

This Tariff is cancelled
effective December 16, 2003.

Regulations and rates regarding
the services previously offered
under this Tariff can now be found in
John Staurulakis, Inc. Tariff
F.C.C. No. 1 for Access Service

ACCESS SERVICE

REGULATIONS, RATES AND CHARGES

Applying to the provision of Access Services within a Local Access and Transport Area (LATA) or equivalent Market Area for connection to interstate communications facilities for customers within the operating territory of

Smart City Telecommunications, LLC d/b/a Smart City Telecom
in the State of Florida
as set forth on Title Page 2.

Access Services are provided by means of wire, fiber optics, radio or any other suitable technology or combination thereof.

All material contained herein is new.

This tariff is filed in accordance with the Federal Communications Commission's Orders in CC Docket No. 86-467, released June 29, 1987 and September 27, 1988, and pursuant to the requirements of Sections 61.39 and 69.3 of the Commission's Rules.

This tariff incorporates by references, under authority of Special Permission No. 01-016, the regulations contained in NECA Tariff F.C.C. No. 5.

ACCESS SERVICE

6. Switched Access Service

6.1 Regulations

The regulations for the provision of Switched Access Service are the same as those set forth in Section 6. of the National Exchange Carrier Association Tariff F.C.C. No. 5, with the exception of Data Base Services, the regulations for the provision of which are set forth in Section 6.3 below.

6.2 Rates and Charges

The rates and charges for the provision of Switched Access Service are set forth in Section 17.2 following.

6.3 Data Base Services

6.3.1 Service Provider Number Portability (SPNP) Service

(A) General

SPNP Service is a capability that utilizes Advanced Intelligent Network (AIN) technology to query a database to secure network routing instructions before completion of a call. The database contains information about end users which have ported their service from the donor switch. At a minimum, the database contains the Location Routing Number (LRN) which identifies the Local Service Provider's (LSP) switch serving each ported end user. The LRN is used to direct the call to the correct switch for completion to the end user. Where more than one network is involved in completing the call, the network just before the terminating network (i.e., the N-1 Network) is responsible for querying a SPNP database to secure the LRN.

Transmittal No. 2

Issue Date: March 7, 2001

Effective Date: March 22, 2001

Martin A. Rubin
CEO
3100 Bonnet Creek Road
Lake Buena Vista, Florida 32830

ACCESS SERVICE

6. Switched Access Service (continued)

6.3 Data Base Services (continued)

6.3.1 Service Provider Number Portability (SPNP) Service (continued)

(B) Service Provider Number Portability (SPNP) Surcharge

The Telephone Company queries the database, as required, on behalf of its end user customers, line side access service customers and resale customers to enable completion of calls to numbers with NXX codes that have been designated as number portable. This service is “automatically” provided as part of the dialing process employed in the Telephone Company’s local exchange and access network.

On calls placed to numbers with NXX codes that have been designated as number portable, an originating SPNP capable switch, using AIN capabilities will suspend call processing, formulate and launch a query via the common channel signaling network to a database containing information necessary to route calls to number portable NXX codes. When the necessary routing information has been returned from the database to the switch originating the query, call processing is resumed and the call is routed to the correct network switching element for completion to the called party.

The SPNP Surcharge Service rate element applies to and provides the capability necessary for the Telephone Company’s end user customers, including its end user customers of lineside access services (e.g. FGA) to: (1) maintain the same telephone number when changing from one Telecommunications Service Provider to another while remaining at the same location, and (2) to complete calls to any telephone number that has been ported.

This capability is automatically provided as part of the local dialing process employed in the Telephone Company’s local exchange network.

This charge applies per line capable of originating local exchange calls.

Transmittal No. 2

Issue Date: March 7, 2001

Effective Date: March 22, 2001

Martin A. Rubin
CEO
3100 Bonnet Creek Road
Lake Buena Vista, Florida 32830

ACCESS SERVICE

6. Switched Access Service (continued)

6.3 Data Base Services (continued)

6.3.1 Service Provider Number Portability (SPNP) Service (continued)

(C) Service Provisioning

SPNP Service procedures will be applied uniformly to all users of the Telephone Company's SPNP Service except as stated in Section 6.3.1(C)(3), following. The Telephone Company's SPNP database will receive and respond to the Telephone Company's queries.

(1) Manner of Provisioning

SPNP Service will be provisioned using the LRN. The LRN associates an NPA-NXX-XXXX number with each central office switch that serves ported lines. This number will be known as the LRN for that switch. The LRN will be used as a network routing number for calls to ported numbers served by that switch. All switching equipment types will utilize LRN functionality using AIN capability.

(2) Limitations

SPNP Service is to be used only on a call-by-call basis for routing calls to number portable NXX codes and cannot be used for purposes other than those functions described herein.

Information residing in the Telephone Company's SPNP database is protected from unauthorized access and may not be stored in a carrier's database or elsewhere for any reason.

