ACCESS SERVICE

13 - Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.8 Controller Arrangement

This arrangement enables the customer to control up to 48 transfer functions at a Telephone Company central office via a CPE remote keyboard terminal capable of either 300 or 1200 bps operation. Included as part of the Controller Arrangement is a dial-up data station located at the Telephone Company Central Office to provide access to the Controller Arrangement. The dial-up data station consists of a 212A DATAPHONE[®] data set and an appropriate Telephone Company provided channel. (T)

The Controller Arrangement must be located in the same Telephone Company central office as the transfer functions which it controls.

13.3.9 Telecommunications Service Priority (TSP) System

(A) Service Description

The Telecommunications Service Priority (TSP) System is a structured coding scheme that prescribes the order in which National Security Emergency Preparedness (NSEP) telecommunications services are installed or restored. The TSP System was developed to support the requirements of the U. S. Government as defined in the TSP Service Vendor Handbook and applies only to NSEP telecommunications services to which the Company is able to apply priority treatment. It requires and authorizes priority action by the Company.

Conditions of emergency or crises that cause invocation of NSEP treatment can only be declared by authorized officials of the Federal Government or other officials (Federal or Non-Federal) specified by the Manager - National Communication System (NCS) on behalf of the Executive Office of the President of the United States.
