SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (CONT'D)

Hub POI

A POI that is used for the purpose of exchanging traffic associated with more than one LATA.

(N)  
|  
(N)

Individual Case Basis (ICB)

The term "Individual Case Basis" denotes a condition in which the regulations, if applicable, rates and charges for an offering under the provisions of this Tariff are developed based on the circumstances in each case.

## SECTION 1 - DEFINITIONS AND ABBREVIATIONS, (CONT'D)

On-hook

The term "On-hook" denotes the idle condition of Switched Access or a Channel.

Point of Interconnection (POI)

An interconnection with the Company's network, by way of Entrance Facilities, for the purpose of exchanging traffic associated with a single LATA; while a Hub POI is a POI used for the purpose of exchanging traffic associated with more than one LATA. The POI denotes the first Company location to which customer facilities are connected by way of such Entrance Facilities.

(N)  
|  
|  
|  
|  
(N)

Point Of Termination (POT)

The term "Point of Termination" denotes a point at or near a Customer-designated premises at which the Company's responsibility for the provision of Access Service ends.

SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.10 Billing and Payment for Service (Continued)

2.10.4 Disputed Charges

A.

(D)  
(D)

A good faith dispute requires the Customer to provide a written claim to the Company. Such claim must identify in detail the basis for the dispute, and if the Customer withholds disputed amounts, it must identify the account number under which the bill has been rendered, the date of the bill and the specific items on the bill being disputed, to permit the Company to investigate the merits of the dispute.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.3 Rate Categories (Continued)

3.3.1 Tandem-Switched Transport

A. General Description

The Tandem-Switched Transport access service category includes tandem switching and common transport between the tandem switch and end office, or any functional equivalent of the incumbent local exchange carrier Tandem-Switched Transport access service provided by the Company via analogous facilities.

Tandem-Switched Transport may include the following rate elements: Tandem Switched Transport-Termination, Tandem-Switched Transport-Facility, Tandem Switching, and Common Transport Multiplexing ("CMUX").

(C)

B. [Reserved for Future Use]

## SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

## 3.3 Rate Categories (Continued)

## 3.3.1 Tandem-Switched Transport (Continued)

## D. Switched Transport TST Rate Category

Customers may connect with the Company's Access Tandem on a direct basis (i.e., by choosing to purchase Access Tandem ports dedicated to the sole use of that Customer) or on an indirect basis (i.e., by choosing not to purchase Access Tandem ports dedicated to the sole use of that Customer).

Tandem Switched Transport (TST) provides the common, or shared, transmission facilities between a third party Access Tandem, for example, and a Company Access Tandem (on indirect basis tandem connections only) and between a Company Access Tandem and End Offices subtending that tandem utilizing tandem switching functions. TST consists of circuits used in common by multiple customers.

The TST rate category is composed of the rate elements set forth in (1) through (4), following based on the functions performed.

## (1) Tandem Transmission

Tandem Transmission is composed of a fixed per-MOU rate ("Tandem Switched Transport - Termination") and per-mile/per-MOU rate ("Tandem Switched Transport – Facility"). The fixed rate provides for the circuit equipment at the end of the interoffice transmission paths. The per-mile rate provides for the transmission facilities, including intermediate transmission circuit equipment between the end points of the interoffice circuit. For purposes of determining the per-mile rate, mileage will be measured as airline mileage using the V & H coordinates method in accordance with standard industry practices.

## (2) Tandem Switching

Tandem Switching is a per-MOU rate assessed for utilizing tandem switching functions when tandem routing is provided for trunkside services.

(M)  
|  
|  
(M)

*Material previously located on this page now appears on Page 79*

## SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

## 3.3 Rate Categories (Continued)

## 3.3.1 Switched Transport (Continued)

## (3) Common Transport Multiplexing

(T)

Common transport multiplexing equipment is utilized on the End Office side of the Access Tandem when common transport is provided between the Access Tandem and the subtending End Offices. Common transport multiplexing may also apply on the Customer side of the Access Tandem on indirect basis tandem connections. This rate is assessed on a per-MOU basis.

