ACCESS SERVICE

7. Special Access Service (Cont'd)7.13 Gigabit Ethernet Metropolitan Area Network (GigaMAN) (x)7.13.1 Basic Channel Description

GigaMAN is a fiber based, point-to-point, gigabit Ethernet service that allows customers to transport data signals between local area networks (LANs). (x)

GigaMAN transports data signals at the rate of 1 gigabit per second (Gbps). All basic service configurations provide a single direction of transmission. There is one basic type of GigaMAN service configuration: Node-to-Node service (two-point service), which connects two customer-designated premises, either inter or intra wire center. (x)

The following regulations will apply to GigaMAN: (x)

- (A) This service is available to customers in those LATAs served by and within the service territories of Nevada Bell Telephone Company (NBTC) only.
- (B) If existing facilities do not exist Special Construction may apply.
- (C) This service is limited to a distance of approximately 50 route kilometers or less (approx. 31 miles), or maximum fiber optic loss between nodes of 29 db. (x)
- (D) NBTC considers a service interrupted when it becomes unusable to the customer because of a failure of a facility component used to furnish service under this tariff in the event that the protective controls applied by NBTC result in the complete loss of service by the customer. An interruption period starts when a customer reports an inoperative service to NBTC and NBTC confirms that continuity has been lost, and ends when the service is operative. (x)

(x) Issued under authority of Special Permission No. 03-093 of the FCC in order to restore currently effective material and to withdraw material without becoming effective filed under Transmittal No. 52.

(This page filed under Transmittal No. 53)

Issued: October 22, 2003

Effective: October 23, 2003

One SBC Plaza, Dallas, Texas 75202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.13 Gigabit Ethernet Metropolitan Area Network (GigaMAN) (Cont'd) (x)7.13.1 Basic Channel Description (Cont'd)

(E) Service Provisioning (x)

(1) The customer provided equipment (CPE) must deliver the data signals for GigaMAN transport for the subscribed data service. (x)

(2) GigaMAN provides physical layer transport only. NBTC assumes no responsibility for the through transmission of signals generated by the CPE, for the signals by the CPE, or address signaling to the extent the CPE performs addressing. Error detection and correction of data generated by the CPE is the customer's responsibility. (x)

7.13.2 Channel Configuration

There are 3 basic rate elements, which apply to GigaMAN service: (x)

(A) Local Distribution Channel (LDC)

Local Distribution Channel (Same as Channel Termination) is the termination of GigaMAN at a customer designated premise (node), as described in Section 7.2.1 (A). A minimum of two LDCs apply, each consisting of the following two elements: (x)

(1) the termination for the fiber optic facilities at each node and its serving wire center. (x)

(2) the fiber optic facility between each node and its serving wire center. (x)

(B) Interoffice Mileage

Interoffice Transport facilities, which provide the transmission path between Serving Wire Centers associated with two customer designated premises, are comprised of Fixed and Per Mile rate elements.

(x) Issued under authority of Special Permission No. 03-093 of the FCC in order to restore currently effective material and to withdraw material without becoming effective filed under Transmittal No. 52.
