in all situations and the application of a given rate element may depend on the application of that element under the benchmark rate. For example the Tandem Switched Transport – Termination (TST-T) function occurs at both ends of the transport connection, but whether the rate element is applied per channel or per termination, depends on the local exchange carrier whose rate serves as the benchmark.

Transmittal No. 5

Effective: August 2, 2018

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd.)

3.4.1 Switched Access Service

Switched Access Service is available to a Customer for its use in furnishing service to an End-User, as those terms are defined in 1.1, above. This service allows access to the switched network of an Exchange Carrier or other Provider for the primary or sole purpose of originating and/or terminating toll and/or interMTA communications.

A. There are several rate categories which apply to Switched Access Service:

- Tandem Switched Access Originating
- Tandem Switched Access Terminating
- Local Switching – Originating or Terminating

The Company provides originating and terminating switched access service based on aggregate traffic volumes from the following rate categories:

1. Tandem Switched Access (“Switched Transport”)

The Switched Transport rate category includes the charges related to the transmission and termination of facilities between the Customer designated premises (Point of Presence) and Company’s access tandem, and between the Company’s access tandem, and the end office switch(es) where the Customer’s traffic is switched to originate or terminate the Customer’s communications, or any functional equivalent of the incumbent local exchange carrier Switched Transport access service provided by the Company via analogous facilities.

Switched Transport may incorporate a dedicated or common path between the Customer’s Point of Presence and the Company’s switch or a common transmission path from Exchange Carrier(s) switch(es) connected to the Company’s switch. The charges that apply, where applicable, to Switched Transport include Tandem Switching, Tandem Common Trunk Port, Tandem Multiplexing, Tandem Switched Transport – Termination, and Tandem Switched Transport – Facility.

The terminating Switched Transport rate schedules are bifurcated into “Affiliated Price Cap LEC End Office” and “All Other End Offices” rates, which includes 3rd party traffic. The Company bills the Price Cap LEC End Office or the Non-Price Cap LEC End Office terminating Switched Transport rate schedule based on the rates the competing Price Cap LEC would charge for switched transport traffic delivered to the same terminating End Office. In other words, the Company mirrors the Switched Transport rates the Price Cap LEC would charge if it were the terminating Switched Transport provider rather than the Company.

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.1 Switched Access Service, (Cont'd)

A. Switched Access Originating or Terminating, (Cont'd)

1. Switched Transport, (Cont'd.)

The Tandem Switching rate element applies to the function of switching call traffic between interconnecting carrier switches. The Tandem Switching rate applies when the Company routes originating or terminating traffic between a Customer and another carrier's end office switch or its equivalent. Where access traffic is routed directly between a carrier Customer and an End-User, the Company will also function as an end office provider rather than just an Access Tandem provider.

The Tandem Common Trunk Port element applies to the termination of Common Transport trunk facilities at the Tandem office. The Tandem Common Trunk Port rate is assessed on a per minute of use basis for all originating and terminating access minutes utilizing tandem routing functions.

Tandem Multiplexing allows Customers to interconnect facilities of one capacity or bandwidth with access tandems to facilities of a different capacity or bandwidth from that of the interconnecting facility. The Tandem Multiplexing rate will be assessed to all minutes of use between the Company's tandem and the Customer's Point of Presence.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.1 Switched Access Service, (Cont'd)

A. Switched Access Originating or Terminating, (Cont'd)

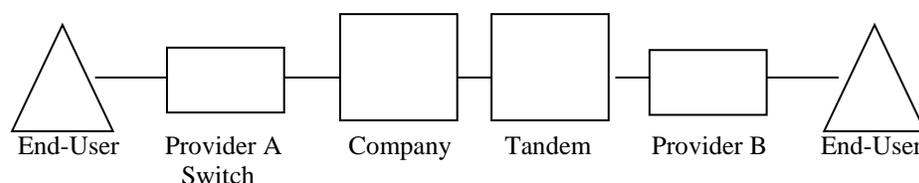

2 End Office

The End Office access service category includes: (1) The switching of calls at the Company's End Office Switch and the delivery of such calls to or from the called party's premises; (2) The routing of calls to the called party's premises, either directly or via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected VoIP service or a non-interconnected VoIP service that does not itself seek to collect switched access charges, regardless of the specific functions provided or facilities or technology used; or (3) Any functional equivalent of the incumbent local exchange carrier End Office access service provided by the Company via analogous services.