## 3.3.2 End Office

The End Office access service category includes: (1) The switching of calls at the Company's End Office Switch and the delivery of such calls to or from the called party's premises; (2) The routing of calls to the called party's premises, either directly or via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected VoIP service or a non-interconnected VoIP service that does not itself seek to collect switched access charges, regardless of the specific functions provided or facilities or technology used; or (3) Any functional equivalent of the incumbent local exchange carrier End Office access service provided by the Company via analogous services.

End Office access service, or its functional equivalent, includes the following rate elements: Local Switching--Originating, Local Switching—Terminating, Common Trunk Port, Interconnection Charge, Information Surcharge, and Dedicated Trunk Port charges. The End Office rate category is composed of the rate elements set forth below based on the functions.

## A. Local Switching

Local Switching provides the local End Office switching functions associated with the various access switching arrangements. The Local Switching rate is assessed on a per-MOU basis to all originating and terminating access minutes utilizing End Office switching.

## SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

## 3.6 Rate Regulations

There are three types of rates and charges that apply to Switched Access Service. These are monthly recurring rates, usage rates and nonrecurring charges. These rates and charges are applied differently to the various rate elements as set forth herein.

- A. Monthly Rates - Monthly rates are typically flat recurring rates that apply each month or fraction thereof that a specific rate element is provided. For billing purposes, each month is considered to have 30 days. Monthly recurring rates for Dedicated Access Services will be assessed on a per minute equivalent basis pursuant to Section 3.7.1 when connections to the Company are via a Hub POI or Alternate Access Tandem. (C)  
|  
(C)
- B. Usage Rates - Usage rates are rates that apply only when a specific rate element is used. These are applied on a per-access minute, a per-call or per-query basis. Usage rates are accumulated over a monthly period.
- C. Nonrecurring Charges - Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Switched Access Service are installation of service, installation of optional features or service rearrangements.

(D)  
|  
(D)

## SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

## 3.7 Dedicated Access Services Charges

Dedicated Access Services include the functional equivalent of incumbent local exchange carrier Entrance Facility, Direct-Trunked Transport, Dedicated Multiplexing, and Dedicated Tandem Trunk Port. Rates for dedicated access services will be based on the rates associated with the relevant end office associated with the origination/termination of traffic rather than the physical location of the POI.

Entrance Facility is a transport facility that provides dedicated transport between the customer's Point of Termination and the Company's POI. The Entrance Facility rate is assessed whether the customer Point of Termination and the POI are in separate locations or in the same building. The Entrance Facility rate is in addition to the rates assessed for Direct Trunked Transport.

Direct-Trunked Transport (DTT) means dedicated transport from the POI(s) to the Access Tandem. Direct-Trunked Transport rates are not assessed when the POI and Access Tandem are in the same building.

Dedicated Multiplexing (DMUX) is required at Company tandem locations when the customer obtains dedicated services to the Company POI or Hub POI.

A Dedicated Tandem Trunk Port (DTTP) is provided for trunks terminated on the Customer side of the Access Tandem.

## 3.7.1 Application of Dedicated Access Services Charges When Connecting via Optional Hub POI or Alternate Access Tandem

- A. When exchanging traffic via a Hub POI or Alternate Access Tandem, monthly recurring rates for dedicated services (Dedicated Tandem Trunk Port, Dedicated Multiplexing, Direct-Trunked Transport, and Entrance Facility) will be assessed on a minute-of-use equivalent (MOU-E) basis using the monthly recurring rates identified herein with a monthly usage factor of 216,000 MOU per DS1-equivalent circuit per month. These MOU-E rates apply irrespective of whether the dedicated services are supported by time division multiplexing (TDM) or session internet protocol (SIP) technology. Mileage-sensitive dedicated services rate components will be calculated using actual miles between 1) the Hub POI or the Alternate Access Tandem and 2) the Company Access Tandem, not to exceed 10 miles. MOU-E rates for dedicated services will be based on the rates associated with the relevant end office associated with the origination/termination of traffic rather than the physical location of the Hub POI. Hub POIs are offered at the Company's discretion. The Company must agree in advance to a particular Hub POI arrangement and the LATAs with which traffic can be exchanged via such Hub POI arrangement.

