

ACCESS SERVICE

7. Special Access service7.1 General

Special Access Service with the exemption of the WATS Access Line and Customer Network Reconfiguration Service, provides a transmission path to connect customer designated premises*, either directly or through a Telephone Company Hub where bridging, multiplexing or Customer Network Reconfiguration Service functions are performed. The WATS Access Line, offered under Voice Grade Service, provides a transmission path connecting customer designated premises with a WATS serving office. Customer Network Reconfiguration Service, provides customers with the (C) ability to reconfigure their Special Access circuits. Special Access (C) Service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connecting are differentiated by bit rate.

7.1.1 There are seven types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specification,
- Bandwidth,
- Speed (i.e., bit rate,)
- Spectrum

Customer can order a basic channel and select from a list of available transmission parameters and channel interfaces those that they desire to meet specific communications requirements.

* Telephone Company Centrex CO-like switches, Telephone Company Answering Service Concentrators and packet switches included in Public Packet Switched Network (PPSN) Service are considered to be customer premises for purposes of administering regulations and rates contained in this tariff.

ACCESS SERVICE

7. Special Access service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel not to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic Service in this tariff, there is not restriction against doing so.

Following is a brief description of each type of channel:

Metallic - a channel for the transmission of low speed varying signals at rates up to 30 baud.

Telegraph Grade - a channel for the transmission of binary signals at rates of 0 to 75 baud or 0 to 150 baud.

Voice Grade - a channel for the transmission of analog signals within an approximate bandwidth of 300 to 3000 Hz. This may also include channels for use for 800 Service, WATS, or similar services.

Program Audio - a channel for the transmission of audio signals. The nominal frequency bandwidths are from 50 to 15000 Hz, from 200 to 3500 Hz, from 100 to 5000 Hz or from 50 to 8000 Hz.

Video - a channel for the transmission of standard 525 line 60 field monochrome or National Television Systems Committee color video signal and one or two associated 5 or 15 kHz audio signals. The bandwidth is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 MHz.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

Digital Data - a channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56 or 64 kbps.

High Capacity - a channel for the transmission of isochronous serial digital data at rates of 1.544, 3.152, Mbps.

(D)

Detailed descriptions of each of the channel types are provided in 7.2 following.

The customer also has the option of ordering Voice Grade and digital high capacity facilities (i.e., 1.544 Mbps, 3.152 Mbps, to a Telephone Company hub for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements. Descriptions of the optional features and functions available are also set forth in 7.2 following.

Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

For example, a customer may order a 3.152 Mbps facility from a customer designated premises to a Telephone Company hub for multiplexing to two 1.544 Mbps channels. The 1.544 Mbps channels may be further multiplexed at the same or a different hub to Voice Grade or Digital Data (i.e., 2.4, 4.8, 9.6, 19.2, 56 or 64 kbps) channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Voice Grade channels. (C)

7.1.2 Rate Categories

There are three basic rate categories which apply to Special Access Service:

- Channel Terminations (described in 7.1.2(A) following)
- Channel Mileage (described in 7.1.2(B) following)
- Optional Features and Functions (described in 7.1.2(C) following)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General7.1.2 Rate Categories (Cont'd)(A) Channel Termination

The Channel Termination rate category provides for the communications path between a Customer-designated premises and the Serving Wire Center of that premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability itself is provided as an optional feature as set forth in (C) following. One Channel Termination charge applies per is terminated. This charge will apply even if the Customer-designated premises and the Serving Wire Center are located in the same Telephone Company building.

- (1) The Channel Termination rate will apply for all Telephone Company Access connections except High Capacity Expanded Interconnection and Collocation Services (Section 17). A Channel Termination rate will apply even when the customer-designated premises and the Serving Wire Center are located in the same Telephone Company building, unless the customer establishes a High Capacity Expanded Interconnection and Collocation arrangement (Section 17), in which case the Electronic Cross-Connect Charge (ECC) rate will apply as specified in Section 17.10.2 or the Virtual Electronic Cross Connect (VECC) specified in Section 17.11.2 at the rates set forth in Section 17.11.13. ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General7.1.2 Rate Categories (Cont'd)(A) Channel Termination

- (2) An Electronic Cross-Connect Charge (ECC) or Virtual Electronic Cross-Connect Charge (VECC) will apply in lieu of the Channel Termination rate for High Capacity Services utilizing an Expanded Interconnection and Collocation arrangement as specified in Section 17. Under Physical Collocation arrangements, this charge provides for the communications path between the collocated Interconnector-provided Facilities, and the Telephone Company Serving Wire Center. Under Virtual Collocation/Interconnection arrangements, this rate provides for the communications path between the Interconnector facilities, and the Telephone Company services set forth in Section 17.11.3. The rates for the ECC are set forth in Section 17.10.2 and the rates for the VECC in Section 17.11.3. (C)

ACCESS SERVICE

7. Special Access Service (Cont'd) (M)
- 7.1 General |
- 7.1.2 Rate Categories (Cont'd) (M)
- (B) Channel Mileage (T)
- The Channel Mileage rate category provides for the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center associated with a customer designed premises and a Telephone Company hubs. There are two rates that apply for each band, i.e., a flat rate per band and a rate per mile. (M)
- (C) Optional Features and Functions (T)
- The Optional Features and Functions rate category provides for optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, they will be charges for as a single rate element. (M)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories (Cont'd)(C) Optional Features and Functions (Cont'd)

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements

A hub is a Telephone Company designated serving wire center at which bridging, multiplexing or Customer Network Reconfiguration Service functions are performed. The bridging functions performed are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth. The Customer Network Reconfiguration Service functions allow customers to reconfigure their Special Access Services. National Exchange Carrier Association, Inc. Tariff FCC No. 4 identifies serving wire centers, hub locations and the type of bridging, multiplexing or Customer Network Reconfiguration Service functions available. (C)

Descriptions for each of the available Optional Features and Functions are set forth in 7.2 following.

7.1.3 Service Configurations

There are two types of service configurations over which Special Access Services are provided: two-point service and multipoint service.

(A) Two-Point Service

A two-point service connects two customer designated premises, or a customer designated premises and a serving office for Voice Grade WATS Access Line Service, either on a directly connected basis or through a hub where multiplexing functions are performed. In addition, a two point service may connect a customer designated premises and a Customer Network Reconfiguration Service hub.

