ACCESS SERVICE  
6 - BellSouth SWA Service (Cont'd)

6.1 General (Cont'd)

6.1.3 Rate Categories (Cont'd)

(A) BellSouth SWA Transport (Cont'd)

(7) Optional Features (Cont'd)

(h) Coin Sent-Paid Capability

Coin sent-paid capability allows the customer to receive signals for coin sent-paid traffic from line controlled pay stations. This option requires the use of Exchange Access Operator Services Signaling (EAOSS) and/or Modified Operator Services Signaling (MOSS). Coin sent-paid capability access is provided direct to designated Telephone Company end offices or via tandem access at the TOPS tandem switches and is available with BellSouth SWA FGD or BellSouth SWA TSBSA 3.

Technical specifications for MOSS are as set forth in the Bell Communications Research Technical Publication TR-TSY-000064. Technical specifications for EAOSS are as set forth in the Bell Communications Research Technical Publication FR-NWT-0000271.

(i) Tandem Signaling

This option provides for the automatic transmission of signaling indicators which identify the interexchange carrier and trunk group to which the call is to be directed. This option, available with BellSouth SWA FGD, is provided on originating direct trunk groups.

Direct trunk groups equipped with tandem signaling can be arranged to overflow to other direct trunk groups equipped with tandem signaling. Direct trunk groups equipped with tandem signaling can not be arranged to overflow to the Telephone Company's common trunk groups.

Depending on the signaling facilities available, this option will be provisioned via MF or CCS7 signaling. The CCS7 alternative requires the establishment of: 1) CCSAC as described in 6.1.3(A)(7)(e) preceding and 2) CCS7 Signaling Connections and CCS7 Signaling Terminations between the customer's SPOI and the Telephone Company's STPs as further described in Section 6.1.3(C) following.

(j) Surveillance Optional Feature

BellSouth SWA DS1 and DS3 Transport services may terminate into FlexServ Service (a.k.a. BellSouth SPA Customer Reconfiguration) as set forth in Section 7 of this Tariff for surveillance only. These SWA channel terminations are not available for reconfiguration. Rates and charges for the surveillance options are provided in Section 7.5.18, of this Tariff.

EFFECTIVE: JANUARY 22, 2004

#### ACCESS SERVICE

#### 7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

#### 7.4 Rate Regulations (Cont'd)

#### 7.4.12 FlexServ Service (a.k.a. BellSouth SPA Customer Reconfiguration) (Cont'd)

##### (A) General (Cont'd)

##### (3) Customer Circuits

There are five types of channel connections, which can be connected to FlexServ service (a.k.a. BellSouth SPA Customer Reconfiguration) - DS0 (Single channel), DS1 (1.544 Mbps) digital circuits, DS3 (44.736 Mbps) digital circuits, STS-1 (51.84 Mbps) digital circuits and SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring).

DS0 Channel Connections - There are two types of DS0 channel connections - Voice Grade and Digital. Both types of DS0 connections will be switched at a DS0 level.

DS1 Channel Connections - There are two types of connections available for a customer desiring to terminate a DS1 circuit - DS0 switching and DS1 switching. For example, if a customer needs to be able to monitor or reconfigure the 24 DS0 circuits riding on the DS1 channel, then the customer would purchase a DS1 channel connection with DS0 switching. If the customer does not need access to the individual DS0 circuits, then the customer would purchase a DS1 channel connection with DS1 switching. A monitoring only option (i.e., surveillance option) is also provided for DS1 channel connections. This option may also be used for terminating SWA DS1 channels.

DS3 Channel Connections - There are three types of connections available for terminating a DS3 circuit - DS0, DS1 and DS3. If a customer needs monitoring or reconfiguration capability for 672 individual DS0 circuits, then the customer would purchase a DS3 channel connection with DS0 switching. If the customer only needs access to the 28 DS1 circuits, then the customer would purchase a DS3 channel connection with DS1 switching. The customer would purchase a DS3 connection with DS3 switching if the customer wants to cross connect the entire DS3 circuit. A monitoring only option (i.e., surveillance option) is also provided for DS3 channel connections. This option may also be used for terminating SWA DS3 channels.

(C)  
(N)  
(N)  
(N)

STS-1 Channel Connections - There is one type of connection available for terminating a STS-1 circuit - VT1.5. The STS-1 connection will be switched at a VT1.5 level.

SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) Channel Connections - FlexServ service (a.k.a. BellSouth SPA Customer Reconfiguration) is available only with OC-1, OC-3 OC-3+, OC-12, OC-48, OC-48+ or OC-192+ SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring). (OC-1 SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) is only available in an overlay arrangement). There are two options available for SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) channel connections - Surveillance and Reconfiguration. Surveillance allows the customer to monitor the ring and retrieve performance monitoring data. Surveillance will be ordered on a per SMARTRing (a.k.a. BellSouth SPA Dedicated Ring) node basis. Customers who order Surveillance must order it for all nodes on
