87-2U.S. Sprint

Consolidate the former GTE Sprint's and US Telcom's FGD presubscribed end user traffic and billing. The consolidation of traffic will occur at each tandem office to which U.S. Sprint has ordered FGD as well as at end offices where FGD Service is directly routed to the customer's premises. Traffic will be reprogrammed to route Carrier Identification Codes (CICs), presently utilized by the IC, over the same trunk groups, with provisions for traffic overflow patterns in tandem switches that have more than one trunk group.

The billing accounts will be merged to provide a single U.S. Sprint account. Should U.S. Sprint request discontinuance of this combined billing-routing arrangement, a new specialized arrangement and new charges will be developed.

Presubscription ballots and service center listings will be altered to reflect the merger.

	<u>Nonrecurring Charges</u>

New York (Cont'd)

Case No.

94-1 (Cont'd)

If service is disconnected in full or in part during the service period, the customer is liable for a termination liability charge calculated as set forth in (a) or (b) following. When calculating termination liability charges, the Telephone Company will apply the option which provides the customer with the lowest termination liability charge. For each option listed below, the termination liability charge shall apply to the portion of the service that is disconnected.

(a) Option 1

For disconnects prior to the end of the service period, the termination liability charge is 80% of the service period rate for each month and fraction thereof in the balance of the service period.

(b) Option 2

The termination liability charge will be the product of the actual number of months the service has been in effect times a rate differential.

The rate differential is the difference between the rate that would be applicable for a lesser service period and the rate for the service period.

The rate differential used to calculate the termination charges are:

<u>DISCONNECT PERIOD</u>	<u>RATE DIFFERENTIAL</u>
1 Month - 23 Months	.66 x Service Period Rate
24 Months - 35 Months	.58 x Service Period Rate
36 Months - 47 Months	.50 x Service Period Rate
48 Months - 59 Months	.25 x Service Period Rate
60 Months - 83 Months	.08 x Service Period Rate

98-1 UUNET Technologies, Inc.

Provision of Wire Center Modem Based Data Aggregation (MBDA) service. MBDA are dedicated servers which will be used to provide dedicated connections between the customer's designated points of presence and the customer's subscribers. The MBDA server will collect and concentrate the traffic of the customer's subscribers located within a LATA. MBDA will be provided in those wire centers where the customer orders a minimum of 138 MBDA ports, and will be provisioned and maintained in accordance with applicable operational provisions contained in this tariff, including Sections 2.1.3 and 2.4.4 of the General Regulations. The channel facilities used to provide transport of the customer's traffic from the MBDA wire center(s) to the customer's dedicated points of presence are provided from Section 7 of this tariff.

(Z)
(C)
(C)

The customer commits to ordering by August 15, 2002, a minimum of 300,000 MBDA ports located at wire centers that serve areas specified in this tariff and in the Bell Atlantic Telephone Companies Tariff F.C.C. No. 1. The customer is charged on a per port basis for the actual number of ports in service until August 15, 2002. Between August 15, 2002 and August 15, 2006, the customer is billed a per port charge for 300,000 ports or for the actual number of ports in service, whichever is higher. Each port ordered is subject to a 7 year commitment period ("Port Term Commitment"). Ports may be ordered until August 15, 2003.

(C)
(C)
(C)
(C)
(C)
(C)
(C)

The customer may disconnect up to 10% of the MBNA ports in-service each 12 month period after August 15, 2000 (each an "Annual Period") and reconnect them at an alternate wire center. Disconnect and reconnect orders must be issued at the same time and the reconnection must occur within 90 days of disconnection. A nonrecurring charge applies to portability for the disconnection and reconnection of groups of ports. The nonrecurring charge is based on the number of ports disconnected from each wire center during an Annual Period.

(N)
|
|
|
|
|
|
(N)

Subject to the preceding paragraphs, termination liability charges apply with respect to a given port that is disconnected prior to the completion of such port's Port Term Commitment. When a port included in the initial 300,000 ports purchased by the customer is terminated early, the charge is equal to \$35.00 multiplied by the number of months remaining in the Port Term Commitment of such terminated port. When a port that is not included in the initial 300,000 ports purchased by the customer is terminated early, the charge is equal to 50% of the monthly rate in effect at the time of termination multiplied by the number of months remaining in the Port Term Commitment of such terminated port.

(C)
|
|
|
|
|
|
(C)

The customer will be given remote access to the servers to monitor them and perform software configurations. The Telephone Company will provide notice 72 hours in advance of scheduled wire center maintenance that will adversely affect MBDA.

