**INTERSTATE INTRALATA MESSAGE TELECOMMUNICATIONS SERVICE****6. Dial Conference Service****6.1 Application**

Dial Conference Service is a communications service furnished between a calling station and two or more called stations. Such stations are connected together by means of a local exchange dial conference arrangement. This service is limited to only stations that are direct dialed by the customer from the calling station.

**6.1.1 Rate and Charge Application**

Charges for services are the sum of (A) and (B) following:

- (A) The rate for each two-point interstate intraLATA connection is the appropriate dial station rate as set forth in Section 3. preceding.
- (B) Rates for the appropriate dial conference connection and each two-point connection within the state where the call originates are those rates as set forth in the appropriate intrastate tariffs.

**Timing of Messages**

Chargeable time begins for each individual two-point connection at the time the two-point connection is established.

Chargeable time ends for each individual two-point connection when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends for each individual two-point connection when each network connection is released by automatic timing equipment in the telephone network.

**Reversal of Charges**

Collect calls are not permitted.
