8. Term Pricing Plan Vintage Rates**8.1 Rates and Charges****8.1.1 General Regulations**

Term Pricing Plan vintage rates are those rates that apply to existing services provided under a term pricing plan in the event the Telephone Company initiates a rate increase. Vintage rates as set forth following are classified as vintage because the Telephone Company ensures that rates provided under a term pricing plan will not be increased by the Telephone Company, above the term pricing plan rate in effect at the beginning of the customer's term pricing plan.

Customers under their current term pricing plans will continue to pay the rates as shown in the original sections until such time as:

- the effective tariff rate in the original section becomes lower than the vintage rate, or
- the customer's existing term pricing plan expires, or
- the service is terminated by the customer.

In addition, other customer modifications, other than termination, that cause a new rate or term pricing plan to be established will result in the service becoming non-vintage and the rates as specified in the original sections will apply.

8.1.2 Vintage Rates

- (A) The following rates apply to services installed prior to July 2, 2002, unless rates as specified under 7.3.10(F), 20.5.2, 20.5.4, 20.5.7 and 31.3.3(D) are lower, in which case the referenced rates apply.

1. High Capacity Term Pricing Plan (HC-TPP):

<u>Collocation Transport</u>	<u>USOC</u>	<u>3 Year Per Mile</u>
1.544 Mbps	(1H48S)	\$12.60

2. MegaLink Custom Services:**a. Optical Channel Termination - AR - Zone**

ACCESS SERVICE

9. Directory Assistance Access Service9.1 General

Directory Assistance (DA) Access Service provides access to Telephone Company Directory Assistance Service locations (DA locations), use of DA access equipment and use of automated DA to provide telephone numbers or a report that a number is non-published. DA Access Service provides for the ability to terminate calls from a customer's premises to a Telephone Company DA location to obtain telephone listing information.

The following diagrams depict a generic view of the components of DA Access Service and the manner in which the components are combined to provide a complete Access Service.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service9.2 Service Description

- (A) Upon being furnished a city, state and name by the customer's end user, the Telephone Company's automated DA will provide or attempt to provide the telephone number listed in the Telephone Company's DA records associated with the name given. The Telephone Company's contact with the customer's end user is limited to that effort necessary to provide a customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a customer's end user's call to any other location for any purpose other than the provision of DA Service.
- (B) Automated DA will respond to a maximum of three (3) telephone number requests per call to automated DA. A telephone number which is not listed in DA records will not be available to the customer's end user. When the DA location or DA equipment or terminals are out of service due to a Telephone Company equipment failure, or an incorrect number is provided, a credit will apply as specified in Section 9.4.5. Telephone Company DA Access Service is not available for 800-555-1212 traffic.
- (C) The Telephone Company will distribute the calls received over the DA Access Service to automated DA using the DA location access equipment. The Telephone Company will specify the DA location which provides the DA Service for each Numbering Plan Area code (NPA). The DA locations are specified in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4 (NECA No. 4), Wire Center and Interconnection Information. When the Telephone Company determines it necessary to change a DA location, the involved customer will be notified by the Telephone Company six months prior to the change. For such changes, the regulations specified in Sections 2.1.4(F) and (G) will apply.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning9.3.1 Manner of Provisioning

- (A) DA Access Service is a terminating service only. Terminating traffic represents access capacity for all LATAs within the NPA for carrying traffic from the customer to the DA location.
- (B) Transport of Directory Assistance Access Service is provided between the customer's premises and a particular DA location using the Switched Transport facilities set forth in Section 6.5 (Switched Transport). These facilities include:
- Entrance Facility for the transport of the DA Access Service call from the customer's premises to the Telephone Company's serving wire center
 - Direct-Trunked Transport facility for transport of the DA Access Service Call from the Telephone Company's serving wire center to the DA location without routing through an access tandem.
 - Tandem-Switched Transport facility for transport of the DA Access Service Call from the Access Tandem to the DA location. Tandem-Switched Transport includes the switching functions performed by the access tandem.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.1 Manner of Provisioning (Cont'd)

- (C) At the customer's option and where technically feasible, DA Access Service may either be provided over trunk groups dedicated to DA Access Service or it may be combined with the customer's FGB, FGD, BSA-B, or BSA-D Switched Access Service as set forth in (1) and (2) following.

(1) Dedicated Trunk Groups

When the customer requests trunk groups dedicated to DA Access Service, a Direct-Trunked Transport facility is required to transport the DA Access Service Call from the Telephone Company's serving wire center to the DA location. An Entrance Facility for the dedicated trunk groups is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When dedicated trunk groups are requested, address signaling is not provided on either the Entrance Facility or the Direct-Trunked Transport.

When dedicated trunk groups are requested, the Telephone Company may require the customer to order a separate trunk group for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information.

(This page filed under Transmittal No. 1)

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.1 Manner of Provisioning (Cont'd)

(C) (Cont'd)

(2) Combined Trunk Groups

When the customer requests to have DA Access Service combined with FGB, FGD, BSA-B, or BSA-D traffic, a Tandem-Switched Transport facility is required (i.e., DA Access Service can only be combined with tandem routed trunk side Switched Access Services). An Entrance Facility for the trunk groups combining the trunk side Switched Access Service and the DA Access Service is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When DA Access Service is combined with tandem routed trunk side Switched Access Services, wink start-start pulsing signaling is provided at the access tandem switch.

DA Access Service using combined trunk groups allows for transport of the DA Access Service call (1-411, 555-1212 or NPA-555-1212) from the customer's premises to the access tandem to the DA location. However, only NPA codes handled by the DA location served by the access tandem switch will be processed.

(D) Trunk side switching is provided at the DA location.

(E) DA Access Service is ordered under the provisions specified in Section 5 (Ordering for Access Service). Also included in that section are charges associated with ordering DA Access Service.

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.3 Interface Groups

(A) Switched Transport Interface Groups 2 through 9, as specified in 6.7.6 (Interface Groups), are provided for terminating the Directory Transport at the customer's premises. In addition, for each Interface Group, premises interface codes are available as a function of the Telephone Company switch supervisory signaling and Switched Access feature group. These premises interface codes are also specified in 6.7.6.

- When DA Service is provided over FGB, FGD, BSA-B, or BSA-D Switched Access Service, the premises interface code for the combination will be the available premises interface code provided for the FGB, FGD, BSA-B, or BSA-D Switched Access Service ordered by the customer.
- When DA Service is provided over access service trunk groups dedicated for DA traffic, the following premises interface codes are available:

4DS9-15	6EA2-E	4RV2-0
4DS9-31	6EA2-M	4AH5-B
4DS0-63	4SF3	4AH6-C
4DS6-44		4AH6-D
4DS6-27		

(B) Except as specified in 9.4.4 (DA Minimum Period), the interface groups and premises interface codes provided for DA Access Service utilizing Direct-Trunked Transport facilities are subject to the ordering conditions specified in Section 5 (Ordering for Access Service). For purposes of applying the ordering regulations, a DA location is considered to be a customer's end user's serving wire center.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.4 Transmission Specifications

DA Access Service is provided with either Type A or Type B transmission specifications described in 6.7.8 (Transmission Specifications). The specifications for the associated parameters are guaranteed to the DA location, whether routed directly or via an access tandem.

(A) When DA Access Service is provided over trunks dedicated to DA traffic, transmission specifications are provided as follows:

- Type B transmission specifications are provided with interface groups 2 through 9 when routed direct to a DA location

(B) When DA Access Service is combined with a customer's FGB, FGD, BSA-B, or BSA-D Switched Access Service transmission specifications are provided as outlined below:

- Type B transmission specifications are provided with interface groups 2 through 9 when DA Access Service is combined with FGB or BSA-B Switched Access Service
- Type A transmission specifications are provided when DA Access Service is combined with FGD or BSA-D Switched Access Service

(This page filed under Transmittal No. 1)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.6 Testing(A) Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

- loss,
- C-notched noise,
- C-message noise,
- 3-tone slope,
- d.c. continuity, and
- operational signaling.

When the Directory Transport is provided with interface groups 2 through 9, and the transport termination is two-wire (i.e., there is a four-wire to two-wire conversion in Directory Transport), balance parameters (equal level echo path loss) may also be tested.

For DA Transport using a DS1 or a DS3 connection as specified in 6.5 (Switched Transport), acceptance tests will include tests applicable to the connection as specified in Technical Reference TP 76625.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.3 Service Provisioning (Cont'd)9.3.6 Testing (Cont'd)(B) Testing Capabilities

In addition, to the acceptance tests described above, which are included with the installation of service, Additional Cooperative Scheduled Testing and Manual Scheduled Testing are available as described in 13.3.6 (Testing Services for Switched Access Service). For DA Transport facilities, as set forth in 9.3.1 (Manner of Provisioning), Additional Cooperative Testing and Nonscheduled Testing are available as described in 13.3.7 (Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN)).

The following testing capabilities are available on an ongoing basis when DA Access Service is combined with FGB, FGD, BSA-B, or BSA-D Switched Access Service and routed through an access tandem to the DA location:

In the terminating direction, where equipment is available, FGB, FGD, BSA-B, and BSA-D are provided with:

- seven digit access to balance (100 type) test line,
- milliwat (102 type) test line,
- nonsynchronous or synchronous test line,
- automatic transmission measuring (105 type) test line,
- data transmission (107 type) test line,
- loop around test line,
- short circuit test line, and
- open circuit test line.

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations

This section contains the specific regulations governing the rates and charges which apply for DA Access Service. There are three types of rates and charges that apply to the various rate categories of DA Access Service. These are nonrecurring charges, monthly recurring rates (including fixed and per mile rates) and usage rates.

Specific rates and charges are set forth in 9.5 (Rates and Charges). Jurisdictional Reporting Requirements for DA Access Service are as set forth in 2.4 (Jurisdictional Reports). Ordering, rating and billing procedures as specified in 2.6 (Jointly Provided Access Service) will apply for access services where more than one Exchange Telephone Company is involved.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.1 Rate Categories

There are three rate categories which apply to DA Access Service:

- DA Service Call (described in (A) following), and
- Directory Transport (described in (B) following),

In addition, Switched Access nonrecurring charges may apply as specified in 6.8.2 (Nonrecurring Charges).

(A) DA Service Call

The DA Service Call rate category provides for the use of Telephone Company DA equipment and DA operators.

(B) Directory Transport

The Directory Transport rate category provides for the transmission facilities and transport termination used for DA Access Service in transporting a call between the customer's premises and the DA location.

Directory Transport provides a two-way voice frequency transmission path using facilities determined by the Telephone Company, as set forth in 6.5 (Switched Transport), which permit the transport of calls in the terminating direction (from the premises of the ordering customer to the DA location).

(This page filed under Transmittal No. 1)

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.2 Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service.) Nonrecurring charges are applicable for installation of services, installation of DA Transport facilities, installation of features, and for certain service rearrangements. In addition, an Access Order Charge may be applicable as specified in 5.3.1 (Access Order Charges).

The nonrecurring charges which apply for DA Access Service are the applicable nonrecurring charges for Switched Transport facilities and FGB, FGD, BSA-B, and BSA-D Switched Access Service as described in 6.8.2 (Nonrecurring Charges).

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates(A) General

Monthly recurring rates (including fixed and per mile rates) are flat recurring rates that apply each month or fraction thereof that a specific rate category is provided. For billing purposes, each month is considered to have thirty (30) days. Usage rates are rates that apply on a per unit basis (e.g., per call or per call per mile) when a specific rate element is used. Usage charges are accumulated over a monthly period.

(B) DA Service Call

A DA Service Call is a usage rate which applies for each call that has been answered by or forwarded to automated DA. The number of calls answered by or forwarded to automated DA will be accumulated by Telephone Company measuring equipment. No charge applies if the automated DA is unable to provide the requested telephone number.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport

The Directory Transport rate element is composed of the following:

- Entrance Facility
- Direct-Trunked Transport
- Tandem-Switched Transport (which is composed of a Tandem-Switched Directory Transmission rate and a Directory Tandem Switching rate).

Rates for Directory Transport are specific to the subcategory being provided and are described below:

(1) Entrance Facility

A monthly rate applies to each Entrance Facility provided for DA Access Service on either a per point of termination basis (for Voice Grade) or on a per type of connection basis (for DS1 and DS3). The monthly rate is set forth in 6.9.2 (Rates and Charges).

When the Entrance Facility is dedicated to DA Access Service, the monthly rate for the Entrance Facility applies. When DA Access Service is provided over a Switched Transport Entrance Facility that combines both DA Access Service and Switched Access Service, only one Switched Transport Entrance Facility charge applies.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)(2) Direct-Trunked Transport

For each Direct-Trunked Transport facility provided for DA Access Service, the following monthly rates apply:

- a fixed monthly rate
- a monthly rate per mile

on a per connection type basis (i.e., Voice Grade, DS1 or DS3). The monthly rates are set forth in 6.9.2 (Rates and Charges). Mileage measurement is set forth in (4) following.

The monthly rates for Direct-Trunked Transport apply only when the Direct-Trunked Transport facility is dedicated to DA Access Service. When DA Access Service is provided over a Switched Transport Direct-Trunked Transport facility that combines both DA Access Service and Switched Access Service (i.e., some of the channels in the facility transport only DA Access Service and other channels in the facility transport only Switched Access services), only one Direct-Trunked Transport rate applies.

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)(3) Tandem-Switched Transport

Tandem-Switched Transport is provided as four sub-elements:

- Tandem-Switched Directory Transmission
- Directory Tandem Switching
- Dedicated Tandem Trunk Port
- Tandem DA Location Multiplexing

The application of the Tandem-Switched Transport sub-elements is set forth in Sections 9.4.3(C) (a) and (b).

(a) Tandem-Switched Directory Transmission

A per call rate and a per call per mile rate applies to each DA call which has been answered by or forwarded to automated DA when the transport was provided using a Tandem-Switched Transport facility. Mileage measurement is described in Section 9.4.3(C) (4).

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)(3) Tandem-Switched Transport (Cont'd)(b) Directory Tandem Switching

A rate per call applies to each DA call which has been answered by or forwarded to automated DA when the transport was provided using a Tandem-Switched Transport facility.

- Tandem Switched Directory Transport

Tandem-Switched Directory Transmission rates apply to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

- Direct-Trunked Transport

Direct-Trunked Transport rates apply to mileage measured from the serving wire center to the access tandem. The customer can also specify routing to hubbing locations between the serving wire center and the access tandem. If intermediate hubbing is requested, mileage between hubs is also measured as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges). Tandem-Switched Directory Transmission rates are applied to the mileage measured from the access tandem to the DA location. Directory Tandem Switching is also applied for the switching functions of the access tandem.

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.3 Monthly Recurring and Usage Rates (Cont'd)(C) Directory Transport (Cont'd)(3) Tandem-Switched Transport (Cont'd)(c) Tandem DA Location Multiplexing

A per call charge applies for the use of the multiplexing equipment on the DA location side of the access tandem.

(d) Dedicated Tandem Trunk Port

A monthly rate applies, per port, for each dedicated trunk on the serving wire center side of the access tandem.

(4) Mileage

The mileage for Directory Transport is measured from the serving wire center for the premises of the ordering customer to the DA location. These two wire centers may be in different LATAs. In addition, the premises of the ordering customer must be in the LATA where DA Service is requested or in the LATA of the DA location. The measurement will be performed and charges determined as described in 6.8.5 (Determining Switched Transport Mileage and Charges).

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.4 DA Minimum Period

DA Access Service is provided for a minimum period of six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Access Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs less estimated net salvage. Non-recoverable costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs.

Material is filed under authority of Special Permission No. 97-234 of the F.C.C. and withdraws material issued under Transmittal No. 2650 to become effective August 6, 1997

ACCESS SERVICE

9. Directory Assistance Access Service (Cont'd)9.4 Rate Regulations (Cont'd)9.4.5 Credit Allowance for DA Service

- (A) Per call credits will be allowed for DA Service Call, DA Interconnection Charge and Tandem-Switched Transport in the following situations. The customer shall report such calls and include the following information.

(1) Telephone Company Equipment Failure

When a DA call is not completed because the DA location or DA equipment or terminals are out of service due to a Telephone Company equipment failure, a credit allowance is applicable.

The customer shall report such calls and include the DA number dialed, the time of the call and the date of the call. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

(2) Incorrect Number

When automated DA or DA equipment provides an incorrect number for a call, a credit allowance is applicable.

The customer shall report such calls and include the number requested, the number provided and the reason the number provided is incorrect. The number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements10.1 General

This section covers Specialized Services or Arrangements that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government, and includes the Telecommunications Service Priority (TSP) System procedures administered by the Office of Emergency Communications (OEC) and the Federal Government Telecommunications Services (FGTS).*

Some of the services described in this section are provided for command and control communications, state emergency operations centers, communications for national security, emergency preparedness, and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.2 Service Provisioning

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period.

(A) Provisioning Intervals(1) Emergency Conditions

The services set forth in this section will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

- (a) State of crisis declared by the National Command Authorities (includes commitments made to the Office of Emergency Communications in the "National Plan for Emergencies and Major Disasters").
- (b) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad (includes space vehicle recovery and protection efforts).
- (c) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- (d) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.2 Service Provisioning (Cont'd)(A) Provisioning Intervals (Cont'd)(1) Emergency Conditions (Cont'd)

- (e) Political unrest in foreign countries which affect the national interest.
- (f) Presidential service.

- (2) The interval provisions in Section 5 (Ordering for Access Service) will apply when orders for services set forth in this section of the tariff are requested under conditions other than those described in (1) preceding.

(B) Facility Availability

In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service.

(C) Temporary Facility Utilization

The provision of service under emergency conditions may require the availability of facilities, such as portable microwave equipment, which are provided on a temporary basis by the Telephone Company or customer.

(D) Utilization of Government Owned Facilities

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities when necessary to provide service.

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.1 Voice Grade Special Access Service

The provision of T-3 and G conditioned services contemplates station and tandem switching operations, using customer provided equipment, as well as Special Access Service. Separate metallic, telegraph or voice grade services, where required by the customer provided equipment or switching operation, are furnished in accordance with the applicable sections of this tariff.

All Voice Grade Secure Communications provide an approximate bandwidth of 10-50,000 Hertz and can be used to transmit either voice frequency signaling or supervisory tones.

(A) Voice Grade Secure Communications Type I

- Furnished on two-wire or four-wire metallic facilities for two-point secure communications between a customer premises location and an end user's premises.
- The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified following.