Case No. 2000-1

2000-1 Bell Atlantic Global Networks, Inc.

This specialized arrangement provides the customer with partitioned access to performance and statistical information on its Bell Atlantic Enterprise DSO Services. Through the use of a Graphical User Interface (GUI), Customer Service Management (CSM) allows for a graphical representation of the customer's network elements that are under control of the Telephone Company's management system. CSM also allows the customer to receive alarm information on its network elements and to generate its own network reports. At its premises, the customer must provide a 330Mhz or higher Pentium or SUN PC on which CSM software has been installed.

The customer must order a Special Access 1.544 Mbps service from its designated premises to the central office-based CSM server as designated by the Telephone Company.

The rate for this specialized arrangement is a nonrecurring charge, which applies in addition to the rates and charges for the associated 1.544 Mbps Service. Only one 1.544 Mbps Service is required, regardless of the number of workstations equipped at that customer designated premises.

This specialized arrangement is being provided for a trial period not to exceed 120 days. Upon completion of the trial, this service will be provided under a Special Access tariff, or the service will be terminated.

New York (Cont'd)
Case No.

2000-2 **Bank of New York**

(N)

This specialized arrangement provides the customer with a dedicated Channel Extension Service (CES) network between points within the New York/New Jersey Corridor using dense wave division multiplexing in a ring topology. The architecture consists of fiber rings between customer premises using customer designated network equipment.

The initial network consists of the following channels, each with a maximum bandwidth of 1.25 Gbps:

- 4 CES channels between 101 Barclay Street and 1 Wall Street, New York, NY
- 2 CES channels between 101 Barclay Street and Church Street, New York, NY
- 2 CES channels between 1 Wall Street and Church Street, New York, NY

Additional channels may be provided at any customer location dependent upon the Telephone Company's network capacity, consideration of applicable rates, and upon mutual agreement between the customer and the Telephone Company. Subsequent channels requiring a different rate will be provided upon revision of this tariff.

The Telephone Company will monitor the service arrangement 24 hours a day, seven days a week for trouble isolation and resolution. The customer will have read-only access to the monitoring system.

The following rates, based on a 60-month service period with a 36-month minimum period, will apply:

<u>Monthly Rate</u> <u>Per Channel</u>	<u>USOC</u>
\$3,127.00	(NOTE)

If service is disconnected in full or in part during the service period, the customer is liable for a termination liability charge. The termination liability charge will equal the sum of \$3,127.00 multiplied by the number of months or fraction thereof remaining in the minimum period plus \$1,785.00 multiplied by the number of months or fraction thereof remaining in the contract period.

Termination liability will not apply if the customer converts to another Telephone Company-provided service that is equal or greater in bandwidth or capacity for a commitment/contract period that is at least equal to the time remaining in this service period.

Description of Specialized Service

This specialized service provides Triumph Communications (the customer) with a 45 Mbps interface option for its Advanced Uncompressed Digital Video Service (AUDVS) allowing for transmission of a simplex (one-way) 45 Mbps signal across the video time slot channel. The 45 Mbps signals will be provided over the same AUDVS channel as the customer's 8 bit or 10 bit encoded NTSC video signals. Each channel termination on the AUDVS channel will be arranged to originate transmission (transmit only) or to receive transmission (receive only) as specified by the customer. The 45 Mbps signal can not be the first channel termination activated on the AUDVS channel.

The customer must subscribe to AUDVS under the terms and conditions specified in Section 7.2.14 preceding, unless otherwise stated in this specialized service.

Terms and Conditions

This specialized service is being provided under a 60 month Service Discount Plan commitment period, subject to the terms and conditions and termination liability specified in Section 7.4.10 preceding.

Rates and Charges

The 45 Mbps interface is provided as an additional Channel Termination only. The customer must activate a First 8 bit or a First 10 bit Channel Termination before any 45 Mbps Additional Channel Terminations may be ordered. These channel terminations apply per point of termination.

Case No.

87-1U.S. Sprint

Consolidate the former GTE Sprint's and US Telecom's FGD presubscribed end user traffic and billing. The consolidation of traffic will occur at each tandem office to which U.S. Sprint has ordered FGD as well as at end offices where FGD Service is directly routed to the customer's premises. Traffic will be reprogrammed to route Carrier Identification Codes (CICs), presently utilized by the IC, over the same trunk groups, with provisions for traffic overflow patterns in tandem switches that have more than one trunk group.

