FACILITIES FOR INTERSTATE ACCESS

20. Optical Networking (Cont'd)20.3 Verizon Optical Networking (VON) (Cont'd)

(E) Rate Regulations

VON is available for 1, 3, 5, and 7-year commitment periods/term plans.

The minimum service period for VON is one year.

Upon expiration of a commitment period, the customer may choose to continue service under a new commitment period or cancel service. If the customer does not choose one of these options, the Telephone Company will continue the service at the monthly rate for the original commitment period.

The customer has the option, within sixty (60) days prior to the expiration date for its commitment period, to extend its expiring Plan to a longer commitment period, for which time-in-service credit will be allowed for the expiring plan. The commitment period selected for the extended plan must be longer than the commitment period of the expiring plan, e.g., an expiring 1-Year Term may be extended to either a 3-Year, 5-Year, or 7-Year Commitment period. Time-in-service credit lessens the actual time commitment for the extended plan. For example, Time in Service Credit for an expiring 3-Year term plan applied toward a new 7-year plan equals a new commitment period of 4 years at the 7-year plan rate. The rate for the longer commitment period will apply effective with the first bill day following expiration of the commitment period for the existing plan and continue through the remainder of the commitment period associated with the extended plan. No adjustment for the increased discount associated with the extended plan will be made to the monthly rates already billed on the expiring plan.

A change in protocol of an On-Net Channel Extension is treated as a discontinuance of service and an installation of both, a new On-Net Channel Extension and the appropriate On-Net Channel Mileage, and will result in Termination Liability Charges applied for the discontinuance of the existing service.

Monthly recurring charges (MRCs) apply for On-Net Channel Extensions and for On-Net Channel Mileage.

The MRC for the Channel Extension applies per channel extension and at the specified term plan rate. The On-Net Channel Extension charge is also dependent on the type of facility interface provided.

The MRC for the Channel Mileage applies on a fixed and on a per mile basis for the airline miles between the Serving Wire Centers. The fixed portion of Channel Mileage is applied at each termination of the interoffice portion of the circuit. When the mileage calculation results in a fraction of a mile, it is rounded up to the next whole mile. (C) (C)

Nonrecurring charges (NRCs) apply for the initial installation of On-Net Channel Extensions.

When connecting VON services to other Telephone Company provided services, the rates and charges, and terms and conditions of the connecting services also apply.
