Rates and Charges.....	18-3
Rate Categories .....	18-1

## **18. DARK FIBER**

Qwest Corporation currently has a Section 214 Application pending before the Federal Communications Commission to exit the Dark Fiber business.

In accordance with Special Permission Number 94-683 and the decision of the U.S. Court of Appeals for the D.C. Circuit in *Southwestern Bell Telephone Co., et al. v. FCC*, Case No. 91-1416, decided on April 5, 1994, beginning on June 10, 1994 the Company will only provide those dark fiber arrangements which are in service as of such date or have confirmed Access Service Requests, and such arrangements will be continued pending the outcome of the remand proceeding resulting from such court of appeals decisions. Also, beginning on such date, the Company will not provide any new Dark Fiber arrangements nor will it provide any changes, additions, moves or rearrangements of existing Dark Fiber arrangements.

### **18.1 DESCRIPTION**

Dark Fiber is composed of fiber strands constructed between customer designated premises, for which no terminating or regenerating electronic equipment is provided by the Company. The customer will provide the terminating equipment which is required to convert the Dark Fiber into a usable path for communications transport.

Technical Specifications for Dark Fiber are delineated in Qwest Corporation Technical Publication PUB 77348.

Dark Fiber will not be connected to Expanded Interconnection - Collocation Service as set forth in Section 21, following.

### **18.2 RATE CATEGORIES**

There are two rate elements which will apply to Dark Fiber Service.

- Dark Fiber - Basic, Recurring Rate (described in 18.2.A.), following.
- Dark Fiber - Basic, Nonrecurring Charge (described in 18.2.B.), following.

These Rate Categories include both recurring and/or nonrecurring charges which apply on a per installation, per mile basis; per two fiber, per mile basis; per order; or per installation basis. (Per installation can be defined as per twelve fiber cable provided between two customer premises.)

## **18. DARK FIBER**

### **18.2 RATE CATEGORIES (Cont'd)**

#### **A. Dark Fiber - Basic, Recurring Rate**

Dark Fiber - Basic, Recurring Rate, will be charged where normal installation of the Dark Fiber occurs, e.g., trenching through loose soil or sand. The recurring rates will apply on a per two fiber, per mile basis, as detailed in 18.4, following. Dark Fiber mileages that total a fraction of a mile will be rounded up to the next higher number of miles.

#### **B. Dark Fiber - Basic, Nonrecurring Charge**

Dark Fiber - Basic, Nonrecurring Charge, recovers the provisioning costs and is applied per order, as detailed in 18.4, following.

### **18.3 ORDERING**

#### **18.3.1 DARK FIBER OPTIONS AND CONDITIONS**

Dark Fiber is ordered under the Access Order provisions set forth in Section 5, preceding. Also included in that section are other charges which may be associated with ordering Dark Fiber (e.g., Cancellation Charges, etc.)

The customer must, on the initial request, order a minimum of two fibers per route and can only order in two fiber increments.

The offering of Dark Fiber contemplates the use of existing facilities. Should facilities not be available, it may be necessary to construct such facilities as (1) normal or (2) special construction. If special construction is involved, the regulations, as set forth in Tariff F.C.C. No. 2 will apply.

**18. DARK FIBER**

**18.4 RATES AND CHARGES FOR DARK FIBER**

The rates and charges for Dark Fiber are as follows:

**18.4.1 ALL STATES**

	<b>USOC</b>	<b>NONRECURRING CHARGE</b>	<b>MONTHLY RATE</b>
• Dark Fiber - Basic, per two fiber, per mile[1]	1A5CS	—	\$532.00
• Dark Fiber - Basic, per order	NRBDO	\$239.07	—

[1] Dark Fiber can be ordered in two fiber increments on a month-to-month basis only.

(Filed under Transmittal No. 2.)

Issued: August 7, 2000

Effective: August 8, 2000

**19. TRIAL SERVICES OR ARRANGEMENTS**

<b>Alphabetical By SUBJECT</b>	<b>PAGE</b>	<b>(T)(M)</b>
General .....	19-1	(T)

Effective: June 15, 2002

**19. TRIAL SERVICES OR ARRANGEMENTS**

(T)(M)

**19.1 GENERAL**

Trial Services or Arrangements may be provided by the Company to provide an opportunity for both the Company and participant to test the marketplace, technical functionality and reliability of a prototype, and/or to determine the requirements for final development of a standard service offering. Trial Services or Arrangements are provided on a temporary basis if such services or arrangements meet the following criteria:

(T)

- A. The trial services or arrangements are not offered under other sections of this Tariff.
- B. The trial services or arrangements will be offered for a limited time as specified in 19.3.
- C. If and when the Company elects to offer a trial service or arrangement on a regular basis as a standard service offering, such trial service or arrangement will be filed in the appropriate tariff section(s) after the trial period. Normal rates and tariff regulations will then apply to all purchasers of Service. Participants of the trial service or arrangement will then order the standard service offering.
- D. The Company and participant representatives shall jointly agree upon, and engage in, an evaluation of a trial. This evaluation of the trial will include any tests or rearrangements conducted jointly on the service or arrangement as well as determining how effectively the service or arrangement works with other telecommunications services. Any joint evaluation shall be performed, and concluded, prior to the end date of the trial. In the event the trial is terminated earlier than the end date, any obligation the parties have with respect to evaluation shall cease without liability, of any kind, attaching to any party.

**19. TRIAL SERVICES OR ARRANGEMENTS**

(T)(M)

**19.2 LIMITATIONS**

- A. The Company is not prohibited or restricted in ability or capacity to engage with other participants in similar or other trial services or arrangements.
- B. The Company makes no guarantee, warranty, or representation to continue a trial service or arrangement beyond the end date or to convert it to a standard service offering.
- C. The Company reserves the right to make changes which might cause interruptions. Credit allowance for service interruptions will apply as set forth in 2.4.4, preceding.

**19. TRIAL SERVICES OR ARRANGEMENTS**

**19.3 TRIALS**

Rates, charges and additional regulations, if applicable, for trial services or arrangements are provided by trial number.

**19.3.1 TRIAL NO:** 01  
**NAME:** QWEST DSL Market Trial  
**START DATE:** January 28, 2003  
**END DATE:** March 14, 2003

**A. Description**

The Company will Market Trial four DMT *QWEST DSL PRO* bandwidths from January 28, 2003 through March 14, 2003, with pricing stability through March 31, 2004. This trial will offer DMT *QWEST DSL PRO DELUXE*, DMT *QWEST DSL PRO 1 MBPS*, DMT *QWEST DSL PRO 4 MBPS* and DMT *QWEST DSL PRO 7 MBPS* to eligible residence customers at a discounted rate.

The *QWEST DSL* Market Trial will be limited to DSL equipped wire centers located in the Denver Metropolitan Area. Unless otherwise specified in this trial, the terms and conditions as set forth in Section 8.4, preceding, apply.

- Eligibility Requirements:
  - Must be a residence customer served out of Denver Metropolitan Area DSL equipped wire center.
  - Must be new DSL Service for the customer not an upgrade to or replacement of existing DSL Service.

**19. TRIAL SERVICES OR ARRANGEMENTS**

**19.3 TRIALS**

**19.3.1 TRIAL NO: 01**

**NAME:** QWEST DSL Market Trial

**START DATE:** January 28, 2003

**END DATE:** March 14, 2003

**A. Description (Cont'd)**

- The following apply:
  - The Company will contact eligible residence customers either by phone or mail to provide them with an 800 number exclusive to this Trial. Eligible customers must be contacted by the Company and must call the 800 number provided in order to participate in this Market Trial. This offering will not be handled through the Company business office.
  - The *QWEST DSL PRO* Installation and Service Guarantees as set forth in 8.4.1.D. & E., preceding, do not apply.
  - Order applications for this service must be made from January 28, 2003 through March 14, 2003, with order completion within 10 days of the order application date. If order completion is delayed due to Company reasons, the order completion date will be extended.
  - On April 1, 2004, the customer's service will revert to the respective DMT *QWEST DSL PRO* Service rates unless the customer elects either to change to another *QWEST DSL* Service or to disconnect the service at no charge.

**19.3 TRIALS**

**19.3.1 TRIAL NO: 01**

**NAME:** QWEST DSL Market Trial

**START DATE:** January 28, 2003

**END DATE:** March 14, 2003 (Cont'd)

**B. Description of Rates and Charges**

The *QWEST DSL Market Trial* will be offered as month-to-month service only, Fixed Period Service Rate Plans as set forth in Section 8.4, preceding, are not available with this trial. Customers subscribing to service under this trial will be billed the rates as set forth in C., following, through March 31, 2004. If the customer disconnects the service prior to March 31, 2004, the customer may not reestablish service under the rates in this trial. A DSL nonrecurring charge will not be assessed with this trial.

**C. Rates and Charges**

	<b>USOC</b>	<b>NONRECURRING CHARGE</b>	<b>MONTHLY RATE</b>
1. DMT <i>QWEST DSL PRO DELUXE</i>	GRLGM	-	\$26.99
2. DMT <i>QWEST DSL PRO 1 MBPS</i>	GRLDM	-	31.99
3. DMT <i>QWEST DSL PRO 4 MBPS</i>	GRLEM	-	41.99
4. DMT <i>QWEST DSL PRO 7 MBPS</i>	GRLFM	-	51.99

## **20. COMMON CHANNEL SIGNALING NETWORK**

The Company's Common Channel Signaling Network (CCSN) is a digital data network carrying signaling information that interfaces with the Company's voice/data network for services using the American National Standards Institute (ANSI) CCS7 signaling protocol.

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.1 GENERAL DESCRIPTION**

Common Channel Signaling Access Capability (CCSAC) allows a customer to connect with the Company's SS7 network. CCSAC is used in conjunction with other SS7 based features and services. CCSAC provides the means for transmitting SS7 out of band signaling information via Switched Access CCS Links between the customer's Signaling Point of Interface (SPOI) and the Company's Signal Transfer Point (STP). The STP provides translations and routing functions for SS7 signaling messages received from the Company's network signaling points and the SS7 networks of other entities. There are two types of signaling messages. ISDN User Part (ISUP) messages are used for call set-up (establishing and closing transmission paths for voice and data calls over the public switched network). Transaction Capabilities Application Part (TCAP) messages are used to carry information between signaling points for call related database services. CCSAC acts as a platform for the following applications.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.1 GENERAL DESCRIPTION (Cont'd)**

##### **A. Call Set-Up**

This application provides the customer the capability to send originating and terminating call set-up signaling information, via ISUP messages, between the customer's designated premises, the Company's STP and other entities in association with message telecommunications service. Call Set-Up may be associated with calls that utilize the Company's switched access network or may be associated with calls that do not utilize the Company's switched access network. If the message trunks are provided by the Company, the customer must order the associated CST3 or Feature Group D trunks with SS7 Out of Band Signaling option as set forth in Section 6, preceding. Call Set-Up associated with calls that do not utilize the Company's switched access network is referred to as transient call set-up and the customer must have message trunks with SS7 capabilities. CCSAC Service as set forth in this section is required to provide both capabilities.

