## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.10 Service Discount Plan (Cont'd)

## (B) Description

A Service Discount Plan applies to: (T)

- Special Access Service Standard Channel Terminations, Channel Mileage and applicable Optional Features and Functions or BSEs monthly or base rates, as set forth in 30.7 following for price band rates and 31.7 following for all other rates; (T)
- NYNEX Enterprise Network Reconfiguration Service Network Access Ports monthly rates as set forth in 30.19 following for price band rates and 31.19 following for all other rates; (T)
- IntelliLight® Dedicated SONET Ring SONET Distribution Channels, Channel Mileage, Nodes and Ports as set forth in 30.26 following for price band rates and 31.26 following for all other rates; (T)
- NYNEX Enterprise Service Fiber Distributed Data Interface Channel Terminations and Channel Mileage as set forth in 30.23 following for price band rates and 31.23 following for all other rates; (T)
- and to Enterprise SONET Service Ring Transport Services as set forth in Section 30.26 following for price band rates and 31.26 following for all other rates. (T)

For services provided with Rate Stability as set forth in (G) following, a fixed discount percentage is applied to the Rate Stability Base Rates specified in Section 30.7 following for price band rates and 31.7 following for all other rates. (C)

For services provided with Base Rates (without rate stability), a discount percentage is applied to the Base Rates specified in Section 30.7 following for price band rates and 31.7 following for all other rates.

For all other services, the month-to-month rates for such services are reduced by a fixed percentage. (C)

The amount of the discount percentage differs based on the length of the commitment period selected by the customer and the type of service. The customer must specify the number of months selected as the commitment period for its Service Discount Plan. For existing Service Discount Plans with commitment periods of 2, 3, 4, 5, 7 or 10 years, the commitment period will be converted to a commitment period of 24, 36, 48, 60, 84, or 120 months, respectively.

## ACCESS SERVICE

26. SONET Services (Cont'd)26.1 Service Descriptions (Cont'd)26.1.5 IntelliLight® Broadband Transport (IBT) (Cont'd)

## (A) General (Cont'd)

IBT services may connect to or between customer designated premises, Expanded Interconnection multiplexing nodes or virtual collocated arrangements, or other SONET services. IBT services are available with or without multiplexing capability.

- (1) When one or both of the end points of an IBT is a customer designated premises, each connection is subject to a Standard Channel Termination and a Port rate element as described in (D)(1)(a) and (D)(1)(c) following, respectively.
- (2) When one end of an IBT connects to an Expanded Interconnection multiplexing node, an Office Channel Termination rate element applies as described in (D)(1)(a) following for that connection. When one end of an IBT connects to an Expanded Interconnection virtual collocation arrangement, a Virtual Office Channel Termination rate element applies as described in (D)(1)(a) following for that connection. The other end of the IBT must be a customer designated premises. Port rate elements do not apply at the end of the service that connects to an Expanded Interconnection arrangement. IBT may connect between two Expanded Interconnection arrangements for the purpose of connecting collocated equipment used for interconnection with the Telephone Company or for access to the Telephone Company's unbundled network elements pursuant to Section 251(C)(6) of the Communications Act of 1934, as amended, subject to the regulations set forth in Section 27 following for Dedicated Transit Service.

(TR 452)

Effective: June 11, 2004

Vice President, Federal Regulatory  
1300 I Street NW, Washington, D.C. 20005

## ACCESS SERVICE

26. SONET Services (Cont'd)26.1 Service Descriptions (Cont'd)26.1.5 IntelliLight® Broadband Transport (IBT) (Cont'd)

## (A) General (Cont'd)

- (3) When the end points of an IBT are served by different Telephone Company wire centers, Channel Mileage rate elements apply as described in (D)(1)(b) following. Except as allowed in (2) preceding, IBT connections within a wire center are limited to termination of an IBT facility as a multiplexing arrangement or connection to other Telephone Company services as described in (4) following. (C)
- (4) The following connections to other Telephone Company services are available for IBT. When IBT is provided without multiplexing capability, these services may be at one end, or both ends, of the service. When IBT is provided with multiplexing capability, these services will only be provided at one end of the service.
- (a) IDSR - connection of IBT service to IDSR is only allowed when the Central Office Extension or port on the IDSR is an equal speed to that of the IBT service. IBT at STM-1 transmission may not connect to IDSR.
  - (b) IEF - connection of IBT service to IEF service is allowed at all speeds except for IBT OC48/OC48c when connecting to an IEF with a fractional OC48 interface. IEF STS1 Terminations apply in addition to the charges associated with the IBT service.
  - (c) Other IBT - connection of IBT service to another IBT service is only provided via an equal speed port of an IBT service derived from a higher speed IBT multiplexed service.
  - (d) VON - connection of IBT service to VON can only occur when IBT is provided as a multiplexed arrangement and the applicable low speed IBT port is offered. For example, IBT multiplexed service does not offer native Ethernet ports at 100 Mbps and therefore, VON at a native Ethernet rate of 100 Mbps may not connect to IBT service.
  - (e) Advanced data services - IBT service may connect to advanced data services at wire centers designated for such connections. (C)