T-3 Conditioning - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

15 dB at 10 Hz
13 dB at 100 Hz
9 dB at 1,000 Hz
20 dB at 10,000 Hz
30 dB at 50,000 Hz.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.1 Voice Grade Special Access Service (Cont'd)(A) Voice Grade Secure Communications Type I (Cont'd)

Additional conditioning (available in one or two directions on four-wire facilities only) - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

0 dB at 1,000 Hz
+ 1 dB between 1,000 Hz and 40,000 Hz
± 2 dB between 10 Hz and 50,000 Hz
- (+ means more loss)

(B) Voice Grade Secure Communications Type II

- Furnished on four-wire metallic facilities for duplex operation for two-point secure communications between a customer premises (which is located on an end user's premises) and an end user's premises.
- Services are conditioned as follows:
G-1 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same as Voice Grade Secure Communications Type I services without additional conditioning.

(C) Voice Grade Secure Communications Type III

- Furnished on four-wire metallic facilities for duplex operation for two-point secure communication between a customer premises switch and an end user's premises.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.4 Telecommunications Service Priority (TSP) System

The TSP System is a service, developed to meet the requirements of the Federal Government, which provides the regulatory, administrative, and operational framework for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP System is available for both Switched and Special Access Services, but its applicability is limited to Access Services that the Telephone Company can discreetly identify for priority provisioning and restoring. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

The customer for TSP System service also must be the same customer for the Access Service with which it is associated. The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the Office of Emergency Communications (OEC) in order for the OEC to maintain and administer its overall TSP System. This customer service record information will include only TSP System Authorization Code and Telephone Company Circuit/Service ID.

Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action being taken. Credit allowance for such service preemption shall be made in accordance with the provisions in 2.5.6(E) concerning Temporary Surrender of a Service.

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)

The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a national security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched network through a special code(s) in the Telephone Company's end offices. GETS is activated at the request of the Federal Government or its authorized agent. GETS facilities may not be used for non-emergency government telecommunications, non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowance for service interruption for GETS is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

(A) Alternate Carrier Routing (ACR) Feature

GETS Alternate Carrier Routing (ACR) is an advanced network feature and is available where facilities exist in suitably equipped end offices. The GETS ACR feature provides for the routing of the GETS universal access number to a sequence of GETS carriers. GETS ACR allows NS/EP end users to use the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disasters. GETS ACR provides alternate route capability on calls originated from lines served by end offices equipped with the GETS ACR feature to the GETS universal access number. When the presubscribed carrier is a participating GETS carrier, GETS ACR enables calls first to be routed for completion to the presubscribed carrier of the originating line. When the presubscribed carrier is not a participating GETS carrier, then an office selection table (Ranking Table) determines the GETS carrier. The Ranking Table contains three alternatives for a GETS carrier and is preselected on a per end office basis using data provided by the Federal Government or its authorized agent.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)(B) Calling Party Number (CPN) Overlay Feature

Where technically feasible and facilities permit, the GETS Calling Party Number (CPN) Overlay feature is included with GETS ACR in suitably equipped GETS ACR end offices. The Federal Government or its authorized agent will determine the unique GETS CPN. The GETS CPN Overlay feature allows the network CPN information to be changed from the value of the actual calling party to a unique GETS number for all GETS ACR calls. The unique GETS CPN, not the actual calling party, is passed to the participating GETS carrier.

(C) Reports

There are two monthly reports available with GETS: Call Data Report and Service Control Point (SCP) Data Report.

(1) Call Data Report

The Call Data Report provides call detail associated with GETS ACR usage. The Call Data Report is populated using data from recordings of GETS calls.

(2) Service Control Point (SCP) Data Report

The SCP Data Report tabulates a count of the GETS carrier selection order list sent to the GETS ACR end offices for GETS calls that were processed. This report provides an aggregated total of each of the call categories by end office.

(D) High Probability of Connection (HPC) Feature

GETS HPC distinguishes the priority assigned to the call setup message in the Signaling System 7 (SS7) network. Setup messages associated with calls to 1-710-NCS-GETS would be sent with the highest priority. GETS HPC provides a trunk queuing feature in equipped switches which is invoked any time an Interexchange Carrier (IC) trunk group is busy. The queuing would only be applied to GETS calls and allows GETS users to dial an emergency call one time without having to redial. The call will automatically complete when the first available trunk becomes idle.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)(D) High Probability of Connection (HPC) Feature (Cont'd)(1) GETS HPC Service Features(a) GETS Call Recognition

This feature provides the capability to recognize originating GETS calls from an administratable screen on the called number. The screen will be set on 710 on all switches and on four 800/888 numbers which provide access to GETS on specified switches only. A call recognized as a GETS call is said to be an HPC marked call.

(b) Trunk Group Queuing (TQ)

The feature provides the capability to queue HPC marked calls to specific trunk groups within the routing chain. Only HPC marked calls are allowed to queue.

(c) Exemption From Network Management Controls (EX-NMCs)

This feature provides HPC marked calls exemption from restrictive Network Management Controls.

(2) Reports

Operational Measurement (OM) Report

The Operational Measurement (OM) report provides periodic implementation status updates and ongoing service verification. The data format is in the form of a series of time stamped OM registers for each of the HPC equipped switches.

(E) GETS Egress Queuing (EQ)

GETS EQ is a switch-based feature that provides priority call processing to calls designated as HPC that are terminating on a designated PBX trunk group. GETS EQ extends the functionality of the existing GETS HPC feature to include two way and Primary Rate ISDN which connects a DMS to a PBX.

This feature is available on DMS100 switches with release NA012.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS) (Cont'd)(F) GETS Office Wide Queuing (OWQ)

GETS OWQ is a switch-based feature that provides priority call processing to calls designated as HPC. GETS OWQ enhances the queuing of HPC calls on supported public trunk group types. GETS OWQ extends the functionality of the existing GETS HPC feature on an office wide basis. GETS OWQ will be activated only in the Central Offices with the required generic to support the OWQ feature.

This feature is available on switches with release (i.e., software) NA015, 5E15, and 19.

10.3.7 SBC Federal Access Solutions Transport (FAST) Program (Cont'd)(A) General Description

This section contains regulations, rates and charges applicable to the provision of SBC FAST Program to any customer awarded a contract to provide telecommunications services for the exclusive use of the Federal Government, Agencies of the Federal Government, or authorized agents of the Federal Governments. The SBC FAST Program will allow each of the Federal Government's authorized contractors providing network services under contract to obtain discounted rates for specified services in return for certain term commitments for dedicated Special Access connections to government locations.

(B) Services Available Under SBC FAST Program

SBC FAST Program is provided as a monthly service arrangements with a 3 year service period for the following Services listed below:

Service	General/Basic Description
High Capacity Service	7.3.10 (A)
(1) _	
(1)	
MegaLink Custom Service	20.1
(1)	

⁽¹⁾ Material in this Section has been de-tariffed as required by the Commission upon use of the forbearance relief pursuant to FCC Memorandum Opinion and Order No. 07-180, released October 12, 2007. Terms and Conditions associated with de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program
(Cont'd)(C) Limitations

- (1) For Services ordered under SBC FAST Program,
-
- The following charges will be waived:

- (a) DS1 Channel Termination Nonrecurring Charge
-
- (b) DS3 Channel Termination Nonrecurring Charge
-
- (c) DS3 and DS1 Multiplexing Installation Charge

However, the nonrecurring charges will apply pursuant to the DS1 or DS3 moves, Section 10.3.7.(D) (5) following.

- (2) All other nonrecurring Charges will apply including the Access Order Charge.
- (3) When a rate element is ordered under the SBC FAST Program, that rate element may not be used for non-SBC FAST Program services. Rate elements not included in this plan as specified in rate Section 10.5.8 are not available under SBC FAST Program and must be purchased from the appropriate tariff section.
- (4) Lower speed non-SBC FAST services may occupy a channel of a SBC FAST Program DS1 service as long as the lower speed service is being provided to a SBC FAST Program eligible customer.
- (5) During the term of the selected SBC FAST Program, Telephone Company initiated recurring charges (increases or decreases) will automatically be applied to the monthly charges for the remaining months of the current SBC FAST Program term.
- (6) The monthly recurring rate during the SBC FAST Program term will never exceed the rate in effect at the beginning of the customers SBC FAST Program term.
- (7) The SBC FAST Program cannot be combined with any other tariffed services, discounts, or pricing flexibility contracts, unless explicitly stated in the respective tariff terms and conditions.
- (8) Services receiving term discounts under this plan are excluded from any application of Shared Use⁽¹⁾ provisions in Section 7.2.10 preceding. (C)

- (1) Effective June 1, 2024, neither new nor existing customers will be permitted to create new Shared Use arrangements. In addition, requests to move, add, or change existing Shared Use arrangements will not be accepted. Shared Use arrangements existing prior to June 1, 2024 are otherwise unaffected by this change. ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST)
Program (Cont'd)(D) Terms and Conditions(1) Conversions of FGTS to a new SBC FAST Program

Conversions from FGTS to a new 3-year SBC FAST Program term may be made if the expiration date for the new 3-year SBC FAST Program term is beyond the expiration of the original FGTS being converted and will become effective upon completion of the conversion activity. The rates, terms, and conditions applicable for the new 3-year SBC FAST Program term will be those in effect at the time the conversion is completed. Access Order Charges will apply for conversions of existing FGTS to a new 3-year SBC FAST Program term.

(2) Conversions of existing SBC FAST Program services to a different SBC FAST Program term

At any time prior to the expiration of the SBC FAST Program term, if the SBC FAST Program has not been grandfathered, a conversion may be made to a new 3-year SBC FAST Program term. The SBC FAST Program term must occur between the same two termination points as the original service being converted and will become effective upon completion of the conversion activity. The rates, terms, and conditions applicable for the new 3-year SBC FAST Program term will be those in effect at the time the conversion is completed. Access Order Charges will apply for the conversion of an existing SBC FAST Program term to a new 3-year SBC FAST Program.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program (Cont'd)(D) Terms and Conditions (Cont'd)(3) Upgrading an existing SBC FAST Program to a Higher Speed Service

At any time during the SBC FAST Program term, service may be upgraded to a higher speed service. The new higher speed service must occur between the same two termination points as the original service being upgraded. The new higher speed service must be on a new term contract that has an expiration date beyond the expiration date of the SBC FAST Program term being terminated. The rates, terms, and conditions applicable for the new contract term of the higher speed service will be those in effect at the time the conversion is completed. Nonrecurring installation and ordering charges associated with the higher speed service are applicable.

(4) Conversions from existing Month-to-Month Upgrades

Customers may convert from existing month-to-month service to a new 3-year SBC FAST Program term. If there are no physical changes to service, the Access Order Charge will apply. If physical changes occur, the activity would be classified as a termination of the month-to-month service and installation of a new 3-year SBC FAST Program term. Customer will be responsible for all nonrecurring installation and ordering charges associated with the new SBC FAST Program term.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program (Cont'd)(D) Terms and Conditions (Cont'd)(5) DS1 or DS3 Moves

During a SBC FAST Program term a customer may move one end of a DS1 or DS3 SBC FAST Program Service to another location in the same LATA and keep the DS1 or DS3 SBC FAST Program in force provided the following requirements are met:

- (a) The minimum in-service period at the previous location must have been met. The new location will be subject to a new minimum in-service period;
- (b) The move is accommodated on a single customer order with the stipulation that the Billing Account Number (BAN), the Network Channel Code (NC), Access Customer Terminal Location (ACTL) and the Circuit Id (ECCKT) are provided and are the same as for the existing circuit being moved. Moves to a different wire center may result in change in the application of the rate elements associated with the service and therefore could result in a change in the monthly recurring charges.

If no lapse in service occurs and if the requirements in (a) and (b) as stated previously are met, termination liability will not apply. Nonrecurring Charges and Access Order Charges for the physical move will apply per the following appropriate Installation Charge Tariff Sections at 3 year term plan rates:

- DS1 Section 7.3.10(F) (5), or Section 39.5.2.7(5)
- DS3 Section 20.5.5 and 20.5.7 or Section 39.5.2.12(E) and 39.5.2.12(G)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program
(Cont'd)(E) Termination Liability

When an SBC FAST customer's disconnection is governed by the Federal Acquisition Regulations, then the termination provisions found in the Federal Acquisition Regulations apply.

When SBC FAST customer's disconnection is not governed by the termination provisions of the Federal Acquisition Regulations, a termination charge will be calculated as follows:

(Monthly Recurring SBC FAST rate) X (number of net terminated SBC FAST circuits subject to Termination Charges) X (months remaining in SBC FAST term) X (50.00%).

Example: An agent of the Federal Government disconnects one SBC FAST DS1 in month 30 of the 36 month term. The monthly recurring charge for the DS1 is \$300.00. The reason for the disconnection is the Agent is going to use another company's facilities to provide the Federal Government with service. Termination liability charges will be calculated as follows:

$$\$300.00 \times 1 \times 6 \text{ mos.} \times .50 = \$900.00$$

(F) Expiration of SBC FAST Program

The SBC FAST Program term is not available for renewal. At the expiration of the SBC FAST Program term, the customer may select a new SBC FAST Program term at the prevailing SBC FAST Program rates. If the customer does not wish to purchase a new SBC FAST Program term at the expiration of the term, the customer's service will automatically convert to the current month-to-month or monthly extension rates found in the appropriate tariff section.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations

This section contains information related to the rate elements applicable to Federal Government Specialized Services or Arrangements. Rates and charges associated with these rate elements are listed in 10.5. The rates and charges for certain of these services shall be developed on an ICB basis and shall be consistent with the rates and charges for services offered in other sections of this tariff. Additional rates and charges may be applicable for other services which operate in conjunction with Special Routing Access Service, Telecommunications Service Priority (TSP) System and Government Emergency Telecommunications Service (GETS).

(A) Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

(B) Mileage Application

Mileage, when used for rate application between two serving wire centers or between an end office switch and the customer's serving wire center, shall be determined by the V and H Coordinates Method as set forth in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4 and administered as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges), 7.2.6 (Mileage Measurement) or 20.4.7 (Determining Interoffice Mileage).

(C) Moves

The provisions set forth in 6.8.10 (Moves), 7.2.7 (Moves) and 20.4.12 (Moves) apply to moves involving services provided in this Section.

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(D) Cancellation

A customer may cancel an order for Special Federal Government Access Service at any time prior to notification by the Telephone Company that service is available for the customer's use.

The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of Special Federal Government Access Services.

(E) Special Routing Access Service

The Telephone Company will record Special Routing Access Service Active Mode usage, and will bill the customer in accordance with these records. In addition, a Special Routing Access Service Trunk Usage charge will apply for each hour the service is in the active mode. The hours for each trunk ordered will be summed and then rounded to the nearest hour, except that when the total is less than one hour, one hour will be used to determine the charge.

(F) Telecommunications Service Priority (TSP) System(1) Rate Elements(a) Priority Installation (Provisioning):

The act of supplying telecommunications service to a customer, including all associated transmission, wiring, and equipment, if provided by the Telephone Company, at an earlier time than standard order intervals would allow.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(1) Rate Elements (Cont'd)(b) Priority Restoration Level Implementation
(Assignment):

The act of designating the priority level for the restoration of a particular NSEP telecommunications service.

(c) Priority Restoration Level Change:

The act of changing the priority level assignment for a NSEP telecommunications service. This includes any extension of an existing priority level assignment to an expanded NSEP service.

(d) Priority Restoration Administration and Maintenance:

The act of administering and maintaining the TSP System in such a manner that it corresponds to the OEC data base.

(2) Rate Application

The Priority Installation (PI) charge and the Priority Restoration (either Level Implementation or Level Change) (PR) charge are applied per circuit for Special Access Service and per line or trunk for Switched Access Service. PI and PR apply only one time per circuit or line except when there is subsequent order activity to add legs or lines to the service. One PI or PR will apply each time leg(s) or line(s) are added to an existing TSP System. When an Access Service is ordered with both PI and PR, the nonrecurring charge for PR Implementation applies.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(2) Rate Application (Cont'd)

The Priority Restoration Level Change charge applies when the only TSP System order activity is that of changing priority levels. It applies each time the level is changed to a higher or a lower level.

The Administration and Maintenance charge applies per line or trunk for Switched Access Service and per circuit for Special Access Service. Each leg of a Special Access multipoint service will be treated as a separate circuit and the charge will apply on a per leg basis.

No TSP System charges apply to subsequent order activity that does not affect the TSP System assignment. When the TSP System is revoked, or discontinued, and the associated Access Service is continued in service, no charge applies for such a discontinuance.

(3) Quotation of Rates

When performing Priority Restoration (either Level Implementation or Level Change) and/or Priority Installation of an Access Service, the Telephone Company will attempt to notify the customer regarding certain Access Services where additional labor charges apply, as set forth in 13.4 (Rates and Charges), before the required additional labor is undertaken. The customer, in obtaining a Priority Restoration, recognizes that quoting charges and obtaining permission to proceed with the restoration of certain Access Services may cause unnecessary delays and, as a result, would be contrary to the aforementioned regulations.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(3) Quotation of Rates (Cont'd)

In subscribing to TSP System service the customer recognizes this condition, grants the Telephone Company the right to quote charges after the restoration or installation is completed, and agrees to pay the charges.

(4) Credit Allowance

The credit allowance for service interruption for the TSP System is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit Allowance for Service Interruptions).

(5) Access Order Charges

Access Order Charges as set forth in 5.3.1 (Access Order Charges) apply to the TSP System.

(6) Expedited Priority Installaion (Emergency or Essential)

Regulations, rates and charges are the same as those set forth in 5.3.2(C) (Expedited Order Charge) for the Switched or Special Access Service for which Priority Installation is required.

(7) Utilizing Specially Constructed Facilities for Priority Installation

Regulations, rates and charges are the same as those set forth in this Company's Tariff F.C.C. No. 69 for Special Construction of the facilities for Switched or Special Access Service for which Priority Installation is required.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services (FGTS)*(1) General

This section contains regulations, rates and charges applicable to the provision of FGTS to those Interexchange Carriers who have won the right to provide telecommunications service to the General Services Administration (GSA) and other Government agencies, including the agencies themselves as end users, for the sole use of the GSA and other such agencies. This section of the tariff does not apply to agencies that have not been awarded the special government contract.

