

ALASKA COMMUNICATIONS SYSTEMS, INC.
2023 Mid-Year Access Charge Tariff Filing
Issued September 15, 2023

Description and Justification

I. Introduction

A. Background

Alaska Communications Systems, Inc. hereby submits this filing in support of 2023 Mid-Year Access Charge Tariff Filing to implement required exogenous cost adjustments to reflect changes in the Telecommunications Relay Service (“TRS”) carrier contribution factor, the North American Numbering Plan Administration (“NANPA”) contribution factor, and the annual regulatory fee for Interstate Telecommunications Service Providers (“ITSP”). This information is being filed on 16 days’ notice pursuant to the Federal Communications Commission’s (“Commission”) streamlined filing procedures and includes adjustments consistent with the requirements of Sections 61.41 through 61.49 of the Commission’s Rules. The issuing carriers (“ACS Companies”) for the ACS Companies Tariff FCC No. 1 are listed below:

Company	Study Area	COSA
ACS of Anchorage	Anchorage	AKAN
ACS of Fairbanks	Fairbanks	AKFB
ACS of Alaska	Greatland	AKGL
ACS of Alaska	Juneau	AKJU
ACS of the Northland	Glacier State	AKGS
ACS of the Northland	Sitka	AKSK

In addition, this filing revises ACS Companies Tariff F.C.C. No. 1 to reflect the change in the Federal Universal Service Fund Contribution Factor for the 4th Quarter of 2023.

B. Waivers

The ACS companies list below all currently applicable waivers that permit rate elements different than those specified in 47 C.F.R., Part 69.

The Commission in Order, In the Matter of ACS of Alaska, Inc., ACS of Anchorage, Inc., ACS of Fairbanks, Inc., and ACS of the Northland Inc., Petition for Conversion to Price Cap Regulation and Limited Waiver Relief, DA 09-854, released April 17, 2009, provided the ACS Companies with the requested relief to convert its companies subject to rate-of-return regulation to price cap regulation and establish initial price cap indexes ("PCIs") for price cap baskets.

C. New Services

The ACS Companies have no new services to report for the 2023 Mid-Year Access Charge Tariff Filing.

II. Index and Rate Development

A. Existing Indices

The existing indices are those indices that will be in effect on September 30, 2023. See IND-REF for transmittal numbers under which existing indices became effective.

B. Exogenous Costs

The ACS Companies developed exogenous cost changes according to the Price Cap Rules. These exogenous costs were measured at the 2022 base period

level of operations and apportioned on a cost-causative basis between price cap and non-price services and then among the price cap baskets. To apportion exogenous costs changes between Special Access services remaining in price caps and Special Access services de-tariffed in the Business Data Services Order, a ratio was developed between total Price Cap Special Access revenue prior to the implementation of Business Data Service Order and after the Business Data Service Order was implemented. Exogenous cost changes and allocations are shown in Exhibit EXG.

For each allowed exogenous cost, the Exogenous Cost adjustment (“EXG_Cost_{Adj}”) is equal to the change in the current Price Cap Exogenous Cost (“EXG_Cost_{t-1}”) less the Exogenous Cost already reflected in the Price Cap indices (“EXG_Cost_{t-2}”).

$$EXG_Cost_{Adj} = EXG_Cost_{t-1} - EXG_Cost_{t-2}$$

The current Price Cap Exogenous Cost is calculated by multiplying current year’s 499A Total Revenue (“499A_Total_Rev_{t-1}”) by the current Exogenous Cost Factor (“Exg_Factor_{t-1}”) adjusted by the ratio of the current year’s 499A Price Cap Revenue (“499A_PriceCap_Rev_{t-1}”) to the current year’s 499A Total Revenue (“499A_Total_Rev_{t-1}”). This formula simplifies to the current Exogenous Cost Factor multiplied by the current year’s 499A Price Cap Revenue.

$$\begin{aligned} EXG_{Cost_{t-1}} &= (499A_Total_Rev_{t-1} * EXG_Factor_{t-1}) * \frac{499A_PriceCap_Rev_{t-1}}{499A_Total_Rev_{t-1}} \\ \rightarrow &= EXG_Rate_{t-1} * IS_PriceCap_Rev_{t-1} \end{aligned}$$