ACCESS SERVICE

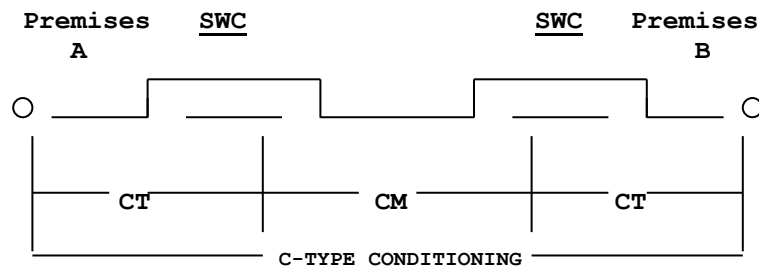

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.3 Service Configurations (Cont'd)(A) Two Point Service (Cont'd)

Applicable rate elements are:

- Channel Terminations*
- Channel Mileage (as applicable)
- Optional Features and Functions (when applicable)

In addition, a Special Access Surcharge, as set forth in 7.4.2 following, may be applicable.

- (1) The following diagram depicts a two-point Voice Grade service connecting two customer designated premises located 15 miles apart. The service is provided with C-Type conditioning.

CT - Channel Termination
CM - Channel Mileage
SWC - Servicing Wire Center

Applicable rate elements are:

- Channel Terminations (2 applicable)*
- Channel Mileage (mileage band over 8 to 25 miles)
- C-Type Conditioning Optional Feature

Only one Channel Termination will apply for Voice Grade WATS Access Line Service, (see diagram on Page 109.6.1).

(This page filed under Transmittal No. 634)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(B) Multipoint Service (Cont'd)

Multipoint service connects three or more customer designated premises through a Telephone Company hub. Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.2 following.

The channel between hubs (i.e., bridging locations) on a multipoint service is a mid-link. There is no limitation on the number of mid-links available with a multipoint service. However, when more than three mid-links in tandem are provided the quality of the overall service may be degraded.

Multipoint service utilizing a customized technical specifications package, as set forth in 7.2 following, will be provided when technically possible. If the Telephone Company determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

When ordering, the customer will specify the desired bridging hub(s). National Exchange Carrier Association Tariff FCC (T) No. 4 identifies serving wire centers, hub locations and the type of bridging functions available.

Applicable Rate Elements are:

- Channel Terminations (one per customer designated premises)
- Channel Mileage (as applicable between each designated customer premises and the hub and between hubs).
- Bridging
- Additional Optional Features and Functions (when applicable).

In addition, the Special Access Surcharge, as set forth in 7.4.2 following, may be applicable.

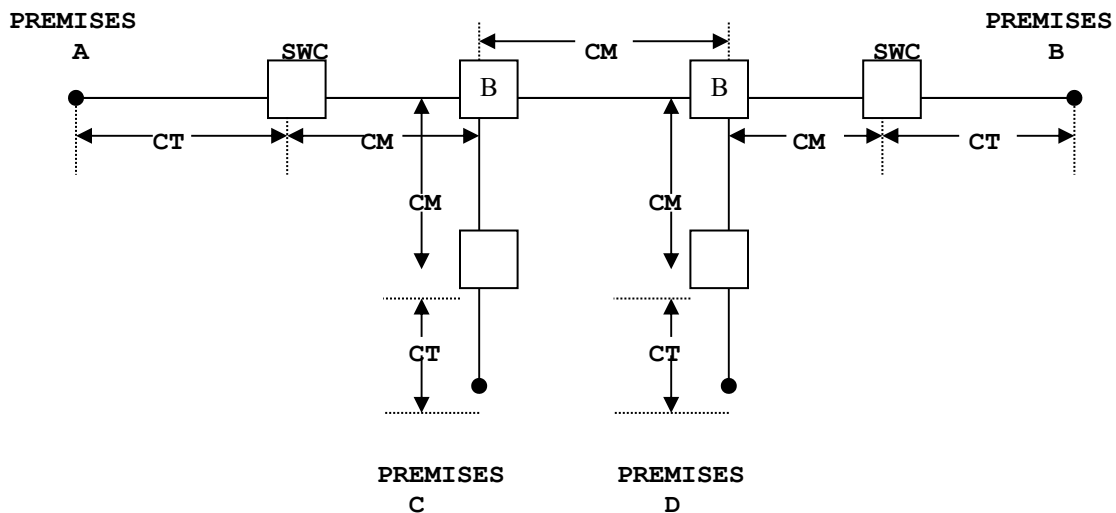

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(C) Customer Network Reconfiguration Service (CNRS)

CNRS provides customer management capability of Voice Grade Service Channels, 9.6, 19.2, 56 and 64 Kbps Digital Data Service Channels and DS1 High Capacity Service Channels as specified in 7.2.10 following. CNRS is provided from CNRS hubs which are identified in the National Exchange Carrier Association, Inc. Tariff FCC No. 4. DS1 High Capacity Service facilities between CNRS hubs are referred to as CNRS mid links. Digital Data and Voice Grade Service Channels are not available for use as CNRS mid links. (C)

Applicable rate elements with monthly rates are:

- DSO and DS1 Port Charges
- Channel Termination Charges (One per customer designated premises)
- Channel Mileage Charges (as applicable between each designated customer premises and a CNRS hub and between CNRS hubs).

- Channel Termination (four DS1 and Two 56 kbps DDS are applicable)
- Channel Mileage (one section of DS1 and one section of 56 kbps DDS are applicable)
- CNRS Port Charges (four DS1 and two DSO are applicable)

ACCESS SERVICE

7. Special Access Service (Cont'd)

(M)

7.1 General (Cont'd)7.1.4 Alternate Use

Alternate Use occurs when a service is arranged by the Telephone Company so that the customer can select different types of transmission at different times. A customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12., Specialized Service or Arrangements. The customer will pay the stated tariff rates for the Access Service rate elements for the service ordered (i.e., Channel Terminations, Channel Mileage [as applicable] and Optional Features and Functions [if any]).

7.1.5 Special Facilities Routing

A customer may request that the facilities used to provide Special Access Service be specially routed. The regulations, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in 11. following.

7.1.6 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this tariff as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

7.1.7 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test at the time of installation, the following parameters:

(M)

Certain regulations on this page formerly appeared in ECA Tariff F.C.C. NO. 1 on 3rd Revised Page 270.

Issued: July 2, 1985

Effective: October 1, 1985

Vice President
201 East Fourth Street
Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.7 Acceptance Testing (Cont'd)

- (A) For Voice Grade analog services, except WATS Access Line, acceptance tests will include tests for loss, 3-tone slope, DC continuity, operational signaling, C-notched noise, and C-message noise when these parameters are applicable and specified in the order for service. Additionally, for Voice Grade services, a balance (improved loss) test will be made if the customer has ordered the improved loss optional feature.
- (B) For other analog services (i.e., Metallic, Telegraph, Program Audio, Video, and Voice Grade WATS Access Line) and for digital services (i.e., Digital Data and High Capacity), acceptance tests will include tests for the parameters applicable to the service as specified in the appropriate Technical Reference document listed in 7.2 following.

