

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

## 1. Introduction

Frontier Telephone Companies ("Frontier") submits herewith its Description and Justification ("D&J") in support of its Annual 2022 Access Tariff Filing, made under Transmittal No. 114, pursuant to sections 61.41 through 61.49 of the Commission's Rules and relevant Commission orders.<sup>1</sup> This filing is made on behalf of the exchange carriers issuing Frontier Telephone Companies Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14.

Frontier Telephone Companies Tariff FCC No. 1 contains five separate rate schedules referred to as Rate Group 1 through Rate Group 5, corresponding to the COSA codes CTC1 through CTC5. Frontier Telephone Companies Tariff FCC No. 2 contains two rate schedules applicable to Frontier Telephone of Rochester, Inc. ("Rochester") and the other issuing carriers of this tariff ("All Other Carriers"). These two rate schedules correspond to the COSA

codes RTNY and RTCS. Frontier Telephone Companies Tariff FCC No. 3 contains a single rate schedule corresponding to the COSA code VITC. Frontier Telephone Companies Tariffs FCC Nos. 4, 5, and 6 are consolidated into a single set of Price Cap Indices, filed under the COSA code FVTR. Frontier Telephone Companies Tariff FCC No. 10 contains a single rate schedule corresponding to the COSA code FCCS. Frontier Telephone Companies Tariff FCC No. 11 contains a single rate schedule corresponding to the COSA code SNCT. Frontier Telephone Companies Tariffs FCC No. 13 and 14 are consolidated into a single set of Price Cap Indices, filed under the COSA code FCTF.

## **2. Development of Proposed CMT Revenue per Line and PCI Values**

The proposed CMT per line and PCI Values are calculated on Forms CAP-1 and PCI-1, respectively, of the Tariff Review Plans for the twelve Frontier COSAs. Frontier develops the proposed CMT revenue per line values by applying exogenous cost changes to the current CMT per line values. The exogenous cost changes allocated to the CMT basket are divided by total EUCL lines to yield an exogenous change per line. The exogenous change per line is

then divided by the existing CMT per line to yield an exogenous cost change factor. This factor is multiplied by the existing CMT revenue per line to get the proposed CMT revenue per line. These calculations are shown on Exhibits CMT-EXG CTC1 through CMT-EXG FCTF for the twelve Frontier COSAs.

### **3. Exogenous Cost Changes**

Frontier has not included identified exogenous cost changes for changes in Federal Regulatory Fees, North American Numbering Plan Administration (NANPA) and Telecommunications Relay Service (TRS) costs in this filing and will do so in its mid-year filing.

### **4. Development of Proposed EUCL, PICC, and CCL Rates**

Initial EUCL, PICC, and CCL rates are computed on Form CAP-1 of the Tariff Review Plans for the appropriate properties. Any adjustments to EUCL rates needed to avoid over-recovery of the allowed CMT per line are shown on Form CAP-2 of the Tariff Review Plans for the appropriate properties.

One of the components in the calculation of EUCL, PICC, and CCL

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

rates is USAC receipts, formerly known as Interstate Access Support ("IAS"). Historically, IAS was computed as a per line amount for residential or business lines in high cost study areas. On January 1, 2012, this support was frozen at the study area level as a flat dollar amount. On January 1, 2015, IAS was consolidated into CAF and no longer exists as a separate support mechanism for CMT rates. For ratemaking purposes, Frontier uses an average per line amount of frozen IAS by study area, calculated by dividing the frozen support for each study area by that study area's 2011 lines.

As allowed by §61.48(m)(1)(ii) of the Commission's rules, Frontier pools a portion of the July 2001 reductions to Local Switching revenues in its multi-line business EUCL and PICC rates. The calculation of the maximum allowable multi line business EUCL and PICC rates including pooled revenues is shown on Form CAP-4 Tariff Review Plans for the appropriate properties. Computation of the amount of available pooling revenue, how much may be recovered at each tariff unit, how much is unrecoverable, and how much is allocated to each tariff unit is shown on Exhibit POOL

FTTC.

## **5. Other Price Cap Rates and Exhibits**

Frontier supplies exhibits that display demand quantities, rates at last PCI update, current rates, and proposed rates, and the associated revenue quantities for ten of the twelve Frontier COSAs. For the COSAs FVTR and FCTF, similar Exhibits display summary information for revenue quantities by price cap basket and band. Rate detail for FVTR and FCTF is displayed on separate Exhibits organized by basket and jurisdiction.

