## I. INTRODUCTION AND SUMMARY

NECA's *2023 Annual Filing*<sup>1</sup> modified company-specific charges, underlying data and resulting estimated Universal Service support (CAF BLS and CAF ICC) amounts, and became effective on July 1, 2023 as scheduled. NECA files further modifications to some tariff charges or universal service support for certain carriers in mid-monthly filings after the annual filing.

This filing is an update to the *October 2023 Filing*.<sup>2</sup> It adds one study area receiving legacy support, and one study area receiving model based support, to the CBOL tariff. Updated cost and corresponding updated revenue requirement shifts from special access to the CBOL category result in a *de minimis* net effect to remaining Common Line and Special Access rates, which continue to target the authorized 9.75 percent rate of return as documented in NECA's *2023 Annual Filing*. This filing is scheduled to become effective on December 1, 2023.

Coincident with this filing, NECA is amending its *2023 Annual Filing* to include an updated CAF BLS Tariff Review Plan (TRP). The CAF BLS TRP has been modified for the revised CBOL demand and associated cost shift described in Sections II and III.

## II. REVENUE REQUIREMENT CHANGES

For those companies participating in NECA's Common Line (CL) pool with updated CBOL demand in this filing, the cost of consumer broadband-only loops is transferred from Traffic Sensitive (TS) special access to the CBOL element in common line consistent with Part 36 and Part 69 cost

allocation rules as directed in the *February 16, 2018 Order*.<sup>3</sup> The net CBOL revenue requirement was added to the CBOL category in CL for any study area with CBOL demand changes since the last filing.

One study area receiving legacy support is being added to the CBOL tariff in this filing. Detailed CBOL cost data are shown in the updated Tariff Review Plan (TRP) CAF BLS data described in Section III.B. There are now 369 NECA CL cost and average schedule pool participants that have opted to have NECA tariff their CBOL rates effective with this filing.

### III. TARIFF RATE AND TRP UPDATES

#### A. CHANGES TO CBOL TARIFF

NECA calculated a new CBOL charge for one study area receiving legacy support in accordance with section 69.132 of the Commission's rules using certified broadband-only data and the *May 23, 2023 BCM Order*<sup>4</sup> which waived the application of the budget control mechanism on CAF BLS support for the 2023/2024 test period. This study area chose to tariff a CBOL charge at the calculated maximum CBOL charge. In addition, one study area receiving model based support chose to enter the CBOL tariff.

The tariffed monthly CBOL charges for study areas in the CBOL tariff range from \$0.00 to \$51.17. In conjunction with prior filings, 141 study areas have elected to have NECA tariff a CBOL charge lower than the maximum calculated CBOL charge. Study areas may be required, however, to impute revenues at the calculated maximum CBOL charge for the purposes of reporting CAF BLS data to USAC and for pool settlement distribution and support true-up calculations. The imputed projected

limited CBOL revenues for 369 study areas currently participating in NECA's CL pool now amount to \$412.08M for July 1, 2023 through June 30, 2024.

The 2023/2024 test period CAF BLS Broadband-only support for 369 common line pool study areas that have currently opted to have NECA tariff their CBOL is projected to be \$713.1M prior to implementation of the \$200/line/month cap.

B. CAF BLS TRP UPDATE

Concurrent with this filing, NECA is amending the *2023 Annual Filing* to include updated Tariff Review Plan (TRP) CAF BLS data. Required carrier certifications of CAF BLS data are contained in Appendix D Exhibit 4.
