Herein referred to collectively as the “Price Cap Rules”;

## B. Waivers

Aliant lists below all currently applicable waivers that permit rate elements different than those specified in 47 C.F.R., Part 69.

The Commission in Memorandum Opinion and Order, *In the Matter of Annual 1989 Access Tariff Filings*, DA 88-1872, Released December 2, 1988, extended indefinitely the waiver allowing carriers to bill \$25.00 for a special access surcharge. This element is included in Aliant's Common Line basket.

The Commission in Memorandum Opinion and Order, *In the Matter of Lincoln Telephone and Telegraph Company Petition for Waiver of Part 69*, DA 89-654, Released June 21, 1989, granted a waiver allowing (then) Lincoln to establish a separate rate element for 900 Access Service. This element is included in Aliant's Local Switching service category within the Traffic Sensitive Basket.

The Commission in Memorandum Opinion and Order, *In the Matter of Lincoln Telephone and Telegraph Company Petition for Waiver of the Commission's Rules To Establish 500 Access Service*, DA 95-115, Released January 26, 1995, granted a waiver allowing (then) Lincoln to establish a separate rate element for 500 Access Service. This element is included in Aliant's Local Switching Service category within the Traffic Sensitive Basket.

The Commission in Memorandum Opinion and Order, *In the Matter of United States Telephone Association Petition for Waiver of Section 69.152 (b) and*

69.153 (c) (1) of the Commissions Rules, DA 99-1122, released June 8, 1999, granted a waiver to allow price cap LECs to use USTA's proposed interim calculations only when necessary to compensate for an anomaly that produces negative multi-line business PICCs.

### **C. New Services**

Not applicable for this filing.

## **II. Index and Rate Development**

### **A. Existing Indices**

The existing indices are those indices that will be in effect on June 30, 2002. See Exhibit INDREF for transmittal numbers under which existing indices became effective.

### **B. PCI Development**

Aliant calculated its Price Cap Indices ("PCIs") for existing baskets in accordance with the Price Cap Rules. See Exhibit RDEV.

#### **1. GDP-PI**

Aliant developed a value of 1.8742% for GDP-PI by dividing the most recent estimate of the 4th quarter 2001 fixed weight GDP-PI by the current 4th quarter 2000 fixed weight GDP-PI and then subtracting one.

## **2. Productivity Factor**

Aliant is using a productivity factor of 6.5% for the Common Line, Traffic Sensitive, Trunking Baskets and Special Access Basket.

## **3. Exogenous Costs**

Aliant developed exogenous cost changes according to the Price Cap Rules. These dollar effects were measured at 2001 base period level of operations and apportioned on a cost-causative basis between the price cap baskets. See Exhibit RDEV. In addition, a final 2000 and initial 2001 Form 492A are provided as Exhibit 492A,

### **a) Regulatory Fees**

Local Exchange Companies are allowed to recover the impact of regulatory fees as an exogenous cost. The impact of regulatory fees is shown in Exhibit RDEV.

### **b) Telecommunications Relay Service**

All common carriers providing interstate telecommunications services are required to contribute to a fund designated to support telecommunications relay services. TRS contributions are treated as exogenous costs and their impact is shown in Exhibit RDEV.

**c) North American Numbering Plan Fee**

In the North American Numbering Plan (NANP) Order, the Commission required all telecommunications carriers to contribute to the cost recovery for numbering administration. Previously, Aliant was not a contributor to the fund; therefore, the cost of such fees was not included in Aliant's rates when Aliant converted to price cap regulation in 1993. To remain consistent in the price cap treatment of such fees, i.e. Regulatory Fee and Telecommunications Relay Services Fee, Aliant is treating the NANP fee as an exogenous change.

The impact for NANP fees for Aliant can be found in Exhibit RDEV.

**4. CMT Per Line Revenue**

Part 61.3(d) of the Commission's Rules discuss the calculation of the maximum SLC for the residential and single-line business, non-primary residential and multi-line business service categories

based on the average common line, marketing and transport interconnection charge revenues (CMT revenue) per line. Exhibit CMT displays the current CMT per line rate for Aliant and calculates the adjusted CMT per line rate based upon 2001 access lines.

## **5. Excluded Services**

Exhibit OUTPC-1 provided a detailed listing of those services which are not included under price cap regulation.
