(Cont'd)Terms and Conditions (Cont'd)

CSM is provided coincident with the installation of the associated IDSR ring or may be added to an existing ring. CSM is not available on rings that utilize OC192 nodes. When CSM is added to an existing ring, existing circuits that are being made reconfigurable will require a design change. In addition to the rates and charges associate with the CSM optional feature, nonrecurring charges for the design change may also apply. The Company's ability to provide CSM on a particular ring may be limited by the overall configuration of that ring. Reconfiguration is limited to those circuits that originate and terminate on the ring (i.e., at locations served by a node on the ring) and utilize ports that are symmetrical.
