FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

*This tariff, F.C.C. Tariff No.1, issued by Intrado Communications, LLC
replaces in its entirety
FCC Tariff No. 1 issued by West Telecom Services, LLC*

INTRADO COMMUNICATIONS, LLC

(T)

3200 West Pleasant Run Road, Suite 300
Lancaster, TX 75146

FACILITIES FOR INTERSTATE ACCESS TARIFF

This tariff contains the descriptions, regulations and rates for the furnishing of services and facilities for Interstate Access Services, including Switched Access Service, End-User Access Service, Transit Service, and other related services provided by Intrado Communications, LLC, hereinafter referred to as the Company, to Customers for their services originating from or terminating to locations within the United States. The Company's principal offices are located at: 3200 West Pleasant Run Road, Suite 300, Lancaster, Texas 75146. This tariff is on file with the Federal Communications Commission, and copies may be inspected, during normal business hours, at the Company's principal place of business.

FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Interstate: The regulatory jurisdiction of services used for communications between locations located in different states within the United States or between one or more location in the United States and one or more international locations.

IntraMTA (Major Trading Area): For purposes of this tariff, IntraMTA refers to telecommunications traffic exchanged between a LEC and a CMRS, PCS or wireless provider that originates or terminates within the same Major Trading Area as used by the FCC to define coverage for certain services.

Intrastate: The regulatory jurisdiction of services for communications between locations within the same state or services which are not jurisdictionally interstate.

LATA: A local access and transport area established pursuant to the Modification of Final Judgment entered by the United States District Court for the District of Columbia in Civil Action No. 82-0192 for the provision and administration of communications services.

Local Switching Center: The switching system that provides service to the End User.

(C)

Meet Point Billing: The arrangement through which multiple exchange carriers involved in providing Access Services divide the ordering, rating, and billing of such services on a proportional basis so that each exchange carrier involved in providing a portion of the Access Service agrees to bill under its respective tariff.

Mobile Telephone Switching Office: Location where the wireless Customer maintains a facility for purposes of interconnecting to the Company's network.

Non-Authorized Traffic: Traffic that is not Switched Access Service traffic or Tandem Transit traffic; Non-Authorized Traffic includes 911, 411, 976, 311, 611, 500, 950, other-than 411 Directory Assistance, Operator Services including 0+Local and 0+Operator, international pay-per-call and other such non-Switched Access, non-Tandem Transit calls.

Nonrecurring Charges: The one-time initial charges for services or facilities, including but not limited to charges for construction, installation, or special fees, for which the Customer becomes liable at the time the Service Order is executed.

Out of Band Signaling: An exchange access signaling feature which allows Customers to exchange call control and signaling information over a communications path which is separate from the message path.

FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Service Order: The written request for the Company's services executed by the Customer and the Company in a format devised by the Company; or, in the alternative, the submission of an Access Service Request by the Customer in the manner specified in this tariff.

Shared Customer: Any entity included within the definition of Customer above, that receives services from and is under obligation to the Company and one or more Customers simultaneously.

Station: Refers to telephone, conference bridge, or IP compatible customer equipment from or to which calls are placed.

(N)
(N)

Switched Access Service: Access to the switched network of an Exchange Carrier or other Provider intended for the primary purpose of originating and/or terminating toll and/or interMTA communications.

Switching: For the purpose of any context or use-case within this tariff (e.g., stand-alone "switching," switching system," Switching center," etc.), the term "switching" shall include Time Division Multiplexing ("TDM")-based circuit switching as well as packet-based switching ("packet switching").

TDM – Time Division Multiplexing: A method of transmitting and receiving voice signals over the Public Switched Telephone Network (PSTN).

Terminating Provider: A Provider, as defined above, whose service is provided in the terminating direction.

Toll VoIP-PSTN Traffic: The term Toll VoIP-PSTN Traffic denotes a Customer's interexchange voice traffic exchanged with the Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. Toll VoIP-PSTN Traffic originates and/or terminates in IP format when it originates from and/or terminates to an End-User customer of a service that requires IP-compatible customer premises equipment.

FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

SECTION 1 - TECHNICAL TERMS AND ABBREVIATIONS, (CONT'D.)

1.1 Definitions, (Cont'd.)

Transit or Transit Service: Transit Service means all Section 251(b)(5) Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic (not delivered to an IXC), and/or CMRS IntraMTA Traffic. A Transit rate element applies to all MOUs transited over the Company's network. The originating Interconnected Carrier is responsible for payment of the applicable charges under this tariff unless otherwise specified in this tariff. Transit Service does not include 911, 411, 976, 311, 611, 500, 950, Directory Assistance, 0+ local, and 0+ operator services or other Non-Authorized Traffic.

Transit Call (or Transit Traffic): Section 251(b)(5) Traffic, ISP-Bound Traffic, IntraLATA Toll Traffic (not delivered via an IXC), and/or CMRS IntraMTA Traffic.

Transit Tandem: A Company switching system that provides a distribution function for Transit Service traffic between Providers.

Trunk: A communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

United States: - The forty-eight contiguous states and the District of Columbia, Alaska, Guam, Hawaii, American Samoa, Puerto Rico, the Northern Mariana Islands, and the US Virgin Islands.

VoIP Provider Partner: A provider of VoIP Service to End Users where the Company provides the connectivity and supporting functions for PSTN interconnection and/or number resources. A VoIP Provider Partner may or may not provide a physical connection to the last-mile facilities used to serve an End User.

(N)
|
|
(N)

VoIP Service: Transmission of communication by aid of wire, cable, radio, or other like connection using Voice over Internet Protocol that is originated or terminated in Internet Protocol ("IP") format. VoIP services are those services that require the use of IP compatible customer premises equipment.

Wireless Provider: Any carrier authorized to operate as a provider of cellular, personal communications, paging, CMRS or any other form of wireless transmission.

(D)

E. PVU Factor Updates

(T)

Customers selecting Option 1 – Self Reporting may update the PVU-A factor quarterly using the method set forth in subsection D.1, above. If the Customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January, April, July and/or October of each year, a revised PVU-A factor based on data for the prior three months, ending the last day of December, March, June and September, respectively, along with supporting documentation for the prior three month period. The verified revised PVU factor will apply prospectively and serve as the basis for billing until superseded by a new verified PVU factor.

F. PVU Factor Verification

(T)

Not more than four times in any year, the Company may ask the Customer to verify the PVU-A factor furnished to the Company. The Customer is subject to auditing and verification by the Company and the Customer is obligated to support all self-reported figures with traffic studies or other reasonable analyses upon the Company's written request. The Customer shall comply with such requests, and shall reasonably provide the records, including information used to determine the PVU-A factor and other information contained in Company's written requests.

FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)

2.8 Termination of Access Services

2.8.1 Customer Termination of Service

A. General

The Customer may terminate access and access-related service with the Company only through adherence to the procedures set forth herein. Requests for termination may not be unreasonably discriminatory and must otherwise comply with requirements of the Communications Act of 1934, as amended, and with all other applicable laws, policies and regulations.

In deference to the unique nature of the relationship between the Company and the Customer, and in acknowledgement of the legitimate interests that the Company has with respect to Shared Customers, strict adherence by the Customer to the Access Services Termination Procedures contained herein is mandatory. Failure on the part of the Customer to follow these procedures, or deviation from such procedures, may be construed by the Company, at its sole option, as part of on-going negotiations between the Company and the Customer, and not as a final position by the Customer. The Customer shall compensate the Company for any and all traffic exchanged during any on-going negotiations, or until such time as the Customer cancels its service arrangements in full accordance with the Access Service Termination procedures set forth herein.

B. Term of Service

At the expiration of the initial term specified in each Service Order, or in any extension thereof, service shall continue on a month-to-month basis at the then-tariffed rates for Access Services, unless terminated by either party upon thirty (30) days' written notice to the other party, or in accordance with the timeframes set forth in Sections 2.8.2.A, 2.9.2.A, and 2.9.2.B, whichever is applicable.

