ACCESS SERVICE

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.9 Jurisdictional Report Requirements

(A) Jurisdictional Reports - Switched Access

(1) Line Side Access Service

- (a) Except in cases where the Telephone Company is billing according to actuals by jurisdiction, when a customer orders Line Side Switched Access Service the customer shall, in its order, state the projected interstate percentage for interstate usage for each Line Side Switched Access Service group ordered. If the customer discontinues some but not all of the Line Side Switched Access Services in a group, it shall provide the projected interstate percentage for such services which are discontinued.

(2) Trunk Side Access Service

- (a) The Company provides SS7 Signaling information to customers for all originating messages; conversely, the Company requires the provision of all SS7 Signaling information for all terminating messages by access customers. This information provides all data necessary for the billing of access services separately for jurisdiction. Accordingly jurisdictional reports are not required from customers using Trunk Side access service.

(Z)

ACCESS SERVICE

11. Access Service Interfaces and Transmission Specifications (Cont'd)

11.1 Switched Access Service (Cont'd)

11.1.1 Local Transport Interface Groups (Cont'd)

(E) Local Transport Optional Features (Cont'd)

- Supervisory Signaling

Supervisory Signaling allows the customer to order an optional supervisory signaling arrangement for each transmission path provided where the transmission parameters permit, and where signaling conversion is required by the customer to meet its signaling capability.

- 64 Clear Channel Capability

64 Clear Channel Capability allows the customer to transport voice or data signals over a 64 Kbps channel with no constraints on the quantity or sequence of ones and zero bits. This option employs the Bipolar 8 Zero Suppression (B8ZS) technique to permit customers to use the full 64 Kpbs bandwidth of a DS0 channel. It is only available in suitably equipped electronic end offices as identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF NO. 4. 64 Clear Channel Capability, as described in Technical Reference GR-334-CORE, is available with Interface Groups 6 and 9 for Trunk Side with Signaling System 7 (SS7) signaling.