Transmittal No. 2

Issue Date: March 7, 2001

Effective Date: March 22, 2001

Martin A. Rubin
CEO
3100 Bonnet Creek Road
Lake Buena Vista, Florida 32830

ACCESS SERVICE

6. Switched Access Service (continued)

6.3 Data Base Services (continued)

6.3.1 Service Provider Number Portability (SPNP) Service (continued)

(C) Service Provisioning

(3) Network Management

The Telephone Company will administer its network with the objective of the provision of acceptable service levels to all users of SPNP service.

The Telephone Company maintains the right to block any SPNP Query traffic, in a nondiscriminatory manner, where the processing of the SPNP queries threatens to disrupt operation of its network and impair network reliability. The provision of SPNP Service is subject to the provisions of Section 6.3.1(C)(2).

(D) Rate Regulations

The charge associated with SPNP Service will be billed on a monthly basis, per line capable of originating local exchange calls.

The specific charge for SPNP Service is set forth in Section 17.2.2.

Transmittal No. 2

Issue Date: March 7, 2001

CEO
3100 Bonnet Creek Road
Lake Buena Vista, Florida 32830

ACCESS SERVICE

8. Digital Subscriber Line Access Services

(N)

Digital Subscriber Line Access Services (DSL Access Services) provide high speed data transmission services over local exchange carrier copper facilities and can be provisioned over existing local exchange service lines. Service is provided, where available, between customer designated premises and designated Telephone Company Serving Wire Centers.

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service

8.1.1 General

Wholesale Digital Subscriber Line (DSL) Transport Service is a high speed data access service that is made available to Network Service Providers for provision of high speed data services to their customers. Wholesale DSL Transport Service establishes a point-to-point Virtual Circuit (VC) between Telephone Company's Asynchronous Transfer Mode (ATM) network and customer designated end user premises utilizing DSL technology.

8.1.2 Definitions

(A) Digital Subscriber Line (DSL)

Digital Subscriber Line (DSL) is an access technology that enables high speed data to be sent over copper facilities.

(B) Downstream

Downstream is the transmission path from the Telephone Company's Wholesale DSL Access Service Connection Point to the point of demarcation at the customer designated end user customer premises.

(C) DSL Access Service Connection Point

The DSL Access Service Connection Point is a location designated by the Telephone Company that serves as an aggregation point for the collection of Telephone Company DSL traffic from multiple Digital Subscriber Line Access Multiplexers (DSLAMs).

(D) Upstream

Upstream is the transmission path from the point of demarcation at the customer designated end user premises to the DSL Access Service Connection Point.

(N)

Transmittal No. 8

Lake Buena Vista, Florida 32830

ACCESS SERVICE

8. Digital Subscriber Line Access Services (Cont'd)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.3 Service Description

- (A) Wholesale DSL Transport Service transports data traffic generated by a customer-provided DSL modem from the end user customer's Network Interface Device (NID) to the Telephone Company's Wholesale DSL Access Service Connection Point over existing Telephone Company local exchange service loops. From the DSL Access Service Connection Point, the traffic is transported to the customer's Network Service Provider via the Telephone Company's ATM network. ATM network services required for transport of Network Service Provider's traffic to the DSL Access Service Connection Point are provided under Section 16.1 following.
- (B) The designated end user premises location must be served by an existing in-service, Telephone Company provided exchange line facility and the Network Service Provider customer designated premises must be connected to Telephone Company ATM Service with the ATM UNI Port enabled for UBR or VBR transmission provided under Section 16.1 following. An in-service exchange line facility is the serving CO line equipment and all the plant facilities up to and including the Telephone Company-provided NID. (C)
- (C) Data speeds available from the Telephone Company are as set forth in Section 8.1.4(B) following for the applicable service class. The data speeds listed at Section 8.1.4(B) are maximum speeds. Actual speeds may be affected by loop distance, outside plant facility conditions, modem technology and other factors. Therefore, these data speeds are not guaranteed.
- (D) The connection speed or "sync rate" is between the NID at the end user's premises and the DSLAM. Actual data transfer or throughput may be lower than sync-rate due to Internet congestion, server or router speeds, protocol overheads, end user use of multiple applications and other factors that may not be in the Telephone Company's control.
- (E) Wholesale DSL Transport Service will be provided subject to the availability and limitations of the Telephone Company Wire Centers and outside plant facilities.