Except as specifically noted below, all rules and regulations applicable to the rate elements provided under a monthly service arrangement (as set forth in Sections 7, 19, and 20 of this tariff) apply to those rate elements provided under FGTS. Rate elements not listed in 10.5.5 (Federal Government Telecommunications Service (FGTS)) are not available under FGTS and must be purchased as set forth in Sections 7, 19, and 20 of this tariff. Exceptions and/or additions to these rules and regulations as set forth in this section supersede those in other sections of this tariff.

If the Telephone Company initiates rate changes resulting in a decrease of rates for existing service with a 1 or 3 year service period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1 or 3 year service period will not exceed the original rate for that selected service period. Rate changes may occur as a result of F.C.C. action.

(2) Ordering

FGTS is provided as a monthly service arrangement with a 1 year or 3 year service period (Initial Service Period) for MegaLink Data Service or a 3 year service period (Initial Service Period) for Voice Grade 4 wire Service, High Capacity Service, MegaLink Custom Service, Self-Healing Transport Service and ReliaNetsm Service.

For services ordered under FGTS, only the Channel Termination nonrecurring charges will be waived. All other nonrecurring charges will apply including the Access Order Charge as set forth in Section 5.3.1 (Access Order Charges).

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services
(FGTS) (Cont'd) *(2) Ordering (Cont'd)

When a rate element is ordered under FGTS, that rate element may not be used for non-FGTS services. No portion of a multiplexed rate element (High Capacity - DS1, MegaLink Custom - DS3, STN or ReliaNetsm) may be under FGTS unless the entire rate element is available under FGTS.

(3) Renewal of Service

The customer must provide the Telephone Company with a written notice of intent to renew or extend FGTS no later than 90 days prior to the expiration of the service period.

The customer may elect to renew the FGTS three year service periods only at the FGTS three year rate in effect at the time of renewal.

If the customer elects not to renew FGTS or does not notify the Telephone Company of its intent to renew FGTS, the customer's FGTS rate elements will revert to the monthly rates in effect, as set forth in Sections 7, 19 and 20, at the time the FGTS expires.

(4) Termination Charges

In the event service is terminated prior to the expiration of the Initial Service Period, termination charges will apply with the following exception. No termination charges will apply in the first year of the 3 year service period only, due to conditions in the government FGTS contract. After the first year, termination charges will apply as set forth following.

FGTS services are not subject to a termination liability charge for any services disconnected at the request of the Federal Government during the life of the contract. In the event service is terminated by an Interexchange Carrier termination charges will apply. The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of services provided under FGTS.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(I) Federal Government Telecommunications Service
(FGTS) (Cont'd) *(4) Termination Charges (Cont'd)

If Special Construction applied for the service being terminated, any associated termination charges, as referenced in 5.2.6 (C) (Special Construction), may apply.

(a) Initial Service Period

The termination charge for the Initial Service Period is calculated as follows:

Billed	Months remaining
Termination	
Monthly Rate	X in service period
percentage.	X

Years in Service Period	Termination
Percentage	

1	50%
3	40%

Example: A customer with a \$2,000 monthly rate terminates service with 5 months remaining in a 3 year service period. The termination charge would be calculated as follows:

$$\$2,000 \times 5 \times .40 = \$4,000$$

The termination charge would be \$4,000.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

12. Specialized Service or Arrangements12.1 General Description

Specialized Service or Arrangements are those which are not offered under other sections of this tariff. The facilities utilized to provide these services are of a type normally used by the Telephone Company in furnishing its other services and shall be compatible with other Telephone Company services, and its engineering and maintenance practices. The requested service or arrangement is provided within a LATA and is subject to the availability of the necessary Telephone Company personnel and capital resources.

ACCESS SERVICE

12. Specialized Service or Arrangements (Cont'd)12.3 Rates and Charges (Cont'd)

<u>Case No.</u>	<u>Customer Name</u>	<u>Volume Tier*</u>	<u>Monthly Rate for each Active Port</u>
00-SBC-1	MCI WorldCom Network Services, Inc.	1 - 200,000	\$12.00

Description

Remote Access Service (RAS) provides an ISDN PRI-based data transport service that supports MCI WorldCom Network Services, Inc. with medium to high speed transport capabilities for end user remote dial access to MCI WorldCom Network Services, Inc.'s internet network. RAS terminates in network access servers in Southwestern Bell Telephone Company LLC's central offices, which provide modem functionality. The connections between the central office and MCI WorldCom Network Services, Inc.'s network are not part of RAS. MCI WorldCom Network Services, Inc. will acquire these services separately.

MCI WorldCom Network Services, Inc. agrees to maintain a minimum of 148,800 active ports each month beginning March 27, 2003. MCI WorldCom Network Services, Inc. agrees to pay a monthly rate on a per port basis as outlined in the volume tier listed above. The volume tier is an aggregation of ports ordered by MCI WorldCom Network Services, Inc. through the tariffs and in the territories of Southwestern Bell Telephone Company, LLC, Pacific Bell Telephone Company, The Southern New England Telephone Company, Ameritech Operating Companies, and Nevada Bell Telephone Company, LLC (hereinafter referred to as The Telephone Companies). In the event that MCI WorldCom Network Services, Inc. does not have 148,800 active ports during a given month after March 27, 2003, MCI WorldCom Network Services, Inc. agrees to pay The Telephone Companies the monthly rate for 148,800 ports in each such month regardless of the actual number of active ports. This modified arrangement shall expire as of the end of month twenty four (24) from March 27, 2003 and is limited to 200,000 ports.

1. In the event this service becomes the subject of a general tariff service offering, MCI WorldCom Network Services, Inc. shall be required to either terminate the service or convert the service to the general tariff offering at the rates, terms and conditions provided thereunder; No termination charges shall apply in either instance.
2. The rate and the terms and conditions of this subsection will not change during the term period of this specialized arrangement, unless noted herein or required by the F.C.C. All other tariff changes will apply accordingly.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)

Section 13 addresses Additional Engineering, Additional Labor and Miscellaneous Services (e.g., Easy Access Dialing, Maintenance of Service, Access Service Billing and Information, etc.)

The specific rates and charges for these activities are set forth in Section 13.4 (Rates and Charges).

For the purposes of Section 13 the terms Basic Time, Overtime and Premium Time are defined as follows:

Hourly Rates - Hourly rates are based upon the time of day, day of the week, and whether the work is performed on a Telephone Company Holiday. Hourly rates will apply as defined below for: Basic Time, Overtime, and Premium Time. Charges apply for each half hour or fraction thereof unless otherwise specified herein.

Basic Time - 8:00 a.m. - 5:00 p.m., Monday through Friday (except Telephone Company Holidays). To the extent work continues past 5:00 p.m., time will be billed as Overtime.

Overtime - Outside Basic Time and on Saturdays (except Telephone Company Holidays).

Premium Time - Sundays and/or Telephone Company Holidays.
Telephone Company Holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Day after Thanksgiving, Christmas Day.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.1 Additional Engineering

Additional Engineering will be provided by the Telephone Company at the request of the customer only when:

- A customer requests additional technical information after the Telephone Company has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.7.13, 7.1.8, 19.2.2 and 20.3.1, or
- Additional Engineering time is incurred by the Telephone Company to engineer a customer's request for a customized service as set forth in 7.3 (Service Descriptions) preceding.

The Telephone Company will notify the customer that Additional Engineering Charges will apply before any Additional Engineering is undertaken.

Additional Engineering Charges apply on a first and additional basis for each half hour or fraction thereof.

(This page filed under Transmittal No. 1)

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.2 Additional Labor

Additional Labor is that labor requested by the customer on a given service and agreed to by the Telephone Company as set forth in this Section 13.2.

Types of Additional Labor are:

- Installation, moves, network reconfigurations, and/or other service activities that the Customer requests the Telephone Company to perform outside of Basic Time. (USOC ALH, ALH++)
- Standby includes all time in excess of one-quarter (1/4) hour during which Telephone Company personnel standby at the customer's request. (USOC ALT, ALT++)
- Additional Labor testing with other telephone companies, or repair of facilities which connect to facilities of other service providers which is in addition to the normal effort required to test, maintain, or repair facilities provided solely by the Telephone Company. (USOC ALK, ALK++)
- Other Labor is that Additional Labor not included in the preceding items including, but not limited to, labor incurred to extend the Point of Termination, and labor incurred to accommodate a specific customer request that involves only labor which is not covered by any other section of this tariff. (USOC ALK, ALK++)

The Telephone Company will notify the customer that Additional Labor Charges as set forth in 13.4 (Rates and Charges) will apply before any Additional Labor is undertaken. Additional Labor Charges apply on a first and additional basis for each half hour or fraction thereof unless otherwise specified herein.

A callout is when a Telephone Company employee is called in to work at a time not consecutive with the employee's scheduled work period. Any dispatch that results in a callout will be subject to a minimum charge on an Overtime and/or Premium Time basis of four (4) hours. However, at no time will the customer be charged if trouble is found to be on the Telephone Company's side of the demarcation point.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services13.3.1 Easy Access Dialing(A) General Description

Easy Access Dialing is an arrangement whereby an end user customer (herein referred to as customer) of the Telephone Company or a local service provider that resells services of the Telephone Company for Telephone Exchange Service (either lines or trunks), FGA and BSA-A lines, WATS Access Lines and Plexar lines may select and designate to the Telephone Company an Interexchange Carrier (IC) to access, without dialing an access code, except "1+" for interLATA toll provided by the Telephone Company. This is referred to as the customer's Primary Interexchange Carrier (PIC).

The end user or customer is identified as the person on the account who is responsible for payment of the account or any person contractually or otherwise lawfully authorized to change telecommunications services and/or represent the end user customer.

Each IC has one or more access codes assigned to it for its various types of service. When a customer selects an IC as its primary PIC, only one such code for that IC may be incorporated into the switching system of the Telephone Company. This permits use of the IC's "1+" toll without dialing an access code except "1+".

If a customer wishes to use other services of the same IC or services of a different IC, it will be necessary for the customer to dial the necessary access code(s).

At the time a customer advises the Telephone Company of its PIC, the Telephone Company will use the IC access code for that IC from the designated carrier list unless the customer at that time directs the Telephone Company to use a different IC access code assigned to the customer's chosen IC. The PIC may either be the same IC or different IC.

Interstate intraLATA toll calls, service between points in different states which are in the same Local Access and Transport Area, will be routed to the IntraLATA PIC selected by the customer, subject to the availability of Dialing Parity as implemented in each state.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.1 Easy Access Dialing (Cont'd)(B) PIC Assignments

The Telephone Company will make changes in the customer's PIC assignment pursuant to (1) through (3) following:

(1) New Service Requests

New customers will be asked to select a PIC when they place an order with the Telephone Company for Telephone Exchange Service, FGA, BSA-A, WATS Access Line Service and Plexar Service.

For Telephone Exchange Service, FGA, BSA-A, and WATS Access Line Service, customers may select a separate PIC for each line requested.

For Plexar service, customers may select their PIC for a single Plexar line, multiple Plexar Lines or the Plexar Group. A Plexar Group defines a group of Plexar facilities (i.e., line, trunks, attendant features, etc.) with a common dialing pattern. A customer may have multiple Plexar Groups.

(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.1 Easy Access Dialing (Cont'd)(B) PIC Assignments (Cont'd)(1) New Service Requests (Cont'd)

Any change subsequent to the initial PIC selection will incur Easy Access Dialing Change charges as set forth in Section 13.4.3, following, specific to the line or lines being changed.

New customers may also designate that they do not want a PIC. This choice (No-PIC) is considered a valid PIC selection. Any subsequent changes will incur Easy Access Dialing Change charges as set forth in Section 13.4.3, following, specific to the line or lines being changed.

On all requests for new service, the Telephone Company will notify the customer of the PIC assigned to the relevant line(s).

(2) Existing Service Requests

(a) Customers of existing Telephone Exchange Service, FGA or BSA-A lines, WATS Access Line Service and Plexar Service may request changes to their PIC according to the selection options set forth in (B)(1) preceding (e.g., separate PIC, No-PIC and). For these services, the Telephone Company will make PIC changes based upon the following:

- (1) For customer initiated requests, the Telephone Company will make PIC changes upon notification by the customer of the change desired.
- (2) For IC initiated changes of customer PIC assignments, the Telephone Company will make PIC changes pursuant to an IC-provided list of customers accepted by the Telephone Company under a Limited Blanket Agency Agreement. ICs must obtain a signed Letter of Authorization (LOA) on all their customers' PIC changes.

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.1 Easy Access Dialing (Cont'd)(C) Rate Regulations

- (1) Unless otherwise specified Easy Access Dialing Change charges apply to each PIC selection on Telephone Exchange Service, FGA and BSA-A lines, WATS Access lines and Plexar lines, including changes to or from a No-PIC designation.

Easy Access Dialing Change charges are set forth in Section 13.4.3 following.

(2) Subsequent Selection

Any change to the customer's initial LPIC will result in LPIC Change Charges as set forth in 13.4.3 following.

A non-recurring charge, as set forth in 13.4.3 following, to process a change in Presubscription is bifurcated into two (2) separate non-recurring charges and applies as follows:

- a) A non-recurring charge applies when the request to change Presubscription is submitted through mechanized methods.
- b) A non-recurring charge applies when the request to change Presubscription is submitted through manual methods.

As used above, manual methods are (i) personal interaction between a customer, or a person acting on behalf of a customer, and a Telephone Company employee; and (ii) any written submission from a customer, or a person acting on behalf of a customer, to a Telephone Company service center. Mechanized methods shall include all other methods. If a request utilizing a mechanized method results in manual processing, the mechanized method results in manual processing, the mechanized non-recurring charge shall apply upon completion of the request.

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.1 Easy Access Dialing (Cont'd)(C) Rate Regulations (Cont'd)(9) Interexchange Carrier Pays Billing Option

The Interexchange Carrier Pays (IC Pays) Billing Option is an option that permits an Interexchange Carrier to be charged by the Telephone Company for their end user's PIC change charge when the Telephone Company changes an end user's primary IC assignment.

The PIC change may either be requested via an IC-provided end user or agent list submitted in the Customer Account Record Exchange (CARE) format (IC Pays - Carrier Initiated) or by the end user customer directly to the Telephone Company (IC Pays - Customer Initiated).

ICs that subscribe to "IC Pays - Carrier Initiated" have the option to redirect billing of the PIC change charge on a case by case basis.

For ICs that subscribe to "IC Pays - Customer Initiated", all end user PIC changes to the IC's CIC (and at the IC's option, changes from the IC's CIC to "No PIC") initiated through the Telephone Company will be redirected to the IC.

The IC submitting the PIC change must sign an IC Pays Billing Option agreement with the Telephone Company for either of the IC Pays Billing Options to apply.

When these conditions have been met, the end user customer will not be assessed the Presubscription change charge for the PIC change. The IC participating in the IC Pays Billing Option will be charged the Presubscription change charge per line or trunk as set forth in Section 13.4.3(A) following.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Access Services Billing(A) Access Services Billing Information

Billing for access services is done monthly according to the bill periods set forth in (C) following. Bills for access service are rendered for each Access Customer Name Abbreviation (ACNA), by customer type (access or local), by bill period and by Revenue Accounting Office (RAO). Both a primary bill and a secondary bill are available to the customer as set forth in (1) and (2) following.

Primary and secondary bills are transmitted to the customer's designated billing address according to the type of media selected by the customer.

Charges for Access Services Billing are located in Section 13.4 (Rates and Charges). If charges for Access Services Billing exist in the Telephone Company's Intrastate Access Service Tariffs and its Interstate Access Service Tariff, the total charge to the customer will be calculated based on one half of the intrastate charge and one half of the interstate charge. If charges for Access Services Billing exist only in the Telephone Company's Interstate Access Services Tariff, full interstate charges will apply.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Access Services Billing (Cont'd)(A) Access Services Billing Information (Cont'd)(1) Primary Bill

For access billing, the customer's primary bill may be provided by one of the following media:

- Electronic Data Interchange (EDI)
- electronic data transmission
- CD-ROM
- DVD
- magnetic tape
- paper

Electronic Data Interchange (EDI) is available with detail billing for Switched Access FGA/BSA-A and Special Access billing. For all other feature groups, EDI is available with summary level billing only.

Once billing has begun, the customer may request to change the medium on which the primary bill is provided. The Access Billing Change charge set forth in 13.4 (Rates and Charges) will apply for each request to change the medium on a per billing period per Revenue Accounting Office (RAO) basis.

(2) Secondary Bill

At the customer's request, a secondary bill, in addition to the customer's primary bill, will be provided. Secondary bills will be broken down as described in Section 13.3.3 (A), preceding. Charges for the provision of a secondary bill are set forth in 13.4 (Rates and Charges) following.

The secondary bill will contain detail billing data as a primary bill and may be requested in one of the following media formats:

- electronic data transmission
- CD-ROM
- DVD
- magnetic tape
- paper format

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Access Services Billing (Cont'd)(B) Alternate Bill Media Specifications (Cont'd)(1) Electronic Data Interchange (EDI), Electronic Data Transmission CD-ROM, DVD, and Magnetic Tape (Cont'd)

Primary bills with the EDI medium must have an ACNA and all Billing Account Numbers (BANs) under that ACNA will be provided in EDI format. Detail level billing will be provided for the customer's FGA and Special Access Services accounts. For all EDI BANs that are not FGA or Special Access accounts, billing will be provided at summary level. The Telephone Company will deliver the EDI data to an electronic mail box that is mutually agreed upon by the Telephone Company and the customer. The customer is responsible for retrieving the data and providing the software to access and manipulate the data.

Data provided on CD-ROM and DVD will be provided for use with Windows 3.1 or better, ASCII and Non-compacted. The data will be formatted using industry standards for access services billing.

In addition to the above for CD-ROM and DVD, the following options are available and must be specified by the customer when requesting this media:

- Format:

- Bill Page format (billing data formatted exactly as it is formatted on a paper bill)
- Bill Data Tape Format (billing data formatted exactly as it is formatted on magnetic tape or electronic transmission media).

- Overnight delivery or US Mail

(2) Paper

There are no formatting specifications available for paper format.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Access Services Billing (Cont'd)(C) Change of Access Services Bill Period

Standard Bill Periods for Switched Access Services, Special Access Services, MegaLink Custom Service, Self-healing Transport Network (STN) and Dark Fiber Facility Arrangement are as follows:

Switched Access	FGA / BSA-A	5th of the Month
	FGB / BSA-B	5th of the Month
	FGD / BSA-D	5th and 15th of the Month
Special Access		25th of the Month
MegaLink Custom Service		25th of the Month
STN		25th of the Month
Dark Fiber Facility Arrangement		25th of the Month

The customer has the option to select a bill period other than the standard bill periods listed above for each specific service, with the exception of jointly provided Switched Access Service, set forth in 2.6 (Jointly Provided Access Services). The bill period options available for Switched Access Services, Special Access Services, MegaLink Custom Service, STN and Dark Fiber Facility Arrangements are the 5th, 15th or 25th of the month.

