

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information19.1 Rate Zones and Metropolitan Statistical Areas

This section contains a list of each Telephone Company wire center that has been assigned to a rate zone. Rate zones are applicable to the services specified in Sections 4 and 5. This table lists, by jurisdiction, wire centers assigned to Rate Zones 1, 2, 3, and Price Bands A, B and C, Metropolitan Statistical Area (MSA) and MSA Level.

Metropolitan Statistical Areas (MSAs) may achieve various phases of pricing relief pursuant to Subpart H of the Commission's Part 69 Rules. For purposes of Switched Access Services, Telephone Company MSAs which qualify for Phase II pricing relief are identified in this section by MSN Name and level of pricing relief.

(A) Level 1 MSA Pricing

MSAs assigned to a Level 1 pricing are those MSAs which have achieved Phase II pricing relief for all Switched Access rate elements associated with the portion of the transmission path connecting an Interexchange Carrier's (ICs) customer designated location (CDL) to the wire center serving the secondary CDL, (i.e. end user premises). The rate elements associated with the transmission path are those rate elements applicable for the type of service involved.

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd)19.1 Rate Zones and Metropolitan Statistical Areas (Cont'd)

(B) Level 2 MSA Pricing

MSAs assigned to Level 2 pricing are those MSAs which have achieved Phase II pricing relief for all rate elements associated with the end-to-end transmission path connecting the Interexchange Carrier's CDL to the secondary CDL involved. The rate elements associated with the transmission path are those rate elements applicable for the type of service involved.

The services which are subject to the MSA rate bands are as follows:

- Banded Optical Transport
- Clear Channel Capability
- Custom Connect
- Digital Data
- Digital Transmission Service
- Express Banded Optical Transport
- Express Connect
- Flex Express Connect
- High Capacity DS1
- High Capacity DS3
- High Voltage Protection
- Dedicated SONET Optical Transport Service
- Program Audio
- Dedicated SONET Ring
- Ethernet Private Line
- Video Digital Transport Service
- Voice Grade

To determine the pricing for the Special Transport rate element when the wire centers involved are located within different price zones/bands, apply the rates for the higher price zone or price band. Rates subject to pricing flexibility are noted as Price Band A, B, or C. Traditional Price CAP rates are in Zones 1, 2 and 3. Rates between corresponding zones/bands (1/A- 2/B- 3/C) are maintained for services not awarded pricing flexibility. The MSA Level indicates whether Special Access (SP) and/or dedicated Switched Access trunking services (DSW) may be subject to pricing flexibility band assignment.

For the avoidance of doubt, in accordance with Section 2.7 of this Tariff, only Telephone Company wire centers in the operating territory of this Tariff will be considered in order to determine the applicable Special Transport rate element. If one wire center is in the operating territory of this Tariff and the other wire center is not, the rates and charges applicable to the Special Transport rate element will be dependent upon the level of pricing flexibility of only the wire center that is in the Telephone Company's operating territory.

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd)19.2 Competitive and Non-Competitive Counties*

(A) General

Counties and county-equivalents within the Telephone Company's operating territories have been designated by the Federal Communications Commission to be either Competitive or Non-Competitive for the purposes of pricing Special Access Services.

Rates and charges are shown in Section 3, 5, 6 and 11 preceding and Section 20 following for Special Access Services.

(1) Competitive Pricing

The rate elements associated with the transmission path are those rate elements applicable for the type of service involved. Rates and charges for competitive rate elements are shown in terms of price bands, regardless of the status of the county for a particular wire center. To determine the price band for a rate element, first locate the county and the wire center from which the service is provided in Section 19.2 (C) following and find the corresponding price band. For DS3 and below Special Access Services in Non-Competitive Counties, rates and charges for End User Special Access Lines are the Price Cap Rates. For DS3 and below Special Access Services in Competitive Counties, rates and charges for End User Special Access Lines are the Price Band Rates. Any rate elements that is not labeled as either Price Band or Price Cap will apply in both Competitive and Non-Competitive Counties.

- (B) * Pursuant to FCC 17-43, released April 28, 2017, Frontier has detariffed (1) TDM channel terminations for wire centers in competitive counties; and (2) packet-based services. Terms and Conditions for detariffed services can be found in the Interstate Service Guide and Pricelist.

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd)19.2 Competitive and Non-Competitive Counties* (Cont'd)

(A) General (Cont'd)

The Special Access Services which are subject to price bands are as follows:

Voiceband
Digital Data Service (DDS)
Program Audio
High Capacity Digital
MetroLAN Special Transport
High Voltage Protection
Bonded Digital Link Service
Supplemental Features
Multiplexing Arrangements
Clear Channel Capability
Federal Government Banded Optical Transport
Banded Optical Transport
Custom Connect DS1, DS3, STS1 Riders and DS1/DS3 Transport
Dedicated SONET Ring, DS1, DS3, DS3 Transmux, and STS1 ports and DS1, DS3 or STS1 Partial Ring
Channel Mapping
Dedicated SONET Entrance Facilities

FACILITIES FOR INTERSTATE ACCESS

19. Wire Center Information (Cont'd)19.2 Competitive and Non-Competitive Counties (Cont'd)

(A) Rate Regulations

To determine the price band for the special transport rate element when the wire centers involved are located within different price bands, apply the rates and charges for the higher price band number.

For the avoidance of doubt, in accordance with Section 2.7 of this tariff, only Telephone Company wire centers in the operating territory of this Tariff will be considered in order to determine the price band of the applicable special transport rate elements. If one wire center is in the operating territory of this Tariff and the other wire center is not, the rates and charges applicable to the special transport rate element will be determined by the band that applies based on the wire center that is in the Telephone Company's operating territory.

When service is provided under a National Discount Plan as set forth in Section 23.1 following, the discount percentage shall be applied to the rate applicable to the price band involved.

When service is provided as part of a Shared Use Arrangement, price band billing under Section 19.1 preceding may apply to the switched access portion of the facility, while price band billing under this Section 19.2 applies to the special access portion of the facility, or Rate Zone billing under Section 19.1 preceding may apply to the switched access portion of the facility, while price band billing under this Section 19.2 applies to the special access portion of the facility.

The application of rates and charges for Special Access service subject to Competitive and Non-Competitive Counties pricing relief are described in Section 5.6.1 preceding.

Section 69.801(d) of the FCC's rules defines a "Grandfathered market" as "[a] county that does not satisfy the competitive market test set forth in § 69.803 for which a price cap local exchange carrier obtained Phase II relief pursuant to § 69.711(c)." Pursuant to Section 69.807(c) of the FCC's rules, CLLIs in Grandfathered Markets as indicated in Section 19.2(C) of this tariff, should apply the Price Cap rate for purposes of determining the applicable Nonrecurring Charge (NRC) associated with the rate element. The Price Band rate will continue to apply to the monthly recurring charge.