ACCESS SERVICE

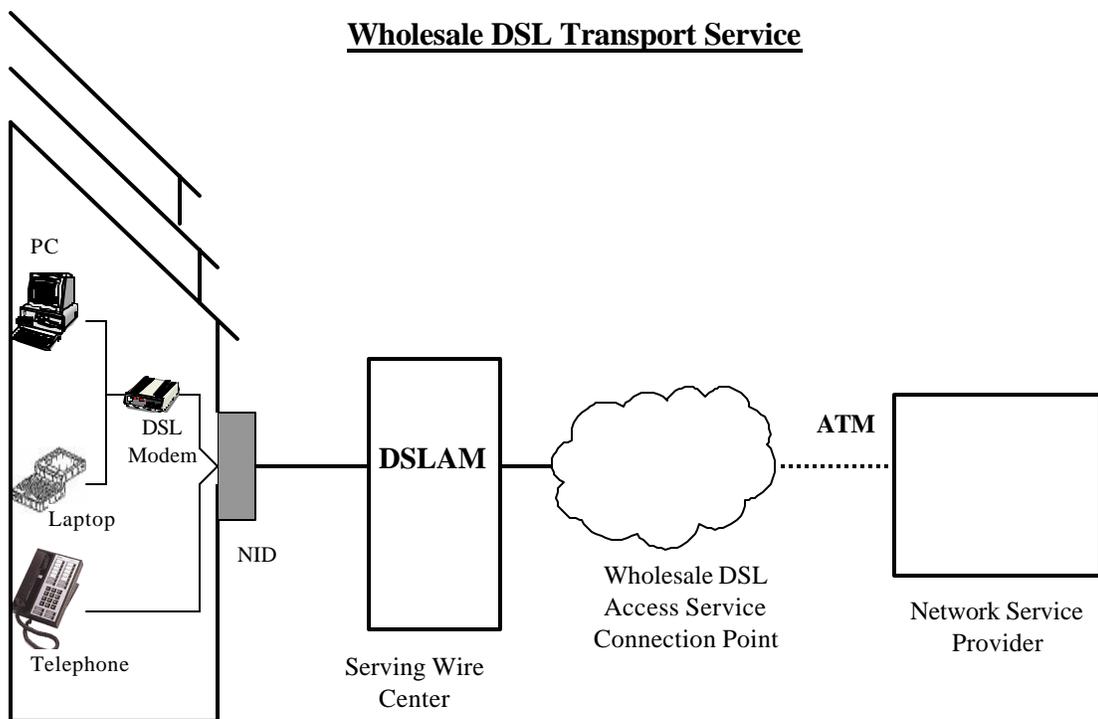

8. Digital Subscriber Line Access Services (Cont'd)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.4 Service Classes and Options

Wholesale DSL Transport Service is provided by the Telephone Company based on service class and service option.

(A) Service Classes

(1) Business Class

Business Class Wholesale DSL Transport Service is a premium DSL Access Service that is designed to support business-critical operations and applications through the use of multiple ATM Quality of Service (QoS) classes. Business Class Wholesale DSL Transport Service is offered at a variety of speeds and is provisioned over a separate, dedicated Telephone Company local exchange line facility.

(2) Consumer Class

Consumer Class Wholesale DSL Transport Service is a "best effort" service primarily designed to support affordable high speed Internet access for residential end users. Consumer Class Wholesale DSL Transport Service may be provisioned over the end user's existing Telephone Company local exchange telephone service line utilized for voice communications. When provisioned over the end user's existing local exchange telephone service line, Consumer Class Wholesale DSL Transport Service utilizes a centrally placed splitter or in-line filters to isolate the voiceband service and equipment from the DSL Access Service and equipment.

ACCESS SERVICE

8. Digital Subscriber Line Access Services (Cont'd)

(N)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.5 DSL Provisioning

(A) Responsibility of the Telephone Company

- (1) The Telephone Company will qualify the local exchange service loop between the customer's designated premises and the Serving Wire Center. The purpose of qualification is to determine the availability and suitability of existing Telephone Company facilities to provide the DSL service, and to determine if loop conditioning is required to support DSL.
- (2) The responsibility of the Telephone Company shall be limited to the furnishing and maintenance of Wholesale DSL Transport Service for the customer between the NID at the end user premises and the customer's ATM UNI interface on the DSL Access Service Connection Point.
- (3) Wholesale DSL Transport Service will be provisioned over existing Telephone Company copper facilities.

(B) Rights of the Telephone Company

- (1) The Telephone Company will not provision Wholesale DSL Transport Service if it has reasonably determined that: a) it is not technically feasible over existing facilities; or b) it will cause interference problems within the Telephone Company's network or other facilities.
- (2) The Telephone Company reserves the right to temporarily interrupt Wholesale DSL Transport Service for Wire Center or network maintenance, software updates, and in emergency situations.
- (3) The Telephone Company will offer Wholesale DSL Transport Service only within a limited area surrounding the ILEC Central Office. This area will be defined by the Telephone Company and the Telephone Company retains the discretion to change this area from time to time for new Wholesale DSL Transport Service.