##### **B. Foreign Data Base Queries**

This service provides the customer the ability to query foreign data bases (data bases not maintained by the Company) by sending signaling information via TCAP messages between the Company's STP, the customer's designated premises and the foreign database. CCSAC Service as set forth in this section is required to provide this capability.

**20. COMMON CHANNEL SIGNALING NETWORK**

**20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

**20.1.1 GENERAL DESCRIPTION (Cont'd)**

**C. Line Information Data Base (LIDB) Service**

Line Information Data Base (LIDB) Service provides the customer the ability to query, in the form of signaling information, the Company's LIDB via the Company's CCSAC. LIDB provides customers with information that can be used to facilitate completion of calls. LIDB is available for Validation Service and Originating Line Number Screening (OLNS). Customers requesting LIDB must order CCSAC, as set forth in 20.1.1 and LIDB as set forth in 20.2.3, following.

**D. Local Number Portability Data Base Service**

Local Number Portability (LNP) Data Base Service provides the customer the ability to query, in the form of signaling information, the Company's LNP data base via the Company's CCSAC. The LNP Data Base provides customers with Location Routing Number (LRN) information for a Local Service Provider by NNX code. Customers requesting LNP must order CCSAC, as set forth in 20.1.1 and LNP as set forth in 20.2.4, following, or the customer may access the LNP Data Base information as set forth in 13.19.1, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY (Cont'd)**

#### **20.1.2 SERVICE DESCRIPTION**

CCSAC is provided by a CCS Link. The CCS Link provides digital bi-directional transmission and operates at a DSO-A level (i.e., 56 kbps of CCS7 signaling data and 8 kbps of control/supervisory data). Each DSO-A channel (link) occupies a single DSO (i.e., 64 kbps) channel of a 24 channel DS1 digital transmission system. The DSO-A channel (link) is multiplexed into a DS1 format for hand off at the customer's SPOI. One STP Port is required for each 56 kbps signaling link utilized for CCSAC at the Company STP. The customer's SPOI and the Company's STP wire center must be located within the same LATA. The STP Port is the point of termination to the signal switching capability of the STP and is dedicated to the customer. The CCS Link is transported via an Entrance Facility and a Direct Link Transport (DLT) facility as described in 1. and 2., following, and is utilized exclusively for connecting the customer's CCS network and the Company's CCSN for the transmission of network control signaling data only.

#### **A. Entrance Facility**

The Entrance Facility provides the connection from the customer's SPOI to the serving wire center (SWC) of the customer's SPOI on a dedicated DS1 facility ordered as set forth in this section and is utilized exclusively for the transmission of network control signaling data only. The customer may utilize an existing DS1 Entrance Facility previously ordered from this section for additional CCS Links or order a new DS1 Entrance Facility from this section. The customer may also choose to utilize a portion (i.e., DS1) of an existing DS3 facility under the regulations of Shared Use. The DS3 facility can only be ordered from Section 6 or Section 7, preceding. Multiplexing arrangements and the associated regulations are described as set forth in 6.1.2., preceding. When the customer chooses to use a portion of an existing DS3 facility, the customer must allocate, at the minimum, one dedicated DS1 for the provision of the signaling links. Rate applications for Shared Use are set forth in Section 2.7, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.2 SERVICE DESCRIPTION (Cont'd)**

##### **B. Direct Link Transport (DLT)**

The DLT provides for the transmission facilities between the SWC of the customer's SPOI and the Company's STP. The customer has the option of ordering a DS1 DLT facility from this section, utilized exclusively for the transmission of network control signaling data only, or a single DSO-A channel (i.e., 64 kbps) of a 24 channel DS1 facility. The customer may utilize an existing DS1 DLT facility previously ordered from this section for additional CCS Links or order a new DS1 DLT or a DSO DLT facility.

Company hubbing arrangements can be utilized for CCSAC. If the customer has an existing DS3 facility between the SWC of the customer's premises and a Company Hub, ordered and provisioned as set forth in Section 6 or Section 7, preceding, the customer may utilize a portion (i.e., DS1) of the existing DS3 facility for the CCS Link(s) under the provisions of the Shared Use regulations as set forth in Section 2.7, preceding. In addition, the customer must order the DS1 or DSO DLT from the Company Hub to the Company STP.

When the customer orders a DS1 DLT facility from the SWC of the customer's SPOI or a Company Hub to a Company STP, it is dedicated to, and controlled by, the customer. The customer must order a DS1 to DSO Multiplexer at the Company STP for termination into the STP Port. Multiplexing rates are set forth in 20.3, following.

When the customer orders a DSO DLT channel, the Company will provide the multiplexing equipment at a location determined by the Company as part of its overall network design at no additional charge. When the customer chooses to order multiplexing equipment at a specific location, the customer is assessed multiplexing rates as set forth in 20.3, following. The facility used to transport the DSO channel(s) is controlled by the Company and may contain other network control signaling channels as determined by the Company.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY (Cont'd)**

#### **20.1.3 RATE CATEGORIES AND APPLICATIONS**

There are four types of charges that may apply for the CCS Links and the associated services. These are nonrecurring, monthly, message and query charges. CCSAC rates and charges are set forth in 20.3, following. Switched Access rates, as set forth in Section 6, are not applicable.

#### **A. Nonrecurring Charges**

##### **1. Installation Charges**

Each CCS Link is assessed a nonrecurring installation charge provided on a first and each additional link basis, per order. A nonrecurring charge is also assessed for each DS1 Entrance Facility provided.

##### **2. CCSAC Option Activation Charge**

The CCSAC Option Activation charge is assessed for adding or changing a point code in the signaling network for the specific application being requested and if that application is considered to be a basic or database application. When the customer initially orders CCSAC Service and the associated application, the first point code is provided at no charge. Each additional point code on the same order is assessed the "Each Additional Point Code" rate. When the customer has existing CCSAC link(s) and chooses to change or add a point code in the STP, the first point code, is assessed the "First Point Code Activation" charge and each additional point code is assessed the "Each Additional Point Code" charge, per access order, per translation basis (i.e., basic or database). The activation charge for the CCSAC link(s) shall be billed to the CCSAC customer.

##### **3. Service Rearrangements**

Any change in CCSAC service, except a change in jurisdiction or point code changes, shall be treated as a discontinuance of the existing service and an installation of a new service. Minimum period requirements are as set forth in 5.2.5, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.3 RATE CATEGORIES AND APPLICATIONS (Cont'd)**

##### **B. Monthly Charges**

The Entrance Facility monthly rate is assessed on a per DS1 facility provided when the Entrance Facility is ordered from this section for CCSAC. When the customer has Shared Use facilities, the monthly rates are apportioned as set forth in Section 2.7, preceding.

For each DLT facility provided, DSO or DS1, a fixed monthly rate per mile band, and a monthly rate per mile is assessed. When the customer has Shared Use facilities, the monthly rates are apportioned as set forth in Section 2.7, preceding. Mileage measurement is calculated on a airline mile basis, using the V&H coordinates method, between the SWC of the customer's SPOI and the Company's STP. When DLT facilities of different capacities are connected by a multiplexer at a Company Hub, mileage is measured separately from the SWC of the customer's premises to the Company Hub, where multiplexing occurs, and then measured from the Company Hub to the Company STP.

An STP Port is provided for each CCS Link and each STP Port is assessed a monthly rate.

EF and DTT multiplexing equipment is assessed a monthly rate per arrangement provided. When the customer has Shared Use facilities, the monthly rates are apportioned as set forth in Section 2.7, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.3 RATE CATEGORIES AND APPLICATIONS (Cont'd)**

##### **C. Message Charges**

Message charges, as set forth in 20.3.1, following, are assessed based on the type of message protocol, ISUP or TCAP. ISUP messages are associated with call set-up, while TCAP messages are used to query call related data bases. ISUP message charges are assessed per call set-up request and TCAP message charges are assessed per data request.

Message charges do not apply for TCAP messages switched by the regional STPs to the Company provided 800 Data Base, LIDB or LNP Data Base. Query charges are assessed in lieu of message charges. Query charges for 800 Data Base are assessed as set forth in 6.2.8, preceding. LIDB and LNP query charges are described in D., following. When TCAP messages are destined for a foreign data base, including a non-company provided LNP Data Base, message charges are assessed in lieu of query charges.

Message charges are assessed in the following manner.

##### **1. Signal Formulation**

An ISUP Signal Formulation charge is assessed, per call set-up request, for formulating signaling messages in association with call set-up.

##### **2. Signal Transport**

An ISUP Signal Transport charge is assessed, per call set-up request, for signaling messages transported to or from the Company STP in association with call set-up.

A TCAP Signal Transport charge is assessed per data request transported to or from a Company STP and destined for a foreign data base.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY**

#### **20.1.3 RATE CATEGORIES AND APPLICATIONS**

##### **C. Message Charges (Cont'd)**

##### **3. Signal Switching**

An ISUP Signal Switching charge is assessed per call set-up request that is switched at the Company STP.

A TCAP Signal Switching charge is assessed for each data request that is switched by the Company STP and destined for a foreign network or data base.

##### **D. Query Charges**

Query charges apply for queries to the Company LIDB and the LNP Data Base. When query charges apply for access to a Company provided data base, message charges are not assessed. LIDB query charges are described in 20.2.3, following, and the LNP Data Base Query Charge is described in 20.2.4, following.

#### **20.1.4 NETWORK MANAGEMENT**

The customer shall provide semi-annually a CCSAC Network Management Report. The CCSAC Network Management Report requirements are described in Qwest Corporation Technical Publication PUB 77342. The Company will use the report information in its own effort to further project CCSN facility requirements.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY (Cont'd)**

#### **20.1.5 ORDERING REQUIREMENTS**

When a customer orders CCSAC, the customer must specify the customer STP premises, the number of CCS Links and the service (application) requiring CCSAC connectivity. One STP Port is provided for each link ordered. In addition, the customer must specify, at a minimum, information for the Entrance Facility and the DLT as described following.

The customer must have capacity available on an existing DS1 Entrance Facility (ordered and provisioned from this section) or a DS3 facility (ordered and provisioned from Section 6 or Section 7) between the customer's SPOI and the SWC of the customer's SPOI with a compatible interface or request a DS1 Entrance Facility. If the Entrance Facility is existing, the customer shall provide the Circuit Facility Assignment (CFA) of the existing facilities that will be utilized.

In addition the customer must specify the type of DLT facility, DS1 or DSO, to be utilized or provided between the SWC of the customer's SPOI and the Company's STP.

The Company will allow Company provided hubbing arrangements in association with CCSAC. If the customer has an existing DS3 facility (ordered and provisioned from Section 6 or Section 7) to a Company Hub, the customer may use a portion of the DS3 facility (i.e., DS1) for the CCS Link(s) from the SWC of the customer's SPOI to the Company Hub and then order the DS1 or DSO DLT from the Company Hub to the Company's STP. If the customer requests a DS1 DLT, multiplexing equipment must be ordered at the Company's STP. CCSAC orders are subject to the provisions (e.g., access order intervals, modification charges, cancellation charges and minimum periods) specified in Section 5, preceding.

