ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.6 Determination of Nonpremium and Premium Rates (Cont'd)

(B) Transition Billing Arrangement (Cont'd)

- (6) For purposes of administering this provision: (1) subscriber lines are defined as exchange service lines, Centrex lines and Centrex-type lines provided by the Telephone Company under its local and/or general exchange service tariff; (2) the access area is defined as the local calling area of the dial tone office for originating and terminating FGA or BSA-A, and all end offices subtending the Telephone Company access tandem for originating and terminating FGB or BSA-B; and (3) the local calling area of the dial tone office is as defined in the Telephone Company's local and/or general exchange service tariff. (C)

6.5.7 Minimum Periods and Charges

(A) Minimum Periods

Switched Access Service is provided for a minimum period of one month.

(B) Minimum Monthly Charge

Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity of service provided.

For all Switched Access Arrangements, the minimum monthly charge is the sum of the Local Switching, Local Transport and Information Surcharge charges set forth in 6.6 and the Carrier Common Line charges set forth in 3.7 for the measured or assumed usage for the month.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.8 Application of Rates for FGA and BSA-A Extension Service (C)

When a FGA or BSA-A extension service is provided with additional (C) terminations of the service at different building(s) in the same or a different Local Serving Area, the FGA or BSA-A extensions within the (C) Local Serving Area are provided and charged for under the Telephone Company's local and/or general exchange service tariffs, and the FGA (C) or BSA-A extensions in different Local Serving Areas are provided and (C) charged for as Special Access Service. The applicable rate elements which may apply are: A Voice Grade Circuit Termination, Circuit Mileage, and Signaling Capability (optional features and functions). All appropriate monthly rates and nonrecurring charges set forth in 7.5.6 following will apply.

Effective: November 30, 1995

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.9 Application of Rates for Extended FGA and BSA-A Terminating Service (C)

(A) For calls established on a 1+ or expanded seven digit measured calling basis, outside the specific FGA or BSA-A Access Area, however (C) inside the LATA, in conjunction with terminating FGA or BSA-A traffic (C) to an end office, the following rates apply:

- for each access minute, the rates per access minute for Local Switching and the Information Surcharge.
- for each access minute, the Tandem-Switched Transport Facility rate per access minute per airline mile and the Tandem-Switched Transport-Termination per access minute per termination.

When the serving wire center of the customer's premises is the dial tone office, the Tandem-Switched Transport-Facility rate is applicable and mileage is measured from the serving wire center (i.e., the dial tone office) of the customer's premises to the end office.

When the serving wire center of the customer's premises is not the dial tone office, the Direct-Trunked Transport rate is applicable for mileage measured between the serving wire center of the customer's premises and the dial tone office. The Tandem-Switched Transport-Facility rate is applicable for mileage measured between the dial tone office and the end office.

The Tandem-Switching rate is not applicable for Extended FGA or BSA-A (C) terminating traffic.

Where the FGA or BSA-A call terminates at an end office equipped with (C) Equal Access, premium usage rates apply. Where the FGA or BSA-A call (C) terminates at an end office not equipped with Equal Access, non-premium usage rates apply.

(B) When FGA or BSA-A terminating traffic is extended outside the LATA, (C) Switched Access rate elements will be billed to the FGA or BSA-A (C) customer for the terminating interLATA access function provided via the FGA or BSA-A connection, and Switched Access rate elements will (C) be billed to the IC providing the interLATA service to the FGA or (C) BSA-A customer for the originating interLATA access function. (C)

(C) Rates for FGA and BSA-A calls terminated to NXXs outside the FGA or (C) BSA-A Access Area as set forth in the preceding paragraphs are in (C) addition to the applicable FGA and BSA-A rates charged within the FGA (C) or BSA-A Access Area for each such call. (C)

(This page filed under Transmittal No. 160.)

Effective: November 30, 1995

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.10 Network Blocking Charge for Feature Group D and BSA-D (C)

In the event that a customer's FGD or BSA-D trunk group blocking (C) threshold stated below is exceeded, the customer will be notified by the Telephone Company to increase its capacity (busy hour minutes of capacity or quantities of trunks) when excessive trunk group blocking occurs on groups carrying FGD or BSA-D traffic and the measured (C) access minutes for that hour exceed the capacity purchased. The blocking thresholds are predicted on time consistent, hourly measurements over a 30 day period excluding Saturdays, Sundays and national holidays. If the order for additional capacity has not been received by the Telephone Company within 15 days of the notification, the Telephone Company will bill the customer, at the rate set forth in 6.5.8, for each overflow in excess of the blocking threshold when (1) the average "30 day period" overflow exceeds the threshold level for any particular hour and (2) the "30 day period" measured average originating or two-way usage for the same clock hour exceeds the capacity ordered.