(C) Responsibility of the Customer

- (1) The customer is responsible for obtaining and installing compatible customer premises equipment (DSL modems and routers) used for connection to Telephone Company Wholesale DSL Transport Service.
- (2) The customer is responsible for ensuring the continuing compatibility of CPE at the end user premises. The customer and/or end user shall be responsible for any expenses incurred for required changes to customer and/or end user equipment or facilities in order to make such equipment or facilities compatible with Telephone Company Wholesale DSL Transport Service.
- (3) The customer is responsible for providing the Telephone Company with the necessary information to provision the Wholesale DSL Transport Service to its subscribers
- (4) The Network Service Provider customer ordering Wholesale DSL Transport Service on behalf of its subscriber(s) must obtain and maintain record of a letter of agency authorizing the Network Service Provider to act as the agent of the end user subscriber. Upon request from the Telephone Company, the Network Service Provider will provide the Telephone Company with a copy of the letter of agency.
- (5) The customer must have connectivity to Telephone Company's ATM network where customer chooses to purchase Wholesale DSL Transport Service. The rates and charges for ATM Service are in addition to the rates and charges for Wholesale DSL Transport Service.
- (6) The customer will obtain the appropriate authorization to allow the Telephone Company's employees or agents to enter the customer's designated premises at any reasonable hour for the purpose of installing, inspecting, repairing or removing the NID or drop associated with Wholesale DSL Transport Service.
- (7) The customer is responsible for providing all customer support, marketing, billing, ordering and repair to and for its end users.

(C) Responsibility of the Customer (Cont'd)

- (8) The customer is responsible for: (1) the terms of any pricing plans offered by customer to its end users; (2) the ordering, billing and collection of its own end users; and (3) customer service for all aspects of the Service. Customer is also responsible for managing end user trouble reports and will advise its end users to contact customer directly with any trouble reports. Customer will not direct its end users to contact Telephone Company.
- (9) The customer shall at all times be the customer of record with respect to all Services purchased hereunder and shall be responsible for payment to Telephone Company. Customer retains all responsibility for billing its end users and for any claim an end user may make concerning unauthorized billing.

8.1.6 DSL Rate Regulations

(A) Rate Elements

Wholesale DSL Transport Service arrangements are available in varying options for the applicable service class based on the Downstream and Upstream speed combinations chosen by the customer. Service classes are described in Section 8.1.4(A) preceding. Service options are listed in Section 8.1.4(B) preceding. For Wholesale DSL Transport Service ordered on a month-to-month basis, a nonrecurring charge and a monthly recurring rate will apply per DSL arrangement as set forth in Section 17.4.8(A) following.

(B) Changes

All changes to existing Wholesale DSL Transport Service (e.g., a change of Network Service Provider and restoration of the Wholesale DSL Transport Service following a disconnect for non-payment of charges and/or a disconnect of the associated local exchange service line for any reason), other than changes involving DSL Network Reconfigurations under Section 8.1.6(C) following and administrative activities, will be treated as a discontinuance of the existing service and an installation of a new service. A nonrecurring installation charge will apply per Wholesale DSL Transport Service line for this work activity.

(N)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(B) Changes (Cont'd)

The following administrative changes will be made without charge to the customer:

- Change of customer designated premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address or contact name or telephone),
- Change of billing account number,
- Change of agency authorization that requires no changes to the Telephone Company's network,
- Change of customer contact name or telephone number, and
- Change of jurisdiction.

(C) Wholesale DSL Network Reconfiguration Charge

A Wholesale DSL Network Reconfiguration Charge applies when the Wholesale DSL Transport Service customer requests the Telephone Company to modify the Telephone Company's network to: 1) accommodate a change in the Wholesale DSL Transport Service end user's existing IP address or 2) limit the data speed delivered over the end user's existing Wholesale DSL Transport Service line. This charge applies for each request per Wholesale DSL Transport Service line. The Telephone Company will bill the Wholesale DSL Network Reconfiguration Charge to the Network Service Provider. The Wholesale DSL Transport Service Charge is set forth in Section 17.4.8(E) following

(D) Line Conditioning

Line conditioning is available, at no charge, and may be required if the facility will not accommodate DSL technology. This may include, but is not limited to, the removal of load coils, bridge taps and/or repeaters. The Telephone Company does not warrant that line conditioning will permit the provision of DSL technology.

(E) Minimum Period

The minimum service period for Wholesale DSL Transport Service provided on a month-to-month basis is one (1) month. If the Wholesale DSL Transport Service line is disconnected prior to the end of the minimum service period, the customer will be assessed all applicable monthly recurring rates for the remainder of the minimum service period.

(N)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(F) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the Wholesale DSL Transport Service customer designated premises
- The Wholesale DSL Transport Service customer designated premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

(1) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the Wholesale DSL Transport Service affected. There will be no change in the minimum period requirements. This charge is in addition to the Access Order Charge as specified in Section 17.4.1(D) following for Special Access.

(2) Moves To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

8. Digital Subscriber Line Access Services (Cont'd)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(G) Term and Volume Discount Plan (TVDP)

(1) General Description

The Wholesale DSL Transport Service Term and Volume Discount Plans (TVDP) provide customers Wholesale DSL Transport Services at discounted rates based on commitments of minimum volumes (Volume Commitment Levels) over a specific term (TVDP Term Commitments). The TVDP encompasses all of a customer's DSL services for the same TVDP Term Commitment term.

