8. Miscellaneous Services (Cont'd)

8.14 Service Provider Number Portability (T)

(A) Service Provider Number Portability Fee (T)

The Service Provider Number Portability (SPNP) Fee recovers the costs of implementing long-term number portability. The SPNP Fee shall be assessed to each end user in the 100 largest Metropolitan Statistical Areas (MSAs) and each end user served from a number-portability-capable wire center outside the 100 largest MSAs with the following exceptions.

- Each PBX Trunk shall be assessed nine (9) monthly SPNP Fees as calculated below
- Each ISDN PRI arrangement shall be assessed five (5) monthly SPNP Fees as calculated below
- Lifeline customers shall not be assessed the SPNP Fee

The SPNP Fee shall also be assessed to carriers that purchase Telephone Company unbundled switching ports and resellers of the Telephone Company's local service.

The Telephone Company shall recover the SPNP Fee for a five-year period from initial billing implementation date of March 10, 1999 with the following exception.

- Not applicable in Texas until July, 1999.

SPNP Monthly Rate
Per Line
\$.36

SPNP Monthly Rate
Per PBX Trunk
\$3.24

SPNP Monthly Rate
Per ISDN PRI Arrangement
\$1.80

ACCESS SERVICE

8. Miscellaneous Services (Cont'd)8.14 Service Provider Number Portability (Cont'd)(B) Service Provider Number Portability (SPNP) General Description

(N)

SPNP allows, where facilities permit: (1) a local exchange telephone service customer to maintain the same Directory Number (DN) when changing from one telecommunications service provider to another while remaining at the same location; and (2) callers to complete calls to numbers that have been ported.

(C) SPNP Query Service Description

SPNP is an advanced intelligent network capability which utilizes the common channel signaling network to query a database to secure network routing instructions before completion of a call. This database contains the Location Routing Number (LRN) that identifies the switch of the Local Service Provider (LSP) that serves a customer with a ported DN. The LRN is used to direct the call to the correct network switching element for completion to the end user customer. Where more than one network is involved in completing the call, the network prior to the termination (i.e., the N-1 Network) is normally responsible for querying a SPNP database to secure the LRN which is then used in routing the call.

Where the N-1 carrier does not perform a database query, and forwards a call to a switch in the Telephone Company's network for a NXX designated as a number portable code in the National Exchange Carrier Association Inc. FCC No. 4, the Telephone Company will perform a query for the N-1 carrier and bill that N-1 carrier a SPNP Query charge, as shown in Section 8.14(D) following.

When the Telephone Company is the first point of switching for terminating traffic to another local exchange carrier (e.g., a Telephone Company tandem switch), the Telephone Company will perform the query on behalf of the N-1 carrier and bill the N-1 carrier a SPNP Query charge, as shown in Section 8.14(D) following.

The SPNP Query is available through the telephone companies network at a tandem or end office.

When a Telephone Company tandem switch performs the query on behalf of the N-1 carrier, an SPNP Query-Tandem charge is applied whenever the call is to an NXX from which a DN has been ported.

When a Telephone Company end office switch performs the query on behalf of the N-1 carrier, an SPNP Query-End Office charge will apply when the called DN has ported out of the Telephone Company switch.

(N)

ACCESS SERVICE

8. Miscellaneous Services (Cont'd)8.14 Service Provider Number Portability (Cont'd)(D) Rate Regulations

(N)

The rates and charges associated with SPNP which are "query" based will be billed monthly, based on recorded usage. For billing purposes, each month is considered to have thirty (30) days.

The SPNP Query rate element provides for the identification of the LRN information associated with the directory number including transport of the query to and from the database. This charge is assessed at either a Tandem or End Office rate depending on where the query was launched.

- SPNP Query - Tandem Query Charges are assessed to each non-queried call delivered at the Telephone Company Tandem to numbers in NXXs from which a DN has ported. This charge is also assessed when the N-1 carrier delivers calls to other LECs through a Telephone Company Tandem.
- SPNP Query - End Office Query Charges are assessed to each non-queried call to a directory number that has been ported out of a Telephone Company end office switch, and the end office switch performs the query.

(E) Rates and ChargesRate Per Query

SPNP Query:

| | | |
|-----|-------------------------|------------|
| (1) | Tandem Query Charge | \$.000926 |
| (2) | End Office Query Charge | .000926 |
