## ACCESS SERVICE

7. Special Access Service (Cont'd)7.11 Transparent LAN Service-Lite ("TLS-Lite")7.11.1 Service Description

Transparent LAN Service-Lite ("TLS-Lite") is a 768 Kbps transport service for the interconnection of Ethernet Local Area Networks ("LANs") and Wide Area Networks (WANs). TLS-Lite is provided over copper facilities and can be provided on a point-to-point or multi-point basis. (T)(x)

TLS-Lite serves as a LAN extension by providing a virtual private circuit that utilizes public transport. The service is bi-directional, providing high capacity service over private virtual circuits. Customers must subscribe to TLS-Lite Port service or may interconnect with Transparent LAN Service-High Speed ("TLS") as a data link. (T)(x)

The electrical signals provided by TLS-Lite at the network interface meet IEEE 802.3 requirements. At the central office, the network management information is used to maintain network performance and integrity.

A. Service Elements

Port Connection – A port connection provides the link from a customer's terminal equipment, to the Company's network supporting TLS-Lite. A port connection includes a network interface, and the related copper facility.

Line Loop Extender – Customers located further than 9,000 feet from the serving wire center may require the use of a Line Loop Extender. Customers located further than 18,000 feet may require the use of two Line Loop Extenders.

(x) Issued under authority of Special Permission 02-140 of the FCC in order to withdraw tariff material filed under Transmittal No. 17.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7. High Capacity Service (Cont'd)7.11 Transparent LAN Service-Lite ("TLS-Lite") (Cont'd)7.11.3 Rate Regulations

- A. The initial order for TLS-Lite must be for a fixed service period of one, three, or five years. At the end of the initial service period, the customer has 30 days in which to select an additional term commitment for any of the service periods specified, or may elect the month-to-month option. If the customer does not sign a term commitment by the end of the 30-day period, the customers will automatically be charged the month-to-month rate.
- B. Customers may elect to spread their TLS-Lite non-recurring charges over one year. If the customer elects to terminate their fixed period agreement, the customer must remit any unpaid portion of the non-recurring charges to the Company.
- C. A subsequent order to add any TLS-Lite ports to an existing TLS-Lite network must be for a fixed-period of one, three, or five years, or for the remainder of the customer's existing fixed-period service agreement. The minimum service period for additional TLS-Lite ports is 12 months.
- D. Ports are priced at the rate for the total number of ports purchased for the term of the service agreement. Customers with 12 or more ports shall pay the 12-port rate. (T)(x)  
(T)(x)
- E. If the customer increases the number of ports after executing the initial term of service agreement, they have two options:
  - 1. sign a fixed term agreement for only the additional port(s);  
or
  - 2. request that the new port(s) be added to an existing fixed period agreement (for not less than 12 months) and re-rate the agreement based on the total number of ports in service.

(x) Issued under authority of Special Permission 02-140 of the FCC in order to withdraw tariff material filed under Transmittal No. 17.

Issued: November 18, 2002