In addition to the above tests, Additional Cooperative Acceptance Testing Voice Grade service to test other parameters, as described in 13.3.5(B) following, is available at the customer's request. All test results will be made available to the customer upon request.

7.1.8 Ordering Options and Conditions

Special Access Service may be provisioned to the customer an Access Order. Details of the ordering process are set forth in Section 5, preceding. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.).

(C)
|
|
|
|
(C)

(This page filed under Transmittal No. 634)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions

For the purpose of ordering, there are seven categories of Special Access Service. These are: (C)

Metallic (MT)
Telegraph Grade (TG)
Voice (VG)
Program Audio (AP)
Video (TV)

(D)
(D)

Digital Data (DA)
High Capacity (RC)

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service is described in this section.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

The channel description specified the characteristics of the basic channel and indicates whether the channel is provided between customer designated premises or between a customer designated premises and a Telephone Company hub where bridging or multiplexing functions are performed.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)

Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. This information is displayed in a matrix with the transmission parameters listed down the left side and the packages listed across the top. Each package is identified by a code, e.g., VGC. The first two letters of the code indicate the category of Special Access Service to which the parameters are applicable. These two letter codes are shown above in parentheses following the category of Special Access Service. The letter "C" following the two letter code indicates the technical specifications package for a customized service. An alpha, numeric or alpha-numeric designation following the two letter code indicates the specific predefined package. For a customized service, the customer may select any parameters available with that category of service as long as the parameters are compatible. When appropriate, the Technical Reference which contains detailed specifications for the parameters is shown following the matrix. (C)

Channel interfaces at each Point of Termination on a two-point service may be symmetrical or asymmetrical. On a multipoint service they may also be symmetrical or asymmetrical, but communications can only be provided between compatible channel interfaces. Only certain channel interfaces are compatible. These are set forth in the appropriate Technical References. (C)

Only certain channel interfaces combinations are available with the predefined technical specifications packages. These are delineated in the Technical References set forth in the service descriptions for each service offering. When a customized channel is requested, all channel interface combinations available with the specified type of service are available with the customized channel. (C)

The optional features and functions available with each type of Special Access Service are described in this section. The optional features and functions information also indicates with which technical specifications packages they are available. Such information is displayed in a matrix with the optional feature or function listed down the left side and the technical specifications packaged listed across the top.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)

The Telephone Company will maintain existing transmission specifications on services installed prior to the effective date of this tariff, except that existing services with performance specifications exceeding the standards listed in this provision will be maintained at the performance levels specified in this tariff.

All services installed after the effective date of this tariff will conform to the transmission specification standards contained in this tariff or in the following Technical References for each category of service:

Metallic	TR-NPL-000336
Telegraph Grade	TR-NPL-000336
Voice Grade	TR-NPL 000335

7.2.3 Voice Grade Service(A) Basic Channel Description

A Voice Grade channel is a channel which provides voice frequency transmission capability in the nominal frequency range of 300 to 3000 Hz and may be terminated two-wire or four-wire. Voice Grade channels are provided between customer designated premises, between a customer designated premises and a Telephone Company hub or as a WATS Access Line (WAL) between a customer designated premises and a WATS Serving Office (WSO).

WAL Service is associated with the closed end of 800 Service, WATS or similar services. It is provided for use with Switched Access Service as set forth in Section 6 preceding.

WAL Service is arranged for either originating calling, terminating calling, or two way calling. It is provided with either rotary dial or dual tone multifrequency address signaling and either loop start, ground start, E&M or reverse battery supervisory signaling. The choice of signaling is at the option of the customer and subject to the technical limitations identified in the Technical Reference TR-NPL-000334.

* Not available in the Bethel and Fairfield Wire Centers.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(B) Technical Specifications Packages (Cont'd)

The technical specifications for these parameters (except for dropouts, gain hits, and phase hits) are delineated in Technical References TR-NPL-000334 and TR-NPL-000335. The technical specifications for dropouts, phase hits, and gain hits are determined in Technical Reference PUB 41004, Table 4.

(C) Channel Interfaces

The following channel interfaces for Voice Grade service do not require signaling capability: DA, DB, DD, DE, DS, NO, PR and TF. (D)

The following channel interfaces for Voice Grade service require signaling capability: AB, AC, CT, DX, DY, EA, EB, EC, EX, GO, GS, LA, LB, LC, LO, LR, LS, RV and SF.

The following interfaces are available with WAL Service: LO, LS, DS, GO, GS, EB.

Compatible Voice Grade channel interfaces and available WAL channel interfaces are set forth in Technical References TR-NPL-000334 and TR-NPL-000335. (T)
|
(T)

(D) Optional Features and Functions(1) Central Office Bridging Capability

- (a) Voice and WAL Bridging (two-wire and four-wire)
- (b) Data Bridging (two-wire and four-wire)
- (c) Telephoto Bridging (two-wire and four-wire)
- (d) DATAPHONE Select-A-Station Bridging with sequential arrangement ports or addressable arrangement ports

Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(D) Optional Features and Functions (Cont'd)(4) Improved Termination (T)

On effective Four-Wire Transmission at Four-Wire Point of Termination (applicable to each two-wire port): Provides for a fixed 600 ohm impedance, variable level range and simplex reversal. Telephone Company equipment is required at the customer's premises where this option is ordered. The Improved Termination parameters are delineated in Technical Reference TR-NPL-000335. (T)

(5) Improved Return Loss (T)

On Effective Two-Wire Transmission at Two-Wire Point of Termination: Provides for more stringent Echo Control specifications. In order for this option to be applicable, the transmission path must be four-wire at one POT and two-wire at the other POT. Placement of Telephone Company equipment may be required at the customer's premises with the two-wire POT. The Improved Return Loss parameters are delineated in Technical References TR-NPL-000334 and TR-NPL-000335. (T)

(6) Data Capability (T)

Data Capability provides transmission characteristics suitable for data communications. Specifically, Data Capability provides for the control of Signal to C-Notched Noise Ratio and intermodulation distortion. It is available for two-point services or multipoint services.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(D) Optional Features and Functions (Cont'd)(6) Data Capability (Cont'd)

(T)

The Signal to C-Notched Noise Ratio and inter-modulation distortion parameters for Data Capability are:

- Signal to C-Notched Noise Ratio is equal to or greater than 32dB
- Intermodulation distortion:
- Signal to second order modulation products (R2) is equal to or greater than 38dB.
- Signal to third order modulation products (R3) is equal to or greater than 42dB.

