

1. Allow month-to-month pricing at the same rate as level 5A or better
2. Obviously, no shortfall liability
3. Obviously, no termination liability

WHY: regional providers like us (www.NJI.com) provide better customer service and more reliable internet service than national providers

Current month-to-month pricing drives away otherwise happy customers since the wholesale price of ONLY THE DSL LINE (\$39.95) is higher than the complete retail price of national providers.

One national provider (VOL) has the unfair advantage of making a profit for its shareholders even when selling service BELOW COST!!! This is done because a separate subsidiary (VZ ILEC CORE) still makes profit on the physical line.

Please change month-to-month pricing for regional provider NJI.com to the same rate as 5A pricing or better.

P.S. since our ordering staff has over 20 years computer/telecom experience, cost of VZ receiving orders from us is much lower than VZ receiving orders from national company with inexperienced ordering staff.

We save VZ money on each order; we provide much better service to the consumer; but we pay a penalty.

I imagine my regional ISP colleagues feel the same way.