The billing accounts will be merged to provide a single U.S. Spring account. Should U.S. Sprint request discontinuance of this combined billing-routing arrangement, a new specialized arrangement and new charges will be developed.

Presubscription ballots and service center listings will be altered to reflect the merger.

	Nonrecurring <u>Charge</u>
Specialized Consolidation Arrangement	\$231,015.00

The preceding charge is in addition to all other rates and charges that may be applicable for the associated Switched Access Services.

87-2MCI Telecommunications

Change customer lines which are presubscribed to one of MCI's Carrier Identification Codes to another of MCI's Carrier Identification Codes.

The Telephone Company will send MCI confirmation of the access code assignment of each customer line changed.

The Telephone Company will bill MCI the charge set forth following for each changed customer line.

	Nonrecurring <u>Charge</u>
Per Telephone Exchange Service line or trunk, Centrex-CO line, or Feature Group A Line	\$5.00

31.13 Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

31.13.6 Testing Services (Cont'd)

(A) Switched Access (Cont'd)

(3) Cooperative Scheduled Testing (CST)

The three tests as set forth in (a) following represent the minimum offering, i.e., an order for testing must, at a minimum, consist of four 1004 Hz Loss Tests per transmission path, four C-Message Noise Tests per transmission path and one Return Loss (Balance) Test per transmission path, per year. The Additional Tests as set forth in (b) following may be ordered by the customer, at additional charges, 60 days prior to the start of the customer prescribed schedule. The customer also may specify a more frequent schedule of tests 60 days prior to the start of the customer prescribed schedule.

(a) Basic Tests*

<u>To First Point of Switching</u>	<u>USOC</u>	<u>Monthly Rates</u>
1004 Hz Loss Tests performed within a one year period, per test ordered, per transmission path	UBSX+	
- New York/Connecticut		\$0.26
- All other states		0.43
C-Message Noise Tests performed within a one year period, per test ordered, per transmission path	UBSX+	
- New York/Connecticut		1.05
- All other states		0.27
Return Loss (Balance) Tests performed within a one year period, per test ordered, per transmission path	UBSX+	
- New York/Connecticut		1.05
- All other states		0.59

* Subject to a one year minimum contract period, and annually thereafter.

(TR 1126)

Issued: April 19, 1999

Effective: May 4, 1999

ACCESS SERVICE

31. The Bell Atlantic Telephone Companies Rates and Charges (Cont'd)31.13 Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)31.13.6 Testing Services (Cont'd)

(A) Switched Access (Cont'd)

(3) Cooperative Scheduled Testing (CST) (Cont'd)

b) Additional Tests

<u>To First Point of Switching</u>	<u>USOC</u>	<u>Monthly Rates</u>
Gain-Slope Tests performed within a one year period, per test ordered, per transmission path	UBSX+	
- New York/Connecticut		\$1.05
- All other states		0.43
C-Notched Noise Tests performed within a one year period, per test ordered, per transmission path	UBSX+	
- New York/Connecticut		1.05
- All other states		0.27

(c) Example using New York rates:

A customer schedules 6 1004 Hz Loss Tests, 6 C-Message Noise Tests and 4 Return Loss Tests on one trunk for a year. The charges will be computed as follows:

$$\begin{aligned}
 6 \times .26 &= 1.56 \\
 +6 \times 1.05 &= 6.30 \\
 +4 \times 1.05 &= 4.20 \\
 \hline
 &= \$12.06 \text{ per month, per trunk}
 \end{aligned}$$

ACCESS SERVICE

31. The Bell Atlantic Telephone Companies Rates and Charges (Cont'd)31.17 Packet Switching Access Service31.17.1 INFOPATH Packet Switching Service - Synchronous

Rates and charges as specified in 31.7 of this tariff apply, as appropriate, for each channel connected to an access concentrator or packet switch. The technical specifications are defined under optional features in Section 7. for channels provided to the port connections.

In addition to the charges specified following, the general regulations and charges specified in other sections of this tariff apply, as appropriate.

(A) Access Concentrator Port Connections (Low to Medium Throughput)

Rates and charges include central office equipment at the Access Concentrator, one logical channel and one network address. In addition, in the New York Telephone operating territory, the service requires a Voice Grade Channel as specified in Section 7. between the customer premises and the Access Concentrator; and in the New England Telephone operating territory, a Voice Grade or DIGIPATH digital service II (DDS II) Channel as specified in Section 7. between the customer premises and the Access Concentrator and a Central Office Interface as specified in (3) following.

(1) X.25 Port - New York/Connecticut