When a customer orders CCSAC in association with other services (e.g., Feature Group D or CST3 with SS7 Out of Band Signaling for call set up or LIDB) separate orders shall be issued.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY (Cont'd)**

#### **20.1.6 SERVICE PROVISIONING**

CCSAC transmission specifications, diversity requirements, testing parameters and design requirements for STP Links (i.e., CCS Signaling Links) are set forth in Technical References GR-905-CORE, GR-954-CORE and Qwest Corporation Technical Publication PUB 77342. CCSAC network interface specifications between the Company STP location and the customer's STP location supporting Integrated Services Digital Network (ISDN) signaling are described in Technical Reference GR-905-CORE. CCSAC is provided from either the customer's Signaling Point (SP) which requires a minimum of two STP Links and two STP Ports or from the customer's Signaling Transfer Point (STP) which requires a minimum of four STP Links and four STP Ports. A group of signaling links that connect the same two signaling points is described as a link set. There are a maximum of 16 signaling links located within one link set. The quantity of CCS Links required is based upon diversity requirements. Diversity is provided as mutually agreed upon by the Company and the customer based upon the availability of facilities from the customer's SPOI location to the Company's STP. If applicable, Tariff F.C.C. No. 2 Special Construction regulations and charges apply.

#### **20.1.7 PERFORMANCE REQUIREMENTS**

The Company supports the performance standards for CCSN as defined in Technical Reference GR-905-CORE and Qwest Corporation Technical Publication PUB 77342. The overall end-to-end CCSN network objective from any SP to any other SP is less than ten minutes unavailable access per year based on design and diversity requirements and the performance objective for any single SP, including a Service Control Point (SCP), is less than three minutes unavailable access per year. The combined link set from the SCP to the Signal Transfer Point (STP) has a performance objective of less than two minutes unavailable access per year.

The Company will administer its CCSN network to ensure acceptable service provision levels. The Company maintains the right to apply protective controls to its CCSN as a result of occurrences such as failure or overload of CCSN facilities, natural disasters, mass calling or national security demands. In the event that the protective controls applied by the Company result in the complete loss of CCSAC service by the customer, the customer will be entitled to a credit allowance for Switched Access service interruptions as set forth in 2.4.4, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.1 COMMON CHANNEL SIGNALING ACCESS CAPABILITY (Cont'd)**

#### **20.1.8 TESTING REQUIREMENTS**

##### **A. Acceptance Testing Requirements**

At no additional charge, the Company will cooperatively test with the customer, at the time of installation, network compatibility and other operational tests for CCSAC as described in Technical References GR-905-CORE and Qwest Corporation Technical Publication PUB 77342.

When Clear Channel Capability on CST3 or FGD service is ordered as described in 6.3.1, preceding, the Company will cooperatively test with the customer, at the time of installation, CCSAC network compatibility and other operational tests for ISDN interworking as described in Technical Reference GR-905-CORE at no additional charge.

Successful completion and acceptance of all testing requirements must occur in order to receive CCSAC service.

##### **B. Additional Cooperative Acceptance Testing Requirements**

Additional Cooperative Acceptance Testing and the applicable rates and charges, as described in 13.3, preceding, shall be performed on a cooperative basis with the customer. Additional Cooperative Acceptance tests for CCSAC are described in Technical References GR-905-CORE and Qwest Corporation Technical Publication PUB 77342.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.1 CALL SET-UP**

This application provides the customer the capability to send originating and terminating call set-up signaling information, via ISUP messages, between the customer's designated premises, the Company's STP and other entities in association with message telecommunications service.

Call Set-Up may be associated with calls that utilize the Company's switched access network or may be associated with calls that do not utilize the Company's switched access network. If the message trunks are provided by the Company, the customer must order the associated CST3 or Feature Group D trunks with SS7 Out of Band Signaling option as set forth in Section 6, preceding. Call Set-Up associated with calls that do not utilize the Company's switched access network is referred to as transient call set-up and the customer must have message trunks with SS7 capabilities. CCSAC Service as set forth in this section is required to provide both capabilities.

#### **20.2.2 FOREIGN DATA BASE QUERIES**

This service provides the customer the ability to query foreign data bases (data bases not maintained by the Company) by sending signaling information via TCAP messages between the Company's STP, the customer's designated premises and foreign databases (those not owned by the Company). CCSAC Service as set forth in this section is required to provide this capability.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE**

##### **A. General Description**

The Company's Line Information Data Base (LIDB) contains information about working telephone numbers or accounts that can be used by the customer to facilitate completion of calls. LIDB is available for both Validation Service and OLNS Service as described in 1. and 2., following. LIDB is accessed via the Company's CCSAC. A customer requesting LIDB for Validation and/or OLNS must order CCSAC as set forth in 20.1, preceding, and LIDB as set forth following. Once LIDB is established, the customer has access to both Validation and OLNS applications.

A customer requesting LIDB information originates a LIDB query from the customer's Operator Service System (OSS) identified by the Service Switching Point (SSP) Originating Point Code (OPC) to the Regional STP pair as designated by the Company. The customer's OPC is translated in the STP. The STP translation process validates the OPC and routes the query to and from the Service Control Point (SCP) which stores all LIDB information. OPC data is recorded in the SCP and later used by the Company to bill the customer the applicable rates as set forth in 20.3, following.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE (Cont'd)**

##### **B. LIDB Applications**

###### **1. Validation Service**

Validation Service allows the LIDB customer to validate account information in the Company's LIDB. Validation Service is provided in support of Alternate Billing Service such as calling card, collect calls, and third number billing. Alternate Billing Service allows customers' end users the ability to bill calls to an account other than the account associated with the originating calling number. All LIDB queries for Validation Service are transported uniformly to the Company's LIDB where the following functions are performed:

- validation of the 14 digit telecommunications calling card account number stored in LIDB,
- determination of whether the billed line has decided in advance to reject certain calls billed as collect and/or to a third number,
- determination of the billed line as a pay telephone (i.e., public or semi-public) or a nonworking telephone number,
- determination of central office codes as active or vacant.

The Company will provide to LIDB customers, upon request, the Billing Name and Address (BNA) information related to a Company calling card when LIDB call attempt activity for a specific account exceeds the Company's designated fraud control threshold level. BNA information provided to a LIDB customer is to be used exclusively for resolving the fraud investigation case and for billing the calling party for telecommunications services and collecting the amount due.

**20. COMMON CHANNEL SIGNALING NETWORK**

**20.2 CCSAC SERVICE APPLICATIONS**

**20.2.3 LINE INFORMATION DATA BASE SERVICE**

**B. LIDB Applications (Cont'd)**

**2. OLNS Service**

OLNS allows a customer to query the Company's LIDB to identify originating screening profiles for working telephone numbers. When the customer sends a properly formatted OLNS query, the Company will provide the originating screening information residing in LIDB that can be utilized for call processing and billing associated with the originating line.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE (Cont'd)**

##### **C. LIDB Ordering Requirements**

When a customer orders LIDB initially for Validation Service and/or OLNS, the customer must specify, per access order, the LIDB Originating Point Code(s), Location Identification Code(s) and projected percent of interstate use that will access the Company's LIDB. LIDB orders are subject to the provisions (e.g., access order intervals, modification charges, cancellation charges and minimum periods) as specified in Section 5, preceding. If the customer has existing Validation Service they have the capability to obtain the OLNS information. However, the customer must notify the Company that they will be utilizing LIDB for OLNS. The customer does not have to submit an actual order.

##### **D. LIDB Provisioning**

LIDB is accessed via the Company's CCSAC. LIDB customers must arrange CCSAC access as set forth in 20.1, preceding. Technical Specifications for LIDB Service are described in Technical References GR-954-CORE, GR-1158-CORE and in Qwest Corporation Technical Publication PUB 77342. All query messages destined for the Company's LIDB require a routing indicator to be set for further Global Title Translations (GTTs). The Company performs the final GTT. The Company will provide to the customer all necessary network accessing information (e.g., regional STP point codes, SCP point codes, sub system number, physical points of interconnection, signal link codes, identity of interconnecting link sets, primary and alternate routes) of the Company's LIDB application.

The Company's LIDB contains a record for all working line numbers, active Company calling card data, line numbers which contain billed number screening (BNS) restrictions, Public Access Line numbers, vacant and active Billed Number Groups and OLNS information. End users may confirm the billed number screening indicators residing in the Company's LIDB by contacting the Company through their normal business office channels. These records are updated on a routine basis and an immediate basis as described following:

##### **1. Routine Updates**

The Company will update LIDB on a daily basis for service order processing changes (e.g., new service, disconnects, moves, modifications, cancellations and nonpayment of an account).

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE**

##### **D. LIDB Provisioning (Cont'd)**

##### **2. Immediate Updates**

The Company has procedures to update LIDB as requested by the customer. These updates are processed the same day as requested by the customer.

The Company has procedures to deactivate (i.e., automatically and manually) a Company calling card number when call attempt activity exceeds the Company's designated usage threshold level over a given period of time. All Company calling card call attempts are monitored against the Company's designated usage thresholds. These thresholds are based upon classes of service and generate warning messages to identify potential calling card fraudulent activity.

The Company will monitor and deactivate Company calling card numbers seven (7) days a week, twenty-four (24) hours a day. Company calling cards determined by the Company as being fraudulently used and/or reported to the Company as lost or stolen will be deactivated within two hours from the time the fraud was determined and/or reported.

The Company will provide to LIDB customers, upon request, the Billing Name and Address (BNA) information related to a Company calling card when LIDB call attempt activity for a specific account exceeds the Company's designated fraud control threshold level. BNA information provided to a LIDB customer is to be used exclusively for resolving the fraud investigation case and for billing the calling party for telecommunications services and collecting the amount due.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE (Cont'd)**

##### **E. LIDB Limitations**

All information residing in the LIDB is proprietary. Proprietary data residing in the Company's LIDB is protected from unauthorized access and may not be stored by customers in a customer's data base for any reason. Examples of proprietary information residing in the Company's LIDB are:

- Billed (Line/Regional Accounting Office) Number
- Personal Identification Number(s)
- Billed Number Screening Indicators
- Class of Service
- Information related to billing LIDB usage
- OLNS Indicators

All customer information (e.g., calling number and called number) received from the LIDB customer is used only for the purposes of billing and/or to assist the Company in toll fraud detection.

##### **F. LIDB Performance Requirements**

The Company supports the LIDB performance standards as defined in Technical References GR-954-CORE, GR-1158-CORE and Qwest Corporation Technical Publication PUB 77342. LIDB Service outage time will be less than twelve hours per year. LIDB is capable of processing up to 100 validation queries per second. The per query response time from switch transmission to reception should not exceed one second for ninety-nine (99) percent of all queries. During periods of LIDB system congestion, an automatic code gapping procedure will be utilized to control such congestion. The automatic code gapping procedure directs the switches' gap level (i.e., how long the switch should wait before sending another query) and the duration (how long the switch should continue to perform gapping). During system congestion, the automatic code gapping will begin to drop a percentage of the queries received uniformly to all LIDB users based upon the level of system congestion.

The Company maintains the right to invoke manual intervention of the automatic code gapping procedure to preserve the integrity of the network. In the event that the protective controls applied by the Company result in the complete loss of LIDB service by the customer, the customer will be entitled to a credit allowance for Switched Access service interruptions as set forth in 2.4.4, preceding.

