## ACCESS SERVICE

26. SONET Services (Cont'd)26.1 Service Descriptions (Cont'd)26.1.5 IntelliLight® Broadband Transport (IBT) (Cont'd)

## (A) General (Cont'd)

- (1) When the end points of an IBT are served by different Telephone Company wire centers, Channel Mileage rate elements apply as described in (D)(1)(b) following. Except as allowed in (2) preceding, IBT connections within a wire center are limited to termination of an IBT facility as a multiplexing arrangement or connection to other Telephone Company services as described in (4) following.
- (2) The following connections to other Telephone Company services are available for IBT. When IBT is provided without multiplexing capability, these services may be at one end, or both ends, of the service. When IBT is provided with multiplexing capability, these services will only be provided at one end of the service.
  - (a) IDSR - connection of IBT service to IDSR is only allowed when the Central Office Extension or port on the IDSR is an equal speed to that of the IBT service. IBT at STM-1 transmission may not connect to IDSR.
  - (b) IEF - connection of IBT service to IEF service is allowed at all speeds except for IBT OC48/OC48c when connecting to an IEF with a fractional OC48 interface. IEF STS1 Terminations apply in addition to the charges associated with the IBT service.
  - (c) Other IBT - connection of IBT service to another IBT service is only provided via an equal speed port of an IBT service derived from a higher speed IBT multiplexed service.
  - (d) VON - connection of IBT service to VON can only occur when IBT is provided as a multiplexed arrangement and the applicable low speed IBT port is offered. For example, IBT multiplexed service does not offer native Ethernet ports at 100 Mbps and therefore, VON at a native Ethernet rate of 100 Mbps may not connect to IBT service.
  - (e) Advanced data services and IP Port services - IBT service (C)  
may connect to advanced data services or IP Port services (C)  
at wire centers designated for such connections.

## ACCESS SERVICE

28. Expanded Interconnection# (Cont'd)28.1 Fiber Optic Expanded Interconnection - General (Cont'd)

The Telephone Company will provide Expanded Interconnection to the collocated customer for the following types of Special Access Service as specified in Section 7. preceding and SONET Service as specified in 26.1.5 preceding:

- High Capacity Service
- 1.544 Mbps
- 44.736 Mbps (Electrical)
- NYNEX Enterprise DS1 Service
- NYNEX Enterprise DS3 Service
- IntelliLight® Shared Single Path (ISSP)
- IntelliLight® Broadband Transport (OC-3, OC-3c, OC-12, OC-12c or OC48c)
- LAN Extension Service (LES)
- IntelliLight® Optical Transport Service (IOTS) Partial Ring
- IntelliLight Dedicated SONET Ring (IDSR) Partial Ring Service
- IP Port service

(N)

In addition, the Telephone Company will provide Expanded Interconnection to the collocated customer for the following types of Switched Access Service as specified in Section 6. preceding:

- Feature Groups B, C and D provided with a DS1 or DS3 Entrance Facility
- Circuit Switched Trunk bsa - Options 1, 2, 3 and 4 provided with a DS1 or DS3 Entrance Facility
- Directory Access Service
- IntelliLight® Shared Single Path (ISSP)

Either the collocated customer or another customer under common ownership with the collocated customer may order service to that collocated customer's Expanded Interconnection multiplexing node or virtual collocation arrangement. The ordering customer will be considered to be under common ownership with the collocated customer if the ordering customer (directly or indirectly) owns or controls, or is owned or controlled by, or is under common ownership or control with, the collocated customer. For purposes of ordering on a common ownership basis, the term "own" means to own an equity interest (or the equivalent thereof) of more than fifty (50) percent.

# See Page No. 28-3 for further information.