Two TVDP Terms Commitment terms are available. Wholesale DSL Transport Service customers may select one of the following TVDP Term Commitment terms:

- One-Year TVDP Term Commitment
- Three-Year TVDP Term Commitment

Rates applicable to Wholesale DSL Transport Service ordered under a One-Year TVDP Term Commitment or Three Year TVDP, a monthly recurring rate will apply per DSL arrangement as set forth in Sections 17.4.8(B) and 17.4.8(C), respectively, following. Except as provided for in Section 8.1.6(G)4, there is no nonrecurring charge for Wholesale DSL Transport Service ordered under a TVDP.

(C)
(C)
(N)
|
(N)

Under each TVDP, the following DSL line Volume Commitment Levels are available:

- | | |
|---------------------------|------------------------|
| Volume Commitment Level 1 | 1 to 49 DSL lines. |
| Volume Commitment Level 2 | 50 to 99 DSL lines. |
| Volume Commitment Level 3 | 100 or more DSL lines. |

Each of the Volume Commitment Levels has minimum line volumes assigned for each year of the TVDP. The Volume Commitment Level line volumes includes all of the in-service DSL lines provided by the Telephone Company to the customer for the committed term, including both Business Class lines and Consumer Class lines. For purposes of meeting the Volume Commitment Level under a TVDP Term Commitment, DSL lines include the aggregate of DSL access lines for all Downstream/Upstream speed Options described at Section 8.1.4(B) preceding.

(N)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(G) Term and Volume Discount Plan (TVDP) (Cont'd)

(1) General Description (Cont'd)

The service year will begin on the service anniversary date, which is defined as the date on which the customer places its order for a TVDP and designates the commitment level and term. Each service year runs 12 months from its service anniversary date.

The commitment level must be reached in accordance with the following schedule:

<u>Term</u>	<u>Grace Period</u>
1 year	6 months
3 years	12 months

At expiration of the TVDP, the customer may choose a new TVDP, convert to the month-to-month rates, or continue with the rates, charges, terms and conditions and commitment level in effect at the end of the expiring TVDP on a year-to-year basis. A conversion to a new TVDP or to month-to-month rates, or discontinuance, will require that the customer submit a service change order.

The minimum service period for Wholesale DSL Transport Service provided under a TVDP is one (1) month. If the Wholesale DSL Transport Service is disconnected prior to the end of the minimum service period, the customer will be assessed all applicable monthly recurring rates for the remainder of the minimum service period.

TVDP customers will be subject to shortfall liability charges for missed annual commitments and/or termination liability charges for early termination as set forth in (3) and (4) following.

(N)

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(G) Term and Volume Discount Plan (TVDP) (Cont'd)

(2) Annual Review

The commitment level is reviewed at the end of each service year on the service anniversary date. A count is taken of all DSL lines in service provided to the customer under this tariff, as of the last day of the service year. Customers who do not meet the minimum quantity of in-service lines for their commitment level on such date will be notified by the Telephone Company.

The commitment levels will be reviewed after each grace period and monthly thereafter. If the commitment levels are not reached within the grace period, the customer shall be assessed a shortfall liability charge.

Customers subscribing to either a One-Year or Three-Year TVDP Term Commitment with Volume Commitment Level 2 or 3 who have fewer than the minimum DSL lines for the applicable Volume Commitment Level will be reassigned to a reduced Volume Commitment Level based on the number of DSL lines provided by the Telephone Company to the customer at the time of the count. Once the number of DSL lines reaches the minimum level for a higher Volume Commitment Level, the customer will be reassigned to the higher Volume Commitment Level.

At the end of any service year, a customer may elect to move to a higher Volume Commitment Level if it has met the minimum line volume for its existing Volume Commitment Level. The election may be for a higher Volume Commitment Level within the customer's existing TVDP Term Commitment or a within a longer TVDP Term Commitment. The election may be for the next service year and for the remainder of the existing TVDP Term Commitment. However, should the customer fail to meet the minimum line volume for the higher Volume Commitment Level by the end of the service year following such election, the shortfall liability will be assessed as set forth in (3) following.

8.1 Wholesale Digital Subscriber Line (DSL) Transport Service (Cont'd)

8.1.6 DSL Rate Regulations (Cont'd)

(G) Term and Volume Discount Plan (TVDP) (Cont'd)

(3) Shortfall Liability

Shortfall liability applies to any TVDP customer with Volume Commitment Level 2 or 3 that fails to meet the minimum line volumes for its designated Volume Commitment Level. Shortfall liability is based on the difference between the monthly rate for the designated Volume Commitment Level and the monthly rate for the Volume Commitment Level that should have been charged based upon the actual quantity of in-service DSL lines at the end of the service period. The shortfall liability is equal to the difference in monthly rate multiplied by the sum of all lines in service at the end of each month during such service period. For example, a customer subscribed to a Three-Year TVDP Term Commitment with Volume Commitment Level 3 that has only 70 lines in-service at the end of year 2 will be assessed the difference in the monthly rates between Volume Commitment Level 3 and Volume Commitment Level 2 for each line in service at the end of each month during the service year.

