7. PRIVATE LINE TRANSPORT SERVICE

7.15 SONET RING SERVICE (SRS)

7.15.1 GENERAL

Effective October 20, 2001, SONET Ring Service (SRS) is limited to existing service. All existing SRS customers may retain their service until the expiration of their term or until the service is moved or disconnected. Channel Terminations and Transport Channels may be added up to 6 months prior to the expiration of the existing Partnership Plan only.

Customers subscribing to an SRS Partnership Program Pricing Plan that expires during 2003, will automatically have their term extended until December 31, 2003 if they are converting to the Regional Commitment Program (RCP).

(N)
|
(N)

A. Description

SONET Ring Service (SRS) is a high capacity shared network service capable of providing an interoffice transport link with high performance and reliability parameters and a level of redundancy/diversity designed to limit a single event from interrupting the service. SONET Ring Service is provided at speeds of 1.544 Mbps (e.g., DS1), 44.736 Mbps (e.g., DS3) and 155.52 Mbps (e.g., OC3) on Synchronous Optical Network (SONET) fiber facilities configured in ring architectures. These facilities are available at specific locations as set forth in NECA Tariff F.C.C. No. 4.

Where SRS is not available, Special Construction charges may apply, as set forth in Tariff F.C.C. No. 2.

(M) Certain material previously found on this page can now be found on Page 7-648.1.

(Filed under Transmittal No. 175.)

Issued: October 27, 2003

Effective: November 11, 2003

7. PRIVATE LINE TRANSPORT SERVICE

7.15 SONET RING SERVICE (SRS)

7.15.1 GENERAL

A. Description (Cont'd)

SONET Ring Service may be ordered as one of the following Pricing Plans:

- DS1 VTPP, as set forth in 7.1.3, for SRS 1.544 Mbps at 36 and 60 months;
- DS3 Pricing Plan, as set forth in 7.12.3, following, for SRS 44.736 Mbps at 36 and 60 months only;
- SST OC3 Pricing Plan as set forth in 7.14.2, following, for SRS 155.52 Mbps at 36 and 60 months only or
- Partnership Program, as set forth in 7.1.3. at 60 months.

Rates for SRS VTPP or Pricing Plans at 36 and 60 months are set forth in 7.15.3, following; SRS Month-to-Month rates, as set forth in 7.15.3, following, are applicable for Partnership Program. Termination Liability and Waiver, as set forth in 7.1.8, applies to SRS 1.544 Mbps VTPP, SRS 44.736 Mbps and 155.52 Mbps Pricing Plans and Partnership Program.

SONET Ring Service is available in Phoenix, AZ, Tucson, AZ, Colorado Springs, CO, Denver, CO, Des Moines, IA, Boise, ID, Minneapolis, MN, Omaha, NE, Albuquerque, NM, Salt Lake City, UT, Seattle, WA, Spokane, WA and Portland, OR.

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL

A. Basic Service Description

GeoMax is a high-speed, multi-protocol, fiber optic data transport service. It utilizes Dense Wave Division Multiplexing (DWDM) technology to enable two or more optical signals having different wavelengths to be simultaneously transmitted in the same direction over one strand of fiber. DWDM technology is protocol and bit rate independent, thus enabling GeoMax service to support multiple customer protocols and applications on a single platform. Concatenated Optical Carrier levels are fully supported and include OC3c, OC12c and OC48c.

At the customer premise, the customer has the option of receiving a protocol or application at a Node (Premise Node) or a Company provided Fiber Distribution Panel (FDP) via a Network Access Channel (NAC).

The following restrictions apply to GeoMax Service:

- A minimum of two nodes are required per GeoMax Service. There are two types of nodes, a CO Node and a Premise Node.
- Traffic can only be added or dropped from a GeoMax Service at a CO Node, Premise Node or a NAC.
- A NAC can only handle one protocol.
- The serving wire center for a NAC, must be a CO Node location.

B. Technical Specifications

GeoMax technical parameters are delineated in Qwest Corporation Technical Publication PUB 77407.

(M) Certain material previously found on this page can now be found on Page 7-702.

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL (Cont'd)

C. Availability

1. GeoMax is available as specified in the NECA TARIFF F.C.C. NO. 4, and provided subject to the availability and limitations of Company outside plant facilities. Special construction options are not available to improve the suitability of Company facilities.

(M)

(M)

2. GeoMax Service can connect to the following Company provided services: ATM, SST and SHNS. Such connections must be made at a CO Node.

(C-M)

(C)

D. Rate Categories

The basic rate categories that apply to GeoMax are:

- Premise Node, equipped with one shelf (described in D.1., following)
- CO Node, equipped with one shelf (described in D.2., following)
- Network Access Channel (NAC), (described in D.3., following)
- Additional Shelf (described in D.4., following)
- Amplifier Node (described in D.5., following)
- Transport Channels (described in D.6., following)
- Ports (described in D.7., following)

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL

D. Rate Categories (Cont'd)

1. Premise Node, equipped with one shelf

The Premise Node is equipped with one shelf and common equipment to support up to 32 ports. The number of ports per shelf will vary, depending on the interface, current technology and whether a customer chooses protected or unprotected ports.

The Company will install a Premise Node at the customer's request to receive traffic from the CO Node or another Premise Node. The Premise Node is assessed per node, per month.

2. CO Node, equipped with one shelf

The Premise Node is equipped with one shelf and common equipment to support up to 32 ports. The number of ports per shelf will vary, depending on the interface, current technology and whether a customer chooses protected or unprotected ports.

