6. Switched Access Service (Cont'd)6.2 Switched Access Service Rate Categories (Cont'd)6.2.1 Switched Transport (Cont'd)Tandem-Switched Transport

Tandem-Switched Transport provides the transmission facility between the Telephone Company access tandem and an end office when the traffic is switched at a Telephone Company access tandem. Tandem-Switched Transport facilities include circuits provided for the common use of all customers who have ordered Tandem-Switched Transport. For examples of Tandem-Switched Transport see Section 2.9.2 preceding.

Tandem Switched Transport consists of three charges, the Tandem-Switching charge, the Tandem Transmission charge, and the Common Transport Mux charge. The Tandem-Switching charge provides for use of the Telephone Company access tandem and is assessed on a per minute of use basis. The Tandem-Switching charge also applies for Feature Group A terminating Switched Transport when Tandem Transmission applies. The Tandem Transmission charge provides for the transport facilities from the Telephone Company access tandem to an end office and is made up of two elements; Tandem Transport Termination and Tandem Transport Facility. The Tandem Transport Termination element includes the non-distance sensitive portion of Tandem-Switched Transport, and is assessed on a per minute of use basis. The Tandem Transport Facility element includes the distance sensitive portion of Tandem-Switched Transport and is assessed on a per mile, per access minutes of use basis. The Common Transport Mux provides for multiplexing of common transport at the End Office and Access Tandem. It is a per minute of use charge that applies to all Telephone Company tandem routed access minutes of use.

Pursuant to FCC 20-143, released October 9, 2020, tandem switching and transport for originating 800 traffic will be charged via a single usage sensitive Joint Tandem Switched Transport Access Service rate applied per access minute.

(N)  
|  
(N)

Tandem-Switched Transport does not apply when the minutes of use are routed to an alternate Tandem Switch Provider.