Usage Charges are rates that apply only when a specific Switched Access Service element (or its functional equivalent), or category of Switched Access Service elements (or its functional equivalent), as the case may be, is provided. These are applied on a per-access minute, a per-call or per-query basis. Usage rates are accumulated over a monthly period.

3.4.2 Transit Service

- A. Transit Service allows an Originating Provider to send Section 251(b)(5) Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic (not delivered via an IXC), and/or CMRS IntraMTA Traffic, to a Terminating Provider through a Company tandem. A Transit rate element applies to all transit MOUs transmitted over the Company's network. The Originating Provider is responsible for paying all applicable charges according to this tariff unless otherwise specified in this tariff. Transit Service does not include Non-Authorized Traffic as specified in 2.4.16 above. Notwithstanding any other provision, the Customer appoints the Company to act on its behalf for the limited purpose of establishing arrangements for the termination of Transit Traffic to terminating Providers, which authority is limited to the establishment of the technical and operational aspects of such arrangements.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.2 Transit Service, (Cont'd.)

- B. Transit Service, (Cont'd.) Upon written request from the Customer, the Company will provide electronic terminating Transit billing records solely for Customer's use in constructing its bills to its customers. Such records shall be in industry-standard EMI format and shall be electronically transmitted to the Customer in secure form negotiated on case-by-case with delivery occurring no more frequently than weekly, at rates specified in Section 4.1.3.
- C. Pursuant to 3.4, above, the Customer is responsible for all aspects of any third-party traffic termination arrangements.
- D. When the Company's network is utilized, the Customer is responsible for paying all charges for Transit Traffic emanating from Customer's network and for Transit Traffic terminating to Customer's network, including MOU charges which may vary by Exchange Area of each terminating number, and other applicable charges as specified in this tariff. This includes On-Net Traffic and Off-Net Traffic, except as specified in E, following
- E. When the Company reroutes a call to another company's switch due to a third-party failure or insufficient capacity on Company's network, the Customer may be charged by the other company a per-MOU charge or other charge, in which case the Company will not simultaneously apply its like function charge for the same call, and the Company may pass-through to the Customer any charge billed to the Company for such Customer traffic, payment of which is the responsibility of the Customer.
- F. Meet Point Billing ("MPB")
- G. Transit Service shall be on a MPB basis with the Company and the Terminating Provider billing their respective rates for their portions of the service directly to Customer, and pursuant to 3.4 above, neither Company nor the Terminating Provider will be required to function as a billing intermediary or clearinghouse.

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.3 8YY Data Base Query

The 8YY Data Base Query Charge will apply for each Toll-Free 8YY call query received at the Company's (or its provider's) Toll-Free 8XX data base.

A Basic or Vertical Feature Query charge is assessed for each completed query returned from the data base identifying the Customer to whom the call will be delivered whether or not the actual call is delivered to the Customer. The Basic Query provides the identification of the Customer to whom the call will be delivered and includes area of service routing which allows routing of 8YY series calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same Customer identification as the basic query and vertical features which may include: (1) call validation, (ensuring that calls originate from subscribed service areas); (2) POTS translation of 8YY series numbers; (3) alternate POTS translation (which allows subscribers to vary the routing of 8YY series calls based on factors such as time of day, place or origination of the call, etc.); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3)). The Vertical Feature charge will be assessed for each feature used on a call.

3.4.5 Optional Features

Other optional features may be available on an Individual Case Basis (ICB).