1. Service will continue to be provided to the Customer until terminated by the Customer or the Company in accordance with this Section.

(T)

2. Service is provided and billed on the basis of a minimum period of at least one month, and shall continue to be provided until canceled by the Customer, in writing, on not less than 30 days' notice. Unless otherwise specified herein, for the purpose of computing charges in this tariff, a month is considered to have 30 days.

Transmittal No. 2

Effective: December 24, 2020

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.3 8YY Data Base Query

The 8YY Data Base Query Charge will apply for each Toll-Free 8YY call query received at the Company's (or its provider's) Toll-Free 8YY data base. (T)

A Basic or Vertical Feature Query charge is assessed for each completed query returned from the data base identifying the Customer to whom the call will be delivered whether or not the actual call is delivered to the Customer. The Basic Query provides the identification of the Customer to whom the call will be delivered and includes area of service routing which allows routing of 8YY series calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same Customer identification as the basic query and vertical features which may include: (1) call validation, (ensuring that calls originate from subscribed service areas); (2) POTS translation of 8YY series numbers; (3) alternate POTS translation (which allows subscribers to vary the routing of 8YY series calls based on factors such as time of day, place or origination of the call, etc.); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3)). The Vertical Feature charge will be assessed for each feature used on a call.

3.4.5 Optional Features

Other optional features may be available on an Individual Case Basis (ICB).

3.4.6 Blocking of Access Traffic Service

Blocking Service is available to Customers where the Customer chooses to have the Company block access traffic to the Company's End-User Customer.

FACILITIES FOR INTERSTATE ACCESS

Issued: December 9, 2020

Transmittal No. 2

Effective: December 24, 2020

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.4 Access Services Offerings, (Cont'd)

3.4.7 Application of Access Charges to Toll VoIP-PSTN Traffic

A. All Toll VoIP-PSTN traffic will be assessed switched access charges pursuant to Sections 2.4.11 and 4.1 of this tariff.

B. The Company shall assess and collect switched access rate elements under this tariff for Access Services, regardless of whether the Company itself delivers such traffic to the called party's Station or delivers the call to the called party's Station via contractual or other arrangements with a VoIP Provider Partner that does not itself seek to collect switched access charges for the same traffic. The Company will charge for functions performed by the Company or its VoIP Provider Partner. For purposes of this provision, functions provided by the Company, or its VoIP Provider Partner, as part of transmitting telecommunications between designated points using, in whole or in part, technology other than TDM transmission in a manner that is functionally equivalent to a service offered by a local exchange carrier shall constitute the performance of the functionally equivalent traditionally applicable carrier access service and their related charges.

C. The Company will apply, bill and collect for the functionally equivalent switched access services performed by the VoIP Provider Partner. If the VoIP Provider Partner provides a physical connection to the last-mile facilities used to serve the End User, the End Office Switched Access charges will apply (in addition to applicable Switched Transport charges -- excluding Tandem Switching and Tandem Common Trunk Port). If a VoIP Provider Partner does not provide a physical connection to the last-mile facilities used to serve the End User, the Switched Access Tandem Services charges will apply.

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.5 Miscellaneous Functions and Services

(M)

3.5.1 Access Order Change

An Access Order Change is a change in the Customer's service requested subsequent to installation.

3.5.2 Return Check Charge

If payment for service is made by a check, draft, or similar instrument (collectively "Check") that is returned to the Company unpaid by a bank or another financial institution for any reason, the Company may bill the Customer a returned check charge. In addition, the Customer may be required to replace the returned Check with a payment in cash or equivalent to cash, such as cashier's check, certified check or money order.

3.5.3. Reconnection

Reconnection charges occur where Access Services to an existing Customer has been discontinued for proper cause, and the Customer desires to resume service with the Company. If service has been discontinued for proper cause and where a Customer desires reconnection, the Customer will be charged a fee to defray the cost of restoring service to the Customer.