To the extent the Telephone Company can accommodate the customer's request to change an existing bill period, a nonrecurring charge will apply as set forth in (1), (2) and (3) following. The nonrecurring charges are set forth in 13.4 (Rates and Charges). The Billing Account Number (BAN) Administrative Change Charge as set forth in 6.9.4, 7.4(E), 19.4(C), 20.5.5 and 22.2.3, does not apply when a customer requests a change of an existing bill period.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Access Services Billing (Cont'd)(C) Change of Access Services Bill Period (Cont'd)

(1) Switched Access Services - Manual Entry

FGA, FGB, FGD, BSA-A, BSA-B, and BSA-D may be reorganized. However, if a customer has usage which may be billed as set forth in 3.3.4 (Adjustment for Resold MTS and MTS-type Usage) or 6.8.3 (B) (Equal Access Transition Plan) all FGA, FGB and FGD or BSA-A, BSA-B and BSA-D Billing Account Numbers (BAN) for a given Access Carrier Name Abbreviation (ACNA), within a LATA, must be billed in the same bill period.

The nonrecurring charge for FGA and BSA-A is applied per line. For FGB, FGD, BSA-B, and BSA-D, the nonrecurring charge is applied per end office and access tandem.

(2) Special Access Services, MegaLink Custom Service, Self-healing Transport Network (STN) and Dark Fiber Facility Arrangement - Manual Entry

The nonrecurring charge for Special Access Services, MegaLink Custom Service and STN is applied on a per circuit basis. The nonrecurring charge for a Dark Fiber Facility Arrangement is applied on a per strand basis.

(3) Switched Access Services, Special Access Services, MegaLink Custom Service, Self-healing Transport Network (STN) and Dark Fiber Facility Arrangements - Mechanical Entry

A mechanical access services bill period reorganization process is available and may be used for switched and special access services accounts including FGA, FGB, FGD, BSA-A, BSA-B, BSA-D, MegaLink Custom Service, STN, and Dark Fiber Facility Arrangements.

The nonrecurring charge for a mechanical bill period reorganization is applied on a per BAN basis for all service types.

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.5 Registered Jacks - Registration Program

Registered jacks are provided by the Telephone Company to connect Registered Equipment to those services that are subject to the Registration Program as set forth in Technical Reference Publication AS No. 1. Registered jacks are used to terminate services provided by the Telephone Company. For each service provided by the Telephone Company, a specific registered jack has been selected as the standard for the service. This jack will be provided and installed at no additional charge. Other services or facilities, provided either by the Telephone Company or by others, may also be terminated in any spare capacity of the standard jack. There is no charge for the use of spare capacity of the jack.

The customer may procure an additional jack (or jacks) from either the Telephone Company or another vendor for installation on the customer's side of the demarcation point.

The use of jacks is covered in Part 68 of the F.C.C.'s Rules and Regulations. Specific jacks are described in the document on file with the F.C.C. entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configurations Described in Subpart F of Part 68 of the F.C.C.'s Rules and Regulations".

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.6 Testing Services for Switched Access Services

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in 13.4 (Rates and Charges). Other testing services, which are described in 6.7.10 (Testing), are provided by the Telephone Company in association with Switched Access Service and are furnished at no additional charge.

Testing services are normally provided by Telephone Company personnel at Telephone Company locations. However, a customer may request Telephone Company personnel to perform testing services at the customer premises, as set forth in (E) following.

The Testing Services offered under this section of the tariff are made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A) through (E) following.

Testing Services for Switched Access Services (excluding Switched Transport) are comprised of:

- Tests which are performed during the installation of a Switched Access Service, and
- Tests which are performed after acceptance of such access services by a customer, i.e., in-service tests.

These in-service tests may be further divided into two broad categories of tests: scheduled and nonscheduled.

Scheduled tests are those tests performed by the Telephone Company on a regular basis, e.g., monthly, which result in the measurement of Switched Access Service.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.6 Testing Services for Switched Access Services (Cont'd)

Scheduled tests may be performed on:

- An automatic basis (i.e., no Telephone Company or customer technicians involved),
- On a cooperative basis (i.e., Telephone Company technician(s) involved at Telephone Company office(s) and customer technician(s) involved at customer's premises), or
- A manual basis (i.e., Telephone Company technician(s) involved at Telephone Company office(s) and at customer's premises).

Nonscheduled tests are performed by the Telephone Company "on demand", which result in the measurement of Switched Access Services. Nonscheduled tests may involve Telephone Company technicians at Telephone Company offices and at the customer's premises.

For Switched Transport, the optional Testing Services set forth in 13.3.7 (Testing Services for Special Access, MegaLink Custom Service and Self-healing Transport Network (STN)) are also available. Tests for Voice Grade Special Access are available for Switched Transport using voice grade connections, tests for Special Access digital services are available for Switched Transport using DS1 connections, and tests for MegaLink Custom service are available for Switched Transport using DS3 connections.

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.6 Testing Services for Switched Access Services (Cont'd)(A) Additional Cooperative Acceptance Testing

Additional Cooperative Acceptance Testing (ACAT) of Switched Access Services involves the Telephone Company provision of a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests.

Additional Cooperative Acceptance Tests may, for example, consist of the following tests:

- . Impulse Noise
- . Phase Jitter
- . Signal to C-Notched Noise Ratio
- . Intermodulation (Nonlinear) Distortion
- . Frequency Shift (Offset)
- . Envelope Delay Distortion
- . Dial Pulse Percent Break

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.6 Testing Services for Switched Access Services (Cont'd)(C) Cooperative Scheduled Testing

Cooperative Scheduled Testing (CST) to the first point of switching for Switched Access Services (FGB, FGD, BSA-B, BSA-D and Directory Access Service not routed through an access tandem), where the Telephone Company provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests, will consist of quarterly loss and C-message noise tests, and annual balance tests. However, the customer may specify a more frequent schedule of tests. In addition to the loss/noise/balance measurements, the customer may also order, at additional charges, gain-slope and C-notched noise testing.

The Telephone Company will provide, on a quarterly basis, a CST report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

CST is provided as Basic Testing or Additional Testing. Basic Testing is divided into three categories, i.e., 1004 Hz Loss Tests, C-Message Noise Tests and Return Loss (Balance) Tests. An order for testing must consist of, at a minimum, four (4) 1004 Hz Loss Tests per transmission path, four (4) C-Message Noise Tests per transmission path and one (1) Return Loss (Balance) Test per transmission path, per year. Basic Testing is subject to a one year minimum contract period and annually thereafter.

Additional Testing is divided into two categories, i.e., Gain-Slope Tests and C-Notched Noise Tests. Additional Testing may be ordered by the customer 60 days prior to the start of the customer prescribed schedule. The customer may also specify a more frequent schedule of tests 60 days prior to the start of the customer prescribed schedule.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.6 Testing Services for Switched Access Services (Cont'd)(E) Nonscheduled Testing

Nonscheduled Testing (NST) to the first point of switching for Switched Access Services is where:

- The customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent ("automatic testing"), or
- The Telephone Company provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests ("cooperative testing"), or
- The Telephone Company provides a technician at its office(s), and/or at the customer's premises with suitable test equipment to perform the required tests ("manual testing").

Nonscheduled Tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer may require.

(F) Obligations of the Customer

- (1) The customer shall provide the Remote Office Test Line priming data to the Telephone Company, as appropriate, to support AST as set forth in (B) preceding or NST as set forth in (E) preceding.
- (2) The customer shall make the facilities to be tested available to the Telephone Company at times mutually agreed upon.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.7 Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN)

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in 13.4 (Rates and Charges). Other testing services (i.e., Acceptance Testing) are described in 7.1.7, 19.2.1, and 20.3.2 and are provided by the Telephone Company in association with Special Access Service, MegaLink Custom Service and STN are furnished at no additional charge.

Testing services are normally provided by Telephone Company personnel at Telephone Company locations. However, a customer may request Telephone Company personnel to perform testing services at the customer premises, as set forth in (A) and (B) following.

The Testing Services offered under this section of the tariff are made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A) and (B) following.

Rates and Charges for Testing Services for Special Access Service, MegaLink Custom Service or STN apply on a first and additional basis for each half hour or fraction thereof.

In addition, any dispatch that results in a callout of a Telephone Company employee will be subject to a minimum charge on an Overtime and/or Premium Time basis of four (4) hours when the trouble is attributed to a customer request/problem. However, at no time will the customer be charged if trouble is found to be on the Telephone Company side of the demarcation point.

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.7 Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN) (Cont'd)(A) Additional Cooperative Acceptance Testing (ACAT)

When a customer provides a technician at its premises or at an end user's premises, with suitable test equipment to perform the requested tests, the Telephone Company will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade Services, Special Access digital services, MegaLink Custom Service or STN. At the customer's request, the Telephone Company will provide a technician at the customer's premises or at the end user premises.

These tests may, for example, consist of the following:

(1) Voice Grade Services

- VG1 through VG5: Attenuation Distortion, C-Message Noise and Echo Control, or
- VG6 through VG12: Attenuation Distortion, C-Message Noise, Echo Control, Impulse Noise, Phase Jitter, Intermodulation Distortion, Envelope Delay Distortion and Frequency Shift.

(2) Special Access digital services, MegaLink Custom Service and STN

- Additional testing time, e.g. 24 hours, or
- Additional test patterns not defined in Technical Reference Publication 76625, or
- Phase Jitter.

When a customer provides a technician at its premises with suitable test equipment to perform the required tests, the Telephone Company will provide a technician at its office for the purpose of conducting Nonscheduled Testing. At the customer's request, the Telephone Company will provide a technician at the customer's premises. Nonscheduled tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer may require.

(C) Obligation of the Customer

When the customer subscribes to the Testing Service as set forth in this section, the customer shall make the facilities to be tested available to the Telephone Company at times mutually agreed upon.

13.3.8 International Blocking

An optional service available, where facilities permit, in Telephone Company electronic end offices. This service provides end office blocking of direct-dialed 011+ and 101XXXX+011+ calls by routing such calls to a recorded announcement. This service is available for use with line side services located in Section 6 and for line side services offered in the Telephone Company's local or general exchange tariffs that are provided for the provision of telephones to transient members of the public, to transient users of an aggregator's premises or to business subscribers.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.8 International Blocking (Cont'd)

The nonrecurring charge for International Blocking applies on a per line basis and is assessed only when the service is requested subsequent to the installation of the line side Switched Access or exchange service.

13.3.9 Billing Name and Address Service(A) General Description

Billing Name and Address (BNA) Service is provided by the Telephone Company to interstate service providers. BNA Service provides the customer with billing name and address information of an end user in the Telephone Company's billing records. BNA Service is not to be used for purposes other than for billing and collecting the amount due for telecommunication services from the Telephone Company's end user.

The service allows for a customer to submit the end user's ten-digit Automatic Number Identification (ANI) to the Telephone Company mechanically. Mechanized input for BNA Service is provided through electronic data transmission. The Telephone Company, upon receipt of the customer's request, will process the ANI. If the BNA information is available within the Telephone Company's billing records, the Telephone Company will produce a mechanized report of the associated BNA information in either paper or electronic data transmission media.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.9 Billing Name and Address Service (Cont'd) (S)(B) Rate Regulation

This section contains the specific regulations governing the rates and charges that apply for BNA Service. (S)
Specific rates and charges are set forth in 13.4 (Rates and Charges). Jurisdictional Reporting Requirements for BNA Service are set forth in 2.4 (Jurisdictional Reports). (S)

Usage rates apply to BNA Service. Usage rates are rates that apply on a per unit basis, e.g., per request, when a specific rate element is used. Usage charges are accumulated over a monthly period. For billing purposes, each month is considered to have thirty (30) days. (S)

(1) BNA Usage

A BNA Usage rate applies on a per ten-digit ANI request basis. Each request is subject to the BNA Usage rate, regardless if the requested telephone number is available. (S)

Reissued material is filed under authority of Special Permission No. 94-393 of the F.C.C. and is deferred until April 23, 1994.

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.9 Billing Name and Address Service (Cont'd)(B) Rate Regulation (Cont'd)(2) Media Charge

There are two types of medium: Paper⁽¹⁾ and Electronic Data Transmission. The applicable Media Charge will depend upon the media type selected by the customer.

(a) **Paper**

A Paper charge is a usage rate which applies to each mechanized report page distributed to the customer.

(b)

(c) **Electronic Data Transmission**

An Electronic Data Transmission charge is a usage rate which applies per electronic data transmission record transmitted to the customer.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.10 900 Call Restriction

An optional service available, where facilities permit, in Telephone Company electronic end offices. This service provides end office blocking of originating 900 calls, and 976 calls in Texas, by routing such calls to a recorded announcement.

Charges associated with 900 Call Restriction will be waived, on a one-time basis, to subscribers of a new telephone number for a period of 60 days after the new number is effective. For subsequent blocking requests in Arkansas, Kansas, Missouri and Oklahoma, the Telephone Company will assess a nonrecurring charge to the subscriber on a per line basis. Any request by a subscriber to remove 900 Call Restriction must be submitted in writing to the Telephone Company.

900 Call Restriction is provided at no charge, on a one-time basis, to subscribers in Texas. For subsequent blocking requests, the Telephone Company will assess a nonrecurring charge to the subscriber on a per line basis.

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.11 MEGA Bill Service(A) General Description

MEGA Bill Service, an optional bill format service, provides the customer the ability to receive monthly access billing information summarized by account type, Switched, Facility or Dedicated, in a single bill period. The Switched account type includes Switched Access Services, e.g. Feature Group services, Directory Assistance, LIDB and Packet Services. The Facility account type includes Special Access Services, Expanded Interconnection and Switched Transport Entrance Facility and Direct Trunk Transport Facility. The Dedicated account type includes WATS. The Telephone Company will render to the customer a MEGA Bill that will include all accounts for the account type indicated. The MEGA Bill for Switched, Facility or Dedicated accounts are rendered by Access Customer Name Abbreviation (ACNA) by Revenue Accounting Office (RAO).

The Customer Service Record (CSR) will be an option to the MEGA Bill Service at the customer's request. The CSR will contain a list of all the service and equipment the customer has on a given account and their service establishment dates and charges.

(B) Media Specifications

The Telephone Company will provide the customer's MEGA Bill in Bill Data Tape (BDT) format by one of the following media:

- electronic data transmission
- magnetic tape.

BDT format requires the billing data to be formatted exactly as it is formatted on magnetic tape or electronic data transmission media.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.11 MEGA Bill Service (Cont'd)(B) Media Specifications (Cont'd)

The applicable media charge will depend upon the media type selected by the customer. Charges, as specified in 13.4.5(A) (Access Services Billing Information) will apply for the transmission of the selected media in addition to the rates and charges associated with the MEGA Bill Service.

Once billing has begun, the customer may request to change the medium on which the MEGA Bill is provided. The Access Billing Change charge set forth in 13.4 (Rate and Charges) will apply for each request to change the medium on a per billing period per RAO basis.

(C) Change in Existing Access Services Bill Period

The customer will have the option of requesting a MEGA Bill with an existing Access Services bill period. For example, if a customer currently has Switched accounts in three different billing periods, the customer could request a Switched MEGA Bill in each of those existing billing periods and not move any accounts. If the customer does not want to maintain the existing billing periods for MEGA Bill and wants to have all of the bills for the account type from a single billing period, the billing period will be negotiated between the customer and the Telephone Company.

To the extent the Telephone Company can accommodate the customer's request to change an existing bill period, a nonrecurring charge will apply. The nonrecurring charges are set forth in 13.4 (Rates and Charges). The Billing Account Number (BAN) Administrative change charge as set forth in 6.9.4, 7.4(E), 19.4(C), 20.5.5 and 22.2.3, does not apply when a customer requests a change of an existing bill period.

(This page filed under Transmittal No. 1)

Effective: May 1, 2024

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.11 MEGA Bill Service (Cont'd)(D) Rate Regulations

The rates and charges for MEGA Bill Service are assessed per account type (Switched, Facility, or Dedicated) for each ACNA, RAO and bill period. A nonrecurring charge is assessed when the MEGA Bill Service is established and when changes in the customer requirement of an existing MEGA Bill account are requested. Rates and charges for MEGA Bill Service are located in 13.4 (Rates and Charges).

If charges for MEGA Bill Service exist in the Telephone Company's Intrastate Access Service Tariffs and its Interstate Access Service Tariff, the total charge to the customer will be calculated based on one half of the intrastate charge and one half of the interstate charge. If charges for MEGA Bill Service exist only in the Telephone Company's Interstate Access Services Tariff, full interstate charges will apply.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.12 Selective Class of Call Screening (SCOCS)

An optional service available, where facilities permit, in Telephone Company electronic end offices. This service restricts outgoing 1+, 0+ and 0- calls placed over the Telephone Company's network, to only those calls which are charged to a number other than the originating number, i.e., collect or third number billed. Selective Class of Call Screening is available for use with line side General Exchange Tariff services that are provided for the provision of telecommunication services to transient members of the public.

Selective Class of Call Screening is offered in three basic types. The applicable recurring rate and nonrecurring charge will depend upon the type selected. These rates and charges can be found in Section 13.4.15.

(1) Type I, Basic SCOCS

An outgoing 1+ call will not be permitted unless the end user makes arrangements to have the call billed to a called telephone number (Collect) or a third number.

(2) Type II, Collect Only-Inmate Calls

Only an outgoing call billed to a called number (Collect) is permitted.

(3) Type III, Coinless Only SCOCS

An outgoing call will not be permitted unless the end user makes arrangements to have the call billed to a called telephone number (Collect) or a third number.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.13 Answer Supervision-Line Side

An optional service available, where facilities permit, in Telephone Company electronic end offices. Answer Supervision-Line Side provides "off-hook" supervisory signals (battery reversal) to Customer Premises Equipment (CPE). These signals originate from the called party's serving central office (terminating) to a line interface at the calling party's serving central office (originating). This provides the signaling necessary to allow billing to begin when the called station has answered an incoming call.

