## V. SWITCHED ACCESS

<p>For Tandem Switched Transport, a Shared Multiplexing Rate will be assessed on all access minutes that traverse a common trunk group from the Telephone Company Access Tandem to an end office, except when the access minutes originate or terminate at the end office part of Class 4/5 switch.</p> <p>Effective July 1, 2021, pursuant to FCC 20-143, released October 9, 2020, existing tandem switching and transport charges for 8YY traffic will be eliminated and a single usage sensitive Joint Tandem Switched Transport access service rate will be established and applied per access minute.</p>	(N )
(c) For FGA or BSA-A, the entrance Facility charge shall apply between the CDL and the serving wire center of the CDL. If the serving wire center is not the dial tone office. Direct-Trunked Transport shall apply between the serving wire center and the dial tone office. Tandem Switched Transport (Facility and Termination) rate, excluding the Tandem Switching charge and the Shared Multiplexing charge, shall apply between the dial tone office and the end office for FGA or BSA-A traffic that originates and .or terminates within the FGA or BSA-A Access Area. For FGA or BSA-A traffic that terminates beyond the FGA or BSA-A Access Area, Switched Transport Rates apply as described in <i>V.E.2.h.(3)</i> .	
(d) The Direct-Trunked Transport rate is applied on a monthly airline mile and termination basis, except that Direct-Trunked Voiceband Transport is applied on a monthly airline mile basis only.	
To determine the Direct-Trunked Transport airline mileage, the distance will be measured from the wire center that normally serves the CDL to the access tandem, end office, WSO (for WATS and WATS-type), or the end office that serves as the host for a remote office. The V&H coordinate method is used to determine the actual mileage as set forth in NECA Tariff FCC No. 4. If the calculated miles include a fraction, the value is rounded up to the next full mile.	
For traffic originating from or terminating to a remote office, the mileage will be calculated separately from the end office switch that serves as the host to the remote using the V&H coordinates method. The Direct-Trunked Transport Rate applies from the customer's serving wire center to the end office that serves as the host office. Traffic originating from and/or terminating to the remote will be billed Tandem-Switched Transport charges based on mileage between the host and remote office. The Tandem-Switched Transport - Termination Charge is applicable for each termination between the host and remote office. The Tandem Switching Charge is not applicable for Tandem-Switched Transport between the end office that serves as the host to the remote office.	
When Telephone Company Hubs are involved, mileage is computed and rates applied separately for each section of the Direct-Trunked Transport, i.e., customer serving wire center to Hub, Hub to Hub, Hub to Tandem or Hub to end office.

## VII. MISCELLANEOUS SERVICES

<p><b>2. Application of FUSF Surcharge to Other Charges</b></p> <p>Customers assessed Presubscribed Interexchange Carrier Charges, ISDN Line Port Charges, Charge for Changing Primary Interexchange Carrier, charges for interstate Special Access Service, and any interstate charges not listed above which give rise to the Telephone Company's obligation to contribute to the Universal Support Mechanisms will be assessed the FUSF Surcharge on such charges as set forth following. Customers who participate in the Lifeline Assistance Program are not exempt from this Surcharge on services other than the Subscriber Line Charge. The FUSF Surcharge will be determined by multiplying the FUSF Surcharge Factor by the applicable charges.</p>	
<p><b>3. FUSF Surcharge</b></p> <p>Surcharge applied to interstate charges                      31.8%</p>	(R)
<p><b>S. <u>Incidental InterLATA Call Management Signaling Service</u></b></p> <p><b>1. General</b></p> <p>Call Management Signaling Service ("Service" or "CMSS") provides a customer with terminating detail information and with the capability to provide instructions back to the Telephone Company regarding the forwarding or other disposition of calls terminating or attempting to terminate at the customer's end user's telephone number. The Telephone Company will deliver this service over a secure IP (Internet Protocol) network connection using standard XML-based formatted data.</p>	
<p>In every instance that a call attempts to terminate at a Telephone Company end office to a customer's end user's telephone line provisioned with the Service, The Telephone Company will provide the customer with signaling information describing the attempted call termination and terminating detail for the call (collectively "Terminating Detail"). All Terminating Detail will be provided to a Telephone Company interface server and then made available to customers through a secure IP network connection using an XML-based data format.</p>	
<p>In every instance that a customer is provided with Terminating Detail for a call, the customer will be required to respond with a valid response ("Response") within eighteen (18) seconds, as further described in the Technical Memorandum documentation referenced in the front of this tariff under Reference to Technical Publications (Technical Memorandum for Incidental InterLATA Call Management Signaling Service associated with the Telephone Company FCC Short Term Notice of Network Change dated March 2007). Valid Responses include an instruction for the Telephone Company to forward the call to a different domestic telephone number, to block the call or to permit the call to terminate to the customer's end user's line.</p>	
<p>In the event no Response is received within eighteen (18) seconds, the Telephone Company will proceed with terminating the call to the customer's end user's line. Responses to the Telephone Company from the customer are received through a secure IP network connection and in an XML-based data format.</p>