When a service equipped with Data Capability is used for voice communications, the quality of the voice transmission may not be satisfactory.

(7) Telephoto Capability

(T)

Telephoto Capability provides transmission characteristics suitable for telephotographic communications. Specifically, Telephoto Capability is provided for the control of attenuation distortion and envelope delay distortion on telephotographic services. The attenuation distortion and envelope delay distortion parameters for Telephoto Capability are:

Attenuation Distortion
(2204Hz Reference)

<u>Frequency</u> <u>Range (Hz)</u>	<u>Variation</u> <u>(dB)</u>
500-3000	-0.5 to +1.5
300-3200	-1.0 to +2.5

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(D) Optional Features and Functions (Cont'd)(7) Telephoto Capability (Cont'd) (T)Envelope Delay Distortion

<u>Frequency Range (Hz)</u>	<u>Variation (mcs)</u>
1000-2600	110
800-2800	180

(8) Signaling Capability (T)

Signaling Capability provides for the process by which one customer premises alerts another customer premises on the same service with which it wishes to communicate.

(9) Selective Signaling Arrangement (T)

An arrangement that permits code selective ringing for up to ten codes on a multipoint service.

(10) Transfer Arrangement (T)

An arrangement that affords customers an additional measure of flexibility in the use of their access channel(s). The arrangement can be utilized to transfer a leg of a Special Access Service to another channel that terminates in either the same or a different customer premises. A key activated control service is required to operate the transfer arrangement. A spare channel, if required, is not included as part of the option.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(E) Four-Wire/Two-Wire Conversions

When a customer requests that an effective four-wire channel be terminated with a two-wire channel interface at the customer designated premises, a four-wire to two-wire conversion is required. The rate for the conversion is included as part of the basic Channel Termination rate.

(F) WAL Improved Two-Wire Voice Transmission

(C)

Two-wire Voice Grade Special Access Service for use as a WATS Access Line (WAL) may be ordered as standard or improved. Transmission specifications are set forth in Technical Reference TR-NPL-000334. The rate for the provision of Improved Two-Wire Voice Transmission is included as part of the basic Channel Termination rate.

(C)

(G) Certain other options associated with WAL services are either Line Termination or Common Switching optional features as defined in Section 6 preceding.

7.2 Service Descriptions (Cont'd)7.2.5 Video Service(A) Basic Channel Description

A Video channel is a channel with one-way transmission capability for a standard 525 line/60 field monochrome, or National Television Systems Committee color, video signal and one or two associated 5 or 15 kHz audio signal(s). The bandwidth for a video channel is either 30 Hz to 4.5 MHz, or 30 Hz to 6.6 MHz. The associated audio signal(s) may be either diplexed or provided as one or two separate channels. The provision and the bandwidth of the associated audio signal(s) is a function of the channel interface selected by the customer. Video channels are provided between customer designated premises or between a customer designated premises and a Telephone Company hub.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 Digital Data Service*(A) Basic Channel Description

A Digital Data channel is a channel for duplex four-wire transmission of synchronous serial data at the rate of 2.4, 4.8, 9.6, 19.2, 56, or 64 kbps. The actual bit rate is a function of the channel interface selected by the customer. The channel provides a synchronous service with timing provided by the Telephone Company through the Telephone Company's facilities to the customer in the received bit stream. Digital Data channels are only available via Telephone Company designated hubs and are provided between customer designated premises or between a customer designated premises and a Telephone Company hub. The 64 kbps speed requires B8ZS Line Code Formatted Signal. The 9.6, 19.2, 56 and 64 kbps Digital Data channels are available for use with Customer Network Reconfiguration Service as described in 7.2.10 following.

The customer is responsible for providing the Channel Service Unit-type equipment or other Network Channel Terminating Equipment associated with the Digital Data channel at its premises. The interim program for interconnection of such equipment is set forth in Technical Reference PUB AS No. 1.

* Not available in the Bethel and Fairfield Wire Centers.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 Digital Data Service* (Cont'd)(D) Optional Features and Functions (Cont'd)(3) Secondary Channel Capability (Cont'd)

as a two-point or multipoint service where available, and must be coterminated in special customer provided equipment. Secondary Channel Capability (SCC) is a derived companion digital transmission path that is independent of the primary data path and operates at a substantially lower bit rate. This derived channel allows the customer to perform network management functions during the normal operation of the network. This diagnostic channel utilizes a portion of a customer's previously unavailable data bit stream allowing for the ability to remotely control and test the network and peripheral devices without taking the network out of service. Due to the transmission equipment restrictions, SCC cannot be provided on 56 Kbps circuits that require the installation of loop repeater equipment for provision of service. The addition of the secondary channel option to an existing Digital Data Service will be treated as a subsequent addition to the existing service and rated as such. SCC is provided as described in Technical Reference TR-NPL-000157.

The following table shows the technical specifications packages with which the optional features and functions are available.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(B) Technical Specifications Packages (Cont'd)

A channel with technical specifications package HC1 will be capable of an error-free second performance of 98.75% over a continuous 24 hour period as measured at the 1.544 Mbps rate through a CSU equivalent which is designed, manufactured, and maintained to conform with the specifications contained in Technical Reference TR TSY 000342

Extended superframe signalling format may be provisioned and transported on channels with technical specifications package HCI. Testing for such channels is as specified in 7.1.7(B) and any maintenance testing that is required to maintain the error free second performance specified herein. Additional testing requested by the customer is provided subject to the provisions set forth in 13.3.5 following.

(C) Channel Interfaces

The following channel interfaces (CIs) define the bit rates that are available for a High Capacity channel:

<u>CI</u>	<u>Bit Rate</u>
DS-15*	1.544 Mbps (DS1)

(D)

|

(D)

Compatible channel interfaces are set forth in Technical References TR-NPL-000054 and TR-TSY-000342.

(D) Optional Features and Functions

- (1) Alternate Central Office Channel - Provides a transmission path for services between the customer's premises and a wire center which is not the customer's serving wire

* A 64.0 kbps channel is available as a channel(s) of a 1.544 Mbps facility to a Telephone Company hub

- (1) center, thus avoiding the office which would normally serve the customer. It is available only where facilities exist using 1.544 and 45 Mbps high capacity service.

(2) Service To Service Through Connect Arrangement

This provides for the interconnection of two 1.544 Mbps channels extended from multiplexed DS3 high capacity services, or two DSO channels from multiplexed 1.544Mbps services. The ordering customer must provide channel assignments for both multiplexed services.