Blocking Thresholds

<u>Trunks in Service</u>	<u>1%</u>	<u>1/2%</u>
1-2	.070	.045
3-4	.050	.035
5-6	.040	.025
7 or greater	.030	.020

The 1% blocking threshold is for transmission paths carrying traffic direct (without an alternate route) between an end office and a customer's premises. The 1/2% blocking threshold is for transmission paths carrying first routed traffic between an end office and a customer's premises via a Telephone Company access tandem.

Effective: July 8, 1997

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.11 Shared Use Facilities

When a Special Access service and Switched Access service is provided over the same Wideband Analog or High Capacity facility through a common interface, the facility will be considered as part of the Special Access Service, and will be ordered, provided, and rated as set forth in 7.2.5 following.

Switched Access Service rates and charges will apply for each channel of the shared use facility that is used to provide a switched access service.

6.5.12 CCS7 Access Service

CCS7 Access Service as described in 6.2.7, connecting a customer's STPs to Telephone Company STPs, requires four STP Port Terminations and four Dedicated Switched Access Facilities. CCS7 Access Service connecting customer Signaling or Service Switching Points to Telephone Company STPs requires two STP Port Terminations and two Dedicated Switched Access facilities.

(A) Dedicated Switched Access

Dedicated Switched Access is composed of two rate elements: Dedicated Switched Access Line (DSAL) and Dedicated Switched Access Transport (DSAT). The DSAL has a nonrecurring charge and monthly recurring charge. The DSAT has only a monthly recurring charge and is charged for on a per airline mile basis.

(B) STP Port Terminations

The STP Port Terminations are charged both a nonrecurring charge and monthly recurring rate.

When a new mated RSTP/STP pair partially or fully replaces an existing mated RSTP/STP pair; Switched Access Ordering charges, DSAL nonrecurring charges, and RSTP/STP Port Termination charges will not apply to service rearrangements to discontinue Dedicated Switched Access connections at the existing pair and reestablish Dedicated Switched Access connections at the new mated RSTP/STP pair.

(C) SS7 Transport

SS7 Transport is provided at a flat rated non-distance sensitive rate as set forth in 6.6.37. The transport rate will apply per segment between each local and/or primary STP location.

(N)

(N)

Effective: November 30, 1995

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.13 Switched Access Cross Connect

The Switched Access Cross Connect charge provides the communications path between Telephone Company provided Switched Access Services and a customer's transmission equipment and facilities where the customer is provided EIS as defined in Section 17. The DS0 Cross Connect arrangement may connect directly to a Telephone Company provided Switched Access Voiceband Direct Trunked Transport. The DS1 Cross Connect arrangement may connect directly to Telephone Company provided Switched Access Services at a DS1 interface, to DS1 Direct Trunked Transport, or to a Telephone Company provided DS1 multiplexing arrangement. The DS3 Cross Connect arrangement may connect directly to DS3 Direct Trunked Transport or a Telephone Company provided DS3 to DS1 multiplexing arrangement. When a DS3 Direct Trunked Transport or Cross Connect arrangement is requested for connection to Switched Access Services, a DS3/DS1 multiplexing arrangement is required. The Cross Connect charge applies per DS1 or DS3 connection. Rates for DS1 and DS3 Cross Connect arrangements are listed in 6.6.34.

6.5.14 Tandem Switch Signaling (TSS)

TSS will be provided via FGD or BSA-D Switched Access, 500 SAC (C) Access, or 900 SAC Access services with either multifrequency (MF) address signaling or SS7 Out of Band Signaling. TSS is available with originating calling only, terminating calling only, or, where available, two-way calling trunks. TSS two-way calling trunks are only available from end offices where the switch technology is capable of measuring the terminating usage on two-way TSS equipped trunks. Where the end office switch technology is not capable of measuring terminating usage on two-way calling TSS equipped trunks, the customer must order originating calling only and/or terminating calling only trunks for use with TSS.