Answer Supervision-Line Side rates and charges apply per line and consist of a nonrecurring charge and a recurring rate per month. These rates and charges can be found in Section 13.4.16.

ACCESS SERVICE

13. Additional Engineering, Additional Labor, and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.15 Long Distance Trouble Management Services (LDTMS)(A) Service Description

LDTMS enables a participating Interexchange Carrier (IC) to receive, from the Telephone Company, specific trouble ticket information that relates to the IC's service after a trouble report has been initiated by a residential or business customer who is presubscribed or interconnected to that IC's interstate network. Specific trouble ticket information is provided electronically to the participating IC via a mechanized interface.

If, during a telephone contact between the Telephone Company's repair personnel and an IC's end-user customer, it is determined that trouble resides in the IC's interstate network, the end-user customer is informed that the ticket will be delivered to the IC for resolution. Telephone Company personnel will answer all repair calls using the Telephone Company brand name.

LDTMS is only provided for a participating IC's residential and business customers who are also customers of the Telephone Company's local retail services. In addition, only those residential and business customers who are presubscribed or interconnected to the IC for direct 1+ dialing are eligible for this service. LDTMS does not support toll-free or data services.

LDTMS will be provided on a negotiated interval basis, which may include joint-acceptance testing. LDTMS will be offered in all states covered by this tariff. If the IC for the residential or business end-user customer has not subscribed to LDTMS, that end-user customer will be treated in accordance with current operating procedures.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.15 Long Distance Trouble Management Services (LDTMS) (Cont'd)(B) Undertaking of the Telephone Company

The Telephone Company will be responsible for providing the IC all the information needed to establish trouble ticket handoff. The Telephone Company will also control the format of the information that will be made available to the IC.

(C) Obligations of the IC

Each IC will be solely responsible for the development of its own operation support systems that interface with the Telephone Company's trouble management system. Each IC will also be solely responsible for meeting the interface standards and requirements as set by the Telephone Company.

(D) Rate Regulations

A monthly recurring rate will apply to each participating IC for every month or fraction thereof that LDTMS is provided. In addition to the monthly recurring charge, there will be a transaction charge for each ticket that is delivered to the IC's trouble management system. No charges will apply to an IC's residential or business end-user customers. Rates and charges for LDTMS are set forth in Section 13.4 (Rates and Charges) following.

ACCESS SERVICE

13. Additional Engineering, Additional Labor, and Miscellaneous Services
(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.16 Data Trouble Management Services (DTMS)(A) Service Description

DTMS enables a participating Interexchange Carrier (IC) to receive, from the Telephone Company, specific trouble ticket information that relates to the IC's service after a trouble report has been initiated by a business customer who is utilizing that IC's interstate network. This is accomplished by having specific trouble ticket information delivered to the participating IC. The method of trouble ticket delivery will be verbal or faxed to a designated telephone number associated with the IC.

If, during a telephone contact between the Telephone Company's personnel and an IC's end-user customer, it is determined that the circuit is owned by the IC, the end-user customer is informed that the trouble will be reported to the IC for resolution. Telephone Company personnel will answer all repair calls using the Telephone Company brand name.

DTMS is only provided to participating ICs that are customers of the Telephone Company's special access service. Furthermore, DTMS is only available to the IC's end-user business customers who subscribe to the IC for data services, and utilize as underlying transport, the Telephone Company's special access service.

DTMS will be provided on a negotiated interval basis, which may include joint-acceptance testing. DTMS will be offered in all states covered by this tariff. If the IC for the end-user customer has not subscribed to DTMS, that end-user customer will be treated in accordance with current operating procedures.

DTMS will only be made available for initial trouble referrals; subsequent trouble ticket status information must be provided by the IC to the customer.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)}14.1.1 General Description

MicroLink II Service utilizes a switched data network which is commonly known as the packet switching network. The network is shared by all users. However, no physical circuit is established for a customer's data call as it is in the switched voice network.

MicroLink II Service is available to all customers and is provisioned from suitably equipped end offices located within a Primary Market Area (PMA). A PMA is a specified area, within a LATA, established by the Telephone Company for the administration and provision of MicroLink II Service. A description and listing of the PMAs are contained in 14.1.5 (Primary Market Areas).

All customers will be served from the nearest suitably equipped end office within the PMA, whether the customer is located inside or outside of the PMA. Information pertaining to end offices equipped with MicroLink II Service capabilities is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

(1)As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2)As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.1 General Description (Cont'd)

The MicroLink II packet switching service data network utilizes packet switching technology for the transmission of packets of data over digital data facilities using a switched facility for bursty type traffic. MicroLink II Service provides asynchronous⁽¹⁾ and synchronous network transport of data through the packet switching network. The data is separated into discrete segments called packets for high speed transmission through the packet switching network. All packets are interleaved (statistically multiplexed) on the facilities as they are transmitted. These packets may contain up to 256 characters of data. Routing and control information (packet header) is automatically inserted at the beginning of each packet, and error detection information (packet trailer) is automatically inserted at the end of each packet. Complete with this information, the entire packet is routed through the packet switching network to its intended destination.

Error checking is performed on each packet as it is transmitted through the network. If a packet and/or format error is detected, the sending equipment is automatically instructed to retransmit the message.

The major components of the packet switching network are: 1) the Packet Nodes, which perform all of the routing, assembly and disassembly of packets and the conversion of terminal communications into the proper network protocol; and 2) the Communications Links, which are the interoffice facilities which connect the Packet Nodes.

(1) This type of equipment is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.1 General Description (Cont'd)

Customers may access the packet switching network through either a dial up⁽¹⁾ or a dedicated access termination. Customers requiring occasional or infrequent access to the packet switching network may use the Public Dial⁽¹⁾ access termination. Customers requiring moderate to frequent access to the packet switching network may use the Private Dial⁽¹⁾ access termination. Customers requiring frequent to constant access to the packet switching network may use the Dedicated access termination.

Customers must provide Data Terminal Equipment in conformance with the interface specifications as described in Technical Reference TP 76800 (X.25 and X.75 Protocol).

(1) This element or function is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.2 Access Termination Descriptions

The Access Termination provides access for the customer to the MicroLink II network. There are three types of Access Terminations: Public Dial⁽¹⁾, Private Dial⁽¹⁾ and Dedicated Access. These Access Terminations and their available protocols are described below.

(A) Public Dial⁽¹⁾

The Public Dial Access provides the capability to dial into the packet switching network through the use of the end user's local asynchronous exchange line.

Public Dial Access allows the customer access into the packet switching network by dialing a unique telephone number designated for the packet switching network within a given geographic area within the customer's LATA.

Public Dial Access asynchronous termination provides for data transmission speeds up to 9.6 kbps and is available with non-pollled asynchronous protocol or X.PC protocol.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.2 Access Termination Descriptions (Cont'd)(B) Private Dial⁽¹⁾

Private Dial Access provides the capability for the customer to dial a unique telephone number designated for the customer's exclusive use for the packet switching network within a given geographic area within a customer's LATA. Private Dial Access provides for data transmission speeds up to 9.6 kbps. The Private Dial Access asynchronous termination is available with non-pollled asynchronous protocol or X.PC protocol; and synchronous termination is available with 3270 bisynchronous protocol, 3270 SDLC protocol or X.25 protocol.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 is obsolete and limited to existing installations, at existing locations, for existing customers.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.2 Access Termination Descriptions (Cont'd)(C) Dedicated Access

Dedicated Access is provided through a dedicated channel from the customer's premises to a port on the packet switching network at 1.2⁽¹⁾, 2,4⁽¹⁾, 4.8⁽¹⁾, 9.6 and

56.0 kbps data transmission speeds. The Dedicated Access asynchronous termination⁽¹⁾ is available with either the polled protocol or the non-polled asynchronous protocol and the synchronous termination is available with 3270 bisynchronous protocol⁽¹⁾, 3270 SDLC protocol⁽¹⁾, X.25 protocol⁽²⁾, or X.75 protocol in suitably equipped end offices.

The dedicated channel provides the connection between the customer's premises and the Telephone Company's packet switching network for the Dedicated Access Termination. For analog transmissions⁽¹⁾, the dedicated channel is provided as a Special Access Voice Grade circuit as specified in Section 7 (Special Access Service). For digital transmissions, the dedicated channel is provided as a Special Access MegaLink Data or DovLink^{sm(1)} channel also as specified in Section 7. The applicable rate elements are a Channel Termination charge, MegaLink Data or DovLink^{sm(1)}, between the customer premises and its serving wire center and Optional Features and Functions charges, where applicable. When a customer's end office is not equipped with MicroLink II Service capabilities, the customer will be served from the nearest suitably equipped end office within the PMA. When a customer is located outside of the PMA, the Channel Mileage rate element will be charged for transport to the nearest end office within the PMA. This charge is in addition to the Channel Termination and Optional Feature and Function rate elements. Rates and Regulations for Voice Grade, MegaLink Data and DovLink^{sm(1)} channels are contained in Section 7 (Special Access Service).

- (1) This element or function is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.2 Access Termination Descriptions (Cont'd)(C) Dedicated Access (Cont'd)

X.75 Protocol is available only on Synchronous Dedicated Access Terminations. Also known as an X.75 Gateway, Synchronous Dedicated Access Terminations with X.75 Protocol provide for interconnection of packet switched data sessions between MicroLink II Service and another packet switching network. When ordering an X.75 Gateway, the customer must specify the Interexchange Carrier to which the X.75 Gateway is connected or, in the alternative, specify the means by which the packet switched data is transported to another state.

The access code for all X.75 Gateways is the Data Network Identification Code (DNIC). These access codes will be the assigned access numbers for all X.75 Gateways provided to the customer by the Telephone Company. The customer is responsible for all charges associated with sessions which traverse the X.75 Gateway.

Packet switching traffic, in the originating direction, may be used to access any DNIC connected to the MicroLink II packet switched network via an X.75 Gateway. In the terminating direction, sessions may not be completed to interstate or intrastate/interLATA X.75 Gateways.

(1)As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2)As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.3 Miscellaneous Service Elements

The following are descriptions of MicroLink II miscellaneous service elements.

(A) Rearrangement of User Facilities

User Facilities establish the Protocol parameters of an Access Termination and must be agreed upon by both the customer and the Telephone Company at the time service is ordered as set forth in 5.2. Rearrangement of User Facilities are those changes or rearrangements made to these facilities subsequent to the installation of the Access Termination and Protocol. The application of nonrecurring charges for Rearrangement of User Facilities is described in 14.1.6(A) (3) (c) (Service Rearrangement) and specified in 14.4 (Rates and Charges). Nonrecurring charges for any other rearrangement of the customer's services or features are specific to the service or feature being rearranged and are described in 14.1.6(A) (3) (c) (Service Rearrangement) and specified in 14.4 (Rates and Charges). User facilities are described in Technical Reference TP 76800, TP 76810 and TP 76820 and Technical Publication TR-TSY-000885 and TR-TSY-000301.

(1)As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2)As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.3 Miscellaneous Service Elements (Cont'd)(B) Call Establishment

Call Establishment provides for the Network Control Center to establish routing of a call through the packet switching network. Call Establishment is applicable to all MicroLink II access customers. Private Dial⁽¹⁾ and Dedicated Access customers who order the Permanent Virtual Circuit Feature will not incur a Call Establishment charge.

(C) Character Transmission

Character Transmission provides for the transport of data through the packet switching network. The Character Transmission charge is applicable to all MicroLink II usage and will be measured on a per kilosegment basis.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.3 Miscellaneous Service Elements (Cont'd)(D) User Identification⁽¹⁾

Provides for user identification and validation for system security. User Identification is required at log-on to verify user access to the common control network facilities. There are two types of User Identification:

(1) Network Terminating Number (NTN)

A station number used to identify the private dial and dedicated access users' access stations connected to the packet switching network.

(2) Network User Identification (NUI)

NUI is an alphanumeric code used by the Public Packet Switched Network (PPSN) to identify customers for billing of originating calls. It is entered as a string of alphanumeric characters for validation. Validation of the NUI authorizes usage of the PPSN and usage of services and features that the customer has subscribed to in association with the NUI. The customer is responsible for all charges applied to his NUI. Customers can have one or multiple NUIs.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements

The following are descriptions of various features and Basic Service Elements (BSEs) that are available in addition to the standard features provided with MicroLink II Service.

(A) Customer Alerting⁽¹⁾

This BSE provides a customer the capability of activating and deactivating an alerting tone on subscriber lines served from suitably equipped end offices within a PMA. The alerting tone is provided in the form of an intermittent dial tone (Message Waiting Indicator) and notifies the subscriber that some type of action is warranted, i.e., a message is waiting for retrieval.

Customers ordering this BSE will have their User Identification(s) entered into a restricted user group within the MicroLink II packet switching network. Only those customers with User Identification(s) residing in the restricted user group will be able to activate or deactivate the Message Waiting Indicator on end user lines. The Customer Alerting BSE shall be used to activate and deactivate an alerting tone on the customer's subscribers' line only.

This BSE is available only with asynchronous and X.25 protocols.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004 MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements (Cont'd)(B) Fast Select

This BSE allows limited amounts of customer specific data to be sent and received during the call set-up and tear down phase and is supported only on X.25 and X.75 protocols.

(C) Menu Server⁽¹⁾

This BSE provides the option of accessing destinations predetermined by the customer in the packet switching network via a menu.

(D) Packet Call Redirection

This BSE provides redirection of incoming calls to a secondary station on the network under conditions predetermined by the customer.

(E) Packet Direct Call⁽¹⁾

Automatically establishes a virtual circuit to an address in the network predetermined by the customer for calls placed without an address. This feature is available only with private dial and dedicated access.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements (Cont'd)(F) Packet Hunt Group⁽¹⁾

This BSE provides a grouping of direct access interfaces that can be called by indicating a single called address or one of several called addresses that apply to the entire group of interfaces. The network hunts for an available logical channel on the group of interfaces.

(G) Permanent Virtual Circuit

Allows a customer to establish a dedicated virtual circuit between his location and a specified location. This eliminates the need to build a virtual circuit prior to each transmission. The Permanent Virtual Circuit simulates a dedicated two-point circuit. This feature is available only with private dial⁽¹⁾ and dedicated access.

(H) Polled Protocol⁽¹⁾

Provides systematic contact between a master computer and a terminal or another computer in the appropriate syntax (i.e., header structure), semantics (i.e., actions and reactions) and timing (i.e., relative ordering and timing of events) where the master computer systematically polls a terminal or another computer to transmit data. Polling is available with dedicated access only. Protocols that require this feature are polled asynchronous, 3270 bisynchronous and 3270 SDLC.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements (Cont'd)(I) Recognized Private Operating Agency (RPOA)
Preselection⁽¹⁾

RPOA Preselection provides the customer with the ability to designate to the Telephone Company one primary packet internetwork provider for internetwork calls. The primary packet internetwork provider may be overridden, and an alternate packet internetwork provider selected, by the customer for any call. If RPOA Preselection is not subscribed to, the customer must choose a packet internetwork provider for each internetwork call.

(J) Extended RPOA Selection⁽¹⁾

Extended RPOA Selection provides the customer with the ability to select one or more packet internetwork providers for each internetwork call, thereby establishing the routing for a particular call. Selection of packet internetwork provider(s) via Extended RPOA Selection will be made on a per call basis and is supported only on X.25 interfaces.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements (Cont'd)(K) Reports

Provided on a monthly basis, reports are sent via first class U.S. Mail Service unless otherwise agreed upon by the customer and the Telephone Company. There are three types of reports available.

(1) Detailed Report

This BSE provides information such as call set-ups, connect time and kilosegments transmitted and received for every session per customer account. Available only on paper.

(2) Magnetic Tape Report⁽¹⁾

This BSE provides information such as call set-ups, holding time and kilosegments transmitted and received for every session per customer account. Available only on magnetic tape.

(3) Summary Report

This BSE provides a monthly total of information such as call set-ups, holding time and kilosegments transmitted and received by either User identification or originating city. Available only on paper.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.4 Features and Basic Service Elements (Cont'd)(L) Restricted User Group⁽¹⁾

This BSE allows a customer to preselect a specific set of other customers with whom to communicate privately. Customer access lines in a restricted user group can only communicate with other access lines in that user group.

(M) Reverse Charge Acceptance⁽¹⁾

This BSE allows acceptance of MicroLink II Service charges by the terminating customer. The terminating customer agrees to pay all applicable MicroLink II usage charges incurred by the originator of the call.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.5 Primary Market Areas

MicroLink II Service is provisioned from suitably equipped end offices located within a Primary Market Area (PMA). A PMA is a specified area, within a LATA, established by the Telephone Company for the administration and provision of MicroLink II Service. The specified areas consist of one or more exchanges and/or zones containing end offices suitably equipped for the provision of MicroLink II Service capabilities. One or more PMAs can be located within a LATA. Following is a listing of PMAs and the LATAs in which they are located. A listing of the inclusive exchanges and/or zones is located in the Telephone Company's local and/or general exchange service tariffs. These tariffs are on file with the respective state commissions. Upon request, the Telephone Company will provide the customer with the appropriate sections of the local and/or general exchange service tariffs which contain the exchanges and/or zones which comprise the Primary Market Areas.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations

Specific rates and charges are set forth in 14.4 (Rates and Charges).

The rates and charges for MicroLink II Service are in addition to the established monthly recurring and nonrecurring charges applicable to services terminated to or used in conjunction with MicroLink II Service.

Jurisdictional reporting requirements are set forth in 2.4 (Jurisdictional Reports). Ordering provisions are contained in Section 5 (Ordering for Access Services).

(A) Description and Application of Rates and Charges

There are three types of rates and charges that apply to MicroLink II Service. These are monthly recurring rates, usage rates and nonrecurring charges. These rates and charges are applied differently to the various rate elements as set forth in 14.4 (Rates and Charges). For billing purposes, each month is considered to have 30 days. Usage charges associated with the Public Dial⁽¹⁾ and Private Dial⁽¹⁾ access terminations may be billed on a reverse charge or a sent-paid basis.

(1) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(2) Usage Rates

Usage rates are rates that apply on a per minute of use⁽¹⁾, per kilosegment, or per call set-up basis when a specific rate element is used.

Minutes of use⁽¹⁾, kilosegments, and call set-ups are accumulated over the billing period. For purposes of billing, all fractional minutes of use⁽¹⁾ will be rounded to the nearest minute⁽¹⁾, and all fractional kilosegment usage will be rounded to the nearest kilosegment.

