VI. SPECIAL ACCESS

²⁶

A. General

Special Access provides a transmission path to connect CDLs²⁷ within a LATA²⁸ for Interstate Telecommunications. Special Access provided to a customer may be connected directly to customer facilities, through Telephone Company Hub Wire Centers where bridging or multiplexing functions are performed, and/or may be connected to access facilities of another telephone company or companies in the joint provision of Special Access Service as well as may be connected to Switched Access as set forth in Section V.. Special Access Services may also be connected to a customer's transmission equipment and facilities using a DS1 or DS3 Cross Connect arrangement where the customer is provided Expanded Interconnection Service (EIS) as defined in Section XVIII.. High Capacity SALs may also be connected to an in-service Telephone Company provided integrated optical service, provided that such connections are technically and operationally feasible, as determined by the Telephone Company.

The provision of Switched Access and Special Access in combination is normally for, but not limited to, the use of WATS or WATS-type Access. When Special Access is connected to Switched Access, the terms, conditions and rates for the facilities between the end user's CDL and the WATS Serving Office are as set forth in this section of the tariff; the terms, conditions and rates for the facilities between the WATS Serving Office and the IC's CDL, as well as the switching functionalities (e.g., end user access codes, screening) are as set forth in Section V. of this tariff.

Special Access can be provided in either analog or digital format. Analog formats are differentiated by spectrum and bandwidth. Digital formats are differentiated by bit rate. The specific types of Special Access (e.g., Voiceband, Digital Data Service) provided are described in VI.B. following.

1. *Rate Elements*

With the exception of Video Digital Transport Service, there are six (6) basic rate elements which apply to Special Access Service:

- Special Transport (described in VI.A.1.b. following)
- Special Transport Termination (described in VI.A.1.g. following)
- Special Access Line (described in VI.A.1.c. following)
- Special Access Cross Connect (described in VI.A.1.d. following)
- Supplemental Features (described in VI.D. following)
- Multiplexing Arrangements (described in VI.E. following)

²⁶ Pursuant to FCC 17-43, released April 28, 2017, ZiPLY Fiber has detariffed 1.) TDM channel terminations for wire centers in competitive counties; 2.) TDM transport charges; and 3.) packet-based services. Terms and Conditions for detariffed services can be found in the Interstate Service Guide and Pricelist.

²⁷ Telephone Company Centrex CO-like switches are considered to be CDLs for the purposes of this tariff.

²⁸ DS1 and DS3 Special Access Services may be provided between the service areas shown under VI.B.7.h., where facilities and conditions permit.

VII. MISCELLANEOUS SERVICES

<p>2. Application of FUSF Surcharge to Other Charges</p> <p>Customers assessed Presubscribed Interexchange Carrier Charges, ISDN Line Port Charges, Charge for Changing Primary Interexchange Carrier, charges for interstate Special Access Service, and any interstate charges not listed above which give rise to the Telephone Company's obligation to contribute to the Universal Support Mechanisms will be assessed the FUSF Surcharge on such charges as set forth following. Customers who participate in the Lifeline Assistance Program are not exempt from this Surcharge on services other than the Subscriber Line Charge. The FUSF Surcharge will be determined by multiplying the FUSF Surcharge Factor by the applicable charges.</p>	
<p>3. FUSF Surcharge</p> <p>Surcharge applied to interstate charges 29.2%</p>	(l)
<p>S. <u>Incidental InterLATA Call Management Signaling Service</u></p> <p>1. General</p> <p>Call Management Signaling Service ("Service" or "CMSS") provides a customer with terminating detail information and with the capability to provide instructions back to the Telephone Company regarding the forwarding or other disposition of calls terminating or attempting to terminate at the customer's end user's telephone number. The Telephone Company will deliver this service over a secure IP (Internet Protocol) network connection using standard XML-based formatted data.</p>	
<p>In every instance that a call attempts to terminate at a Telephone Company end office to a customer's end user's telephone line provisioned with the Service, The Telephone Company will provide the customer with signaling information describing the attempted call termination and terminating detail for the call (collectively "Terminating Detail"). All Terminating Detail will be provided to a Telephone Company interface server and then made available to customers through a secure IP network connection using an XML-based data format.</p>	
<p>In every instance that a customer is provided with Terminating Detail for a call, the customer will be required to respond with a valid response ("Response") within eighteen (18) seconds, as further described in the Technical Memorandum documentation referenced in the front of this tariff under Reference to Technical Publications (Technical Memorandum for Incidental InterLATA Call Management Signaling Service associated with the Telephone Company FCC Short Term Notice of Network Change dated March 2007). Valid Responses include an instruction for the Telephone Company to forward the call to a different domestic telephone number, to block the call or to permit the call to terminate to the customer's end user's line.</p>	
<p>In the event no Response is received within eighteen (18) seconds, the Telephone Company will proceed with terminating the call to the customer's end user's line. Responses to the Telephone Company from the customer are received through a secure IP network connection and in an XML-based data format.</p>	

XIV. END USER FIA

2. <i>Access Recovery Charge (ARC)</i>		
The rates for the ARC, where applicable, are provided below.		
	General Rate Per Month	
Residence, Non-Primary Residence, and ISDN BRI, all jurisdictions		
- Individual Line or trunk, each	\$1.03	(R)
Single Line Business		
- Individual Line or trunk, each	\$1.06	(R)
Multi-Line Business, ISDN PRI, Centrex, Per individual line or trunk		
- Idaho	\$2.06	(R)
- Oregon	\$2.06	(R)
- Washington	\$2.06	(R)