In the case of the CMT Basket, maximum allowed rates and the corresponding revenues are also shown. For the non-CMT baskets, PCI, SBI, and sub-index calculations are shown.

Frontier identifies the transmittals in which the current index levels became effective on Exhibits IND-SRC CTC1 through IND-SRC FCTF for the twelve Frontier COSAs, as required by ¶ 25 of the *2022 TRP Order*. Exhibit OUTPC shows services excluded from Price Caps for the nine Frontier COSAs, as required by ¶ 34 of the

*2022 TRP Order.* Calculation of Pooling revenues for Row 100 of Form CAP-4 of the TRP are developed on Exhibit POOL FTTC.

The *2022 TRP Order*, at ¶ 35, requires price cap ILECs to include a list of currently applicable Part 69 waivers. Frontier does not believe it currently relies on any Part 69 waivers.

As required by ¶ 33 of the *2022 TRP Order*, Frontier supplies rate detail files for the twelve Frontier COSAs in similar format to that provided in previous years. Frontier submits price cap TRPs in the format specified by the *2022 TRP Order* for the twelve Frontier COSAs. As with all filings, electronic copies of TRPs are uploaded to the Commission's electronic filing system, which allows any interested person to obtain a copy of the original file submitted.

## **6. Access Recovery Charge (ARC) Calculations**

Frontier's Price Cap ARC rate calculations for the tariff year beginning July 1, 2022, were based on a consolidated holding company basis. The tariffed ARC rate calculations were computed on an exchange-by-exchange basis for all of the company's 90

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

Price Cap Study Areas operating in 25 States consistent with § 51.915 of the Commission's rules and the industry's approved ARC model. End user Access Recovery Charges (ARCs) are applied to the same base of subscriber access lines that qualify for Federal SLC charges, subject to the residential rate ceiling limitations imposed under § 51.915. Frontier does not qualify for any Intercarrier Compensation Connect America Funds (ICC-CAF) for the current tariff year beginning July 1, 2022. The tariffed ARC rates per line are set such that the cumulative expected revenues from the application of these ARC rates do not exceed Frontier's consolidated Eligible Access Recovery. The results of these ARC rate calculations are shown on Exhibit "**FTTC-TRCNOCAF-061622**" included with this filing.

Frontier reviewed all local residential tariff rates by exchange to determine the extent to which a residential ARC rate could be applied given the total of the residential rate ceiling charges for each exchange. Tariff rates effective as of January 1, 2022 for each of the rate ceiling component charges as defined in the FCC rules under §51.915(b)(11) were used to develop the total monthly

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

equivalent residential flat rate charge per access line for local residential service. The highest equivalent monthly residential flat rate charge per line from all prior periods was then compared against the residential rate ceiling cap of \$30 per month, per line to determine which residential access lines by exchange would qualify for the application of either a full or reduced residential ARC tariff charge. Based on the total amount of Frontier's Eligible Recovery at the holding company level for the tariff year beginning on July 1, 2022 and the current access line demand, it was determined Frontier does not qualify to apply the maximum annual allowable end user ARC rate increases per the FCC rules.

As shown on Exhibit "**FTTC-ER-061622**", Frontier's Eligible Recovery for the current tariff year of \$56.1M is based on the following components:

- (A) The amount of Net Intrastate and Interstate Switched Access Revenue reductions determined pursuant to § 51.907(e) multiplied by the Price Cap Carrier Traffic Demand Factor and CALLs Base Factor;
- (B) Net CMRS Reciprocal Compensation Revenues multiplied by

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

the Price Cap Carrier Traffic Demand Factor and CALLs Base factor;

(C) Net Non-CMRS Reciprocal Compensation Revenues multiplied by the Price Cap Carrier Traffic Demand Factor and CALLs Base Factor;

(D) An amount equal to the True-up Revenues for Access Recovery Charges for the year beginning July 1, 2020; and

(E) The amount of Exogenous Costs attributable to the current tariff year not recoverable through other price cap rates.

