ACCESS SERVICE

5. Ordering Switched and Special Access Service (Cont'd)

5.1 Access Service Request Requirements (Cont'd)

5.1.7 Access Order Service Date Intervals (Cont'd)

The Telephone Company shall publish and make available to all customers, upon reasonable request, a schedule of Service Date Intervals applicable for Switched and Special Access Services. The schedule shall specify the services and the quantities of services that can be provided in the Service Date Intervals. Service Date Interval schedules are provided during regular business days at Telephone Company offices at which the customer places an order for Access Service.

Access Services provided in a Service Date Interval will be installed during Telephone Company business days. If a customer requests that installation be done outside of scheduled work hours, and the Telephone Company agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in 8.2. following.

5.1.8 Selection of Facilities For Access Order

When there are analog or digital high capacity facilities to a Hub on order or in service for the customer's use, or a Switched Access Service that is part of a shared use Special Access facility, the customer may request a specific channel or transmission path be used to provide the Switched or Special Access Service requested in an Access Service Request. The Telephone Company will make a reasonable effort to accommodate the customer request.

For all other Access Service Requests, the option to request a specific transmission path or channel is not provided except as provided for under Special Facilities Routing as set forth in 11. following.

5.1.9 Shared Use Facilities

Shared use (i.e., Switched Access Services provided over analog or digital high capacity Special Access facilities) is (C)
allowed. All shared use high capacity facilities will be ordered and provided as Special Access Service. While shared (C)
use is allowed, individual services utilizing these facilities must be ordered either as Switched Access Service or
Special Access Service. When placing the order for the individual service(s), the customer must specify a channel
assignment for each service ordered. Shared use of Switched Access facilities (i.e., Special Access Services (N)
provided over Switched Access facilities) is not allowed. (N)

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.2 Local Transport (Cont'd)

(b) The originating per minute charge(s) apply to:

- all originating access minutes of use;
- less those originating access minutes of use associated with FGA or BSA-A Access Services used to provide Foreign Exchange Service;
- less all originating access minutes of use associated with calls placed to 500, 700, Toll Free, and 900 numbers;
- plus all originating access minutes of use associated with calls placed to 500, 700, Toll Free, and 900 numbers for which the customer furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges, and for which a corresponding reduction in the number of terminating access minutes of use has been made as set forth in (a).

(F) Multiplexing

Multiplexing provides for arrangements to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Monthly rates and nonrecurring charges for multiplexing apply as follows: 1) the DS3/DS1 Multiplexing Charge applies to all DS3 to DS1 multiplexing arrangements that are located in a Telephone Company wire center; and 2) the DS1/Voice Multiplexing Charge applies to all DS1 Entrance Facility and Direct-Trunked Transport circuits that terminate in an analog office and where the multiplexer performs DS1/Voice multiplexing functions. (T) (D)

(G) Dedicated Switched Access

The Dedicated Switched Access Transport Rate is assessed upon customers subscribing to CCS7 Access Service for the use of facilities between the customer's common channel signaling network and the Telephone Company's signaling transfer point. It is a flat rated, distance-sensitive monthly rate. This rate element is further described in 6.2.7.

Effective: April 20, 2024

ACCESS SERVICE**6. Switched Access Service (Cont'd)****6.5 Rate Categories, Applications, and Regulations (Cont'd)****6.5.11 Shared Use Facilities**

When a Special Access service is provided over the same Special Access High Capacity facility through a common interface, the facility will be ordered, provided, and rated as Special Access Service as set forth in 7.2.5 following. Shared use of Switched Access facilities (i.e., Special Access Services provided over Switched Access facilities) is not allowed. (C)

Switched Access Service rates and charges will apply for each channel of the shared use facility that is used to provide a switched access service.

6.5.12 CCS7 Access Service

CCS7 Access Service as described in 6.2.7, connecting a customer's STPs to Telephone Company STPs, requires four STP Port Terminations and four Dedicated Switched Access Facilities. CCS7 Access Service connecting customer Signaling or Service Switching Points to Telephone Company STPs requires two STP Port Terminations and two Dedicated Switched Access facilities.

(A) Dedicated Switched Access

Dedicated Switched Access is composed of two rate elements: Dedicated Switched Access Line (DSAL) and Dedicated Switched Access Transport (DSAT). The DSAL has a nonrecurring charge and monthly recurring charge. The DSAT has only a monthly recurring charge and is charged for on a per airline mile basis.

(B) STP Port Terminations

The STP Port Terminations are charged both a nonrecurring charge and monthly recurring rate.

When a new mated RSTP/STP pair partially or fully replaces an existing mated RSTP/STP pair, Switched Access Ordering charges, DSAL nonrecurring charges, and RSTP/STP Port Termination charges will not apply to service rearrangements to discontinue Dedicated Switched Access connections at the existing pair and reestablish Dedicated Switched Access connections at the new mated RSTP/STP pair.

(C) SS7 Transport

SS7 Transport is provided at a flat rated non-distance sensitive rate as set forth in 6.6.18. The transport rate will apply per segment between each local and/or primary STP location.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Categories, Applications, and Regulations (Cont'd)

7.2.5 Shared Use Analog and Digital High Capacity Services

Monthly charges for a DS1 or DS3 high capacity shared use facility will be apportioned between Switched and Special Access based on the relative proportion of channels used for Switched and Special Access in the following manner. (T)

Rating as Special Access will continue until such time as a portion of the available capacity is used to provide Switched Access Service. As individual channels are activated for Switched Access, monthly charges will be apportioned between Switched and Special Access based on the number of channels used for Switched Access and the number of remaining channels on the Special Access facility according to the following formula: (D)

- 1) the total shared use charge is equal to the Monthly Switched Access Charge times the number of channels used for Switched Access divided by 24 for DS1 or 672 for DS3 plus the monthly Special Access Charge times the number of channels remaining for Special Access divided by 24 for DS1 or 672 for DS3.

(D)

(D)