Measurement of connect time for Public Dial Access minutes of use is a function of the packet switching network.⁽¹⁾ Measurement begins when the host destination provides acknowledgment by returning a call set-up packet to the end user's node. Measurement ends when the network receives a clear confirmation acknowledgment from the host's or end user's node, whichever is recognized first.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service). Assessment of nonrecurring charges for MicroLink II Services are based upon whether the specific work activity was requested on an Initial Order or on a Subsequent Order.

(1) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)

An Initial Order is an access order that establishes a specific Access Termination and Protocol within a LATA for a particular customer account. All work activity associated with the initial establishment and installation of a specific Access Termination and Protocol will be considered part of the Initial Order. Any request to change or rearrange an existing Access Termination and Protocol or its associated features, BSEs and functions or to add another Access Termination and Protocol of the same type within the LATA will be treated as a Subsequent Order.

The nonrecurring charges that apply for installation of MicroLink II Service are described in (a) and (b) following. Application of nonrecurring charges for service rearrangements is described in (c) following.

- (1) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (2) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)

Certain features, BSEs and functions also have separate installation nonrecurring charges as described in (b) following.

(a) Installation of Service

The installation charge for the MicroLink II Dedicated Channel are those installation charges which apply to a Voice Grade Channel⁽¹⁾, for analog transmissions⁽¹⁾, and the MegaLink Data channel, for digital transmissions, as specified in Section 7 (Special Access Services).

For all other Access Terminations, an installation charge is applicable on a first and additional basis.

If a customer orders multiple Access Terminations of the same type on the same Order, the first Access Termination for a specific Protocol is assessed the "first" installation charge. Each additional Access Termination for the same Protocol is assessed an "additional" installation charge.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)(a) Installation of Service (Cont'd)

The installation charge for the User Identification⁽¹⁾ is applicable for each Initial and Subsequent Order.

If a customer orders multiple User Identifications⁽¹⁾ on the same Access Order, the first User Identification⁽¹⁾ is assessed the "first" installation charge and each additional User Identification⁽¹⁾ is assessed the "additional" charge.

In addition, when a customer places a Subsequent Order to reissue, change or add additional User Identification(s)⁽¹⁾, a subsequent nonrecurring charge is assessed. This subsequent nonrecurring charge is applicable on a first and additional basis, as described above.

(b) Installation of Features and BSEs

Application of nonrecurring charges for features and BSEs is dependent upon the feature or BSE ordered.

(1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.

(2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)(b) Installation of Features and BSEs (Cont'd)

A nonrecurring charge applies each time the following BSEs are provided:

- Detailed Report
- Magnetic Tape Report⁽¹⁾
- Summary Report

For all other features and BSEs, nonrecurring charges are assessed on a first and additional basis. When multiple features and BSEs are requested for a like Access Termination and Protocol on the same Access Order, nonrecurring charges are assessed as follows:

For each of the following features and BSEs, the "first" nonrecurring charge is assessed per feature or BSE ordered. For each additional request of the same feature or BSE, the "additional" nonrecurring charge applies.

- Menu Server⁽¹⁾
- Packet Hunt Group⁽¹⁾
- Polled Protocol⁽¹⁾
- RPOA Preselection⁽¹⁾
- Restricted User Group⁽¹⁾

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)(b) Installation of Features and BSEs (Cont'd)

For the following features and BSEs, nonrecurring charges apply only when they are installed for existing Access Terminations and Protocols. The feature or BSE with the highest nonrecurring charge is assessed the "first" charge and the remaining features are assessed the "additional" charge associated with the specific feature(s) or BSE(s) being ordered.

- Fast Select
- Packet Call Redirection
- Packet Direct Call⁽¹⁾
- Permanent Virtual Circuit
- Extended RPOA Selection⁽¹⁾
- Reverse Charge Acceptance⁽¹⁾

For the Customer Alerting BSE⁽¹⁾, a nonrecurring charge applies when the BSE is installed within a PMA.

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)(c) Service Rearrangement

A service rearrangement is a change to the existing MicroLink II Service. Nonrecurring charges for service rearrangements apply to those additions, changes or rearrangements made to the service subsequent to the installation of the service. Nonrecurring charges for additions, changes or rearrangements of the features or BSEs for an existing service are specific to the feature or BSE being added, changed or rearranged. Nonrecurring charges for service or feature or BSE rearrangements are applied on a first and additional basis as described in 14.1.6(A) (3) (a) (Installation of Service) and 14.1.6(A) (3) (b) (Installation of Features and BSEs) and are specified in 14.4 (Rates and Charges). Administrative changes will be made without charge(s) to the customer. These administrative changes are specified in 6.7.2(D) (1) (Nonrecurring Charges for Service Rearrangements) and where noted in 7.2.4(D) (Service Rearrangements).

(1) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(1) (2)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(A) Description and Application of Rates and Charges
(Cont'd)(3) Nonrecurring Charges (Cont'd)(c) Service Rearrangement (Cont'd)

Nonrecurring charges apply for Rearrangement of User Facilities on a first and additional basis as follows: the first User Facility being rearranged is assessed the "first" charge and each additional User Facility being rearranged on the same Access Order is assessed the "additional" charge. When Rearrangement of User Facilities is requested on the same Access Order as a rearrangement to the associated Access Termination, only the nonrecurring charges for the Access Termination will apply. Rearrangement of User Facilities is described in 14.1.3(A) (Rearrangement of User Facilities).

A change in the physical location of the point of termination at either the customer's premises or the end user's premises will incur nonrecurring charges as specified in 14.4 (Rates and Charges).

All other changes to existing services will be treated as a discontinuance of the existing service and an installation of a new service. The nonrecurring charges described in (a) preceding will apply for this work activity.

(1) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(2) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

14. Packet Service (Cont'd)14.1 MicroLink II Service^{(2) (3)} (Cont'd)14.1.6 Rate Regulations (Cont'd)(B) Minimum Period Charges

MicroLink II Service features, BSEs and functions are provided for a minimum period of one month. When a feature, BSE or function is disconnected prior to the expiration of the minimum period, monthly charges are applicable for the balance of the minimum period. If a feature, BSE or function is disconnected after the minimum period, monthly charges will be based on the actual number of days the feature, BSE or function was furnished, as set forth following. For the purpose of administering this regulation, with respect to the determination of charges for a fractional part of a month, every month is considered to have 30 days.

The minimum period charge for usage rated services applies for the total usage provided for the following elements: Call Establishment, Character Transmission and Public Dial Access⁽¹⁾, when applicable, and is the sum of the charges as set forth in 14.4 (Rates and Charges).

- (1) This element is obsolete and limited to existing installations at existing locations, for existing customers, as of September 30, 1997 and will no longer be available after April 1, 1999.
- (2) As of March 9, 2002 MicroLink II service utilizing the X.25 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.
- (3) As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

15. Operating Territory of the Telephone Company15.1 Operating Territory

The operating territory of the Telephone Company is comprised of geographic areas for which the Telephone Company is certified to operate in the states of Arkansas, Kansas, Missouri, Oklahoma and Texas. The geographic areas for which the Telephone Company is certified are specified by identification of the exchanges established by the Telephone Company for the administration of communications service. Exchanges are related to the central office(s) and their corresponding NXX code(s). The NXX codes assigned to the Telephone Company's central offices are specified in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

15. Operating Territory of the Telephone Company (Cont'd)15.2 Competitive and Non-Competitive Counties(A) General

Counties and county-equivalents within the Telephone Company's operating territories are either Competitive or Non-Competitive for the purposes of pricing Special Access services, as provided in Sections 7, 18, 19, 20 and 31. The application of the Competitive and Non-Competitive designations is described in Sections 7.2, 18.1.5, 19.3, 20.4 and 31.3.2.

Rates and charges for Competitive rate elements are provided in Section 39.5.2, and for Non-Competitive rate elements, the rates and charges are provided in Sections 7.3 and 20.5.

For Special Access Services, as provided in Sections 7 and 20, rates and charges for End User Channel Terminations and their applicable optional features⁽²⁾ in Non-Competitive Counties are the Price Cap rates.⁽¹⁾

(B) Rate Regulations

The application of rates and charges for Special Access services, as provided in Sections 7, 18, 19, 20 and 31, is based upon the county classification as Competitive or Non-Competitive, as provided in Sections 7.2, 18.1.5, 19.3, 20.4 and 31.3.2. A list of Competitive and Non-Competitive Counties is located in Sections 15.2(C) and (D).

⁽¹⁾ Until February 1, 2018, End User channel terminations and their optional features that had not qualified for Phase II, Level 2 pricing flexibility prior to June 1, 2017, will be rated at the price cap rate regardless of the status of the county in which the applicable wire center is located.

⁽²⁾ Optional features for End User channel terminations includes all optional features in Section 7.3 and 20.5, except for the Loop Transfer Arrangement.

The following list matches the Telephone Company's Basic Service Element (BSE) names to the industry standard names for each BSE.

<u>Telephone Company Names</u>	<u>Generic Name of ONA Service</u>
Network Reconfiguration ⁽¹⁾	Network Reconfiguration ⁽¹⁾

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service⁽¹⁾18.1.1 General

Network Reconfiguration Service is a BSE that permits customers to access a database maintained by the Telephone Company to reconfigure their dedicated network. Customers gain database access through the use of a terminal on their premises without going through normal service order procedures.

Network Reconfiguration Service allows customers direct access to, and control of, their 45 mbps services, 1.544 mbps services, subtending channels, and Internodal Facilities (the facilities that connect a Digital Cross-Connect System in one central office with a Digital Cross-Connect System in another central office) without going through normal service order procedures. Network Reconfiguration Service utilizes a central office cross-connect system for the remote reconfiguration of these channels. Customers can reconfigure their dedicated service network from their premises, or they can have the Telephone Company perform the reconfigurations.

Customers will access Network Reconfiguration Service by using a terminal on their premises in conjunction with dedicated lines provided for in Sections 7 and 20, or in conjunction with a local telephone line with a seven digit telephone number.

Network Reconfiguration Service is available at those Hubs where Telephone Company cross-connect systems are located. Network Reconfiguration Hub designations are found in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.2 Network Reconfiguration Options

Two network reconfiguration options are available to Network Reconfiguration customers:

- On-demand
- Reservation

The on-demand option will make immediate changes to the network, while the reservation option will be executed at a specified time designated by the customer. Both types of reconfigurations are available whether the customer performs the reconfigurations or requests the Telephone Company to perform them.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.3 Network Reconfiguration Functions

Network Reconfiguration Service provides the following functions:

(A) Routing/Rerouting

The routing feature allows customers to select the routes that will be used to connect their circuits between DCSS. The route selection process can be controlled by various parameters according to the customer's needs. Rerouting of circuits off of a failed internodal facility to a working one is also available.

(B) Renaming

Renaming permits customers to rename their network locations, circuits, and facilities.

(C) Special Day Definition

Special day definition gives customers the capability to specify circuit reconfiguration on special days, e.g., payday, holidays.

(D) Resource Verification

Resource verification allows customers to verify the resource availability for the reservation period in their reconfiguration request prior to the system's confirmation or denial of the request.

(E) Transaction Log

Transaction log provides customers a database log that contains every transaction involving reconfigurations.

(F) Multi-Level Security

Multi-level security eliminates the unauthorized entry into a customer's circuit network arrangement inventory.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.3 Network Reconfiguration Functions (Cont'd)(G) Compatibility Table

Compatibility table permits customers to view the allowable access line combinations that can be used with Network Reconfiguration Service.

(H) Path Priority

Path priority gives customers the ability to arrange their circuit paths in order of priority when multiple routes exist.

(I) Reservation Summary Screen

Reservation summary screen allows customers to view the status of their reconfiguration reservations.

(J) Simple Commands and Screens

Simple commands and screens permits customers to use simple commands on screens with easy to use menus.

(K) MACRO Command/Network Modeling

MACRO command/network modeling (i.e., model request) gives customers the ability to initiate with one command, multiple two-point cross-connections. Customers can build separate network models, such as day-time models, night-time models, and disaster recovery models and invoke their activation or switch from one to the other.

(L) Variable Bandwidth

Variable bandwidth applies to an Internodal Facility and permits it to be used interchangeably to connect full 45 mbps or 1.544 mbps services, or to connect one or more individual subtending channels.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾

18.1.4 Technical Specifications

Services that are cross-connected by Network Reconfiguration Service must have identical technical characteristics to ensure compatibility and proper operations, e.g., Data to Data, Voice to Voice.

Network Reconfiguration Service specifications are delineated in Technical Reference TR-TSY-000366.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.5 Rate Regulations

This section contains information related to the rate elements applicable to Network Reconfiguration Service. Rates and charges associated with the rate elements are listed in 18.1.6.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.7 and the wire centers within such counties are listed in Sections 15.2(C) and (D).

For all rate elements in Section 18.1, price flex rates and charges, as provided in Section 39.5.2, apply, regardless of whether the county is Competitive or Non-Competitive.

(A) Rate Element Descriptions(1) Service Establishment Charge

The Service Establishment charge applies per customer database setup. The customer database setup is a grid, built by the Telephone Company, that contains all the circuits the customer will be able to control and reconfigure. Security, as well as circuit inventory, is built into the grid, permitting the customer control of its own circuits. Also included is the provisioning of customer training. This charge includes the connection of the initial circuits.

(2) Database Modification Charge

This charge applies (per customer contact, or request) each time the customer requests a subsequent modification of its database. A modification can be an addition or deletion of circuits terminating on the cross-connect system, or a rearrangement of the database, e.g., an outside move, a change in the signaling characteristics of a circuit (e.g., from data to voice), a rearrangement of the customer's routing priority between nodes, virtual port establishment, etc.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd)⁽¹⁾18.1.5 Rate Regulations (Cont'd)(A) Rate Element Descriptions (Cont'd)(3) Port Charges

Port Charges apply per port termination on the cross-connect system. There are three types of charges:

- Subtending Port Charge - applies per subtending channel port termination for all Special Access services (64 kbps and below or 45 mbps service) per circuit on the cross-connect system.
- 1.544 mbps Port Charge - applies for 128 kbps - 1.544 mbps channel port termination per circuit on the cross-connect system.
- 45 mbps Port Charge - applies for 45 mbps channel port termination per circuit on the cross-connect system.

Two Port Charges apply per circuit connecting 2 Network Reconfiguration Hubs or 2 cross-connect systems within the same Network Reconfiguration Hub (with one Port Charge applying at each termination of the circuit).

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.5 Rate Regulations (Cont'd)(A) Rate Element Descriptions (Cont'd)(4) Reconfiguration Charges

Full 45 mbps or 1.544 mbps bandwidth, sub 45 mbps or 1.544 mbps bandwidth, contiguous subtending channel groupings (up to and including all 24 subtending channels within a 1.544 mbps service), contiguous 1.544 mbps service groupings (up to and including all 28 1.544 mbps services within a 45 mbps service), or individual subtending channel or 1.544 mbps service arrangements are as specified by the customer. This specification limits the parameters within which the service can be reconfigured and defines how reconfiguration charges will apply. If reconfiguration is at the subtending channel, 1.544 mbps or 45 mbps level, one reconfiguration charge applies per subtending channel, 1.544 mbps service or 45 mbps circuit reconfigured; if reconfiguration is for a previously defined contiguous group of subtending channels, one reconfiguration charge applies per group of DS0s reconfigured; etc. One reconfiguration charge applies per cross-connect and/or disconnect successfully completed in a DCS per request.

There are two types of reconfiguration charges:

- For individual reservation or demand request performed by the customer, or for each segment of a model request performed by the customer or Telephone Company.
- For individual reservation or demand requests performed by the Telephone Company at the customer's request.

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.5 Rate Regulations (Cont'd)(A) Rate Element Descriptions (Cont'd)(4) Reconfiguration Charges (Cont'd)

For example, if a customer wishes to reconfigure a circuit that is routed through two NRS Hub offices (the existing circuit being routed between customer premises A through the two NRS Hub offices to customer premises B, and the customer wishes to reconfigure the circuit to be rerouted between customer premises A through the two NRS Hub offices to customer premises C), two transactions would occur: one transaction to disconnect the circuit between premises A and B, and one transaction to reconnect the circuit between premises A and C. The customer would be billed four NRS charges: two for disconnecting the circuit (one for each disconnect at each NRS Hub), and two for reconnecting the circuit (one for each reconnect at each NRS Hub).

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

18. Network Management Services (Cont'd)18.1 Network Reconfiguration Service (Cont'd) ⁽¹⁾18.1.5 Rate Regulations (Cont'd)(B) Application of Rates

When Network Reconfiguration Service is used in conjunction with Special Access or MegaLink Custom services, the appropriate regulations, rates and charges as set forth in Sections 7 and 20 will apply in addition to charges as set forth in 18.1.6:

- One Channel Termination (CT) applies between the customer premises and serving wire center.
- Channel Mileage or Interoffice Mileage, if applicable, applies between the serving wire center and the Telephone Company Network Reconfiguration Hub, or between two Network Reconfiguration Hubs.

Nonrecurring charges, as set forth in Sections 7 and 20, are also applicable when existing channels must be reterminated in a Network Reconfiguration Port to provide Network Reconfiguration Service. When an existing DS3 circuit is reterminated in a Network Reconfiguration Port, termination charges as set forth in 20.4.5 (Minimum Service Periods), 20.4.6 (Termination Charges) and 20.4.12(B) (Moving Customer Premises), will only apply to the Optional Features, BSEs and Functions associated with the reterminated DS3 circuit. Termination charges will not apply to Channel Terminations and Interoffice Mileage associated with the reterminated DS3 circuit when the DS3 end points involved do not change.

When a new or existing High Capacity Term Pricing Plan (HC-TPP) customer subscribes to or has a 3 or 5 year HC-TPP, as described in Section 7.2.10 (High Capacity Term Pricing Plan (HC-TPP) and requests an associated NRS with that HC-TPP DS1 circuit terminating on the NRS, NRS recurring rates and nonrecurring charges associated with the Service Establishment Charge, 1.544 Mbps Port Charge and the Database Modification Charge, will apply.

