## ACCESS SERVICE

4. End User Access Service (Cont'd)4.6 Rate Regulations (Cont'd)4.6.6 Residence Services(A) Primary Line and Non-Primary Line Service

When an end user is provided local residence exchange service(s) in a state and when the local residence exchange service is provided under the general and/or local exchange service tariffs, the EUCL Residence - Primary or Non-Primary line or trunk rate as set forth in 4.7 following, applies to each such local residence exchange service. See 2.6 for definition of Primary and Non-Primary line.

The EUCL for ISDN Basic Rate Service (BRS) shall be the EUCL Residence Non-Primary line or trunk rate as set forth in 4.7 following.

(B) Centrex CO and CO-like Dormitory Service

Regulations concerning the application of EUCL charges to student or faculty dormitory (residential) quarters served by Centrex CO or CO-like service are set forth in 4.6.3(C) preceding.

4.6.7 Federal Universal Service Fee (FUSF)

The Federal Universal Service Fee (FUSF) recovers the Telephone Company's contribution to various federal universal service funds. The Telephone Company will apply the FUSF through a monthly surcharge applied to the total billed charges for interstate access services ordered by end users, as described below.

The FUSF Revenue Surcharge will not apply to any local exchange services purchased by end users participating in the Lifeline Assistance program or by customers that resell services to end users as part of an interstate telecommunication service and are required to contribute to the various federal universal service funds. In case of a dispute regarding whether the customer is reselling service, the Telephone Company may request a signed certification to that effect from the customer.

When an end user temporarily suspends its local exchange service that is associated with FUSF, one-half of the FUSF surcharge will be temporarily suspended for the time period the local exchange service is suspended.

(A) Rate Application

The FUSF Revenue Surcharge will be determined by multiplying the surcharge factor shown in Section 17.1.4, following, by the end user's total interstate access services charges at the billing account level.
