## ACCESS SERVICE

7. Special Access Service7.1 General

Special Access Service provides a transmission path to connect customer designated premises\*, directly, through a Telephone Company hub or hubs where bridging or multiplexing functions are performed, or to connect a customer designated premises and a WATS Serving Office. Special Access Service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

Special Access Service purchased from the provisions of this tariff may be commingled with unbundled network elements or unbundled network element combinations purchased pursuant to the Commission's Part 51 Interconnection Rules and in compliance with the Federal Communications Commission's Report and Order and Order on Remand and Further Notice of Proposed Rulemaking in CC Docket Nos. 01-338, 96-98 and 98-147, adopted February 20, 2003 and released August 21, 2003 (FCC 03-36). (C)

7.1.1 Channel Types

There are eight types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth
- Speed (i.e., bit rate),
- Spectrum

Customers can order a basic channel and select from a list of available transmission parameters and channel interfaces those that they desire to meet specific communications requirements.

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic Service in this tariff, there is no restriction against doing so.

\* Telephone Company Centrex CO and CO-like switches are considered to be a customer designated premises for purposes of this tariff.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.11 High Capacity Service (Cont'd)7.11.4 Optional Features and Functions (Cont'd)(D) Clear Channel Capability (CCC)

- (1) CCC is an arrangement that allows a customer to transport 1.536 Mbps information rate signals over a 1.544 Mbps High Capacity channel or over a 1.544 Mbps High Capacity channel derived from a multiplexed 44.736 Mbps High Capacity channel with no constraint on the quantity or sequence of one and zero bits. This arrangement requires the customer signal at the channel interface to conform to Bipolar with Eight Zero Substitution (B8ZS) line code as described in Technical Reference TR-NPL-000054 and Technical Reference TR-INS-000342.
- (2) CCC is provided, subject to availability of facilities, on DS1/1.544 Mbps High Capacity channels between two customer designated premises and on multiplexed DS3/44.736 Mbps High Capacity channels or multiplexed DS1/1.544 Mbps High Capacity channels\* between a telephone company hub office and a customer designated premises. The wire centers providing CCC are identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC., WIRE CENTER INFORMATION, TARIFF F.C.C. NO. 4.
- (3) No nonrecurring charge will apply when the CCC optional (C) feature is ordered at the same time the High Capacity service is ordered. If the CCC optional feature is ordered as an addition to an existing High Capacity Service, a nonrecurring charge is applicable as set forth in 7.11.5 following. The customer must agree to out-of-service periods required to add this feature to an existing High Capacity Service.

\*Available only on a DS1-to-Digital multiplexed configuration.

(TR132)

ACCESS SERVICE

9. Advanced Communications Networks (Cont'd)

9.4 Rate Regulations (Cont'd)

9.4.5 Promotional Offerings (Cont'd)

(C) Reserved for future use.

(D)

(D)

(D) For a limited time only, Telephone Company subscribers to local service may order new ADSL Tier Four service at \$11.00 a month for the first 3 months of service. To receive this promotional offering, a customer must place an order for new ADSL service between January 1, 2004, and March 31, 2004.

(C)

This promotional offering is available to residential and business customers. If the order completion is delayed due to Telephone Company reasons, the promotional offering will be extended to those affected customers. This offering is not available with any other promotions.

(E) For a limited time only, Telephone Company subscribers to local service may order new ADSL Tier One service at no charge for the first month of service and then \$19.95 a month for the next 11 months of service. To receive this promotional offering, a customer must place an order for new ADSL service between January 1, 2004, and March 31, 2004.

(C)

This promotional offering is available to residential and business customers. If the order completion is delayed due to Telephone Company reasons, the promotional offering will be extended to those affected customers. This offering is not available with any other promotions.