(4) Termination Liability

A customer may terminate a TVDP without termination liability or shortfall liability charges if a Telephone Company initiated rate increase causes the customer's rates to increase by 10% or more at any one time during the term of the existing TVDP. Subsequent to a rate increase of 10% or more, customers must either elect to terminate the TVDP, or

- (G) Term and Volume Discount Plan (TVDP) (Cont'd)
- (4) Termination Liability (Cont'd)

If the customer elects to discontinue its TVDP prior to the end of the commitment period, the customer will be subject to termination charges.

- (a) For customers electing to terminate a Three-Year TVDP Term Commitment after one year but prior to completion of the three-year term, the termination charges shall be equal to the difference between charges assessed at the One-Year TVDP Term Commitment rate for the applicable Volume Commitment Level achieved by the customer and charges assessed at the Three-Year TVDP Term Commitment rate for the applicable Volume Commitment Level for the customer for all months from the beginning of the three-year term and the end of the month in which service is terminated.
- (b) For customers electing to terminate a Three-Year TVDP Term Commitment prior to completion of the first year of the three-year term, the termination charges shall be equal to the difference between charges assessed at the month-to-month rate set forth in Section 17.4.8(A) following and charges assessed at the Three-Year TVDP Term Commitment rate for the applicable Volume Commitment Level for the customer for all months from the beginning of the three-year term to the end of the month in which service is terminated plus the Nonrecurring Charge under Section 17.4.8(A) for each DSL line installed under the TVDP. (C)
- (c) For customers electing to terminate a One-Year TVDP Term Commitment prior to completion of the term, the termination charges shall be equal to the difference between charges assessed at the month-to-month rate set forth in Section 17.4.8(A) and charges assessed at the One-Year TVDP Term Commitment rate for the applicable Volume Commitment Level for the customer for all months from the beginning of the one-year term to the end of the month in which service is terminated plus the Nonrecurring Charge under Section 17.4.8(A) for each DSL line installed under the TVDP. (5) Renegotiation

Except as provided in 8.1.6(G)(4) preceding, the customer may choose to terminate an existing TVDP prior to the end of the TVDP Term Commitment and negotiate a new TVDP without termination liability provided the new TVDP meets the following requirements:

- the new TVDP must represent TVDP Term Commitment greater than or equal to the previous TVDP Term Commitment,
- the new TVDP must represent a Volume Commitment Level greater than or equal to the previous TVDP, and
- the new TVDP must be based upon the rates that are currently in effect and available to all customers.

When the customer converts to a TVDP with a greater TVDP Term Commitment, the new TVDP will begin in month one and no credit will be given for the actual time in service for the original TVDP. Lines in service at the time of conversion to the new agreement will apply to the Volume Commitment Level selected in the new agreement.

Customers upgrading to a new TVDP will be subject to a nonrecurring renegotiation charge as set forth in Section 17.4.8(D) following.

ACCESS SERVICE

16. Public Packet Data Network

(N)

Public Packet Data Networks utilize separate data networks, comprised of switching, routing and transmission facilities. The networks provide for the transfer of data provided by a customer in a frame or cell format. The data is separated into discrete segments for transmission through the public packet data network.

16.1 Asynchronous Transfer Mode (ATM) Service

16.1.1 General Service Description

Asynchronous Transfer Mode (ATM) Service is a cell-based, connection-oriented broadband communication transport and switching service using fixed-length, 53-byte cells to transport data, video and voice traffic. ATM cells generated by ATM-compatible customer premises equipment (CPE) are transmitted to a pre-specified destination over the Company's ATM network using Permanent Virtual Circuits (PVCs). Each ATM cell is delivered unchanged from the source to the destination.

Connection to the Telephone Company's ATM network is provided via a dedicated access circuit connecting the customer premises to the ATM User Network Interface (UNI) port connection. Interstate dedicated Special Access Service rates, charges and regulations will apply to the dedicated access circuit as set forth in Section 7 preceding. Special Access Service rates and charges are in addition to the ATM Service rates and charges set forth in Section 17.4.9 following.

Telephone Company ATM Service is initially offered solely for the purpose of providing Network Service Providers with the ability to connect to the Telephone Company's DSL Access Service Connection Point as described in Section 8 preceding.

ATM Service conforms to industry protocol standards created by the Telecommunications Standardization Bureau of the International Telecommunications Union (ITU-T), the American National Standards Institute (ANSI), and the ATM Forum.

ACCESS SERVICE

16. Public Packet Data Network

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.2 Definitions

(A) User Network Interface (UNI)

The User Network Interface (UNI) is an industry standard protocol used to connect private (customer) and public (Telephone Company) ATM networks. The Telephone Company ATM UNI is offered at 44.736 Mbps only.

(B) Peak Cell Rate (PCR)

The Peak Cell Rate (PCR) is the maximum cell rate at which the user will transmit. PCR is an ATM traffic parameter associated with VBR PVCs.