(3) Central Office Multiplexing

(a)

(D)

(D)

(b) DS3/ to DS1

(D)

An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(3) Central Office Multiplexing (Cont'd)(c) DS2 to DS1

An arrangement that converts a 6.312 Mbps channel to four DS1 channels using digital time division multiplexing.

(d) DS1C to DS1

An arrangement that converts a 3.152 Mbps channel to two DS1 channels using digital time division multiplexing.

(e) DS1 to Voice

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services. A channel(s) of this DS1 to the Hub can also be used for Program Audio, Metallic or WATS Access Line Service.

(f) DS1 to Digital Data

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with individual digital data circuits to the Hub at speeds of 2.4, 4.8, 9.6, 56, or 64 Kbps. A channel of this DS1 to the Hub can also be used for Voice Grade, Program Audio, Metallic or WATS Access Line Service.

(g) DS1 to DS0

An arrangement that converts a 1.544 Mbps channel to 23 64 kbps channels utilizing digital time division multiplexing. This arrangement can be provided with the Secondary Channel Capability feature of Digital Data Service.

Issued: January 28, 1991

Effective: March 14, 1991

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(3) Central Office Multiplexing (Cont'd)(h) DSO to Subrate

An arrangement that converts a 64.0 kbps channel to subspeeds of up to twenty 2.4 kbps, ten 4.8 kbps, or five 9.6 kbps channels using digital time division multiplexing. This arrangement can be provided with the Secondary Channel Capability feature of Digital Data Service.

(i)

(D)
|
(D)(4) Clear Channel Capability

Clear Channel Capability is an optional feature that provides the customer with an increase in useable bandwidth from 1.344 Mbps to 1.536 Mbps of an unconstrained data stream across the network. Clear Channel Capability is provided only on 1.544 Mbps High Capacity service and requires the customer signal at the channel interface to conform to Bipolar with Eight Zero Substitution (B8ZS) line code format as described in Technical Reference TR-TSY-000342. Customer equipment must be compatible with this method of providing the unconstrained signal.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)

The following table shows the technical specifications packages with which the optional features and functions are available.

	Available with Technical Specifications Package HC-					
	<u>0</u>	<u>1</u>	<u>1C</u>	<u>2</u>	<u>3</u>	<u>4</u>
Central Office Multiplexing:						
DS4 to DS1						X
DS3 to DS1					X	
DS2 to DS1				X		
DS1C to DS1			X			
DS1 to Voice		X				
DS1 to DS0		X				
DS0 to Subrate*	X					
Clear Channel Capability		X				

(5) Enhanced Access Diversity (EAD)

(M)

EAD is an optional feature in which Special Access High Capacity Service (MercNET 1.5 and MercNET 45) is provided on a transmission facility alternately routed from the primary (Standard) transmission facility path.

This feature utilizes existing physically diverse interoffice facilities, excluding equipment and facilities located in a wire center, to provide diversity between serving wire centers only.

(M)

* Available only on a channel of a 1.544 Mbps facility to a Telephone Company hub.

Regulations appearing on the page formerly appeared on Page 109.44.1

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.9 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(5) Enhanced Access Diversity (EAD) (Cont'd)

EAD may be provisioned on Telephone Company facilities where capability and capacity exist. Otherwise, the customer may order facilities under Special Construction.

When placing orders for EAD, the customer must identify the services that will be diverse, and any facilities placed under Special Construction that will be used. The customer must also supply all appropriate facility assignments and other information to permit the Telephone Company to provide and maintain EAD service.

When High Capacity MercNET 45 service is multiplexed, rates and charges for each EAD service connecting to the multiplexer will apply. Applicable rates and charges for the MercNET 45 service will also apply if identified as an EAD service. Customers leasing Telephone Company-provided multiplexers will provide and identify Connecting Facility Assignments of diverse services to the multiplexer.

(6) Customer Specified Signaling Level

This option adds additional equipment at the customer premises to enable the customer to regulate the specific db loss level down to zero db loss. This option is available as a month-to-month option as shown in Section 7.5.9.(C).6 or a non-recurring option as shown in Section 13.3.10.

(7) Digital Facility Cross-Connection

This option enables customers to cross-connect special access circuits within the same central office from the customer's termination to a Light Guide Cross-Connect (LGX) or Digital Signal Cross Connect (DSX) panel. The customer's facilities must be physically adjacent to the LGX or DSX panels in the central office.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.10 Customer Network Reconfiguration Service (CNRS)*

(M) (#)

(A) Basic Service Description

CNRS is an optional service for use with 1.544 Mbps (DS1) High Capacity Service, 9.6, 19.2, 56 and 64 kbps Digital Data Services and Voice Grade Service that enables a customer to monitor and reconfigure, in near real-time, their Special Access Service network without the intervention of the Telephone Company. The monitoring and reconfiguration functions are performed by a compatible customer-provided personal computer (PC) or other terminal device which is connected to a CNRS network controller, located in a Telephone Company CNRS hub. The PC or terminal device is connected to the CNRS network controller over an appropriate Special Access Service dedicated line or a local telephone line with a seven digit telephone number. The Telephone Company's CNRS hubs are designated in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

CNRS allows customers to perform network monitoring, circuit provisioning, bandwidth re-allocation, and circuit re-routing at the DSO level within the CNRS hub equipment. Also, circuit re-routing may be performed at the DS1 level. Upon request, the Telephone Company will perform CNRS changes for the customer, subject to the charges specified in 7.5.9 following. Services that are cross-connected by CNRS must have identical technical characteristics to ensure compatibility and proper operation, e.g., Data to Data, Voice to Voice. CNRS specifications are delineated in Technical Reference TR-TSY-000366.

CNRS provides the following functions:

Network Monitoring and Surveillance

With compatible CPE equipment and software, users can visually monitor the outgoing status of their network on their terminal.

(M) (#)

*CNRS is limited to existing subscribers of CNRS service as of May 15, 1997

(C)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.10 Customer Network Reconfiguration Service (CNRS) (Cont'd) (N)(A) Basic Service Description (Cont'd)Circuit Provisioning

Customers can activate or deactivate any of the circuits defined in the database down to the DS0 level.

Manual and Automatic Route Selection

Customers can select alternate routes on demand, or on a pre-scheduled basis.

Bandwidth Re-allocation

Customers can shift unused bandwidth capacity to locations where it can be better utilized (e.g., temporary support for a videoconference).

Partitioning

For example, customers may choose to permit only a portion of their network to be accessible by CNRS or by certain personnel for security purposes.

Command Profiles Feature

Customers can set up files with pre-set lists of commands.

