TRANSMITTAL NO. 6

VII. SWITCHED ACCESS SERVICE

(4) The Shared Multiplexing rate is usage sensitive and assessed at the access tandem and end office on all minutes of use from the Telephone Company access tandem to an end office. The Shared Multiplexing rate recovers multiplexing costs on the end office side of the tandem and at the end office.	
(5) Effective July 1, 2021, pursuant to FCC 20-143, released October 9, 2020, existing tandem switching and transport charges for 8YY traffic will be eliminated and a single usage sensitive Joint Tandem Switched Transport access service rate will be established and applied per access minute.	(N) (N)
d. Transitional Interconnection Charge (TIC) The Transitional Interconnection Charge is assessed upon all customers for interconnecting with the Telephone Company's switched access network.	
The Transitional Interconnection Charge is usage-sensitive and is applied per access minute to all feature groups that utilize the Telephone Company's switched access network. It applies to all originating and terminating minutes of use whether transported via Direct Trunked Transport, Tandem-Switched Transport Entrance Facilities, or switched access EIS cross connect arrangements. The Transitional Interconnection Charge has two (2) rate levels. One rate applies to customers utilizing Telephone Company Transport and a different rate that is applicable to switched access EIS cross connect arrangements.	
e. Multiplexing Multiplexing provides for arrangements to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Multiplexing is only available at a Telephone Company designated Hub Wire Center arranged for multiplexing.	
All types of multiplexing may not be available at each Hub Wire Center. Refer to Section VIII.A.3. for a description of a Hub Wire Center.	
f. Interface Groups Interface Groups are provided for terminating the Entrance Facility at the customer's designated premises. Each Interface Group provides a specified premises interface (e.g., two-wire, four-wire, DS1, etc.). Where transmission facilities permit, the individual transmission path between the customer's designated premises and the first point of switching may, at the option of the customer, be provided with optional features as set forth in <i>b.</i> following. The interface groups described in Section XII. and the optional features described in <i>b.</i> following are nonchargeable features. No additional charges other than the rate for Local Transport described in Section XXI. apply.	

TRANSMITTAL NO. 6

XXI. RATES AND CHARGES

Rates and charges for Access Service set forth below apply to all of the Issuing Carriers shown in Section I., Sheet 2. These carriers are arranged into rate groups as set forth in Section I., Sheet 2.

A. Rate Group #1

For a list of Carriers included in Rate Group 1, refer to Section I., Sheet 2.

1. *Carrier Common Line*

Regulations concerning Carrier Common Line Access Service are set forth in Section IV. preceding.

Premium Access

Originating 8YY, per Access Minute \$0.00000000 (T)

Originating Non-8YY, per Access Minute \$0.00000000 (T)

Terminating, per Access Minute \$0.00000000

Non Premium Access

Originating 8YY, per Access Minute \$0.00000000 (T)

Originating Non-8YY, per Access Minute \$0.00000000 (T)

Terminating, per Access Minute \$0.00000000