(C) ATM Permanent Virtual Circuit (PVC)

An ATM Permanent Virtual Circuit (PVC) is a pre-defined logical connection between a customer premises ATM port and a port on the Telephone Company ATM network. ATM PVCs are set up by the Telephone Company based on information contained in a service order rather than by ATM signaling.

(D) Unspecified Bit Rate (UBR)

The Unspecified Bit Rate (UBR) is a "best effort" ATM class of service designed to transport bursty data for delay-tolerant applications such as data file transfers. UBR contains no Quality of Service (QoS) parameters. An advantage of UBR is that ATM cells can be transmitted up to the port line rate, if available, rather than being limited to a predefined maximum Peak Cell Rate (PCR).

(E) Variable Bit Rate (VBR)

Variable Bit Rate (VBR) provides a specified throughput capacity but data is not sent evenly. VBR generally is either "real time" or "non-real time". The type of VBR provided by the Company is subject to technical capability of the Company's ATM network.

(1) Variable Bit Rate – real time (VBR-rt)

VBR-rt supports applications for which the data flow is bursty and requires low delay variance in ATM cell transmissions. Examples of applications requiring VBR-rt include voice and video.

(2) Variable Bit Rate – nonreal time (VBR-nrt)

VBR-nrt supports applications for which the data flow is bursty and variable delays in ATM cell transmissions can be tolerated. Examples of applications requiring VBR-nrt include file transfer, multimedia and computer aided design/computer aided manufacturing (CAD/CAM).

Transmittal No. 15

(N)

(N)

ACCESS SERVICE

16. Public Packet Data Network

(N)

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.3 ATM Service Provisioning

- (A) The customer must provide compatible ATM equipment (e.g., routers, access concentrators, ATM switches, etc.) in accordance with interface specifications defined in the ATM Forum UNI specifications for PVCs.
- (B) The Telephone Company is not responsible for the installation, operation, or maintenance of any equipment provided by the customer.
- (C) The Telephone Company reserves the right to temporarily interrupt ATM Service for wire center or network maintenance, software updates, and in emergency situations. When it is necessary to place a customer's service in an inactive (out of service) condition, the Company will provide customers reasonable and timely notification to minimize impacts to the customer's service.

Transmittal No. 8

Issue Date: May 31, 2002

Effective Date: June 15, 2002

Martin A. Rubin
CEO
3100 Bonnet Creek Road
Lake Buena Vista, Florida 32830

ACCESS SERVICE

16. Public Packet Data Network

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.4 Rate Elements

(A) ATM UNI Port Connection

An ATM UNI Port Connection is required and is available at the ATM Access Connection speed of 44.736 Mbps. The UNI Port Connection receives ATM data cells from the Customer's network or CPE devices and verifies that the addressing and traffic parameters are valid before relaying the cells to the specified destination.

Each ATM UNI Port Connection requires at least one ATM PVC and will accommodate multiple ATM PVCs based upon the speeds selected. An ATM UNI Port Connection nonrecurring and a monthly rate apply, based upon the speed of the port connection, as set forth in Section 17.4.9 following.

(B) ATM Access Connection

Customer connection to a Telephone Company ATM UNI Port Connection at the DSL Access Service Connection Point requires a dedicated DS3 (44.736 Mbps) Special Access Service High Capacity Service. The DS3 (44.736 Mbps) Special Access High Capacity Service circuit is provided under the terms and conditions in Section 7 preceding. A nonrecurring charge and a monthly rate apply as set forth in Section 17.3.8 following.

(C) ATM Permanent Virtual Circuits (PVCs)

The Telephone Company will provide ATM Permanent Virtual Circuits (PVCs) for Wholesale DSL Access Service at the Unspecified Bit Rate (UBR) ATM QoS level or, if available, the Variable Bit Rate (VBR). A minimum of one ATM PVC is required per ISP or Network Service Provider. ATM PVCs do not extend beyond the Company's ATM switch to end user DSL Customers. PVCs to end user customers comprise ATM service subject to applicable ATM Port Charges on the end user side of the switch and related channel termination charges.

(C)
(N)
|
(N)

An ATM PVC must be provisioned by the Telephone Company via service order activity and remain in place until requested to be removed by the customer.

A nonrecurring and a monthly rate apply, based upon the QoS category specified, as set forth in Section 17.4.9 following.

Transmittal No. 15

Issue Date: July 11, 2003

Effective Date: July 26, 2003

Martin A. Rubin
CEO

Lake Buena Vista, Florida 32830

ACCESS SERVICE

16. Public Packet Data Network

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.4 Rate Elements (Cont'd)

(D) ATM PVC Effective Bandwidth

At the option of the Telephone Company and subject to technical capability, ATM PVCs are available in increments of 64 kbps starting at 256 kbps up to 2 Mbps. Total ATM PVC connection subscribed bandwidth may exceed the ATM UNI Port Connection bandwidth. It is not possible, however, for the simultaneous aggregate of the ATM PVC's throughput to exceed the bandwidth of the ATM UNI Port Connection. This condition is known as over subscription. When over subscription occurs, there can be no guarantee that any of the bandwidth defined for any of the connections will be available.