3.4.6 Blocking of Access Traffic Service

Blocking Service is available to Customers where the Customer chooses to have the Company block access traffic to the Company's End-User Customer.

FACILITIES FOR INTERSTATE ACCESS

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.7 Application of Access Charges to Toll VoIP-PSTN Traffic

- A. All Toll VoIP-PSTN traffic will be assessed switched access charges pursuant to Sections 2.4.11 and 4.1 of this tariff.
- B. The Company shall assess and collect switched access rate elements under this tariff for Access Services, regardless of whether the Company itself delivers such traffic to the called party's premises or delivers the call to the called party's premises via contractual or other arrangements with an affiliated or unaffiliated provider of VoIP service that does not itself seek to collect switched access charges for the same traffic. The Company will charge for functions performed by the Company or by its affiliated or unaffiliated provider of VoIP service. For purposes of this provision, functions provided by the Company, or by its affiliated or unaffiliated provider of VoIP service, as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is comparable to a service offered by a local exchange carrier constitutes the functional equivalent of carrier Access Services.

3.5 Miscellaneous Functions and Services

3.5.1 Access Order Change

An Access Order Change is a change in the Customer's service requested subsequent to installation.

3.5.2 Return Check Charge

If payment for service is made by a check, draft, or similar instrument (collectively "Check") that is returned to the Company unpaid by a bank or another financial institution for any reason, the Company may bill the Customer a returned check charge. In addition, the Customer may be required to replace the returned Check with a payment in cash or equivalent to cash, such as cashier's check, certified check or money order.

3.5.3. Reconnection

Reconnection charges occur where Access Services to an existing Customer has been discontinued for proper cause, and the Customer desires to resume service with the Company. If service has been discontinued for proper cause and where a Customer desires reconnection, the Customer will be charged a fee to defray the cost of restoring service to the Customer.

FACILITIES FOR INTERSTATE ACCESS

Issued: October 2, 2015

Transmittal No. 1

Effective: October 3, 2015

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.6 Switched Access Dedicated Components

Subject to availability, the provision of Access Services by the Company may include dedicated facilities such as entrance facilities, dedicated trunk ports, dedicated multiplexing, dedicated transport, or any combination of dedicated facilities. See Section 4 of this tariff for generally available facilities and applicable rates.

3.7 Determination of Interstate Charges for Mixed Interstate and Intrastate Access Service

When mixed interstate and intrastate Access Service is provided, all charges (i.e., nonrecurring, monthly and/or usage) including the associated charges for transport and port charges and optional features, will be prorated between interstate and intrastate. The Percentage for Interstate Use PIU(s) as set forth in Section 2.4.9 of this tariff preceding will serve as the basis for prorating the charges. The percentage of an Access Service to be charged as interstate is applied in the following manner:

3.7.1. For monthly and nonrecurring chargeable rate elements

A. Access Services Except Direct-Trunk Transport Facilities or Entrance Facilities

Multiply the general PIU or the residual PIU, if the Customer has chosen to provide usage type PIUs, times the quantity of chargeable elements times the stated applicable tariff rate per element

B. Direct-Trunked Transport Facilities and Entrance Facilities

Multiply the Direct-Trunked Transport Facility or Entrance Facility PIU, times the quantity of chargeable elements times the stated applicable tariff rate per element.

3.7.2. For all Access Services usage sensitive chargeable rate elements:

A. If the actual jurisdiction of the usage can be reasonably identified, multiply the actual measured use that is identified by jurisdiction times the applicable stated tariff rate.

B. If the Customer has chosen to provide one general PIU for all usage types, then multiply the general PIU times actual usage (i.e., measured or Telephone Company assumed average usage) which cannot be reasonably jurisdictionally identified times the stated tariff rate. If the Customer has chosen to provide separate usage type PIUs and the residual PIU, then multiply the usage type PIU or the residual PIU times the corresponding actual usage type minutes of use times the stated applicable tariff rate.