Reports and Alarms

Customers can obtain management reports regarding their network configuration, status, and various alarm reports.

Security

CNRS provides extensive multi-level security to deny unauthorized users access to a customer's CNRS network.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

Competitive Counties and Non-Competitive Counties are defined in Section 2.6 and the wire centers within such counties are listed in Section 16. For wire centers within a Competitive County, monthly rates and nonrecurring charges for Special Access rate elements are arranged in zones. The zone for each serving wire center within a Competitive County is specified in Section 20 following. (N)

For Interexchange Carrier Point of Presence Special Access Lines, Special Transport and Optional Features and Functions, including Multiplexing Arrangements, zone rates and charges apply regardless of whether the county is Competitive or Non-Competitive. In cases where Special Transport crosses Zones, the charge for the higher numbered Zone applies.

For End User Special Access Lines, the application of Competitive rates or Non-competitive rates is dependent upon whether or not the serving wire center is located in a Competitive County. If the End User Special Access Line is in a Competitive County, Competitive rates and charges apply. If the End User Special Access Line is in a Non-Competitive County, Non-competitive rates and charges apply. (N)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. The rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

For Channel Terminations associated with MercNET 45 High Capacity Service there are higher monthly rates for the first channel termination and lower monthly rates for the second, third and above channel terminations provided when the following conditions are met:

- The first, second, and third and above service(s) are billed to the same customer premises.
- The first, second, and third and above service(s) must be provided to the same customer premises.
- Each subsequent order for a channel termination is eligible for the appropriate lower monthly rate.

For Channel Terminations associated with MercNET 45 High Capacity Service - 12 Pack Arrangement the following conditions must be met:

- The 12 pack arrangement must be billed to the same customer.
- The 12 pack arrangement must be provided to the same premises.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(B) Daily Rates

Daily rates are flat recurring rates that apply to each 24 hour period or fraction thereof that a Program Audio or Video Special Access Service is provided for part-time or occasional use. For purposes of applying daily rates, the 24 hour period is not limited to a calendar day.

The application of daily rates for Program Audio and Video service for consecutive 24 hour periods during a consecutive 30 day period is as follows. Daily rates will be topped at an amount equal to the monthly rate (i.e., the charge to the customer for usage billed at daily rates will not exceed the monthly rate). For each day or partial day that the service is available for use after the daily rates have been topped, a charge equal to 1/30th of the monthly rate will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Special Access Service are: installation of service, installation of optional features and functions, and service rearrangements.

(1) Installation of Service

Nonrecurring charges apply to each service installed. The nonrecurring charges for the installation of service are set forth in 7.5 following as a nonrecurring charge for the Channel Termination rate element.

(2) Installation of Optional Features and Functions

Nonrecurring charges apply for the installation of some of the optional features and functions available with Special Access Service. The charge applies whether the feature or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service.

The optional features for which nonrecurring charges apply are:

- Voice Grade Data Capability
- Voice Grade Telephoto Capability
- Program Audio Gain Conditioning
- Program Audio Stereo
- Service to Service through Connect Arrangement- (N)
1.544 Mbps (N)
- High Capacity Clear Channel Capability

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.5 (E) preceding or a change in the physical location of the point of the termination at a customer designated premises. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts.

Changes in the physical location of the point of the termination are treated as moves and are described and charged for as set forth in 7.4.5 following.

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service. Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the Access Service). Administrative changes are as follows:

- Change of customer name, (i.e., the customer of record does not change but rather the customer of record changes its name--e.g., AT&T-Long Lines to AT&T-Communications), (Z)
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number), (Z)
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

All other service rearrangements will be charged for as follows:

- If the change involves the addition of other customer designated premises to an existing multipoint service, the nonrecurring charge for the channel termination rate element will apply. The charge(s) will apply only for the location(s) that is being added.
- If the change involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- If the change involves changing the type of Signaling Capability on a Voice Grade service, a charge equal to the Voice Grade channel termination rate element nonrecurring charge will apply. The charge will apply per service termination affected. (T)
- For all other changes, including the addition of an optional feature or function without a separate nonrecurring charge, a charge equal to a channel termination rate element nonrecurring charge will apply. Only one such charge will apply per channel termination, for all changes of this type made at one time. (T)

7.4.2 Surcharge for Special Access Service(A) General

In addition to the rates and charges described in 7.4.1 preceding, there is a monthly surcharge that applies to Special Access Service. The Special Access Surcharge compensates the Telephone Company for use of the local exchange network when Special Access Service is connected to a PBX or equivalent device which is capable of interconnecting the Special Access Service with local exchange service.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(A) General (Cont'd)

The Telephone Company will automatically bill the surcharge on each Special Access Service installed irrespective of whether the inter-connection capability exists in the customer's premises equipment or in a Centrex-CO type switch unless written certification is received from the customer certifying exemption status as set forth in (B) following.

(B) Special Access Surcharge Exemptions

(Z)

The Special Access Service will be exempted from the surcharge if the customer provides the Telephone Company written certification that the Special Access Service termination is one of the following:

- (1) an open-end termination in a Telephone Company switch of an FX line, including CCSA and CCSA-equivalent ONALS; or
- (2) an analog channel termination that is used for radio or television program transmission; or
- (3) a termination used for TELEX service; or
- (4) a termination that by the nature of its operating characteristics could not make use of Telephone Company common lines; or

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(B) Special Access Surcharge Exemptions (Cont'd)

- (5) a termination that interconnects either directly or indirectly to the local exchange network where the usage is subject to Carrier Common Line charges* (C) such as, where the Special Access Service accesses only FGA and no local exchange lines, or Special Access Service between customer points of termination or Special Access Service connecting CCSA or CCSA-type equipment (inter-machine trunks); or
- (6) a termination that the customer certifies to the Telephone Company is not connected to a PBX or other device capable of interconnecting the special access facility to a local exchange subscriber line. If a user's equipment is prevented from interconnecting private lines with the local exchange lines due to actual operating practicalities or limitations -- resulting from either hardware or software restrictions -- then it is not capable of leakage. Thus no surcharge should be assessed.

* Resellers of WATS Access Line Service who are exempted from paying CCL charges during the transition period of June 1, 1986 to January 1, 1987 (N) | should not be assessed any Special Access Surcharge on the closed end. (N)

(x) Issued in compliance with the Report and Order of the Federal Communications Commission in CC Docket No. 86-1, released March 21, 1986.

