ACCESS SERVICE

6. SWITCHED ACCESS SERVICE – Feature Group D Switched Service (cont'd)6.4 Toll Free Database Access Service (T)

Toll Free Database Access Service is provided with FGD switched access service. (T)
When a 1+ (e.g. 800, 888, or other toll free number) + NXX + XXXX call is originated (T)
by an end user, the Company will utilize the Signalling System 7 (SS7) network to (T)
query an Toll Free Database Access Service to perform the identification function. The (T)
call will then be routed to the identified customer over FGD switched access. The (T)
manner in which Toll Free Database Access Service is provided dependent on the (T)
availability of SS7 service at the end office from which the service is provided as
outlined below:

When Toll Free Database Access Service originates at an end office equipped (T)
with Service Switching Point (SSP) capability for querying centralized data
bases, all such service will be provisioned from that end office.

When Toll Free Database Access Service originates at an end office not (T)
equipped with SSP customer identification capability, the Toll Free Database (T)
Access Service call will be delivered to the access tandem on which the end
office is homed and which is equipped with the SSP feature to query centralized
data bases.

Query charges as set forth in the following are in addition to those charges applicable
for the FGC or FGD switched access service.

6.5 Rate Regulations

This section contains a brief description and the general regulations governing the rates
and charges that apply for Switched Access Service.

6.5.1 Description and Application of Rates

Switched Access Service rates are generally of two types; usage rates and non-
recurring rates. Usage rates may be minute, and/or distance sensitive,
occurrence and/or quantity sensitive or combinations of these usage elements.
Non-recurring rates are one-time charges that apply for a specific work activity.
Examples would include installation of service, rearrangements of service,
moves and changes of service, provision of optional features and functions not
ordered initially, service date changes, service design changes, cancellation of
access, orders for additional engineering, and expedited orders.
