## ACCESS SERVICE

### 6. Switched Access Service (Cont'd)

#### 6.2 Switched Access Service Arrangements (Cont'd)

##### 6.2.10 Toll Free\* Data Base Access Service

###### (A) Description

- (1) Toll Free Data Base Access Service provides for the forwarding of end user dialed Toll Free-NXX-XXXX calls to a customer via a Telephone Company designated switch capable of performing a customer identification function. The Toll Free Data Base Access Service customer identification function utilizes Toll Free Data Base Query Service, as described in 6.2.10(D), to screen all ten digits of all Toll Free-NXX-XXXX type calls generated by end users to determine the customer to which Toll Free call is routed by the Telephone Company.

The Toll Free Data Base Access Service customer identification function will be available at suitably equipped end offices or Telephone Company access tandems. Once customer identification has been established, the call will be routed to the customer. Toll Free Data Base Access Service may be provided via Toll Free Data Base Access Service switched trunk groups or in conjunction with a customer's FGD Switched Access Service. Toll Free Data Base Access Service may also be provided in conjunction with BSA-D as shown in 6.2.7 and 6.2.8.

- (2) Toll Free Data Base Access Service is an originating trunk side switched service that is available to the customer via Toll Free Data Base Access Service trunk(s) at Telephone Company designated switches capable of performing the Toll Free Data Base Access Service customer identification function. If the customer's Toll Free Data Base Access traffic originates from an end office switch not equipped to perform the Toll Free Data Base Access Service customer identification function, the call will be routed to the nearest office at which the function is available. Once customer identification has been established, the call will be routed to the customer.

Unless prohibited by technical limitations, the customer's Toll Free Data Base Access Service traffic may, at the option of the customer, be combined in the same trunk group arrangement with the customer's FGD or BSA-D Access Service traffic. When required by technical limitations a separate trunk group must be established for Toll Free Data Base Access Service.

\* "Toll Free" is considered to mean any access service which utilizes any of the following NPAs: 800, 888, 877, 866, 855, 844, 833, 822, or other NPAs as they become available to the industry.

(T)

Effective: July 1, 2021

## ACCESS SERVICE

- 6. Switched Access Service (Cont'd)
- 6.5 Rate Categories, Applications, and Regulations (Cont'd)
- 6.5.2 Local Transport
- (D) Tandem-Switched Transport

The Tandem-Switched Transport Rate is assessed upon customers for the use of transport between a serving wire center and an end office that is switched at a Telephone Company access tandem. The Tandem-Switched Transport Rate may also be assessed for transport between a Telephone Company access tandem and end office, between a host end office and a remote end office and between a FGA or BSA-A dialtone office and other end offices in the local calling area. Tandem-Switched transport consists of circuits used in common by multiple customers from the Telephone Company access tandem to an end office. The Tandem-Switched Transport Rate includes four sub-elements, a Tandem-Switched Transport - Facility, a Tandem-Switched Transport - Termination, Tandem Switching Rate, and Shared Multiplexing Rate. For Toll Free originating access minutes, the Tandem Switching rate provides for tandem transport, tandem transmission, and tandem switching. No other Tandem Switched Transport usage charges will be assessed for Toll Free originating access minutes. For Other Than Toll Free originating access minutes, the Tandem-Switching Rate provides for tandem switching facilities. The Tandem Switching Rate is not applicable for transport between a host end office and a remote end office or to FGA or BSA-A Transport.

(C)(x)  
|  
(C)(x)

- (1) The Tandem-Switched Transport - Facility rate is applied per access minute per airline mile for each Switched Access Feature Group and Basic Serving Arrangement type. Tandem-Switched Transport-Facility airline mileage will be determined as follows:

Where Direct-Trunked Transport is ordered between a serving wire center and a Telephone Company access tandem, and Tandem-Switched Transport is ordered to subtending end offices, mileage will be measured from the Telephone Company access tandem to the end office or WSO (for WATS and WATS-type).

When the end office is acting as a host office, a separate mileage calculation determines the mileage from the host office to the remote office. Traffic originating from and/or terminating to the remote will be billed Tandem-Switched Transport charges. The Tandem Switching charge does not apply to traffic between a host and remote office.

(x) Issued in compliance with the Order of the Federal Communications Commission in WC Docket No. 18-156, *In the Matter of 8YY Access Charge Reform*, FCC 20-143, released October 9, 2020.

Effective: July 1, 2021

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.3 End Office (Cont'd)

(B) Information Surcharge

Information Surcharge rates are assessed to a customer based on the total number of access minutes. Information Surcharge rates are set forth in 6.6 following. The application of these rates with respect to individual Switched Access Arrangements is set forth in 6.5.6.

(C) Toll Free Data Base Query Service

Query usage charges for Toll Free Data Base Query Service shown in 6.2.5(D) apply as follows:

- (1) A Basic Toll Free Data Base Query charge will apply for each basic Toll Free call query completed at the Telephone Company's Toll Free data base. Per query charges are accumulated over a monthly period and billed to the customer on a monthly basis.
- (2) A Premium Toll Free Data Base Query charge will apply for each premium Toll Free call query completed at the Telephone Company's Toll Free data base. The Premium Toll Free Data Base Query charge is in addition to the Basic (T) Toll Free Data Base Query charge. Per query charges are accumulated over a monthly period and billed to the (T) customer on a monthly basis.