Issued: April 1, 1986

Effective: June 1, 1986

Vice President

Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd) (M)
- 7.4 Rate Regulations (Cont'd) |
- 7.4.2 Surcharge for Special Access Service (Cont'd) (M)
- (C) Exemption Certification (T)
- (1) Special Access Services which are terminated as set forth in (B) preceding will be exempted from the Special Access Surcharge if the customer provides the Telephone Company with a written notification certifying exemption. Such notification shall be provided by the customer (1) at the time the Special Access Service is ordered or installed; (2) at such time as the Special Access Service is reterminated to a device not capable of interconnecting to the local exchange network, or (3) at such time as the Special Access Service becomes associated with a Switched Access Service that is subject to Carrier Common Line charges. (T) (M) (M) (T) (T)
- (2) If written certification is not received at the time the Special Access Service is obtained, the surcharge will be applied. Exempt status will become effective on the certification date indicated by the customer, subject to the regulations in (D) following. (M) (T) (M) (M) (T)
- (3) The exemption certification is to be provided by the customer ordering the service. The certification must be signed by the customer or authorized representative and include the category of exemption, as set forth in (B) preceding, for each termination, and the date which the exemption is effective. (N) | | | | |
- (4) The customer shall also notify the Telephone Company when an exempted Special Access Service is changed or reterminated such that the exemption is no longer applicable. (N) | | | |
- (D) Crediting the Surcharge (T)
- The Telephone Company will cease billing the Special Access Surcharge when certification that the Special Access Service has become exempt from the surcharge, as set forth in (B) preceding is received. If the status of the Special Access Service was changed prior to receipt of the exemption certification, the Telephone Company will credit the customer's account, not to exceed ninety (90) days, based on the effective date of the change specified by the customer in the letter of certification. (M) (T) (T) (M) | | (M)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.2 Surcharge for Special Access Service (Cont'd)(D) Crediting the Surcharge (Cont'd)

On June 1, 1986, the Telephone Company will begin to bill	(N)	(x)
the Special Access Surcharge for WATS Access Lines		
presently in service. Payment of any Special Access		
Surcharge billed on WATS Access Lines in service as of		
June 1, 1986, may be deferred, without penalty, for up to		
ninety (90) days from the date of the first bill ordered		
for the Special Access Surcharge.		
 If appropriate exemption certification is not received by		
the Telephone Company by the end of the ninety (90) days		
deferral period, the billed Special Access Surcharges will		
become due. These charges, if unpaid, will be subject to a		
late payment charge as set forth in Section 2.4.1 (B) (2)		
preceding. Customers who provide exemption certification		
within the first ninety (90) days following the surcharge		
effective date, will be given credit for the surcharge to		
the surcharge effective date.	(N)	(x)

(x) Filed under authority of Special Permission No. 86-357 of the Federal Communications Commission.

Issued: May 27, 1986

Effective: June 1, 1986

Vice President

Cincinnati, Ohio 45202

7. Special Access Service (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(1) The monthly Special Access Surcharge applies to Special Access Services arranged, as set forth in (A) preceding, on a per voice equivalent basis as shown in the following example. The rate for the Special Access Surcharge is set forth in 7.5.11 following

<u>Special Access Service</u>	<u>Voice Grade Equivalent</u>		<u>Surcharge</u>	<u>Monthly Charge</u>
Voice Grade	1	X	\$25	\$ 25.00
DS1	24	X	\$25	\$600.00

- (2) In the case of multipoint Special Access Service, one Special Access Surcharge will apply for each termination at a customer designated premises except that no surcharge applies at the customer designated premises when such premises are an interexchange carrier's point of termination.
- (3) The Telephone Company will bill the surcharge to the customer who orders the Special Access Service unless the Service is exempt as set forth in (B) preceding.

Rate zones are applicable to CBT MercNET 1.5 (DS1) and CBT MercNET 45 (DS3) services described in this section. Each Telephone Company Wire Center has been assigned to a rate zone as described in 19, following. Channel Termination, Channel Mileage Fixed and Per Mile, Alternate Central Office and Interoffice Access Diversity rates are dependent upon the zone assignment of the Service Wire Center. Channel Mileage that is computed between wire centers in different rate zones will be assessed the rates in the higher rate zone. Multiplexing rates will be determined by the location of the multiplexing arrangement.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.4 Minimum Periods

The minimum service period for all services is one month except as follows:

(A) The minimum service period for part-time and occasional Video and Program Audio services is one day (i.e., a continuous 24 hour period, not limited to a calendar day).

(B) The minimum period for individual case basis (ICB) High Capacity Services is one month unless otherwise specified in the ICB filing.

(C) For Optional Payment Plans (OPP) for Digital Data Service, MercNET 45 and 1.544 High Capacity Services the minimum period is specified in paragraph 7.4.9 following.

(D) The minimum service period for Voice Grade, DS1, DS3, After the minimum period is satisfied, see specified regulations in 7.5 following.

(D)

(D)

|

(D)

7.4.5 Moves

A move involves a change in the physical location of one of the following.

- The Point of Termination at the customer's premises
- The customer's premises

Moves changing the Customer's premise will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued services.

Moves changing the Point of Termination to a new location within the same customer's premises will be provided, at the customer's request, on a time sensitive basis. The labor rates which apply are set forth in Section 13.2.6. (Charges for Additional Labor). There will be no change in minimum period requirements

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.6 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage is calculated on the airline distance between the locations involved, i.e., the serving wire centers associated with two customer designated premises, a serving wire center associated with a customer designated premises and a Telephone Company hub, or two Telephone Company hubs. The serving wire center associated with a customer designated premises is the serving wire center from which this customer designated premises would normally obtain dial tone.

Mileage is shown in 7.5 following in terms of mileage bands. To determine the rate to be billed, first compute the mileage using the V&H coordinates method, as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF FCC No. 4, then find the band into which the computed mileage falls and apply the rate shown for that band. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band and applying the rates.

When hubs are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., customer designated premises serving wire center to hub, hub to hub and/or hub to customer designated premises serving wire center. However, when any service is routed through a hub for purposes other than customer specified bridging, multiplexing or Customer Network Reconfiguration Service (e.g., the Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the customer designated premises.

(This page filed under Transmittal No. 612)

Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs

A customer has the option of ordering Voice Grade facilities or digital high capacity facilities (i.e., DS1, DS1C, DS2, or DS3) to a facility hub for channelizing to individual services requiring lower capacity facilities (e.g., Telegraph, Voice, Program Audio, etc.). (D)

Different locations may be designated as hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. When placing an Access Order the customer will specify the desired hub. The National Exchange Carrier Association Tariff FCC No. 4 identifies serving wire centers, hub locations and the type of multiplexing functions available.

