## ACCESS SERVICE

6. SWITCHED ACCESS SERVICE – Feature Group D Switched Service (cont'd)6.4 Toll Free Database Access Service (T)

Toll Free Database Access Service is provided with FGD switched access service. (T)  
When a 1+ (e.g. 800, 888, or other toll free number) + NXX + XXXX call is originated by an end user, the Company will utilize the Signaling System 7 (SS7) network to query an Toll Free Database Access Service to perform the identification function. The call will then be routed to the identified customer over FGD switched access. The manner in which Toll Free Database Access Service is provided dependent on the availability of SS7 service at the end office from which the service is provided as outlined below: (T)

When Toll Free Database Access Service originates at an end office equipped with Service Switching Point (SSP) capability for querying centralized data bases, all such service will be provisioned from that end office. (T)

When Toll Free Database Access Service originates at an end office not equipped with SSP customer identification capability, the Toll Free Database Access Service call will be delivered to the access tandem on which the end office is homed and which is equipped with the SSP feature to query centralized data bases. (T)

Query charges as set forth in the following are in addition to those charges applicable for the FGC or FGD switched access service.

6.5 Rate Regulations

This section contains a brief description and the general regulations governing the rates and charges that apply for Switched Access Service.

## 6.5.1 Description and Application of Rates

Switched Access Service rates are generally of two types; usage rates and non-recurring rates. Usage rates may be minute, and/or distance sensitive, occurrence and/or quantity sensitive or combinations of these usage elements. Non-recurring rates are one-time charges that apply for a specific work activity. Examples would include installation of service, rearrangements of service, moves and changes of service, provision of optional features and functions not ordered initially, service date changes, service design changes, cancellation of access, orders for additional engineering, and expedited orders.

## ACCESS SERVICE

\*Northwest Fiber, LLC d/b/a Ziplly Fiber Telephone Companies FCC No. 2.

(T)

<sup>1</sup> This charge is generally billed to the end user who is the subscriber to the Company. In those instances where the Interexchange Carrier (IXC) both requests the PIC change and requests the associated charge be billed to it, the Company will bill the IXC. In the event the subscriber is incorrectly presubscribed due to misassignment on the part of the Company, no charge shall apply. In the event the subscriber denies requesting a PIC change, the Company will credit the subscriber's account for the PIC Change Charge associated with the alleged unauthorized change, if such charge was billed to the subscriber. The Company will then bill the IXC responsible for the alleged unauthorized change a PIC Change Charge to return the subscriber to its previous authorized carrier and, if initially billed to the subscriber, the PIC Change Charge for the alleged unauthorized change.