**20. COMMON CHANNEL SIGNALING NETWORK**

**20.2 CCSAC SERVICE APPLICATIONS**

**20.2.3 LINE INFORMATION DATA BASE SERVICE (Cont'd)**

**G. LIDB Testing Requirements**

**1. Acceptance Testing Requirements**

At no additional charge, the Company will cooperatively test with the customer, at the time of installation, network compatibility and other operational tests for LIDB as described in Technical Reference GR-954-CORE and Qwest Corporation Technical Publication PUB 77342.

Successful completion and acceptance of all testing requirements must occur in order to receive LIDB service.

**2. Additional Cooperative Acceptance Testing Requirements**

Additional Cooperative Acceptance Testing with the applicable rates and charges, as described in 13.3, preceding, shall be performed on a cooperative basis with the customer. Additional Cooperative Acceptance tests for LIDB are described in Technical References GR-954-CORE, GR-1158-CORE and in Qwest Corporation Technical Publication PUB 77342.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS**

#### **20.2.3 LINE INFORMATION DATA BASE SERVICE (Cont'd)**

##### **H. LIDB Rate Categories and Applications**

Query charges as described following, are assessed for each query to the LIDB SCP for both Validation Service and OLNS. Messages charges are not assessed when query charges apply. Rates and charges for LIDB are set forth in 20.3.2, following.

##### **1. LIDB Access Transport Query**

The Access Transport Query represents the transport from the STP to the SCP and back. The LIDB Access Transport Query rate is applicable to all completed queries for each application regardless of the results of the query.

##### **2. Validation Service Query**

The Validation Service Query represents the actual verification of LIDB information. The query rate, which is in addition to the LIDB Access Transport Query, is applicable to all completed queries for billing validation data regardless of the results of the validation.

##### **3. OLNS Service Query**

The OLNS Service Query rate applies to each query received at the Company's LIDB for the identification of originating line number screening information. This OLNS Service Query is in addition to the LIDB Access Transport Query.

##### **4. Service Rearrangements**

Any change in LIDB Service shall be treated as a discontinuance of the existing service and an installation of a new service except as set forth following.

When the customer has existing LIDB Service and chooses to add or change a point code for the associated existing CCSAC link(s), a CCSAC Option Activation charge applies to change the point code in the STP as set forth in 20.1.3, preceding.

## **20. COMMON CHANNEL SIGNALING NETWORK**

### **20.2 CCSAC SERVICE APPLICATIONS (Cont'd)**

#### **20.2.4 LOCAL NUMBER PORTABILITY DATA BASE SERVICE**

##### **A. General**

The Company's Local Number Portability (LNP) data base contains Location Routing Number (LRN) information for a telecommunication service user's choice of Local Service Provider by NXX code. Each LRN is unique to the LSP's serving switch that will complete the call. Customers may access the Local Number Portability data base information as set forth in 13.19.1, preceding, or by utilizing the Company's CCSAC as set forth in 20.1, preceding.

##### **B. Ordering Requirements**

When a customer utilizes CCSAC links to receive LNP data base information, the customer must specify, per access order, the LNP Point Code(s), Location Identification Code(s) and projected percent of interstate use that will access the Company's LNP data base.

##### **C. Provisioning Requirements**

LNP customers using CCSAC as set forth in 20.1, preceding, must specify a routing indicator to be set for further Global Title Translations (GTTs). The Company performs the final GTT. The Company will provide to the customer all necessary network accessing information (e.g., territorial STP codes, SCP point codes, sub system number, physical points of interconnection, signal link codes, identity of interconnecting link sets, primary and alternate routes) of the Company's LNP application.

The Company's LNP data base records are available 7 days a week, 24 hours a day. The Company's LNP data base is updated based on the national standards adopted by the North American Numbering Council (NANC) for local number portability data base administrators who are responsible for the Regional Service Management System/Number Portability Administration Center.

**20. COMMON CHANNEL SIGNALING NETWORK**

**20.2 CCSAC SERVICE APPLICATIONS**

**20.2.4 LOCAL NUMBER PORTABILITY DATA BASE SERVICE**

**C. Provisioning Requirements (Cont'd)**

LNP data base information is proprietary and protected from unauthorized access. Customers may not store any LNP data base information in their own data base or elsewhere for any reason. The LNP data base is accessed on a call by call basis and cannot be used for purposes other than those functions described herein.

**D. Testing Requirements**

At no additional charge, the Company will cooperatively test with the customer, at the time of installation, network compatibility and other operational tests for those customers utilizing Company CCSAC Links to reach the Company's LNP data base.

**E. Performance Requirements**

The Company will administer its network to ensure the provision of acceptable service levels to all telecommunications users of the Company's network service. The Company maintains the right to invoke manual or automated protective control intervention to its network on a competitively neutral basis. These controls would generally be applied as a result of occurrences such as failure or overload of Company facilities, customer facilities or other networks, natural disasters, mass calling or national security.

**20. COMMON CHANNEL SIGNALING NETWORK**

**20.2 CCSAC SERVICE APPLICATIONS**

**20.2.4 LOCAL NUMBER PORTABILITY DATA BASE SERVICE (Cont'd)**

**F. Rate Categories**

A LNP Data Base Query Charge as described following is assessed when the customer utilizes CCSAC links to access the Company's LNP data base. Rates and charges for the LNP Data Base Query Charge are set forth in 20.3.3, following.

**1. LNP Data Base Query Charge**

The LNP Data Base Query Charge represents the transport from the STP to the SCP, the query to the LNP data base and back to the originating STP. The LNP Data Base Query Charge is billed on a per query basis regardless of the outcome of the query.

**2. Service Rearrangements**

Any change in LNP CCSAC links shall be treated as a discontinuance of the existing service and an installation of a new service except as set forth following.

When the customer has existing CCSAC links and chooses to add or change a point code for the associated existing CCSAC link(s), a CCSAC Option Activation charge applies to change the point code in the STP as set forth in 20.1.3, preceding.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.1 GENERAL**

Expanded Interconnection-Collocation (EIC) Service provides for wire center interconnection of the following Company-provided interstate services to a Company-provided collocation service.

(C)  
(C)

- Private Line Transport Service (PLTS)

- Analog PLTS, as set forth in 21.2.1, following,
- DDS Service,
- DS1 Service,
- DS3 Service,
- SST Service,
- SRS,
- SHNS,
- Any other optical service, or
- CO Multiplexing Optional Feature

(T)  
(N)  
—  
(N)

- Switched Access Service

- DS1 Service,
- DS3 Service
- SST Service,
- SRS,
- Any other optical service, or
- Multiplexing Optional Feature

(T)  
(T)  
(N)  
—  
(N)

- Frame Relay Service (FRS)

- 56 or 64 kbps and
- 1.544 Mbps
- 45 Mbps

- *QWEST DSL HOST* Service

- 1.544 Mbps and
- 45 Mbps

- ATM Service

- 45 Mbps

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.1 GENERAL (Cont'd)**

EIC Service is accomplished through an interconnection-collocation arrangement. The Company is solely responsible for the determination of whether an interconnection-collocation arrangement is available from its wire center. Each wire center where an interconnection-collocation arrangement is available, is identified in the National Exchange Carrier Association Inc., Tariff F.C.C. No. 4.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.1 GENERAL (Cont'd)**

EIC Service is provided pursuant to the regulations, rates and charges contained in this Tariff and in accordance with Qwest Corporation Technical Publication PUB 77386.

Connectivity of Company-provided interstate services to an interconnection-collocation arrangement is provided utilizing an Expanded Interconnection Channel Termination (EICT) or an Interconnection Tie Pair (ITP), as set forth in 21.2.1, following. (C)

The Company will provide interstate interconnection at an applicable standard channel interface (e.g., Voice Grade, DDS, 1.544 Mbps, 44.736 Mbps, or OCn transmission rate) as specified by the customer. CO multiplexing arrangements for EIC Service may be ordered as set forth in 21.2.1, following. (C)

When EIC Service is connected to Company FRS, the FRS customer-provided terminal equipment must conform to standards for FRS as set forth in Section 8, preceding. The customer is responsible for ensuring equipment compatibility between the customer terminal equipment and the FRS equipment used by the Company.

When EIC Service is connected to Company *QWEST DSL HOST* Services, the *QWEST DSL HOST* Service customer-provided terminal equipment must conform to standards for *QWEST DSL HOST* Services as set forth in Section 8, preceding. The customer is responsible for ensuring equipment compatibility between the customer terminal equipment and the *QWEST DSL HOST* Services equipment used by the Company.

When EIC Service is connected to Company ATM Service, the ATM customer-provided terminal equipment must conform to standards for ATM Service as set forth in Section 8, preceding. The customer is responsible for ensuring equipment compatibility between the customer terminal equipment and the ATM equipment used by the Company.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.1 GENERAL (Cont'd)**

EIC Service has the following customer of record (COR) requirements:

- The interconnector-owned fiber optic facility and basic transmission terminating equipment (referred to as IDE) must be ordered by and billed to the same COR, (T)
- The EICT/ITP and its associated Company-provided interstate service(s) may be ordered by and billed to the COR of the IDE. (C)
- The EICT/ITP may be ordered by and billed to a designated COR when the customer has obtained a Letter Of Authorization (LOA) from the COR of the IDE and provides the LOA to the Company before ordering the EICT/ITP. In addition, the interstate service(s) connected to the EICT/ITP may be ordered and billed to either the interstate service customer of record, the designated EICT/ITP customer of record or the COR of the IDE. (C)  
(T)  
(C)  
(C)  
(C)
- CO multiplexing requested for an EICT/ITP must be ordered by and billed to the EICT/ITP customer of record. (C)  
|  
(C)

The interconnector-owned fiber optic facility and IDE must be installed before any EICTs/ITPs may be ordered. Customers are responsible for the coordination required (e.g., equipment compatibility) between different EICT/ITP CORs and the COR for the interconnector-owned fiber optic facility and IDE. (C)  
(C)

Trouble reports will only be accepted from the COR of the specific component reported as inoperative. The Company will test the reported service and if no trouble is found on Company facilities (e.g., EICT), a Maintenance of Service charge will apply as set forth in Section 13, preceding. Customers are responsible for all coordination required as a result of inoperative services involving different CORs. Disputes regarding out of service reports and credit allowances, must be settled between customers. If trouble is found in a Company-provided facility used to provide service, a credit allowance for service interruption may apply as set forth in 2.4.4, preceding.

Credit allowances will not apply for any Access Services tested and found without trouble on Company-provided facilities connected to interconnector-owned fiber optic facilities and/or IDE that is inoperative.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.2 SERVICE DESCRIPTIONS**

#### **21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND INTERCONNECTION TIE PAIRS**

An Expanded Interconnection Channel Termination (EICT) or Interconnection Tie Pair (ITP) is a Company-provided Channel Termination, or equivalent into a Company-provided collocation service. An EICT may include regeneration. Regeneration maintains the integrity of the transmitted signal. An ITP does not include regeneration. For the purposes of ordering, there are Private Line Transport Service or Switched Access Service EICTs and ITPs.