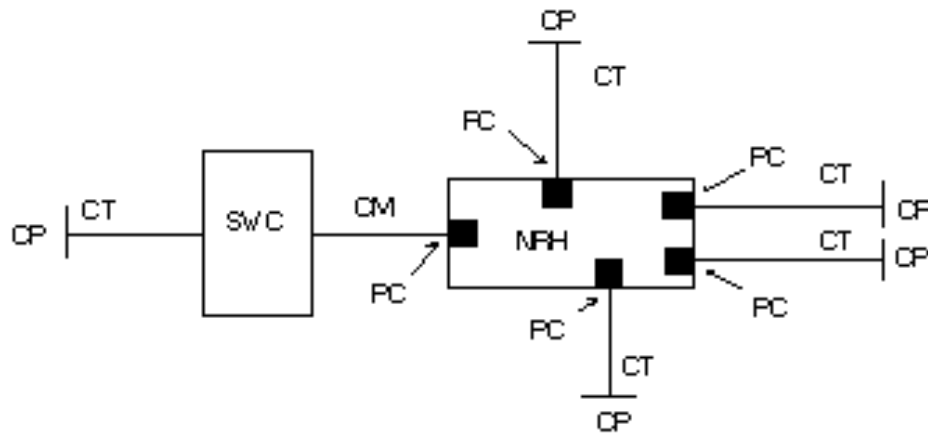

⁽¹⁾ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

ACCESS SERVICE

19. Self-healing Transport Network⁽²⁾ (Cont'd)19.1 General Description⁽¹⁾

Self-healing Transport Networks (STN) provide for dedicated digital transport from two or more customer specified STN Access Nodes, one of which, at a minimum, must be a Telephone Company central office (CO Access Node). An Access Node is a Telephone Company central office or a customer premises equipped with STN features and functions. The Telephone Company will identify central offices equipped with STN features and functions. For a listing of the Telephone Company offices equipped with STN capabilities, see the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4.

Rates and charges for Self-healing Transport Network for are set forth in Section 19.4 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Self-healing Transport Network in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

⁽¹⁾ The regulations below are effective December 4, 2012.

For Volume Options 3, 6, 12, and 24, Customers may not purchase additional STN service; however, they may continue to purchase additional Digital Transport Links (DTL's) and directly related elements associated with an existing STN service, subject to existing capacity availability, for the remainder of any Minimum Period. Existing service will be provided according to all applicable rates, terms and conditions for the remainder of any Minimum Period. Upon the expiration of any Minimum Period, service will be provided on a month-to-month basis at the then-applicable month-to-month rate until service is discontinued by the Telephone Company. No new or additional Minimum Period commitments of any kind, including any otherwise available renewals, extensions or renegotiations, will be available. Upon the expiration of any Minimum Period commitment, no move, adds or change orders will be accepted.

For Volume Options 36 and 48, Customers are limited to existing service and quantities at existing locations. The Telephone Company will not accept any requests for additions, partial disconnections, moves, upgrades or changes to STN Volume Options 36 and 48. Customers with existing Volume Options 36 and/or 48 will not be able to add access nodes, reconfigure the ring, or move access nodes. They may continue to add additional Digital Transmission Links (DTLs) and Interfaces at current Tariff rates.

⁽²⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

STN provides premises-to-premises arrangements or premises-to-hub arrangements for interconnection to other Access Services with transmission speeds of 1.544 Mbps or greater. STNs are characterized by a ring configuration which provides redundant transmission over separate physical facilities. Digital Transmission Links (DTL) interconnect customer selected Access Nodes to form the ring configuration. The DTL is a high capacity channel which delivers the same bandwidth signal at each Access Node in a given STN. The standard Volume Option DTL transport signal is a 44.736 Mbps bandwidth or equivalent. Each DTL will include Network Access Points (NAP) located in customer specified Access Nodes. A NAP designates the point at which a particular DTL may be interconnected with a Premises Access Node or with High Capacity Services or MegaLink Custom Services in a central office Access Node. Only two NAPs, one of which must be located in a Premises Access Node, may be specified for each DTL. The high capacity channel is available for use only at the designated NAPs. STN is equipped with self-healing characteristics, multiplexing capabilities, performance monitoring, and network supervision. Multiplexing may be provided only in a Telephone Company Central office node which has been designated as a Hubbing and Bridging office in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4.

In addition to the standard 44.736 Mbps electrical interface, STN also offers the following SONET (Synchronous Optical Network) based Interfaces.

<u>SONET-based Interface</u>	<u>Bandwidth</u>
DS1	1.544 Mbps
EC-1	51.84 Mbps
OC3	155.520 Mbps
OC3c	155.520 Mbps (concatenated)
OC12	622.080 Mbps
OC12c	622.080 Mbps (concatenated)

SONET interfaces are available only where STN is provisioned using SONET-based facilities. Therefore, the SONET-based Interface Options will not be available at those locations. The Telephone Company will notify the customer accordingly when the service is ordered.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

Technical specifications for SONET-based Interfaces are contained in the following publications:

Bellcore Document GR-253-CORE

Bellcore Document TR-NWT-000496

Bellcore Document GR-1374-CORE

American National Standard, ANSI T1.105-1991

American National Standard, ANSI T1.102-1993

In the event of a single facility failure or single Access Node failure on a given ring, STN will restore transmission within an engineered objective of 50 milliseconds, not to exceed 2.5 seconds. For a single facility failure, 100% of the STN transmission will be restored within 2.5 seconds. The loss of an Access Node will result in the restoration of the transmission of the total STN ring minus the failed Access Node transmission.

The STN architecture is designed to permit rearrangement of NAPs and/or Multiplexers as set forth in Section 19.3.2.

DTLs, Optional SONET-based Interfaces, Multiplexers and Access Nodes may be added to existing STN service.

The Telephone Company will meet or exceed the specified acceptance and maintenance parameters set forth for STN Services in Southwestern Bell Technical Publication 76635 and for SONET-based Interfaces in Southwestern Bell Technical Publication 76839.

There are five basic rate categories which apply to STN. Three of the rate categories apply based on the DTL Volume Option selected; the other two rate categories apply to STN, independent of the DTL Volume Option selected by the customer.

The three basic rate categories which apply on a DTL Volume Option basis are Basic Configuration, Additional Access Node and Additional DTL. The Basic Configuration rate category provides for the appropriate number of Access Nodes equipped with the number of DTLs in the customer selected DTL Volume Option. The Additional Access Node rate category provides for any quantity of Access nodes in addition to the Basic Configuration. The Additional DTL rate category provides for any quantity of DTLs required by the customer over and above those included in the DTL Volume Option selected by the customer. Additional DTLs are provided on both a Basic Configuration and an Additional Access Node basis. The SONET-based Interfaces (DS1, EC-1, OC3c, OC12) provide for the circuit card plug-in units and fiber-optic terminal multiplexing equipment (if required) to convert the optical carrier (OC) signal to the bandwidth that corresponds with the interface as specified in the preceding table.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

The two basic rate categories that apply to STN, independent of the selected DTL Volume Option are Transport and Optional Features and Functions. The Transport rate category provides for the transmission facilities between the Access Nodes. The Optional Features and Functions rate category provides for optional features and functions which may be added to an STN to improve its quality or utility to meet specific communications requirements. There are three types of Optional Features and Functions available to STN; Multiplexing, SecureNet Interconnection, and SONET-based Interface Options. The Optional Features and Functions rate categories are detailed as follows:

The Multiplexing rate category provides for an arrangement that converts a standard DTL (44.736 Mbps) into 28 (1.544 Mbps) channels using digital time division multiplexing at the Central Office.

The SecureNet Interconnection with High Capacity DS1 Services rate category provides for interconnection with High Capacity DS1 Services equipped with the SecureNet Hub Redundancy feature (Option 1) as set forth in 7.3.10(E) (6) (a) (Hub Redundancy) preceding. Because SecureNet is only provisioned via specific pairs of Telephone Company central offices, interconnection of STN and High Capacity Services equipped with SecureNet Option 1 requires that the customer must designate both SecureNet offices as STN Access Nodes.

This SecureNet Interconnection will be available only on the standard DTL (44.736 Mbps) interface, not on SONET-based interfaces.

The STN Interconnection with SecureNet Equipped MegaLink Custom Service rate category provides for interconnection of an STN with MegaLink Custom Services equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following.

In addition, other service specific charges and nonrecurring charges may apply as specified in Section 19.3 (Rate Regulations).

Ordering and billing provisions as set forth in 2.6 (Jointly Provided Access Services) will apply when more than one Exchange Telephone Company is involved when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

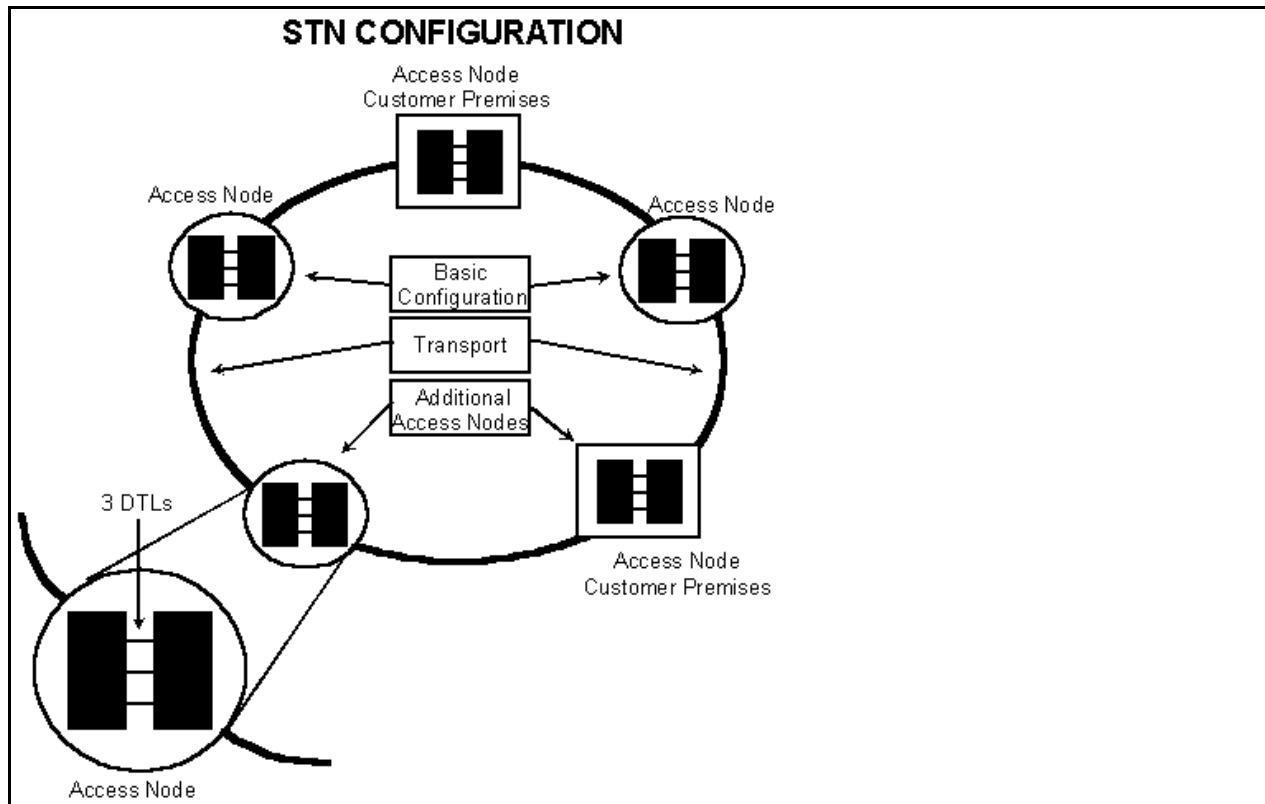

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

The following diagram depicts an STN configuration transversing five Access Nodes:

This configuration depicts an STN arrangement using the Basic Configuration equipped with DTL Volume Option 3 which includes three Access Nodes and three DTLs, plus two Additional Access Nodes.

- Basic Configuration (described in Section 19.3.1(A) (1))
- DTL Volume Option (described in Section 19.3.1(A))
- Additional Access Nodes (described in Section 19.3.1(A) (2))

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.2 Service Provisioning19.2.1 Testing(A) Acceptance Testing

At the time STN services are installed and at no additional charge, the Telephone Company will, at the customer's request, cooperatively test STN as specified in Technical Publication 76635, and for SONET-based Interfaces in Technical Publication 76839.

(B) Testing Capabilities

In addition to the above tests, Additional Cooperative Acceptance Testing to test other parameters not defined in Technical Publication 76635 or 76839 is available at the customer's request. Charges as defined in Section 13.4.9 (Testing Service for Special Access and Self-Healing Transport Network) will apply. All test results will be made available to the customer upon request.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.2 Service Provisioning (Cont'd)19.2.2 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the makeup of the facilities and services provided under this tariff as STN to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

19.2.3 Special Construction

Where facilities and equipment do not exist or are not available, Special Construction charges, as set forth in Section 5.2.6(C) preceding, may apply.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

19. Self-healing Transport Network⁽²⁾ (Cont'd)19.3 Rate Regulations

This section contains specific regulations governing the rates and charges for STN.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.7 and the wire centers within such counties are listed in Sections 15.2(C) and (D).

For all rate elements in Section 19, price flex rates and charges, as provided in Section 39.5.2, apply, subject to service availability,⁽¹⁾ regardless of whether the county is Competitive or Non-Competitive.

If the Telephone Company initiates rate changes resulting in a decrease of rates for an existing service with a 3 or 5 year billing period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing 3 or 5 year billing period will not exceed the original rate for that selected bill period. Rate changes may occur as a result of F.C.C. action.

Other Access Services used in conjunction with STN are governed by specific regulations and applicable rates and charges set forth in other sections of this tariff unless otherwise noted herein.

19.3.1 Rate Categories

There are five basic rate categories which apply to STN. There are three rate categories that apply on a DTL Volume Option basis. These rate categories may not be intermixed between different Volume Options on a particular STN. Two rate categories apply to STN, independent of the DTL Volume Option selected by the customer.

(A) DTL Volume Option-Based Rate Categories

The three basic rate categories which apply on a DTL Volume Option basis are as follows:

- Basic Configuration
- Additional Access Node
- Additional DTL

⁽¹⁾ See Footnote 1 on Page 19.3.

⁽²⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(A) DTL Volume Option Rate Categories (Cont'd)(1) Basic Configuration

The Basic Configuration rate category provides for the following Access Nodes equipped with the number of DTLs in the customer selected DTL Volume Option:

<u>DTL Volume Option</u>	<u>Number of Access Nodes</u>
3	3
6	4
12	4
24	5
36	5
48	5

(2) Additional Access Node

The Additional Access Node rate category provides for any quantity of Access Nodes in addition to the Basic Configuration.

(3) Additional DTL

The Additional DTL rate category provides for any quantity of DTLs required by the customer over and above those included in the DTL Volume Option selected by the customer. Additional DTLs are provided on both a Basic Configuration and an Additional Access Node basis.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories

The two basic rate categories that apply to STN, independent of selected DTL Volume Option are as follows:

(1) Transport

The Transport rate category provides for the transmission facilities between the Access Nodes.

(2) Optional Features, BSEs and Functions

The Optional Features, BSEs and Functions rate category provides for the following optional features, BSEs and functions which may be added to an STN to improve its quality or utility to meet specific communications requirements:

(a) Central Office Multiplexing BSE

The Multiplexing rate category provides for an arrangement that converts a standard DTL (44.736 Mbps) at an Access CO node into 28 (1.544 Mbps) channels using digital time division multiplexing.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(b) SecureNet Interconnection of High Capacity DS1 Service

The SecureNet rate category provides for interconnection with High Capacity DS1 Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E) (6) (a) (Hub Redundancy) preceding.

(c) STN Interconnection with SecureNet Equipped MegaLink Custom Service

This rate category provides for interconnection of an STN with MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following.

(d) C-Bit Parity Framing Format Option

C-Bit Parity Framing Format Option (C-Bit) allows customers to specify the C-Bit format rather than using the standard M13 multiplex format interface. C-Bit allows DS3 framing bits to be rearranged for additional performance monitoring capabilities by the customer. The performance monitoring capability is inherent to the customer's CPE. The Telephone Company does not monitor the C-Bits for performance or any other purpose.

When C-Bit is ordered with new STN service, the C-Bit nonrecurring charge does not apply. When C-Bit option is requested for existing STN service, a nonrecurring charge will apply as set forth in Section 19.4 following.

C-Bit Parity Framing Format is not available when multiplexing is utilized on the DTL as described in Section 19.1.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(e) SONET-based Interface Options

The SONET-based Interface Option provides the circuit or channel card plug-in units and fiber-optic terminal multiplexing equipment (if required) to convert the optical carrier signal to the bandwidth that corresponds with the interface as specified in Section 19.1.

STN Volume Option	-----Interface (Port)-----					
	DS1	EC-1	OC3	OC3c	OC12	OC12c
3	X	X				
6	X	X	X	X		
12	X	X	X	X	X	X
24	X	X	X	X	X	X
36	X	X	X	X	X	X
48	X	X	X	X	X	X

If the customer elects a DS1 interface at any STN node, the first DS1 interface ordered will dedicate an entire DTL. This DTL will then accommodate up to 27 additional DS1 interfaces (total of 28 DS1s per DTL).

If the customer elects an EC-1 interface, this interface is the sole interface of that particular DTL.

If the customer elects an OC3 interface, this interface utilizes (3) three DTLs of bandwidth capacity.

If the customer elects an OC3c interface, this is a concatenated signal which cannot be demultiplexed into a lower capacity. The OC3c interface utilizes (3) three DTLs of bandwidth capacity.

If the customer elects an OC12 interface, this interface utilizes (12) twelve DTLs of bandwidth capacity.

If the customer elects an OC12c interface, this is a concatenated signal which cannot be demultiplexed into a lower capacity. The OC12c interface utilizes (12) twelve DTLs of bandwidth capacity.

(1) The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(e) SONET-based Interface Options (Cont'd)

Rates and charges for SONET-based Interface Options, as shown following in Section 19.4, are applied in addition to any other applicable STN rate element rates and charges such as for Basic Configuration, Additional Access Nodes, Additional DTLs, etc.

Table A, following, represents the possible point-to-point interface combinations available for STN SONET-based Interface Options.

