First Quarter 2004 Universal Service

With this tariff filing, Qwest is updating the universal service contribution factors for the first quarter of 2004. This update applies the factor as adopted in Public Notice DA 03-3866, released December 4, 2003.

- General USF Charge Factor

The general USF charge factor has been decreased to 0.087 to reflect the first quarter 2004 charge factor.

- Multiline Business and Centrex USF Charge Factors

Multiline Business USF Charge Factor

As shown in Workpaper 1, "Federal Universal Service Fund Charge Factor Development," the Multiline Business charge factor for each study area is calculated by dividing the Multiline Business lines subject to FCC end user charges by the total number of lines subject to PICC charges pursuant to 47 C.F.R. 69.153. This ratio is multiplied by

the First Quarter 2004 USF Factor to determine the appropriate Multiline Business USF Charge Factor.

Centrex USF Charge Factor

As shown in Workpaper 1, "Federal Universal Service Fund Charge Factor Development," the Centrex USF Charge Factor is one-ninth of the Multiline Business USF Charge Factor.

As part of this of this filing Qwest is also updating the universal service contribution factor contained in its Tariff F.C.C. No. 4, Interstate IntraLATA Message Telecommunications Service, for the first quarter of 2004. This revision also applies the factor as adopted in Public Notice DA 03-3866, released December 4, 2003.

Supporting information discussed under § 61.49 of the Commission's Rules is, to the extent applicable, included with this filing.