(C)  
(C)

EICTs and ITPs are connected to Company Access Services as set forth following:

- Private Line Transport Service EICT Analog PLTS, EICT DDS, EICT 1.544, ITP 1.544, EICT 44.736 Mbps or 45 Mbps, ITP 44.736 Mbps or 45 Mbps, or Optical ITP may be connected, respectively, to Company Analog PLTS (i.e., LS1, LS2, DC, TG1, TG2, VG), DDS, DS1, DS3, SHNS, SST Services, or any other optical service within a Company wire center.
- Private Line Transport Service EICT DDS, may be connected to Company FRS. An ITP 1.544, EICT 1.544, ITP 44.736, and EICT 44.736 Mbps may be connected to Company FRS or *QWEST DSL HOST* Service, and an EICT 45 Mbps or ITP 45 Mbps may be connected to Company ATM.
- When FRS, ATM CRS, or *QWEST DSL HOST* Service are connected to an EICT or ITP, it is in lieu of an FRS, ATM, or *QWEST DSL HOST* Service Access Link as set forth in Section 8, preceding.
- PLTS EICT DS1, EICT DS3, ITP DS1, ITP DS3, or Optical ITP may be connected to Switched Access Service DS1, DS3, SST or any other OCn capacity within a Company wire center. When a PLTS EICT or ITP DS1, DS3, or Optical connects to Switched Access Service DS1, DS3, or SST capacity, Shared Use Regulations as set forth in 2.7, preceding, apply.

(C)  
—  
(C)  
(T)  
  
(C)  
—  
(C)

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.2 SERVICE DESCRIPTIONS**

**21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND  
INTERCONNECTION TIE PAIRS (Cont'd)**

- Switched Access Service EICT DS1, EICT DS3, ITP DS1, and ITP DS3 must be connected to Switched Access Service DS1 or DS3 capacity within a Company wire center. When a Switched Access Service EICT or ITP connects to Switched Access DS1 or DS3 capacity, the Switched Transport Entrance Facility is not required.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.2 SERVICE DESCRIPTIONS**

**21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND  
INTERCONNECTION TIE PAIRS (Cont'd)**

**A. Types of Expanded Interconnection Channel Terminations and Interconnection Tie Pairs**

**1. EICT Analog PLTS**

EICT Analog PLTS is a channel for the transmission of data having the transmission characteristics according to the electrical signal of the applicable PLTS Service ordered from Section 7, preceding.

An EICT Analog PLTS is provided between the IDE and Company PLTS Analog (i.e., LS1, LS2, DC, TG1, TG2, VG) Service ordered from Section 7, preceding.

The IDE installed in a Company wire center must include multiplexing to derive channel interfaces compatible with the applicable Analog PLTS.

An EICT Analog PLTS will interface with an Analog PLTS electrical signal, and if compatible, with the channels of DS1 to Voice and Digital Data Multiplexing (channel banks) common to Company wire centers. There are no precise interface standards for this connection but there are equipment standards which, if followed, will cause the channel parameters at the access channel network interface to conform to the Analog PLTS as ordered from Section 7, preceding.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.2 SERVICE DESCRIPTIONS**

#### **21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND INTERCONNECTION TIE PAIRS (Cont'd)**

##### **A. Types of Expanded Interconnection Channel Terminations and Interconnection Tie Pairs (Cont'd)**

##### **2. EICT DDS**

EICT DDS is a channel for the transmission of Digital Data Service at the rate of 2.4, 4.8, 9.6, 19.2, 56 or 64 kbps. EICT DDS can be utilized for connection to FRS for the transmission rate of 56 or 64 kbps.

An EICT DDS is provided between the IDE and Company PLTS DDS Service ordered from Section 7, preceding. CO multiplexing for the EICT may be ordered from Section 7, preceding, by the EICT customer.

An EICT DDS will interface with the PLTS Digital Data Service electrical signal, and if compatible, with the channels of DS1 to Voice and Digital Data Multiplexing (channel banks) common to Company wire centers. There are no precise interface standards for this connection but there are equipment standards, which if followed, will cause the channel parameters at the access channel network interface to conform to the PLTS Digital Data Service as ordered from Section 7, preceding. The IDE used to connect to an EICT DDS, or FRS 56 or 64 kbps port must utilize compatible multiplexers connected to the Company composite clock in each wire center.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.2 SERVICE DESCRIPTIONS**

#### **21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND INTERCONNECTION TIE PAIRS (Cont'd)**

##### **A. Types of Expanded Interconnection Channel Terminations and Interconnection Tie Pairs (Cont'd)**

##### **3. EICT 1.544 and EICT DS1**

EICT 1.544 and EICT DS1 are high capacity channels for the transmission of 1.544 Mbps isochronous serial data having a line code of bipolar with alternate mark inversion or Bipolar with Eight Zero Substitution (B8ZS). The 1.544 Mbps signal consists of 1.536 Mbps of customer information and .008 Mbps signal for other use, (e.g. framing and synchronization).

An EICT 1.544 is provided between the IDE and Company PLTS DS1 Service and the EICT DS1 is provided between the IDE and Company Switched Access Service DS1 capacity. CO multiplexing for the EICT may be ordered from Sections 6 and 7, preceding, by the EICT customer.

An EICT 1.544 is also provided between the IDE and Company FRS ordered from Section 8, preceding. The EICT 1.544 must be used when the customer is ordering customer-selected User-To-Network Information Transfer (UNIT) or Network-To-Network Information Transfer (NNIT) for a Committed Information Rate (CIR) of 112 kbps through 1.544 Mbps.

An EICT 1.544 Mbps is also provided between the IDE and Company *QWEST DSL HOST* Service ordered from Section 8, preceding.

##### **4. EICT 44.736 Mbps or 45 Mbps, and EICT DS3**

EICT 44.736 Mbps or 45 Mbps, and EICT DS3 are high capacity channels for the transmission of 44.736 Mbps isochronous serial data having a line code of Bipolar with Three Zero Substitution (B3ZS).

An EICT DS3 is provided between the IDE and Company PLTS DS3 Service or Switched Access Service DS3 capacity while an EICT 44.736 or 45 Mbps is provided for *QWEST DSL HOST* Service, FRS and ATM. CO multiplexing for the EICT may be ordered from Sections 6 and 7, preceding, by the EICT customer.

(T)

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.2 SERVICE DESCRIPTIONS**

**21.2.1 EXPANDED INTERCONNECTION CHANNEL TERMINATIONS AND INTERCONNECTION TIE PAIRS**

**A. Types of Expanded Interconnection Channel Terminations and Interconnection Tie Pairs (Cont'd)**

**5. ITP at 1.544 Mbps and ITP DS1**

An ITP at 1.544 Mbps and ITP DS1 are provided between the IDE and Company provided service. They deliver an attenuated signal as specified in Qwest Corporation Technical Publication PUB 77386. This ITP may also apply when associated with FRS and *QWEST DSL HOST* Service.

**6. ITP at 44.736 Mbps or 45 Mbps and ITP DS3**

An ITP at 44.736 or 45 Mbps and ITP DS3 are provided between the IDE and Company provided service. They deliver an attenuated signal as specified in Qwest Corporation Technical Publication PUB 77386. This ITP may also apply when associated with FRS, *QWEST DSL HOST* Service, and ATM.

**7. ITP for Optical Services**

An optical ITP is provided between the IDE and Company-provided optical service. This ITP is specified in Qwest Corporation Technical Publication PUB 77386. The ITP applies to any optical service connection to a collocator, provided the customer does not require multiplexing. When multiplexing is required, the customer must subscribe to a central office node or the equivalent, out of Sections 7, 15 or 17.

(N)  
—

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.3 VIRTUAL EIC SERVICE**

#### **21.3.1 GENERAL REGULATIONS**

- A. The regulations for Shared Use set forth in 2.7, preceding, are applicable for the EICT and ITP provided under VEIC Service.
- B. The offering of VEIC Service contemplates the use of existing Entrance Facilities. There may be occasions where the VEIC Service is not available due to these structure limitations, or where it may be necessary to construct such facilities. Should additional Entrance Facilities be desired for immediate VEIC Service, all costs of constructing such structures will be included in the applicable nonrecurring charges as set forth in 21.4, following. The Company will offer two points of entry to a particular wire center to interconnectors only if the Company has at least two Company cable entry points. However, where all but one of the entry points are at capacity, the Company will provide only one entry point.
- C. The regulations described herein are in addition to the terms and conditions found elsewhere in this Tariff. The Company's obligation to prepare a quotation for VEIC Service is contingent upon the Company's receipt of a Quotation Preparation Fee (QPF) and VEIC Order Form. The Company's obligation to provide VEIC Service after receipt of the QPF and VEIC Order Form is contingent upon receipt of the signed Quotation Summary form and nonrecurring charges as set forth in 21.4, following.
- D. VEIC Order Form
  - 1. The VEIC Order Form defines the structure necessary to allow entrance into the Company wire center for VEIC Service. This information needs to include, but is not limited to, company name, address, contact name and telephone number, wire center address, interconnector fiber optic facility information and the specified interconnector-designated basic transmission terminating equipment.
  - 2. Microwave VEIC Service is ordered on a VEIC Microwave Order Form.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.1 GENERAL REGULATIONS (Cont'd)**

- E. The Company will not extend Dark Fiber, as set forth in Section 18, preceding, to IDE nor connect PLTS or Switched Access Service EICTs or ITPs to Company Dark Fiber.
- F. EICTs and ITPs can be ordered by and billed to the customer of record of the IDE and interconnector-owned fiber optic facility at the Company-designated point of interconnection serving the wire center or as set forth in 21.1, preceding.
- G. The Company will work cooperatively with the customer of record of the IDE and interconnector-owned fiber optic facility in matters of joint testing and maintenance, as set forth in Section 13, preceding. When the customer of record of the IDE and interconnector-owned fiber optic facility is different from the customer of record of the EICT or ITP, the customers are responsible for any coordination required in the matters of testing and maintenance.
- H. VEIC Common Components as set forth in 21.5.3, following, are not subject to Shared Use regulations as set forth in 2.7, preceding.
- I. The Company is not required to purchase plant or equipment, relinquish forecasted space or facilities, or undertake the construction of new quarters or construct additions to existing quarters in order to satisfy an interconnector's request.
- J. The Company is not required to connect interconnector facilities with any Company service (e.g., DS3) at a particular wire center when the Company does not offer that service at that wire center.
- K. The interconnector will construct its fiber optic facility to the Company-designated point of interconnection serving the wire center.
- L. The Company will work in conjunction with the interconnector to splice the interconnector's fiber optic facility to the Company's fiber optic facility at the Company-designated point of interconnection serving the wire center. The interconnector will not have physical access to the Company wire center building.