TABLE A
Network Access Point (NAP) SONET Based Interface Combinations

	NAP B							
		DS1 ⁽²⁾	DS3	EC-1	OC3	OC3C	OC12	OC12c
NAP A	DS1 ⁽²⁾	X	X ⁽¹⁾	X ⁽³⁾	X		X	
	DS3	X ⁽¹⁾	X	X	X		X	
	EC-1	X ⁽³⁾	X	X	X		X	
	OC3	X	X	X	X		X	
	OC3C					X	X	
	OC12	X	X	X	X	X	X	
	OC12c							X

- (1) This option is via the conventional Central Office Hub multiplexing and standard DTL. DS1 interfaces do not apply.
- (2) If the DS1 interface on one NAP is derived from SONET technology, the interface on the opposite NAP, if not a DS1 interface, must be a SONET signal OC3, OC12).
- (3) As of December 29, 2009, this option is no longer available.
- (4) The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges*

Nonrecurring charges are one-time charges that apply for a specific work activity (e.g., installation or change to an existing service). Nonrecurring charges are applicable for initial and subsequent installation of service, service rearrangements and NAP Rearrangement.

(A) Nonrecurring Charges for Installation of Service

There are two types of nonrecurring charges for Installation of Service: Initial and Subsequent. These nonrecurring charges apply to STN components and apply to selected STN rate elements on a first and additional basis.

(1) Initial

Initial nonrecurring charges apply for the installation of the Basic Configuration, and any Additional Access Nodes and Additional DTLs when STN service is first established.

(2) Subsequent

Subsequent nonrecurring charges apply when the customer requests to modify an existing STN service by adding Access Nodes or additional DTLs after the initial Service Order.

(B) Nonrecurring Charges for Service Rearrangements

Nonrecurring charges apply for Service Rearrangements or changes. Service Rearrangements are changes to existing services which do not result in either a change in the Minimum Period requirements as set forth in 19.3.5 following or a change in the physical location of the point of termination at the customer's premises or the customer's end user's premises. A change in service arrangement is a change in the physical location of the Point of Termination at the customer designated premises as set forth in 19.3.7 following.

* For Services ordered under MVP, refer to Section 38.3(E) (5).

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(B) Nonrecurring Charges for Service Arrangements (Cont'd)

Changes which result in the establishment of a new minimum period are treated, with the exception of Minimum Period Upgrades (19.3.10), as a discontinuance of the existing service and an installation of a new service and all applicable nonrecurring charges will apply. Changes in the physical location of the point of termination are treated as moves and are described and charged for as specified in 19.3.7 (Moves).

A nonrecurring charge will apply per DTL on a first and additional basis for the following change or combination of changes requested by the customer on the same Access Order and will be charged as set forth in 19.4(C) (2).

- Change of Access Carrier Name Abbreviation (ACNA)
- Change of Billing Account Number (BAN)
- Change of customer Circuit Identification (CKR)

The customer requesting administrative service rearrangements will be responsible for all billing associated with the changes requested.

When a change of customer name and change in billing data (name, address, contact name, or telephone number) are requested in association with a change in the customer of record, the Access Order Charge will apply as set forth in Section 5.4(A) (Access Order Charge) preceding.

(C) Nonrecurring Charge for NAP Rearrangement

A nonrecurring charge will apply for customer requested rearrangements of a NAP to another STN Access Node on the same STN Volume Option as set forth in 19.4 following.

(D) Nonrecurring Charge for Basic Configuration

A nonrecurring charge as set forth in 19.4 following also applies.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(E) Nonrecurring Charge for Additional Access Node

A nonrecurring charge applies on a per node basis as set forth in 19.4 following. The nonrecurring charge will be applied depending on whether the Access Node is a central office or a customer premises.

(F) Nonrecurring Charge for Additional DTL

A nonrecurring charge is applied for the first DTL on the initial service order and for each additional DTL placed on the same order.

A nonrecurring charge is also applicable for a subsequent DTL placed on an order following the initial Service Order. A different nonrecurring charge is applicable for each subsequent additional DTL placed on the same order.

(G) Nonrecurring Charge for Optional Features and Functions(1) Multiplexer

A nonrecurring charge will be applied for the installation of each Multiplexer; additionally, a nonrecurring charge will apply for each multiplexer relocation required by the customer during the Minimum or Optional Renewal Period.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(G) Nonrecurring Charge for Optional Features and Functions (Cont'd)(2) SecureNet Interconnection of High Capacity DS1 Service

A nonrecurring charge is applicable for the interconnection of each DTL in a given STN arrangement with High Capacity DS1 Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E)(6)(a) (Hub Redundancy) preceding.

(3) STN Interconnection with SecureNet Equipped MegaLink Custom Service

A nonrecurring charge is applicable for the interconnection of each DTL in a given STN arrangement with a MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.5.3(D) (STN Interconnection with SecureNet Equipped MegaLink Custom Service) following.

(4) SONET-based Interface Options

A nonrecurring charge is applicable on a per node, first and additional basis for each SONET-based Interface Option. If multiples of the same type Interface option are ordered on the same access order, the first Interface option is assessed the "first" nonrecurring charge and each additional is assessed the "additional" installation charge. These nonrecurring charges are applicable in addition to all other STN nonrecurring charges (e.g. Basic Configuration, Additional Access Nodes, Additional DTLs, etc).

(5) C-Bit Parity Framing Format Option

A nonrecurring charge is applied on a per DTL first and additional basis when the option is added to an existing STN.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.3 Monthly Recurring Rates

Monthly rates are recurring charges that apply each month that the service is provided and are specific to the Minimum Period selected by the customer.

Except for the Transport rate element and any STN Optional Features and Functions selected, the DTL Volume Option selected by the customer will dictate the basic rates that will apply throughout the selected Minimum Period and any Optional Renewal Periods.

(A) Monthly Recurring Rate for Basic Configuration

One Basic Configuration monthly recurring rate will apply for each STN arrangement, specific to the DTL Volume Option selected by the customer.

(B) Monthly Recurring Rate for Additional Access Node

A monthly recurring rate specific to the DTL Volume Option selected by the customer is applied on a per node basis to add Access Nodes to the Basic Configuration.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.3 Monthly Recurring Rates (Cont'd)(C) Monthly Recurring Rate for Additional DTL

A monthly recurring rate specific to the DTL Volume Option selected by the customer is applied to add DTLs to the selected DTL Volume Option. The rate is applied when an Additional DTL is added to the Basic Configuration. A different monthly recurring rate is applied if an Additional DTL is added to an Additional Access Node. Example below illustrates a typical application of the Additional DTL rate element.

Example:

Customer has existing a V.O. 3 DTL STN under a 60 Month Minimum Period. The STN has 5 Access Nodes (3 with the Basic Configuration and 2 Additional Access Nodes). Customer desires to add 3 Additional DTLs to this arrangement.

<u>Existing Arrangement</u>	<u>Monthly Rate</u>
Basic Config (1)	= \$ 4,484.00
Addtl Access Node (2)	= 4,354.00
	Total = \$ 8,838.00

New Arrangement (w/Addtl DTLs)

Basic Config	= \$ 4,484.00
Addtl Access Node (2)	= 4,354.00
Addtl DTL to Basic Config (3)	= 3,300.00
Addtl DTL to A.A. Nodes (3) x (2)	= 1,110.00
	Total = \$13,248.00

(D) Monthly Recurring Rate for Transport

The monthly recurring Transport rate applies on a per mile basis to each STN arrangement. This charge is applied to the airline mileage measured between Access Nodes as set forth under regulations for Determining Transport Mileage, 19.3.4 following.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.3 Monthly Recurring Rates (Cont'd)(E) Monthly Recurring Rates for Optional Features, BSEs and Functions(1) Central Office Multiplexing BSE

A monthly recurring rate is applicable on a per multiplexer basis. Multiplexer additions are permitted anytime throughout the Minimum or Optional Renewal Period, subject to the regulations set forth in 19.3.9 following. The monthly recurring rate for a multiplexer is set forth in Section 19.4 following.

(2) SecureNet Interconnection of High Capacity DS1 Service

A monthly recurring rate is applicable for the interconnection of each DTL in a given STN arrangement with High Capacity Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E) (6) (a) (Hub Redundancy) preceding. The monthly recurring rate is set forth in Section 19.4 following.

(3) STN Interconnection with SecureNet Equipped MegaLink Custom Service

A monthly recurring rate is applicable for the interconnection of each DTL in a given STN arrangement with MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following. The monthly recurring rate is set forth in Section 20.5.3(D) following.

(4) SONET-based Interface Options

A monthly recurring rate is applicable for Interface Options, bandwidths other than 44.736 Mbps which is standard for STN service. SONET-based Interface Options are available in DS-1, EC-1, OC3, OC3c, OC12, and OC12c bandwidths. The recurring rate is applicable on a per access node, per interface basis and are set forth in Section 19.4 following and is applicable in addition to all other STN recurring rates (e.g. Basic Configuration, Additional Access Nodes, Additional DTLs, etc.)

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)

19.3 Rate Regulations (Cont'd)

19.3.4 Determining Transport Mileage

The mileage to be used to determine the monthly rate for Transport is calculated based on the sum of the airline distance between customer designated Access nodes in a given STN service arrangement and rounded to the next higher mile. The Telephone Company will provide the customer with the ring topology and airline distances between the Access Nodes associated with the requested STN service arrangement. The Telephone Company will utilize the V&H coordinates method, as set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.8 Additions of Service (Cont'd)(b) Service Established Prior to and including August 29, 1993 (Cont'd)

EXAMPLE:

The customer elects to add one Additional DTL, one Additional Access Node and one Multiplexer in the 37th month of a 60 month Minimum Period. The monthly billing in effect for the initial establishment of the STN is \$11,896.

To determine the monthly rate for the subsequent addition of the DTLs, Access Node and multiplexers

		Multiplier	
1 Additional DTL (Basic Configuration)	\$3,965.00	x 1.15 =	\$ 4,559.75
1 Additional DTL (Additional Access Node)	1,243.00	x 1.15 =	1,429.45
1 Additional Access Node	3,730.00	x 1.15 =	4,289.50
1 Multiplexer		887.50 x 1.15 =	1,020.62
	TOTAL		\$11,299.32

Total billing for the STN arrangement in this example would be calculated as follows:

$$\$11,896.00 + \$11,299.32 = \$23,195.32$$

Subsequent service additions are for a given STN arrangement and are coterminous with the Minimum Period and are subject to all applicable STN terms and conditions.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.9 Optional Renewal Periods

Upon completion of a 36 or 60 month term, Minimum Period the customer may elect to:

1. Sign a new 36 or 60 month STN agreement; or
2. Annually renew the STN for up to five (5) one-year periods; or
3. Terminate STN under provisions in Section 19.3.15 following; or
4. Continue on a month-to-month arrangement at the last month's charges as set forth in 19.4 following.

If the customer elects to annually renew, the monthly recurring charges for each of the Optional Renewal Periods will be the customer's monthly recurring charges at the conclusion of the immediately preceding Minimum Period or Optional Renewal Period and modified by the following table:

Optional Renewal	
<u>Year</u>	<u>Multiplier</u>
1	.90
2	.95
3	.95
4	.95
5	.95

EXAMPLE

Assume the customer has a monthly recurring charge of \$42,670.50 and elects to renew for a one-year period for each of the next two consecutive years. The monthly recurring charge in this example would be calculated as follows:

Year

1	\$42,670.50 x .90 = \$38,403.45
2	\$38,403.45 x .95 = \$36,483.27
3	\$36,483.27 x .95 = \$34,659.11
4	\$34,659.11 x .95 = \$32,926.15
5	\$32,926.15 x .95 = \$32,279.84

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.10 Upgrades

There are two types of Upgrades available for STN customers. Volume Option Upgrades and Minimum Period Upgrades as follows:

(A) Volume Option Upgrades

The STN customer may choose to upgrade a particular STN by increasing to a higher Volume Option configuration (e.g., from V.O. 6 to V.O. 12 or V.O. 12 to V.O. 24, etc.). Charges for this type of upgrade will be dependent on whether the customer, for a particular STN to be upgraded, has added sufficient Additional DTLs to reach the upgrade crossover as defined in the following table.

TABLE C

Exiting STN Volume Option	---Upgrade Crossover (Total DTLs)----					
VO3	VO6	VO12	VO24	VO36	VO48	
3	-	5	9	20	24	30
6	-	-	9	20	24	30
12	-	-	-	20	24	30
24	-	-	-	-	30	30
36	-	-	-	-	-	42
48	-	-	-	-	-	-

If the STN customer has reached the Upgrade Crossover, (as specified on Table C), the upgrade may be done without termination liability or nonrecurring charges, except for the Access Order Charge as set forth in Section 5.4. If the STN customer has not reached the Upgrade Crossover, the upgrade may still be ordered; however, the customer will be subject to nonrecurring charges, in addition to the Access Order Charge, on a time-sensitive basis with no termination charges provided conditions are met as set forth in 19.3.15(A)(1)(e). The charges for this upgrade will not exceed the nonrecurring charge applicable to the target Volume Option Basic Configuration (the higher Volume Option which is being upgraded to). Labor rates for the time-sensitive charges are set forth in Section 13.4 (Rates and Charges) preceding.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)

19.3 Rate Regulations (Cont'd)

19.3.10 Upgrades (Cont'd)

(B) Minimum Period Upgrades

The STN customer may choose to upgrade a particular STN 36 Month Minimum Period to a 60 Month Minimum Period.

The only charge for the upgrade will be the normal Access Order charge as specified in Section 5.4. No termination liability will be applied to this upgrade provided conditions are met as set forth in Section 19.3.15 (A) (1) (e) .

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.11 Shared Use⁽²⁾

(C)

Shared Use is the provision of Switched Access over STN. The service will be ordered, provided and rated as STN; the nonrecurring charge(s) for STN will apply at the time of installation. Rating as STN will continue until such time as, at the election of the STN customer, a portion of the available STN capacity is used to provide Switched Access Service. In these cases the STN customer and the Switched Access Service customer may be different. When the STN customer is not the same as the Switched Access customer, all STN charges and Switched Transport charges (including Switched Transport features charges) will be billed to the customer who initially ordered the STN service. All other Switched Access charges will be separately billed to the customer who initially ordered the Switched Access service.

As each individual voice grade equivalent channel is activated for Switched Access, STN monthly charges for Basic Configuration, Additional Access Nodes, Additional DTLs, Transport, Multiplexers and Sonet-based Interface Options will be reduced as described below. The customer must place an order for each individual Switched Access Service utilizing the Shared Use facilities and specify the appropriate channel assignment. While the customer may designate any percentage of STN for Shared Use, credit will only be applied up to 50% of the voice grade equivalent capacity provided in conjunction with the STN.

Following are two examples of how Shared Use will apply to STN. Both examples assume the same basic network and associated charges:

1 Basic Configuration (DTL Volume Option 3)	\$12,745.00
2 Additional Access Nodes	\$7,994.00
2 Additional DTLs (Basic Configuration)	\$8,496.00
2 Additional DTLs (Additional Access Nodes)	\$5,328.00
5 Multiplexers	\$4,687.50
Transport (20 Miles)	\$3,420.00
TOTAL	\$42,670.50

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

⁽²⁾ Effective June 1, 2024, neither new nor existing customers will be permitted to create new Shared Use arrangements. In addition, requests to move, add, or change existing Shared Use arrangements will not be accepted. Shared Use arrangements existing prior to June 1, 2024 are otherwise unaffected by this change.

(N)

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.11 Shared Use⁽²⁾ (Cont'd)

(C)

EXAMPLE 1:

The customer designates 150 STN voice grade equivalent channels for use as Switched Access transport. Since the number of Switched Access channels is less than 50% of the total voice grade equivalent capacity for STN, full Shared Use credit will apply and is calculated via the following formula:

$$\frac{150}{3,360} \times \$42,670.50 = \$1,904.93$$

Total monthly billing for STN in this example would be calculated as follows:

$$\$42,670.50 - \$1,904.93 = \$40,765.57$$

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

⁽²⁾ Effective June 1, 2024, neither new nor existing customers will be permitted to create new Shared Use arrangements. In addition, requests to move, add, or change existing Shared Use arrangements will not be accepted. Shared Use arrangements existing prior to June 1, 2024 are otherwise unaffected by this change.

ACCESS SERVICE

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.11 Shared Use⁽²⁾ (Cont'd)

(C)

EXAMPLE 2:

The customer designates 1,700 STN voice grade equivalent channels for use with Switched Access. Because the number of requested channels in this case exceeds 50% of the total voice grade equivalent capacity for this example, the applicable credit is calculated as follows:

$$\frac{1,680}{3,360} \times \$42,670.50 = \$21,335.25$$

Total billing for STN in this example would be calculated as follows:

$$\$42,670.50 - \$21,335.25 = \$21,335.25$$

Switched Access Service rates and charges as set forth in Section 6.9 (Rates and Charges) preceding will apply for each channel of the Shared Use facility that is used to provide Switched Access Service.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

⁽²⁾ Effective June 1, 2024, neither new nor existing customers will be permitted to create new Shared Use arrangements. In addition, requests to move, add, or change existing Shared Use arrangements will not be accepted. Shared Use arrangements existing prior to June 1, 2024 are otherwise unaffected by this change.

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.17 DTL Portability

STN customers have the ability to move (portability) certain DTLs, as specified following, to any other STN within the Telephone Company jurisdictional area without incurring termination liabilities, provided certain conditions are met:

- (1) This portability applies only to STNs of Volume Options 12 and above. This Volume Option limitation applies to both the source STN - STN from which the DTL will be moved, to the target STN - the STN to which the DTL will be moved (e.g., a DTL from a Volume Option 12 STN may not be moved to a Volume Option 6 STN).
- (2) Portability applies only to those DTLs purchased above and beyond the Basic Configuration, i.e., Additional DTLs.
- (3) Portability applies only if the number of months remaining in the target STN's Minimum Period are equal to or greater than the months remaining in the source STN's Minimum Period (e.g., a DTL from an STN with 24 months remaining in the Minimum Period may not be moved to an STN with only 10 months remaining in the Minimum Period).

Under STN Portability the customer's total monthly charges associated with each STN involved in the move (source STN and target STN) will be modified to reflect the higher or lower quantity of DTL's resulting after the move. Due to the restrictions as noted above, no STN total monthly charge will be reduced below that of the Basic Configuration for that particular STN Volume Option.

Charges for the DTL Portability will be the same as the existing NAP Rearrangement charge as listed in Section 19.4 (Rates and Charges) following.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

19. Self-healing Transport Network⁽²⁾ (Cont'd)19.4 Rates and Charges

Effective November 1, 2017, all rate elements are no longer available from Section 19.4 for new service subscriptions, and price flex rates and charges, as provided in Section 39.5.2, apply, subject to service availability.⁽¹⁾ See Rate Regulations in Section 19.3.