CO Nodes may be placed in a serving and/or remote wire centers. When a CO Node is located in a serving wire center (SWC), protocols may be delivered to a NAC which is in the customer-designated premise serviced by the SWC. The CO Node is assessed per node, per month.

3. Network Access Channel (NAC)

The Network Access Channel (NAC) may be placed in a customer-designated premise and is a Fiber Distribution Panel (FDP) connected to a CO Node Port via a 2 fiber non-protected interface.

One NAC is required per directly connected CO Port, there are no NAC ports. The NAC rate element is assessed per NAC, per month.

4. Additional Shelf

The shelf is equipped with common equipment to support up to 32 ports. The number of ports per shelf will vary, depending on the interface, current technology and whether a customer chooses protected or unprotected ports.

(M) Certain material previously found on this page can now be found on Page 7-703.1.

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL

D. Rate Categories (Cont'd)

5. Amplifier Node

(T)(M)

This Optical Amplification provides required strengthening of the optical signals or wavelengths to support greater distances that are beyond the reach of the normal DWDM optical signals. Traffic cannot be added or dropped from an Amplifier Node. The Company will determine the location of the wire center where the Amplifier Node will be placed based upon design.

(M)
|
(C)(M)
(C)
(C)

6. Transport Channel

(C)

The Transport Channel rate category provides for the transmission facilities between SWCs for a Premise Node and/or a CO Node. If there is just one SWC or CO Node in the configuration the mileage is zero.

(C)

If there are two or more SWCs and/or CO Nodes, the mileage for the application will be the air line miles between each of the SWCs and/or CO Nodes, calculated on a V and H basis. The mileage is not doubled to reflect protected or diverse paths.

(N)

Example: If a configuration consists of three SWCs at points A, B and C, then the mileage would be calculated on the air line miles from A to B, from B to C and from C to A. If location C was not an SWC then B to C and C to A would not be calculated.

(N)

7. Ports

(T)

- OC3 Port, An Optical Carrier Level 3 of 155.52 Mbps
 - Protected
 - Unprotected
- OC12 Port, An Optical Carrier Level 12 of 622.08 Mbps
 - Protected
 - Unprotected
- OC48 Port, An Optical Carrier Level 48 of 2.488 Gbps
 - Protected
 - Unprotected

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL

D.7. Ports (Cont'd)

(T)

- ETR Port – An IBM™ External Timing Reference (ETR)/Control Link Oscillator (CLO), or Sysplex Timer™ links, 16 Mbps signals for distributing the Time-of-Day (TOD) information to all Central Processing Units (CPUs) in the sysplex and to keep the Sysplex Timer™ Units synchronized with each other.
- FDDI Port, Fiber Distributed Data Interface, An ANSI standard operating at 125 Mbps
 - Protected
 - Unprotected
- ESCON Port, An IBM™ Enterprise Systems Connection (ESCON) channel, a 200 Mbps signal for sending user data and control information between IBM systems such as S/390 CPUs.
 - Protected
 - Unprotected
- Fast Ethernet Port, 125 Mbps
 - Protected
 - Unprotected
- ISC Port, An InterSystem Coupling Facility or A Coupling Facility link – An IBM 1.06 Mbps signal that provides data caching, locking and queuing services between a Coupling Facility and a CPU.
 - Protected
 - Unprotected
- FICON Port, Fibre Connection (FICON™) channel – An IBM version of the industry standard Fibre Channel operating at 1.06 Gbps signal which provides for connectivity similar to ESCON™ while enabling full duplex transfer and multiple concurrent Input/Output (I/O) operations on a single channel
 - Protected
 - Unprotected

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.1 GENERAL

D.7. Ports (Cont'd)

- Gigabit Ethernet Port, 1.25 Mbps
 - Protected
 - Unprotected
- D1 Video Port, A CCIR (Comite' Consultatif International des Radiocommunications) standard operating at 270 Mbps
 - Protected
 - Unprotected
- Fibre Channel Port, A set of ANSI standard supporting the following speeds:
133 Mbps, 266 Mbps, 531 Mbps, 1.062 Gbps
 - Protected
 - Unprotected

7. PRIVATE LINE TRANSPORT SERVICE

7.18 GEOMAX

7.18.2 REGULATIONS

A. Obligations of the Customer

1. The customer shall provide immediate access to Company equipment by authorized Company personnel 24 hours a day, 7 days a week for restoration of service, response to equipment failure, or maintenance of service.
2. All operations at the customers premises will be performed at the expense of the customer and must conform to rules and regulations adopted by the Company to maintain a proper standard of service. Included in the aforementioned expenses would be structural work required for supporting telecommunications facilities.
3. The customer is required to provide adequate building space, lighting and atmospheric control (humidity, temperature and ventilation) for proper installation, operation and maintenance of Company equipment and facilities on the customer premises.

B. Installation Guarantee

The Company guarantees 100% on-time provisioning of all new GeoMax Services based on the agreed date between the customer and the Company. If the agreed-on due date is missed, the Company will credit the customer 50% of the nonrecurring rate on all affected ports.

C. Service Guarantee

Credit allowance will apply when the customer experiences a service interruption as follows:

- Qualified ports will not receive double credit during any billing cycle. When a particular port qualifies for more than one service credit during a billing cycle, the higher service credit will be given to the customer.
- The customer will receive service credit on the billing cycle following the service interruption and completion of the Company's verification process.
- A service credit will not be given when network failure(s) and/or outage(s) is associated with Company equipment and does not result in customer downtime or performance degradation.
- Exception: Service Guarantee does not cover protocol delivered via a NAC.