**21. EXPANDED INTERCONNECTION**

**- COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.1 GENERAL REGULATIONS (Cont'd)**

- M. The interconnector will pay for the use of the VEIC Entrance Facilities as described in 21.4, following.
- N. Equipment and construction costs necessary to provide VEIC Service will be recovered under the appropriate nonrecurring charges as set forth in 21.5, following.
- O. The interconnector will be responsible for obtaining and providing to the Company administrative codes, e.g., common language codes, for all equipment specified by the interconnector and installed in wire center buildings. These codes, commonly obtained from the equipment manufacturer or Telcordia, must be consistent with those used by the Company.
- P. The interconnector will be responsible for payment of training for the maintenance, operation and installation of the IDE when the IDE is different than the equipment used by the Company. VEIC Training charges are described in 21.4, following.
- Q. The interconnector will be responsible for payment of charges incurred in the maintenance and/or repair of the IDE as set forth in 21.4, following.
- R. The Company does not guarantee the reliability of any IDE. The Company will work cooperatively with the customer to resolve any incompatibilities between equipment types.
- S. For VEIC utilizing SONET technology, the customer is responsible to ensure functionality between different vendors' equipment.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.1 GENERAL REGULATIONS (Cont'd)**

- T. Should the customer choose to utilize a reconfiguration software with IDE, the customer is totally responsible for providing the connecting facility assignment and tracking the same.
- U. The Company will work with the customer to ensure that the IDE is engineered, standard-designed and installation detailed-designed to meet both the customer's specified needs and to ensure compatibility with Company equipment and operating systems.
- V. For VEIC Maintenance Labor, Inspector Labor, Engineering Labor and Equipment Labor, business hours are considered to be Monday through Friday, 8:00 a.m. to 5:00 p.m. and after business hours are after 5:00 p.m. and before 8:00 a.m., Monday through Friday, all day Saturday, Sunday and holidays.
- W. The interconnector shall not rearrange, move, disconnect, remove or attempt to repair any facilities contained in a Company-owned facility housing (e.g., above ground cabinets, under ground utility vaults, utility hole, hand hole, etc.) except with prior written consent and presence of a Company-designated inspector.
- X. The Central Office Connecting Channel (COCC) rate element does not apply to connections to EIC Service.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE (Cont'd)**

**21.3.2 APPLICATION FOR VIRTUAL EIC**

- A. The customer of record for the IDE and interconnector-owned fiber optic facility must provide to the Company a Quotation Preparation Fee (QPF) for each specific wire center requested, along with a completed VEIC Order Form, as specified in 21.3.1, preceding.

The QPF and VEIC Order Form must be sent to the Company via courier, U.S. Mail or hand delivered to:

Qwest Corporation  
Expanded Interconnection-Collocation  
EIC Product Manager  
1801 California St., Rm. 2330  
Denver, CO 80202

The QPF will be used to cover the cost of all activities required to determine the quotation specific to the interconnector's request. The QPF will be refunded if a request for VEIC is unable to be met by the Company.

- B. The Company will process applications on a first-come, first-served basis as determined by the receipt of the QPF and VEIC Order Form.
- C. An Access Order is required for all EICT and ITP requests.
- D. A bona fide request for a new type of EICT or ITP shall at a minimum, reference the applicable tariffed service, either Switched or PLTS, as well as describing the specific interface the interconnector requires.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE (Cont'd)**

**21.3.3 INVENTORY, QPF AND CANCELLATION OF SERVICE**

- A. Upon receipt of the VEIC Order Form and QPF, the Company will determine the availability of VEIC Entrance Facilities to meet the interconnector's requirements. The Company will respond to the interconnector within five (5) business days as to the ability of the Company to accommodate the interconnector's request for VEIC Service. If the requested wire center is not currently listed in National Exchange Carrier Association Inc., Tariff F.C.C. No. 4 as offering VEIC Service, the response will be no more than fifteen (15) business days.
- B. Once the interconnector is notified that VEIC Entrance Facilities are available, the Company will begin work activities to prepare a quotation for the interconnector's request according to the information set forth on the VEIC Order Form. Within twenty five (25) business days of the written notice, the interconnector will be provided a final quotation in writing, except as set forth in I., following, of all nonrecurring charges for the VEIC Service, excluding EICT charges.
- C. The interconnector shall have thirty (30) calendar days from the date the Company mails the quotation to the interconnector to respond. During that 30 day period, the VEIC Entrance Facilities will be reserved for the interconnector. If the Company does not receive an acceptance of the quotation within the specified period, the request will be closed and the VEIC Entrance Facilities will be returned to available inventory.
- D. The interconnector agrees to meet with the Company, if requested, to review design and construction work plans and establish schedules for the installation of the IDE.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.3 INVENTORY, QPF AND CANCELLATION OF SERVICE (Cont'd)**

- E. 50% of the nonrecurring charges on the quotation (less the QPF) and proof of insurance are due prior to the beginning of any Virtual IDE installation. The nonrecurring charge is payable by check or money order.
- F. The Company will notify the interconnector in writing of the completion of the VEIC Service as set forth on the VEIC Order Form.
- G. The remaining balance of the nonrecurring charges on the quotation is due to the Company on the VEIC due date. The Company will notify the interconnector in advance if the due date is in jeopardy. EICTs and ITPs may not be ordered prior to the VEIC Service due date and receipt of the balance of the nonrecurring charges.
- H. Billing for applicable recurring rates will begin when installation of the IDE has been completed.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.3 INVENTORY, QPF AND CANCELLATION OF SERVICE (Cont'd)**

**I. Change Requests Prior to Final Quote**

Any changes, modifications, or additional engineering requested by the interconnector to the type and quantity of the IDE prior to the interconnector receiving the final quotation in writing (by certified U. S. Mail return receipt requested) from the Company may require an additional ten business days to develop the quote.

An interconnector's request to cancel, will result in a refund to the interconnector of the QPF minus all direct costs incurred by the Company at the time the cancellation was received.

**J. Change Requests After the Final Quote**

A change request to increase or decrease the number of plug-in units or type of plug-in units received after the final quote and prior to the installation completion of the IDE will be accepted. All other changes, modifications or additional engineering requested by the interconnector to the type and quantity of IDE after the final quotation with or without receipt of the 50% payment for the applicable VEIC nonrecurring charges (less the QPF), will result in cancellation of the VEIC request.

Cancellation of a VEIC request, as set forth above, or as a result of an interconnector's request to cancel after the final quotation, will result in a refund to the interconnector of the QPF and the paid nonrecurring charges minus all direct costs incurred by the Company. If the IDE is applicable for use on a new quote and VEIC Order Form, the direct costs (e.g., engineering) and paid nonrecurring charges will not be deducted from the original quotation. Should the direct costs incurred on behalf of the interconnector for the canceled order exceed the QPF and paid nonrecurring charges, the excess balance will be billed to the interconnector.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE (Cont'd)**

**21.3.4 IDE TRANSFER OF POSSESSION**

**A. General**

1. When an interconnector purchases IDE and requests VEIC Service with the Company, the following provisions apply. Rates and charges for VEIC Service are set forth in 21.5, following.
2. The interconnector will transfer possession of equipment described in the VEIC Order Form to the Company via a no cost lease subject to the terms and conditions of this Tariff. The sole purpose of the lease is to provide the Company with exclusive possessory rights to the IDE. Title to the IDE shall not pass to the Company at any time.
3. All risk of loss shall be the responsibility of the interconnector, except to the extent as set forth in Section 2, preceding.
4. The interconnector is responsible for providing the Company with OSHA safety requirements associated with the IDE.
5. All installation, maintenance and removal work performed on behalf of the interconnector must be performed by the Company or a Company-authorized vendor. Authorization procedures may be obtained from the Company upon request.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.4 IDE TRANSFER OF POSSESSION (Cont'd)**

**B. Company Possession of IDE**

1. The interconnector shall obtain the IDE described in the VEIC Order Form.
2. The interconnector shall ensure that upon receipt of the IDE by the Company all warranties and access to ongoing technical support are passed through to the Company, all at the interconnector's expense. The interconnector shall advise the manufacturer and seller of the IDE that the IDE will be possessed, installed and maintained by the Company.
3. All IDE installed in Company wire centers must comply with the Telcordia Network Equipment Building System (NEBS) Generic Equipment Requirement GR-63-CORE, Company wire center environmental and transmission standards and any statutory (local, state or federal) and/or regulatory requirements in effect at the time of equipment installation or that subsequently become effective. The interconnector shall provide the Company interface specifications (e.g., electrical, functional, physical and software) of the IDE.
4. When an interconnector purchases IDE and requests the Company to provide VEIC Service, the Company may restrict the type of transmission equipment placed in its wire center (e.g., fiber optic terminals, DS3 and/or DS1 channelization equipment and fiber terminating devices). The Company will evaluate the equipment upon receiving a VEIC request to determine if it is deemed basic transmission terminating equipment. The Company will only receive and possess equipment which it determines is basic transmission terminating equipment conforming to industry standards. Any other equipment will be rejected.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.3 VIRTUAL EIC SERVICE**

#### **21.3.4 IDE TRANSFER OF POSSESSION**

##### **B.4. (Cont'd)**

The interconnector must specify all software options for the IDE and associated plug-ins. In addition, the interconnector shall provide the following:

- all necessary connecting cables (i.e., bay-to-bay and shelf-to-shelf), plug-ins and/or circuit packs,
- all necessary fiber interconnection cable and connectors between the IDE and the Company-designated fiber distribution panel of the fiber distribution frame equipment side,
- all necessary cable and connectors from the IDE to the Company's distributing frame designated as the single point of termination (SPOT),
- all unique tools and test equipment for interconnector-designated equipment,
- initial and subsequently added equipment sized and equipped to handle a minimum of 12 months forecasted growth,
- any necessary equipment for remote monitoring and control and
- synchronization (e.g., timing) for the IDE traceable to a stratum one primary reference source.

Should any necessary equipment be defective or not be provided, installation of the interconnector-designated equipment will be halted until such equipment is replaced by the interconnector.

#### **C. Delivery of IDE and Receipt by the Company**

1. The interconnector shall deliver the IDE to the Company-designated delivery point. The interconnector shall ensure that the IDE is packaged in containers to ensure adequate protection against physical damage, static charge, discharge or deterioration, so as to ensure safe delivery to the Company. The interconnector shall ensure that all containers of IDE packaged and shipped to the Company meet the Company's reasonable packaging and shipping specifications. The Company shall be responsible for warehousing, hauling and hoisting IDE once the equipment is at the Company-designated delivery point.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.4 IDE TRANSFER OF POSSESSION**

**C. Delivery of IDE and Receipt by the Company (Cont'd)**

2. All IDE shall be received subject to the Company's right of inspection and/or rejection. IDE not conforming to the VEIC Order Form specifications or damaged, will be rejected. The equipment will be held for a reasonable time pending the interconnector's instruction. Nonconforming, rejected and/or damaged equipment will be returned to the interconnector at the interconnector's expense.
3. Physical receipt and possession of IDE by the Company prior to inspection shall not constitute a final acceptance by the Company of the IDE and is without prejudice to any claims that the Company may have against the interconnector. The Company shall have all rights relating to inspection, rejection, revocation of acceptance, latent defects and related matters, which are made available to a buyer under the Uniform Commercial Code. This provision shall not be constituted to make the Company a buyer or owner of the IDE.

