This filing introduces DS3 Transmuxing as an optional feature for IntelliLight Dedicated SONET Ring (IDSR) service. The IDSR DS3 Trans mux port will perform a DS3 to DS1 conversion at an IDSR Enhanced Node. In addition, a 7-year term plan is introduced for IDSR ports in F.C.C. No. 1.

Support documentation as described in Part 61.49 of the Commission's rules is not required with this filing. However, a description of the services being filed is attached. Additionally, Figure 1 is attached for the new service options proposed for IDSR. Figure 1 will be used in the 2004 Annual Filing to demonstrate that these services options should be granted the same Phase I or Phase II regulatory relief in the MSAs and the Non-MSAs where the service category has been granted such relief.