Frontier established its tariffed ARC rates for residential, single line business and multi-line business in compliance with § 51.915(e)(4) which establishes a maximum limitation ratio among the line types to assure the company does not recover a higher fraction of its total revenue recovery from ARCs imposed on residential and single line business lines. Per that rule, Frontier may not recover a higher fraction of its total eligible revenue recovery from ARCs assessed on Residential and Single Line Business lines than their share of Total Weighted Lines where Multi-Line Business lines gets twice the weight (i.e., Total Weighted Lines = Residential Lines + Single-

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

Line Business Lines+ (2 X Multi-Line Business Lines)). For purposes of distribution of ARC among different types of lines, Frontier's Residential and Single Line Business lines are the same lines (excluding lines of Lifeline Customers) which are assessed the residential primary and non-primary and single line business end user common line charges. Frontier's Multi-Line Business Lines are the same lines which are assessed the multi-line business end user common line charge. Frontier's total Eligible Recovery Revenue pursuant to § 51.915(d)(1)(i) of the rules (after adjusting for CALLS Study Area Base Factor and Price Cap Carriers Traffic Demand Factor) is \$56.1M.

Per Paragraph 911 of the USF/ICC Transformation Order (FCC 11-161) which establishes maximum limits as to the distribution of ARC charges among lines of different types, Frontier is allowed to recover no more than 38.55% or \$21.6M of its total Eligible Recovery of \$56.1M from Residential and Single-Line Business Lines. However, due to residential rate ceiling constraints, the ARC Revenue Forecast based on the proposed tariffed ARC rates on Residential and Single-Line Business Lines is 21.77% or \$11.9M,

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

and the ARC Revenue Forecast based on the proposed tariffed  
ARC rates on Multi-Line Business is 78.23% or \$42.8M.

The reason the tariffed amount of total ARC revenue as computed in this filing (\$54.7M) is under the consolidated Eligible Access Recovery (\$56.1M) is because the tariffed ARC rates were rounded down to the nearest cent to assure the cumulative ARC revenue forecast does not exceed the consolidated Eligible Recovery.

Regarding the forecast of line counts, a 12-month annual demand forecast was computed using the average access line demand reductions experienced by Frontier over the last year. All residential lifeline lines were excluded from all the computations in accordance with the rules. In addition to the line demand forecast, an ARC revenue true-up calculation for the tariff year beginning 7/1/20 was computed and has been included in Frontier's consolidated Eligible Access Recovery computations in accordance with the FCC rules under §51.915. The ARC revenue true-up calculation compares the actual line counts for the tariff year beginning July 1, 2020 against the forecast of line counts used to develop the ARC rates for that same period. The difference between the actual line counts and

the forecast line counts by wire center was multiplied by the effective ARC tariffed rate applicable to each specific line type in the wire center to compute the ARC revenue true-up for the current year.

## **7. Uncollectible Adjustments for Eligible Recovery**

For all of Frontier's 90 Study Areas, excluding FrontierConnecticut, an uncollectible factor was developed based on Frontier's actual experience of collected revenues as related to billed revenues. Billed revenues consisted of revenues from usage sensitive and dedicated switched access services provided from October 2010 through September 2011. Late payment charges, special access billing, and PICC charges were excluded from the analysis. Billed revenues were reduced by adjustments, write-offs and ongoing open disputes to arrive at collected revenues. Disputes and collections were reviewed through March 2012. Late payment charges and adjustments to late payment charges were excluded from the calculation. Partial payments were reflected in the collected revenue, while the unpaid portions of invoices that were partially paid were included as part of open disputes. In the case of

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

partial payment of bills that were for a combination of special access and dedicated switched access, the unpaid portions were assigned to special access and excluded from the analysis because over 99% of disputes on this type of bill are for special access. Disputes for switched access are overwhelmingly disputes of usage sensitive charges, which are billed separately from non-switched services. The sum of the adjustments, write-offs and open disputes account for a collection rate of approximately 96.7% of Frontier's billed revenues. This resulted in an uncollectible factor of 3.3%. This factor was applied against all Frontier TRP study area interstate and intrastate access reduction calculations, with the exception of the Frontier Connecticut study area, resulting in a net reduction to the cumulative interstate and intrastate TRP access revenue reductions as reflected on the Eligible Recovery TRP form.