The level of exogenous cost already reflected in the Price Cap indices is calculated by multiplying the previous year’s 499A Total Revenue (“499A_Total_Rev_{t-2}”) by the exogenous cost factor included in the price cap indices (“Exg_Factor_{t-2}”). This result is then multiplied by the ratio of the previous

year's 499A Price Cap Revenue ("499A_PriceCap_Rev_{t-2}") to the previous year's 499A Total Revenue ("499A_Total_Rev_{t-2}"). The result is lastly multiplied by the ratio of the current year's 499A Price Cap revenue ("499A_PriceCap_Rev_{t-1}") to the previous year's 499A Price Cap revenue ("499A_PriceCap_Rev_{t-2}"). This formula simplifies to the exogenous cost factor included in the price cap indices multiplied by the current year's 499A Price Cap revenue.

$$\begin{aligned}
 EXG_Cost_{t-2} &= (499A_Total_Rev_{t-2} * EXG_Factor_{t-2}) * \frac{499A_PriceCap_Rev_{t-2}}{499A_Total_Rev_{t-2}} * \frac{499A_PriceCap_Rev_{t-1}}{499A_PriceCap_Rev_{t-2}} \\
 \rightarrow &= (IS_499A_Rev_{t-2} * EXG_Rate_{t-2}) * \frac{IS_PriceCap_Rev_{t-1}}{IS_499A_Rev_{t-2}} \\
 \rightarrow &= EXG_Rate_{t-2} * IS_PriceCap_Rev_{t-1}
 \end{aligned}$$

Thus, the Exogenous Cost adjustment is equal to the current Exogenous Cost Factor ("EXG_Factor_{t-1}") multiplied by the current year's 499A Price Cap revenues ("499A_PriceCap_Rev_{t-1}") less the Exogenous Cost factor already in the Price Cap indices ("EXG_Factor_{t-2}") multiplied by the current year's 499A Price Cap revenue ("499A_PriceCap_Rev_{t-1}"). This simplifies to the changes in the Exogenous Cost factor, i.e. the current Exogenous Cost factor less the Exogenous Cost factor already in the Price Cap indices, multiplied by the current year's 499A Price Cap revenue.

$$\begin{aligned}
 EXG_Cost_{Adj} &= (EXG_Factor_{t-1} * 499A_PriceCap_Rev_{t-1}) - (EXG_Factor_{t-2} * 499A_PriceCap_Rev_{t-1}) \\
 \rightarrow &= (EXG_Factor_{t-1} - EXG_Factor_{t-2}) * 499A_PriceCap_Rev_{t-1}
 \end{aligned}$$

1) Regulatory Fees

Local Exchange Companies are allowed to recover the impact of regulatory fees as an exogenous cost. The calculations of the regulatory fees to be paid in the 2023 tariff year are based on the factor of 0.00540 as referenced in *Appendix B of the Assessment and Collection of Regulatory Fees for Fiscal Year 2023 and Review of the Commission's Assessment and*

Collection of Regulatory Fees, MD Docket No. 23-159 & 22-301, Report and Order and Notice of Inquiry, FCC 23-66, released August 10, 2023.

2) Telecommunications Relay Service Fee

All common carriers providing interstate telecommunications services are required to contribute to a fund designated to support telecommunications relay services. For the 2023 tariff year, the fee will be based on the TRS IPCTS factor of 0.01615 and TRS Non-IPCTS factor of 0.00025 as set forth in *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities*, CG Docket Nos. 03-123 & 10-51, Order, DA 23-577, released June 30, 2023.

3) North American Numbering Plan Administration Fee

In the North American Numbering Plan Administration (“NANPA”) Order, the Commission required all telecommunications carriers to contribute to the cost recovery for numbering administration. To remain consistent in the price cap treatment of such fees, *i.e.*, Regulatory Fee and Telecommunications Relay Services Fee, the NANPA fee is treated as an exogenous change. For the 2023 tariff year, the fee will be based on the factor of 0.0001047 as set forth in Public Notice, “Wireline Competition Bureau Announces the Proposed North American Numbering Plan Administration Fund Size Estimate and Contribution Factor for October 2023 through September 2024,” CC Docket No. 92-237, DA 23-675, released August 10, 2023.

C. CMT Per Line Revenue

Section 61.3(d) of the Commission's Rules, 47 C.F.R. § 61.3(d), sets forth the calculation of the maximum SLC for residential and single-line business customers, non-primary residential, and multi-line business service categories based on the average common line, marketing and transport interconnection

charge revenue (“CMT” revenue) per line. Exhibit CMT depicts the CMT per line calculation.

D. Excluded Services

Exhibit OUTPC provides a detailed listing of those services which are excluded from price cap regulation.