A monthly recurring Bandwidth Charge applies per 1 Mbps bandwidth increment, as set forth in Section 17.4.9 following, based on the ATM PVC category specified.

(C)
|
(C)

(E) PVC Service Activation Charge

A PVC Service Activation Charge is applicable for each network interface over which a UBR or VBR ATM PVCs will traverse. One monthly recurring charge is applicable per network interface regardless of how many ATM PVCs will traverse that network interface.

(C)
|
(C)

(F) Service Rearrangements

Service rearrangements are changes to existing (i.e., installed) services, which may be administrative only in nature as set forth below or that involve an actual physical change to the service.

The ATM PVC nonrecurring charge described at Section 16.1.4(C) preceding will apply per ATM PVC to change the bandwidth capacity and/or to change the traffic routing prioritization parameter on an existing ATM PVC.

Transmittal No. 15

Issue Date: July 11, 2003

Effective Date: July 26, 2003

ACCESS SERVICE

16. Public Packet Data Network

(N)

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.4 Rate Elements and Service Provisioning (Cont'd)

(F) Service Rearrangements (Cont'd)

Administrative changes will be made without charge(s) to the customer.
Administrative changes are as follows:

- Change of customer name,
- Change of customer or customer's end user premises address when the change of address is not a result of physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction

(G) Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the customer's premises
- The customer's premises

The charges for moving ATM Service components are dependent on whether the move is to a different location within the same building, to a different building within the same Serving Wire Center, or to a different building in a different Serving Wire Center. The charges specified below apply in addition to any applicable charges for moving the associated Special Access Services as specified in Section 7 preceding.

(i) Moves Within the Same Building

ATM UNI Port Connections and ATM PVCs are not impacted when a customer moves its Point of Termination to a different location within the same building. There will be no change in the minimum period requirements.

(N)

16.1 Asynchronous Transfer Mode (ATM) Service (Cont'd)

16.1.4 Rate Elements and Service Provisioning (Cont'd)

(G) Moves (Cont'd)

(ii) Moves To a Different Building Within the Same Serving Wire Center

ATM UNI Port Connection and ATM PVCs are not impacted when a customer moves its Point of Termination to a different building within the same Serving Wire Center.

(iii) Moves to a Different Building in a Different Serving Wire Center

A move to a different building in a different Serving Wire Center will be treated as a discontinuance and start of service of all associated ATM Service components. Associated nonrecurring (i.e., installation) charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

(H) Minimum Periods

The minimum period for ATM Service components provided to a customer and for which charges are applicable are:

- Twelve months for ATM UNI Port Connection
- One month for ATM PVCs

ACCESS SERVICE

17. Rates and Charges

17.1 Common Line Access Service

17.1.1 Carrier Common Line Access Service Rate

Regulations concerning Carrier Common Line Access are set forth in Section 3. preceding.

Premium Access

The rates and charges for the provision of Carrier Common Line Access Service are the same as those set forth in Section 17.1.1 of the National Exchange Carrier Association Tariff F.C.C. No. 5.

Non-Premium Access

The rates and charges for the provision of Carrier Common Line Access Service are the same as those set forth in Section 17.1.1 of the National Exchange Carrier Association Tariff F.C.C. No. 5.

17.1.2 End User Access Service

Regulations concerning End User Access Service are set forth in Section 4.1 preceding.

End User Common Line (EUCL)

The rates and charges for the provision of End User Access Service are The same as those set forth in Section 17.1.2 of the National Exchange Carrier Association Tariff F.C.C. No. 5.

17.4.9 Asynchronous Transfer Mode (ATM) Service

Regulations concerning Asynchronous Transfer Mode (ATM) Service are set forth in Section 8.1 preceding.

	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>	
(A) <u>ATM UNI Port Connection</u> Per ATM UNI Port Connection			
- DS3 (44.736 Mbps)	\$2,000.00	\$750.00	
(B) <u>ATM Permanent Virtual Circuits (PVCs)</u>			
(i) <u>Unspecified Bit Rate (UBR)</u>			
ATM PVC Charge,			
- Per ATM PVC per 1 Mbps ⁽¹⁾	\$5.00	\$70.00	(C)
UBR Service Activation Charge			
- Per DS3 (44.736 Mbps)	\$250.00		
(ii) <u>Variable Bit Rate (VBR)</u>			(N)
ATM PVC Charge,			
- Per ATM PVC per 1.0 Mbps ⁽¹⁾	\$10.00	\$70.00	
VBR Service Activation Charge			
- Per DS3 (44.376 Mbps)	\$250.00		

⁽¹⁾With respect to Digital Subscriber Line (DSL) access, the Permanent Virtual Circuit (PVC) charges apply to PVCs established between the ISP and the Company's ATM switch. In the event a customer orders an ATM PVS to an end user customer designated premises, an additional port charge and applicable local channel termination charge would apply.