The Frontier Connecticut study area (Southern New England Telephone) purchase from AT&T was officially completed and incorporated into Frontier Communications results on October 24, 2014. As a result of this acquisition, the uncollectible factor previously developed and used by AT&T for its Connecticut ILEC

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

operations was used by Frontier in this TRP filing. The methodology for computing AT&T's uncollectible factor was similar to that of Frontier, except AT&T applied the calculated reduction of the switched access revenues attributable to uncollectible back against the switched minutes-of-use demand quantities. As a result, the demand units on the Frontier Connecticut access reduction TRP reflects the net allowable revenue reductions and no further uncollectible factor adjustment was required based on the TRP calculations. The methodology AT&T used to compute its uncollectible factor reduction is described here. To help determine the billed demand quantities for which payment was collected by March 31, 2012, calculations were completed to determine an "uncollected" experience and produce a factor that could be used to determine billed but not collected quantities. This experience was determined by reviewing twelve months of billed Switched Access revenue data in the aggregate for all six AT&T ILECs. These Switched Access revenues were compared to the negative revenue adjustments created by service center adjustments or settlements that reduce revenue (contra revenue). This produced a factor of 3.84 percent. This represents in a revenue format what was billed

but not collected. The uncollected factor was employed in adjusting billed quantities to estimate the billed quantities which were collected. The intrastate demand quantities adjusted for these uncollected quantities were used to calculate the intrastate revenue based on intrastate rates and the intrastate revenue based on interstate rates.

#### **8. Business Data Services (“BDS”) Order Impacts**

Of Frontier’s study areas, three are completely competitive for purposes of BDS. Frontier is thus only including CommonLine Basket line items and no BDS line items in the TRPs for these study areas:

- Frontier FCC No. 1, Rate Group 3: Ogden Telephone Co.;
- Frontier FCC No. 1, Rate Group 5: Global Valley;
- Frontier FCC No. 2: Frontier Telephone of Rochester (RTNY).

#### **9. USF Recovery Charge**

On June 9, 2022, the Commission released a *Public Notice*, Proposed Third Quarter 2022 Universal Service Contribution

Factor, DA 22-623 ("*3Q22 USF Notice*"). The *3Q22 USF Notice* proposes a universal service contribution factor of 33.0% for the third quarter of 2022. In this filing, Frontier changes its USF Recovery Charge<sup>2</sup> rate element for Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13 and 14 to 33.0% in keeping with the change in the underlying contribution factor.

## **10. 8YY Access Charge Reform**

The 8YY Access Charge Reform Order<sup>3</sup> adopted rules requiring price cap incumbent LECs to transition their interstate and intrastate toll free (or 8YY) originating end office access service rates to bill-and-keep over a three-year period. Beginning July 1, 2022, price cap incumbent LECs are required to reduce their interstate and intrastate toll free originating end office access service rates by one-half of the maximum rate allowed by the Commission's rules (see 51.907(j)(1)). Frontier has prepared public versions of worksheets showing the interstate and intrastate

---

<sup>2</sup> This rate element is called "Universal Service Fund (USF) Recovery Charge" in Tariffs FCC Nos. 1, 2, and 3; "Federal Universal Service Fund (FUSF) Surcharge" in Tariffs FCC Nos. 4, 5, 6, 11, 13 and 14; and "Federal Universal Service Charge (FUSC)" in Tariff FCC No. 10.

<sup>3</sup> See 8YY Access Charge Reform, *Report and Order*, FCC 20-143 (rel. October 9, 2020) ("*8YY Access Order*")

Frontier Telephone Companies  
Tariffs FCC Nos. 1, 2, 3, 4, 5, 6, 10, 11, 13, and 14  
Description and Justification  
Transmittal No. 114  
June 16, 2022

toll free originating end office access service rate calculations.

The rate calculations are included with this filing as Exhibit

**“COSA 2022 8YY Rates”** for each of the twelve Frontier COSAs.

In addition, price cap incumbent LECs are required to reduce interstate and intrastate toll free database query charges by one-half of the difference between the rate permitted by the Commission’s rules (see 51.907(i)(6) and 51.907(j)(2)) and the transitional rate of \$0.0002 per query set forth in 51.907(k)(2). The toll free database query charge calculations are included in the worksheets referenced above.

All 8YY Access Charge Reform related tariff changes are also filed in compliance with the applicable state regulations.