*Material appearing on this page was previously located on Page 66.*

## SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

## 3.7 Dedicated Access Services Charges (Continued)

(N)

## 3.7.1 Application of Dedicated Access Services Charges When Connecting via Optional Hub POI or Alternate Access Tandem, (Cont'd.)

B. Dedicated Tandem Trunk Port MOU-E rates will be derived from the Company tariffed rate per DS1 port; Dedicated Multiplexing MOU-E rates will be derived from the Company tariffed rate per multiplexing arrangement (DS3/DS1 or equivalent); and Entrance Facility and Direct-Trunked Transport MOU-E rates will be derived from the Company tariffed rate per DS3.

## C. Rate Application Example

MOU-E rates applicable to access minutes originating from, or terminating to, an End User in Miami, FL, that traverse a Company Access Tandem by way of a Hub POI or Alternate Access Tandem (SIP or TDM):

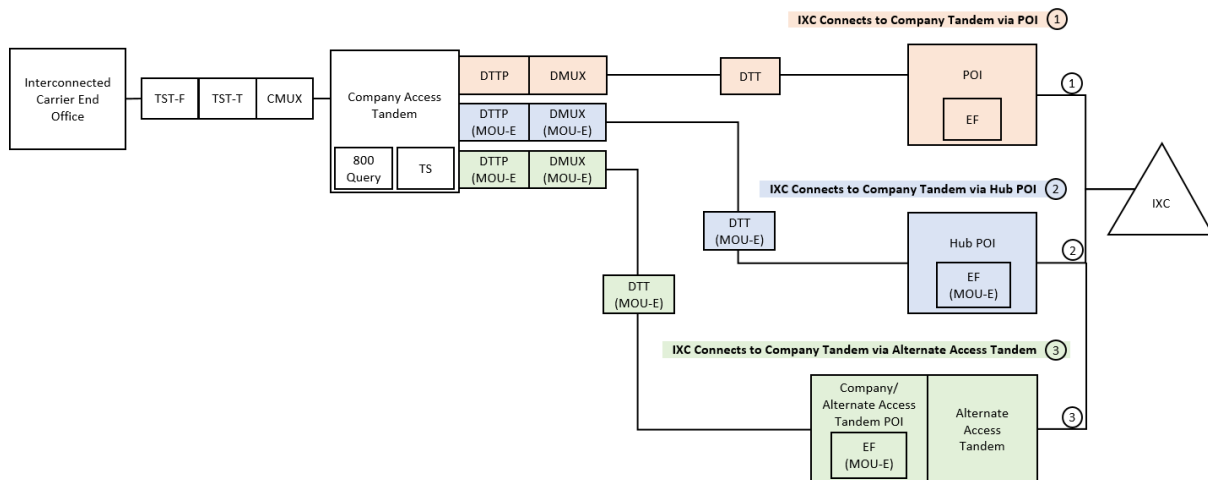

EF (MOU-E)	per DS3 Entrance Facility (3.8.1(A)) divided by 28 (DS1s per DS3) divided by 216,000 (MOU per DS1 per month conversion)
DTT-fixed (MOU-E)	per DS3 DTT-fixed (3.8.1(B)) divided by 28 (DS1s per DS3) divided by 216,000 (MOU per DS1 per month conversion)
DTT-per mile (MOU-E)	per DS3 DTT-per mile (3.8.1(C)) divided by 28 (DS1s per DS3) divided by 216,000 (MOU per DS1 per month conversion) multiplied by applicable mileage
DMUX (MOU-E)	per multiplexing arrangement (3.8.1(D)) divided by 28 (DS1s per DS3) divided by 216,000 (MOU per DS1 per month conversion)
DTTP (MOU-E)	per DS1 DTTP (3.8.1(F)) divided by 216,000 (MOU per DS1 per month conversion)

(N)