III. USF/ICC Transformation Order

On November 18, 2011, the Commission released the *USF/ICC Transformation Order*, FCC 11-161, which established new rules requiring ILECs to adjust, over a period of years, many of their switched access charges effective on July 1 of each of those years, with the goal of transitioning to a bill-and-keep regime at the end of the transition. The Commission also adopted a transitional recovery mechanism, including a tariffed Access Recovery Charge (ARC), which is intended to partially mitigate the effect of reduced inter-carrier revenues. Per the Pricing Policy Division’s order, DA 23-282, TRP’s were provided by the FCC to determine the amounts eligible for recovery through the tariffed ARC. This section describes the methods the ACS companies used to determine the Eligible Recovery in compliance with Section 51.915(d)(1)(viii) of the Commission’s rules and how it calculated the tariffed ARC rate in compliance with Section 51.915(e) of the Commission’s rules. With this 2023 Mid-Year Access Charge Tariff filing the ACS Companies updates TRP’s impacted by the changes to the exogenous costs.

1) Access Charge & Reciprocal Compensation Reductions

The ACS Companies in its 2018 Annual Access Charge Tariff Filing completed all steps to reduce access charges & reciprocal compensation

rates in compliance with sections 51.907 Transition of price cap carrier access charges & 51.911 Access reciprocal compensation rates for competitive LECs, therefore no ICC or Recip Comp Reduction TRP's are required for this 2023 Mid-Year Access Charge Tariff filing. Amounts calculated in previous year's ICC-Access Charge & Recip Comp Reduction TRP's are summarized in the Eligible Recovery TRP spreadsheet labeled ACSTER23_9-15-2023.xls.

2) Access Recovery Charge (ARC)

The Commission also adopted a transitional recovery mechanism, including an Access Recovery Charge (ARC), which is intended to partially mitigate the effect of reduced inter-carrier revenues. The ARC TRP spreadsheets demonstrate the calculations necessary to arrive at an ARC rate for filing carriers pursuant to section 51.915 of the Commission's rules. This 2023 Mid-Year Access Charge Tariff filing updates the ACS Companies Access Recovery TRP's based on the impact of the changes to exogenous costs.

There are two different ARC TRP spreadsheets. The first is the Rate Ceiling TRP and is being provided in this filing as ACSTARC23_9-15-2023.xls. The second is the Tariff-Rate Comparison TRP and is being provided in this filing as ACSTTRC23_9-15-2023.xls. The Rate Ceiling TRP reflects the ACS Companies compliance with Part 51.915 of the commission rules while the Tariff-Rate Comparison TRP reflects the proposed ARC tariffed rates.

Portions of both the Rate Ceiling TRP (ACSTARC23_9-15-2023.xls) and the Tariff Rate Comparison TRP (ACSTTRC23_9-15-2023.xls) contain information considered to be confidential and that confidential information has been redacted from the Public Version of the filing. The confidential

version has been filed under seal subject to protective order issued in WC Docket No. 23-9, Public Notice DA 23-470.

3) Access Recovery Charge (ARC) True-up

Per 51.915 the ACS companies have included an amount equal to the True-up Revenue for Access Recovery Charges for the year beginning July 1, 2020. This true-up amount was calculated using projected demand minus actual demand for Access Recovery Charges times the tariffed Access Recovery Charge. This calculation was made separately for each class of service and adjusted to reflect any changes in tariffed rates for the Access Recovery Charge. For ease of calculating the true-up ACS used actual billed revenue and demand instead of realized demand and is foregoing an additional eligible recovery that would occur if ACS decreased these amounts by any uncollectible amounts. The ARC True-up is the same amount calculated and as filed in the ACS Companies Annual July 16, 2023 filing, therefore no ARC True-up TRP is required for this 2023 Mid-Year Access Charge Tariff filing.

4) Eligible Recovery

ACS eligible recovery per section 51.915 can be found in TRP ACSTER23.xls and ACETSUMER23_9-15-2023.xls of the ACS filings. The eligible recovery was calculated by using the Non-Calls Study Area Base Factor of 90% applied to the cumulative amount of its reduction in Transitional Intrastate Access Service revenues and Net CMRS Reciprocal Compensation revenues multiplied by the Price Cap Carrier Traffic Demand Factor (31.38%). This 2023 Mid-Year Access Charge Tariff filing updates the ACS Companies Eligible Recovery TRP's based on the impact of the changes to exogenous costs.

The eligible recovery summary file ACSETSUMER23_9-15-2023.xls contains information considered to be confidential and that confidential information has been redacted from the Public Version of the filing. The confidential version has been filed under seal subject to protective order issued in WC Docket No. 23-9, Public Notice DA 23-470.

5) CAF ICC Support

Pursuant to 47 C.F.R. § 51.915(f)(5), beginning July 1, 2019, a Price Cap Carrier may no longer recover any amount related to revenue recovery under this paragraph from CAF ICC Support.