**D. IDE Installation**

1. At the time of initial installation, the Company will cooperatively perform acceptance testing on the IDE with the interconnector. Acceptance testing parameters (e.g., fiber loss terminal to terminal, terminal to terminal operation, alarming, and protective switching) for IDE will be conducted by the Company in accordance with the IDE manufacturer's recommendations.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.4 IDE TRANSFER OF POSSESSION (Cont'd)**

**E. IDE Change**

1. The interconnector will provide the Company a QPF and VEIC Order Form as described in 21.3, preceding, when the interconnector requests to change existing IDE. The Company will provide a quote to the interconnector for the costs associated with the requested change. The quote shall include the installation of all necessary hardware, software and any other identified equipment. The interconnector shall provide all IDE to the Company and pay any and all engineering and installation charges as a result of the change.
2. All terms and conditions of this Tariff shall apply on a going forward basis to the existing and changed IDE as a whole.
3. IDE changes that require the Company to change its own equipment are not permitted.

**F. IDE Maintenance**

1. The interconnector is responsible for purchasing and maintaining a supply of spares.
2. Upon a service failure, the interconnector is responsible for transportation and delivery of maintenance spares to the Company-specified premises. The interconnector shall deliver the IDE as set forth in C., preceding. The Company will not warehouse any maintenance spares.
3. Upon restoration of the VEIC Service failure, the Company will return the defective equipment to the interconnector, all at the interconnector's expense.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.4 IDE TRANSFER OF POSSESSION (Cont'd)**

**G. IDE Discontinuance and Removal**

**1. Voluntary Discontinuance of VEIC Service**

- a. The Company requests the interconnector to provide thirty (30) days written notice (by certified U. S. Mail, return receipt requested) when the interconnector requests to discontinue VEIC Service.
- b. The Company will provide a quote for the costs associated with the engineering and equipment removal of the IDE from its wire center. Such quote will be provided to the interconnector within fourteen (14) calendar days from receipt of the written notice. The interconnector is responsible for paying all removal nonrecurring charges to the Company prior to the Company removing the equipment from its wire center.
- c. Upon receipt from the interconnector of the full payment of the nonrecurring charges quoted for the removal of IDE, the Company will negotiate with the interconnector a removal date of the IDE from its wire center. Upon completion of the removal of the IDE from its wire center, the Company will notify the interconnector to pick up the IDE from the Company-specified premises.
- d. The interconnector shall have seven (7) calendar days from the agreed-to-date to remove the IDE from the Company's premises. Absent circumstances beyond the interconnector's reasonable control, if the interconnector fails to remove the IDE from the Company's premises by the seventh day from the agreed-to-date, the Company may dispose of the IDE in any manner it sees fit, and may retain any proceeds from such disposal.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.4 IDE TRANSFER OF POSSESSION**

**G. IDE Discontinuance and Removal (Cont'd)**

**2. Involuntary Discontinuance of Service**

- a. In the event the interconnector fails to abide by the terms and conditions of this Tariff, and the Company discontinues VEIC Service to the interconnector, rendering the IDE disabled to any Company service, the Company is entitled to exercise exclusive domain over the IDE in its possession. The Company may remove the IDE from its wire center and may dispose of it in any manner it sees fit. Should the Company decide to dispose of the IDE via a sale, the Company will notify the interconnector of the time and date of such sale. Any proceeds received from such a sale shall be retained by the Company with no obligation to turn such proceeds over to the interconnector.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.3 VIRTUAL EIC SERVICE (Cont'd)**

#### **21.3.5 INSTALLATION AND MAINTENANCE**

##### **A. Technical Specifications**

The interconnector's fiber optic facilities shall be placed, maintained, relocated or removed in accordance with the applicable requirements and specifications of the current editions of the National Electrical Code (NEC), the National Electrical Safety Code (NESC) and rules and regulations of the Occupational Safety and Health Act (OSHA), and any governing authority having jurisdiction.

The interconnector's fiber optic facilities and splices must comply with Generic Requirements for Optical Fiber and Fiber Optic Cable Technical Reference GR-20-CORE, Cable Placing Handbook, Cable Splicing Handbook, Cable Maintenance Handbook, and General Information Tools and Safety, as they relate to fire, safety, health, environmental safeguards or interference with the Company services or facilities.

##### **B. Point of Interconnection (POI)**

The Company will designate the POI at the point of physical demarcation between the interconnector-provided and owned fiber optic facilities and the Company's fiber optic facilities. The Company will provide and be responsible for installing and maintaining all facilities on the Company side of the POI. The Company reserves the right to prohibit all equipment and facilities, other than fiber optic facilities, from the Company designated POI.

##### **C. VEIC Entrance Facility**

The Company will provision the VEIC Entrance Facility. The VEIC Entrance Facility includes the POI and all applicable components from the Company-designated POI to the fiber distribution panel in the wire center of the IDE. The VEIC Entrance Facility charge is described in 21.4, following.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.3 VIRTUAL EIC SERVICE**

**21.3.5 INSTALLATION AND MAINTENANCE (Cont'd)**

**D. VEIC Equipment Maintenance - Labor**

The Company is responsible for providing repair of out of service and or service affecting conditions and preventative maintenance (e.g., change-out of cards, back up tapes, filter changes) of the IDE in accordance with the information set forth on the VEIC Order Form. VEIC Equipment Maintenance - Labor charges are not applicable to EICT maintenance. VEIC Equipment Maintenance - Labor charges are described in 21.4, following.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.4 RATE REGULATIONS**

This section contains the specific regulations governing the rates and charges that apply for EIC Service. Company services purchased by the interconnector for interconnection with EIC Service are subject to appropriate nonrecurring charges, monthly rates and other applicable rates and charges as set forth in this Tariff.

#### **21.4.1 TYPES OF RATES AND CHARGES**

There are two types of rates and charges that apply to EIC Service. These are monthly rates and nonrecurring charges.

##### **A. Monthly Rates**

Monthly rates are recurring rates that apply each month or fraction thereof that a EIC Service is provided. For billing purposes, each month is considered to have 30 days.

##### **B. Nonrecurring Charges**

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service). VEIC Service nonrecurring charges are common components as set forth in 21.3.1.H., preceding, with the exception of the QPF and EICT/ITP rate categories.

(C)

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS (Cont'd)**

**21.4.2 RATE CATEGORIES**

The rate categories for EIC Service are described following:

**A. Fees**

**1. Quotation Preparation Fee**

The Quotation Preparation Fee (QPF) provides the work activities performed to develop a quotation for VEIC Service. The QPF is set forth in 21.5.1, following.

**2. Microwave Quotation Preparation Fee**

The Microwave Quotation Preparation Fee (MQPF) provides the QPF work activities performed to develop a quotation for VEIC Service and the necessary studies (e.g., structural and radio frequency interference) to determine the feasibility of providing Microwave EIC. The MQPF is set forth in 21.5.1, following.

**B. Expanded Interconnection Channel Terminations and Interconnection Tie Pairs**

**1. PLTS Expanded Interconnection Channel Termination**

The PLTS EICT rate element provides for the communications path between the IDE and a Company Analog PLTS (LS1, LS2, DC, TG1, TG2, VG), DDS, DS1, DS3, FRS, ATM, and *QWEST DSL HOST* Service within the same wire center. Included as part of the EICT is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the Analog PLTS, DDS, DS1, DS3, FRS, ATM CRS, and *QWEST DSL HOST* Service are connected and the type of signaling capability, if any.

(T)

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**B. Expanded Interconnection Channel Terminations and Interconnection Tie Pairs (Cont'd)**

**2. Switched Access Service Expanded Interconnection Channel Termination**

The Switched Access Service EICT rate element provides for the communications path between the IDE and a Company Switched DS1 or DS3 Transport Service within the same wire center. Included as part of the EICT is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the Switched Access Service DS1 or DS3 capacity are to be connected and the type of signaling capability, if any.

A recurring rate and nonrecurring charges apply to each PLTS or Switched Access Service EICT per termination installed as set forth in 21.5.2, following.

**3. PLTS and Switched Access Service Interconnect Tie Pairs**

The PLTS and Switched Access Service ITPs, except Optical ITPs, deliver an attenuated signal. These ITPs are the last facility segment from the Company provided customer's service and the collocater's demarcation point. They all include the terminating block/equipment at the service termination, the tie cable facility, and the cable racking between that location and the network interface.

(C)

(C)

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES (Cont'd)**

**C. VEIC-Common Components**

**1. VEIC Entrance Facility**

The VEIC Entrance Facility rate element provides a fiber optic facility on a per 2 fiber increment basis from the point of interconnection utilizing Company-owned, conventional single mode type of fiber optic cable to the fiber distribution panel in the wire center of the IDE. The recurring rate and nonrecurring charge are assessed per 2 fibers as set forth in 21.5.3, following.

**2. VEIC -48 Volt DC Power**

The VEIC -48 Volt DC Power rate element provides for the amount of DC power to the equipment bay as specified by the interconnector and terminated according to the prevailing electrical standards. The recurring rate is charged on a per ampere basis, per month as set forth in 21.5.3, following.

## **21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

### **21.4 RATE REGULATIONS**

#### **21.4.2 RATE CATEGORIES**

##### **C. VEIC Common Components (Cont'd)**

##### **3. VEIC -48 Volt DC Power Cable**

The VEIC -48 Volt DC Power Cable rate element provides for the maintenance of the power cabling per A and B feeder pair sized at 20, 40 or 60 amps.

The VEIC -48 Volt DC Power Cable Installation charge is to provision the power to the equipment bay where the VEIC equipment is located. The nonrecurring rate element includes the engineering, furnishing and installing the associated cable and cable rack from the closet power distribution bay to the location of the VEIC equipment. It includes the power cable (feeders) A and B sized at 20, 40, or 60 amps.

The recurring rate and nonrecurring charge is assessed per A and B feeder pair 20, 40 or 60 amp feed, as applicable, as set forth in 21.5.3, following.

##### **4. VEIC Equipment Bay**

The VEIC Equipment Bay provides mounting space for the interconnector-designated shelves and fuse panel. Each bay includes the 7 foot bay, its installation, all necessary environmental supports (e.g., floor space, heat and lighting). Mounting space on the bay, including space for the fuse panel and air gaps necessary for heat dissipation, is limited to 78 inches. Physical dimensions of the equipment bay are 84 inches high by 26 inches wide by 12 inches deep. This recurring rate element is applied per shelf as set forth in 21.5.3, following.

**21. EXPANDED INTERCONNECTION**

**- COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**C. VEIC-Common Components (Cont'd)**

**5. CO Synchronization**

CO Synchronization provides Composite Clock and/or DS1 Synchronization signals traceable to a Stratum 1 source. The interconnector must determine the IDE synchronization requirements and notify the Company of these requirements when ordering the clock signals. The Composite Clock signal is a 64 kHz, nominal 5/8 duty cycle, bipolar return-to-zero signal with a bipolar violation every eight pulse. The DS1 Clock signal is a framed, all-ones, 1.544 Mbit/s (DS1) signal using the superframe format and Alternate Mark Inversion line code. CO Synchronization is required for VEIC Service involving digital connections. Synchronization may be required for analog services depending on the IDE involved. CO Synchronization is available where Company wire centers are equipped with Building Integrated Timing Supply (BITS).

CO Synchronization is an option ordered by the customer on the VEIC order form. The recurring rate is billed per equipment bay as set forth in 21.5, following.