Switched Access connections to the customer's access tandem location(s) shall be via Direct-Trunked Transport, Entrance Facility, and/or a customer's transmission equipment and facilities using DS1 or DS3 Cross Connect arrangement where the customer is provided Expanded Interconnection Service as described in Section 17. The Switched Access Entrance Facility provides the

Effective: January 24, 1995

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.14 Tandem Switch Signaling (TSS) (Cont'd)

facility, including interface arrangement, between the point of termination at the customer designated location and the Telephone Company's serving wire center. Direct-Trunked Transport provides the interoffice facilities dedicated to a single customer between the serving wire center and end offices. TSS is not available via a Telephone Company access tandem. The facilities ordered by the customer for connectivity from the customer's access tandem to an IC's CDL is provided via Special Access facilities as described in Section 7. (S)(y)(M)

- For originating usage the owner of the carrier identification code will be billed for all usage. (S)(y)(M)
- For terminating usage all associated Switched Access charges are the responsibility of the TSS customer. At the TSS customer's request, the Telephone Company will bill each of the TSS customer's users directly for their respective usage, if the TSS customer agrees to furnish the Telephone Company, free of charge, the call detail information necessary to bill its users. This call detail information must be provided daily for the previous day's usage in industry standard format (i.e., 1101-20 Expanded Message Record format with end office level detail). The information must be provided by either electronic transmission or magnetic tape as specified by the Telephone Company. (S)(y)(Z)(x)

If the TSS customer fails to provide the call detail information or fails to provide the information in the required format within 30 days from the call activity date, then the TSS customer will be billed for that day's usage. Where the total usage measured by the Telephone Company differs from the total amount of usage provided by the TSS customer's call detail information, the Telephone Company will work cooperatively with the customer to resolve the discrepancies. (S)(y)

The TSS customer must retain documentation in support of the billing information for a period of fifteen months after submission of the billing tapes to the Telephone Company. The Telephone Company reserves the right to audit billing tape information upon 30 days' notice to the TSS customer. In the event of a discrepancy, if final agreement cannot be reached, charges will be billed based on the results of the audit. (N)(x)

- (x) Issued on not less than one day's notice under authority of Special Permission No. 95-66 of the FCC.
- (y) Deferred from November 10, 1994 until January 24, 1995. See Supplement No. 17.

6. Switched Access Service (Cont'd)

6.5 Rate Categories, Applications, and Regulations (Cont'd)

6.5.15 Basic Service Elements (BSEs) (S)(x)

Recurring rates and charges for Basic Service Elements (BSEs) in 6.2.13 are applied on a premium or nonpremium basis as discussed in 6.5.6. The ASR Ordering Charge will not apply when a customer orders BSEs in conjunction with the establishment of a Basic Serving Arrangement (BSA) or the conversion of a feature group to a BSA. The ASR Ordering Charge will apply to changes to or additions of BSEs associated with an established BSA. The application of monthly recurring charges or usage rates to BSEs are as follows.

(A) Alternate Traffic Routing - BSE

Premium and nonpremium nonrecurring charges in 6.6 apply per trunk group equipped.

(B) Automatic Number Identification (ANI) - (BSE) (S)(x)

Rates in 6.6 apply per ANI attempt. (T)(y)

(C) User Transfer - BSE (S)(x)

Monthly recurring charges in 6.6 apply per line arranged. (T)(y)

(D) Hunt Group Arrangement - BSE (S)(x)

Premium and nonpremium monthly recurring charges in 6.6 apply per line equipped.

(E) Queuing - BSE

Premium and nonpremium monthly recurring charges in 6.6 apply per group equipped.

(F) Uniform Call Distribution - BSE

Premium and nonpremium monthly recurring charges in 6.6 apply per line equipped.

(G) Simplified Message Desk Interface (SMDI) - BSE

Premium and nonpremium monthly recurring charges in 6.6 apply per DNAL. (S)(x)

(x) Effective November 30, 1995.

(y) Issued under authority of Special Permission No. 95-1500 of the FCC.

(This page filed under Transmittal No. 170.)

(I) Direct Inward Dialing (DID) - BSE

Monthly recurring charges as shown in 6.6 apply.

(J) Billed Number Screening (BNS) - BSE

Monthly recurring charges in 6.6 apply per line.

(K) Answer Supervision - BSE

Monthly recurring charges as shown in 6.6 apply per line.

6.5.16 Carrier Identification Parameter (CIP)

(N)

The Carrier Identification Parameter (CIP) provides for the transmission of the Carrier Identification Code (CIC) or the access code 101XXXX to the customer with the Initial Address Message (IAM). CIP will be populated by a 4-digit CIC at the rates shown in 4.6.12. The monthly recurring rate is applicable per trunk. The nonrecurring charge is applicable per CIC, per trunk group. The nonrecurring charge has two rate levels. There is a nonrecurring charge applicable to trunk groups direct to the access tandem and a nonrecurring charge applicable to trunk groups direct to an end office.
