SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.23 Determination of Jurisdiction of Mixed Interstate and Intrastate Dedicated Facilities

2.23.1 When mixed interstate and intrastate service is provided over a dedicated facility, the jurisdiction will be determined as follows. For jurisdictional reports required for switched access, see Section 2.9.2.

- A. If the Customer's estimate of the interstate traffic on the service equals 10% or more of the total traffic on that service, the service will be provided according to the applicable rules and regulations of this tariff.
- B. If the Customer's estimate of the interstate traffic on the service is less than 10% of the total traffic on that service, the service will be provided according to the applicable rules and regulations of the appropriate intrastate tariff.
- C. If the percentage of interstate traffic on the service changes to the extent that it alters the jurisdiction of the service, the Customer must notify the Company of any required change in status. The affected service will revert to the appropriate jurisdictional tariff within the next full billing cycle. Any applicable termination liability will be transferred with the jurisdictional change of the service.

2.24 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company is Involved

When an Access Service is provided to a customer where one portion of the service is provided by one Exchange Telephone Company and the other portion of the service is provided by another Exchange Telephone Company, the Company accepts and adheres to the Ordering and Billing Forum guidelines, Multiple Exchange Carrier Access Billing (MECAB) and Multiple Exchange Carrier Ordering and Design (MECOD).

2.25 Toll VoIP-PSTN Traffic

The Company will apply, bill, and collect for the functionally equivalent switched access services performed by the Company and/or its VoIP Provider Partner. With regard to the switching charges in Section 3 herein, if the VoIP Provider Partner provides a physical connection to the last-mile facilities used to serve End Users, the applicable switching charge will be the Local Switching charge. If a VoIP Provider Partner does not provide a physical connection to the last-mile facilities used to serve End Users, the applicable switching charge will be the Tandem Switching charge. In either case, all other applicable charges, including the Common Trunk Port, will also be assessed.