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Voice Grade, not High Capacity.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs (Cont'd)

The Telephone Company will commence billing the monthly rate for the facility to the hub on the date specified by the customer on the Access Order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or a High Capacity digital Channel Termination, Channel Mileage (when applicable) and the multiplexer at the time the facility is installed. Individual service rates (by service type) will apply for a Channel Termination and additional Channel Mileage (as required) for each channelized service. These will be billed to the customer as each individual service is installed. (C)

Cascading multiplexing occurs when a high capacity digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a MercNET 45 (DS3) facility is de-multiplexed to 28 DS1 facilities and then one of the DS1 facilities is further de-multiplex to individual Digital Data Service channels (i.e., 2.4, 4.8, 9.6, 56 or 64 kbps channels). (C)

When cascading multiplexing is performed, whether in the same or a different hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different hubbing locations, Channel Mileage charges also apply between the hubs.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.7 Facility Hubs (Cont'd)

Although not requiring multiplexing, certain Video and Program Audio services must be routed to Telephone Company designated hubs when connection is desired with other broadcast facilities. A customer can order full-time and/or part-time service(s) between customer designated premises and a hub and will be billed accordingly at the rates set forth in 7.5.15 following for the full-time or part-time service, as appropriate. At the request of a customer, the full-time and/or part-time services provided to the hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Other Labor as set forth in 13.2.6(C) following. The rates that apply for the service between each customer designated premises and the hub are a Channel Termination and Channel Mileage, if applicable. In addition, for Program Audio Services, rates for optional features and functions may be applicable. For two-point Video and Program Audio services not requiring hubbing, circuit configuration will be as shown in 7.1.3 for two-point service.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use High Capacity Services

Shared use occurs when Special Access Service and Switched Access Service including CCSAC signaling connections are provided over the same High Capacity facilities through a common interface. The facility will be ordered, provided and rated as Special Access Service (i.e., Channel Termination, Channel Mileage, as appropriate, and Multiplexer). The nonrecurring charge that applies when the shared use facility is installed will be the nonrecurring charge associated with the appropriate Special Access High Capacity Channel Termination. Individual service including Switched Access CCSAC signaling connections (i.e. Switched or Special Access) non-recurring charges will not apply to the individual channels of the shared used facility. Rating as Special Access will continue until such time as the customer chooses to use a portion of the available capacity for providing Switched Access Service including CCSAC signaling connections. As each individual channel is activated for Switched Access Service including CCSAC signaling connections, the Special Access Channel Termination, Channel Mileage and Multiplexer rates, as appropriate, will be reduced accordingly (e.g., 1/24th for a DS1 service, etc.) The customer must place an order for each individual Switched or Special Access Service including CCSAC signaling connections utilizing the Shared Use Facilities and specify the channel assignment for each such service including CCSAC signaling connections.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use High Capacity Services and OC-3 (Cont'd)

(D)

Switched Access Service rates and charges as set forth in 6.8 preceding will apply for each channel of the shared use facility that is used to provide a Switched Access Service including CCSAC signaling connections. The ordering, provisioning and rating of Switched Access Shared Use facilities is set forth in 6.7.14 preceding. Where Special Access Service is provided utilizing a channel of the shared use facility to a Hub, High Capacity and OC Service rates and charges will apply for the facility to the Hub as set forth preceding and individual service rates and charges will apply from the Hub to the customer designated premises. The rates and charges that will apply to the portion from the Hub to the customer designated premises will be dependent on the specific type of Special Access Service that is provided (e.g., Voice Grade, Telegraph, etc.) The applicable rates and charges will include a Channel Termination and Channel Mileage, if applicable. Rates and charges for optional features and functions associated with the service, if any, will apply as set forth in 7.5 following.

7.4.9 Payment Plans for Digital Data Service, MercNET 45, 1.544 High Capacity Services,

(D)

The Optional Payment Plan (OPP) is a provision that allows a customer to pay a fixed rate for specific Digital Data Service, MercNET 45, 1.544 High Capacity Service, over a specified month payment period. OPP options are 36 and 60 months for Digital Data Service 12, 24, 36, 48, 60, and 84 months for DS1, and DS3,

(D)

(D)

During the effective term, monthly rates for services installed Under this arrangement will not be subject to Telephone Company initiated rate changes.

Digital Data Service, MercNET 45, and 1.544 High Capacity,

Cincinnati, Ohio 45202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.9 Payment Plans for Digital Data Service, MercNET 45, 1.544 High Capacity Service.

(D)

Customers subscribing to the OPP will be subject to nonrecurring charges as specified in 7.4.1(C), 7.5.8(A) and 7.5.9(A) for installation and rearrangements of services covered by the plan. The nonrecurring charges will not be spread over the OPP term.

During a customer's OPP/DCP term, the customer shall pay current rates provided they do not exceed the original rate contracted for by the customer. Conversion of service may be made to a new OPP/DCP term of the same or different length or to a higher speed service or to the same or higher speed service.

(D)

If the expiration date for the new service or OPP/DCP term is beyond the end of the original OPP/DCP term, the remaining OPP/DCP charges for the original term will not apply.

At the expiration of the OPP term and if the customer wishes to continue Digital Data Service, MercNET 45, 1.544 High Capacity Service, the customer may elect:

(D)

- Prevailing month-to-month tariff rates
- A new OPP at the prevailing OPP rate, if available

During an OPP term, a customer may move one Channel Termination service to another location while keeping the OPP in force, provided the customer and customer's end user remain the same and no lapse in service occurs.

The Minimum Period for service provided under an OPP is the same as the OPP term selected by the customer (i.e. 36 or 60 month payment period). The Minimum Period for service provided under the month-to-month payment arrangement is 12 months for Metallic Service, Voice Grade Service, DDS Service, 1.544 High Capacity Service, Service and MercNET 45 Service,

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.9 Payment Plans for Digital Data Service, MercNET 45,
1.544 High Capacity Service, (Cont'd) (D)

Customers requesting termination of service prior to the expiration date of the Minimum Period will be liable for payment of a Minimum Period Charge. The Minimum Period Charge applies to all features associated with a service. The Minimum Period Charge for all OPP terms will be calculated as follows:

- Customers with a 12 month OPP would pay a charge equal to the total of the remaining months of the OPP contract. The Termination rate calculation is:

[12 months - months in service] X 12 month OPP monthly rate.

- Customers with a 36 month OPP would pay a charge equal to the total of the remaining months of the OPP contract. The Termination rate calculation is:

[36 months - months in service] X 36 month OPP monthly rate.

- Customers with a 60 month OPP would pay a charge equal to the total of the remaining months of the OPP contract. The Termination rate calculation is:

[60 months - months in service] X 60 month OPP monthly rate.
