ACCESS SERVICE

31. The Bell Atlantic Telephone Companies Rates and Charges (Cont'd)31.17 Packet Switching Access Service (Cont'd)31.17.2 INFOPATH Packet Switching Service - Asynchronous(A) Network Usage Charges Optional Features

Network usage charges are based on calls originating over the INFOPATH packet switching service to the network addresses in the serving area. Asynchronous charges consist of:

- Call Set-up (as specified in 31.17.1(D)(1) preceding);
- Packets Transported (as specified in 31.17.1(D)(2) preceding);
- A Service Usage Charge, (as specified in 31.17.2(C) following), when access to the INFOPATH packet switching service network is via public dial.

In addition, general regulations and charges specified in other sections of this tariff apply, as appropriate.

New York/Connecticut	SP1CD	\$0.22
All Other States	SP1CD	0.16

* See Section 28. preceding for application of rates.

(Z)

** A microwave customer will not be assessed a fixed cable space charge unless the customer's cables and/or waveguide passes through the serving wire center cable vault.

A customer interconnecting its transmission equipment between its multiplexing nodes or virtual collocation arrangements within the same serving wire center, access tandem or remote node will not be assessed a fixed cable space charge.

When determining the linear footage associated with interconnection of an Expanded Interconnection Arrangement and another Interexchange Carrier point of presence already located in the same Telephone Company building as the serving wire center, access tandem or remote node (i.e., a point of presence established under terms other than those specified for Expanded Interconnection), the linear footage to connect such locations will be measured from manhole zero to the multiplexing node or virtual collocation arrangement.
