These cases are subject to the regulations specified in 2.1 through 2.8 preceding, with the exception of annual underutilization liability, as follows. Instead of underutilization liability based on costs, when there is a partial discontinuance of service on specially constructed facilities, the charge for only the rate elements containing the specially constructed facilities, as contained in the appropriate service tariff, will apply for each discontinued facility during the unexpired portion of the maximum termination liability period. For purposes of determining this charge, any facilities subject to minimum period monthly charges are considered to be in service at filed tariff rates.