**6. IDE Maintenance - Labor**

The IDE Maintenance - Labor nonrecurring charge provides for the labor necessary for repair of out of service and/or service-affecting conditions and preventative maintenance of the IDE as specified by the interconnector. The interconnector is responsible for ordering maintenance spares. The Company will perform maintenance and/or repair work upon receipt of the replacement maintenance spare and/or equipment from the applicable interconnector. The IDE Maintenance Labor charge is assessed per one half hour (1/2) or fraction thereof, per technician, during business hours or per one half hour (1/2) or fraction thereof, per technician, after business hours as applicable. A call-out of a maintenance technician after business hours, is subject to a minimum charge of four (4) hours. If the technician is required beyond the four hour minimum, the remaining time will be billed at the half-hour increment charge as set forth in 21.5.3, following.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**C. VEIC-Common Components (Cont'd)**

**7. VEIC Fiber Cable Splicing**

VEIC Fiber Cable Splicing consists of two charges: per set up, and per fiber spliced. The initial splice is included in the VEIC Entrance Facility nonrecurring charge. Fiber Cable Splicing will only apply on a subsequent basis. Fiber Cable Splicing will occur at the point of interconnection as specified by the Company. The nonrecurring charge is assessed per set up and per fiber spliced as set forth in 21.5.3, following.

**8. VEIC Inspector - Labor**

The VEIC Inspector Labor charge provides a Company-qualified Inspector when the interconnector requires access to the point of interconnection after initial installation. VEIC Inspector Labor is charged by the 1/2 hour or fraction thereof based on business hours or after business hours. A call-out of an Inspector after business hours, is subject to a minimum charge of four hours. If the VEIC Inspector is required beyond the four hour minimum, the remaining time will be billed at the half-hour increment charge as set forth in 21.5.3, following.

**9. VEIC Training**

The VEIC Training rate element provides for the billing of vendor-provided IDE training for Company personnel, on a metropolitan service area basis, when the IDE is different from Company-provided equipment. The Company will require three employees to be trained per metropolitan service area affected by the particular IDE. Within five business days of receiving the interconnector's request for service, the Company will inform the interconnector of the number of employees requiring training. The interconnector will coordinate the training schedule with the vendor and the Company. The Company will work cooperatively with the interconnector to schedule employee training. If, by an act of the Company, the employees that have been trained are relocated, retired or are no longer available, the Company will not require an interconnector to provide training for any new employees for the same IDE.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**C.9. (Cont'd)**

VEIC training nonrecurring charges are described in a., through c., following. A copy of the invoice for training hours, vendor direct charges and Company direct charges will be provided to the interconnector. The elements in a. through c., following apply only as required.

**a. Training Hours Element**

- The training hours are determined based on the actual number of hours the employee(s) is in training, and are billed to the interconnector.
- The total training hours are multiplied by 2 to derive the total number of billable 1/2 hour increments.
- The total 1/2 hour increments are multiplied by the VEIC Training Hours rate as set forth in 21.5.3, following.

**b. Vendor Direct Training Charge Element**

- Vendor Direct Training Charges, direct billed to the Company by the vendor, are billed to the interconnector in the form of VEIC Training 1/2 hour. The charges are billed as set forth following:
- The total direct billed training expense is divided by the VEIC Training rate as set forth in 21.5.3, following, to determine the number of 1/2 hour increments.
- The sum of the 1/2 hour increments is rounded to the nearest 1/2 hour, and is multiplied by the VEIC Training rate.

**21. EXPANDED INTERCONNECTION**

**- COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**C.9 (Cont'd)**

**(c) Company Direct Training Charge Element**

- Company Direct Training Charges are the expenses for daily per diem (i.e., expenses based upon effective Company labor agreements), travel and lodging incurred by Company employees attending a vendor-provided IDE training course. The Company Direct Training Charge element is billed to the interconnector as set forth following:
- The total per diem, travel and lodging expenses are divided by the VEIC Training rate element as set forth in 21.5.3, following, to determine the number of one-half (1/2) hour increments.
- The sum of the one-half (1/2) hour increments is rounded to the nearest one-half (1/2) hour, and is multiplied by the VEIC Training rate.

VEIC Training will apply per same type of IDE in a metropolitan service area (i.e., the geographical area in which a technician normally services transmission equipment). The first interconnector ordering a type of IDE, will be billed the full training charges. The second interconnector ordering the same IDE, will be billed fifty (50%) of the training charges that were billed to the first interconnector. The fifty (50%) of the training costs recovered from the second interconnector will be credited to the first interconnector's bill. VEIC Training will not apply for the third or any subsequent requests for the identical IDE within the same metropolitan service area.

**10. VEIC Engineering (Installation, Change or Removal) - Labor**

VEIC Engineering Labor is a charge associated with the planning and engineering of the IDE at the time of installation, change or removal (i.e., discontinuance). The VEIC Engineering Labor charge is a nonrecurring charge based on the quote per one half hour (1/2) or fraction thereof, during business hours or per one half hour (1/2) or fraction thereof, after business hours as applicable. The nonrecurring charge is as set forth in 21.5.3, following.

**21. EXPANDED INTERCONNECTION - COLLOCATION (EIC) SERVICE**

**21.4 RATE REGULATIONS**

**21.4.2 RATE CATEGORIES**

**C. VEIC-Common Components (Cont'd)**

**11. VEIC Equipment - Labor**

VEIC Equipment Labor is a charge associated with the installation, change or removal (i.e., discontinuance) of VEIC equipment. The VEIC Equipment Labor charge is a nonrecurring charge based on the quote per 1/2 hour or fraction thereof, during business hours or per 1/2 hour or fraction thereof, after business hours as applicable. The nonrecurring charge is set forth in 21.5.3, following.

**12. VEIC Single Point of Termination**

VEIC Single Point of Termination (SPOT) is an optional connection to the Company's SPOT cross-connect bay or frame within a wire center. Recurring and nonrecurring charges are assessed per two-wire pair, per Analog PLTS/DDS termination and per termination for each DS1, DS3, 1.544 Mbps, or 45 Mbps as set forth in 21.5.3, following.

**13. VEIC Cable Racking**

The VEIC Cable Racking is a nonrecurring charge for cable racking required between the IDE and the Company's SPOT. VEIC Cable Racking is assessed on a per foot basis for each two-wire pair, per Analog PLTS/DDS termination and per termination for each DS1, DS3, 1.544 Mbps, or 45 Mbps requested as set forth in 21.5.3, following.

## **22. OPERATOR ASSISTANCE SERVICE**

### **22.1 GENERAL DESCRIPTION**

Operator Assistance Service (OAS) provides services using the assistance of a Company operator. The Company operator provides OAS for interLATA calls only. OAS includes Busy Line Verification and Busy Line Interruption. OAS is provided where technically feasible in Company-designated OAS tandem locations.

#### **22.1.1 BUSY LINE VERIFICATION**

Busy Line Verification (BLV) provides the conversation status of a telephone line. The Company operator verifies the conversation status of a telephone line as requested by the calling customer's operator and advises the status of the telephone line to the requesting operator. The Company will not interrupt the conversation on the telephone line when verifying the line status. Only telephone numbers residing in the end offices subtending the Company-designated OAS tandem locations will be verified. Only one BLV attempt will be made per customer operator call and a BLV charge applies whether or not conversation is detected.

#### **22.1.2 BUSY LINE INTERRUPTION**

Busy Line Interruption (BLI) provides busy line verification and interruption of a telephone line. The Company operator verifies the conversation status, interrupts the conversation, informs the user that a caller is attempting to reach the line, requests the user to release the line and advises the requesting operator the user of the line was informed that a caller is attempting to reach the telephone line. Only telephone numbers residing in the end offices subtending the Company-designated OAS tandem locations will be verified and interrupted. The Company operator will only interrupt the call and will not complete the call of the end user initiating the interrupt request. Only one BLI attempt will be made per customer operator call and a BLI charge applies whether or not the user of the telephone line releases the line.

#### **22.1.3 BLV OR BLI EMERGENCY EXEMPTION**

BLV and BLI charges will not apply if the calling customer's operator identifies the call as being to an official public emergency agency and concerns official business involving such agency. An official agency is defined as a government agency which is operated by the federal, state or local government and has the capability and legal authority to provide prompt and direct aid to the public in an emergency situation.

## **22. OPERATOR ASSISTANCE SERVICE**

### **22.2 BLV AND BLI ORDERING AND PROVISIONING REQUIREMENTS**

BLV and BLI are available in conjunction with Switched Access Services CST3 or FGD provisioned with Equal Access Multifrequency Address signaling. The customer must specify the number of trunks desired between its premises and the Company-designated OAS tandem location in the same LATA. The trunks may be two-way or terminating only. Where the OAS tandem switch also functions as a switched access tandem, the customer may combine other switched traffic over the same trunks.

The customer shall request BLV and BLI in the same manner as described for Switched Access Services as set forth in Section 5, preceding, with the exception of signaling, as described above. In addition, the customer must specify the OAS traffic type as set forth in 6.1.1, preceding. BLV and BLI are not available separately.

OAS tandem locations are designated in National Exchange Carrier Association, Inc., Tariff F. C. C. No. 4.

### **22.3 DESIGN BLOCKING REQUIREMENTS**

The Company will design and monitor facilities used for OAS in the same manner as described for Switched Access Services in 6.5.9, preceding.

### **22.4 ACCEPTANCE TESTING REQUIREMENTS**

The Company will, at the customer's request, cooperatively test with the customer, as set forth in 6.1.5, preceding when OAS is provisioned in conjunction with CST3 or FGD Switched Access Services.

### **22.5 JURISDICTIONAL REQUIREMENTS**

OAS may, at the option of the customer, be provided for interstate and intrastate communications. When the customer requests such mixed access, the interstate OAS charges will be determined by the Company using a customer-provided jurisdictional report as set forth in 2.3.10, preceding.

## **22. OPERATOR ASSISTANCE SERVICE**

### **22.6 OBLIGATIONS OF THE COMPANY**

The Company operator will advise the requesting operator to contact the appropriate serving Local Exchange Carrier (LEC) when the telephone number requested to be verified or interrupted is determined to be served by a different LEC.

### **22.7 OBLIGATIONS OF THE CUSTOMER**

The Company operator will respond to one request to verify or verify and interrupt a telephone line per call received from a requesting operator. The Company operator will not transfer redial or forward the call to another location.

The customer premises must provide the necessary on-hook and off-hook answer and disconnect supervisory signaling.

Jurisdictional reporting as described in 2.3.10, preceding, will apply to OAS.

### **22.8 RATE REGULATIONS**

#### **22.8.1 GENERAL RATE REGULATIONS**

Switched Access Service nonrecurring charges associated with ordering installation and rearrangement of CST3 or FGD services apply. In addition to the nonrecurring charges, the recurring BLV and/or BLI per call rate elements apply. Switched Access usage rate elements do not apply.

#### **22.8.2 BUSY LINE VERIFICATION**

The Busy Line Verification rate element is assessed per telephone line verified regardless of the status of the line verified. When the Company operator verifies the telephone line, only the Busy Line Verification rate per call applies.

#### **22.8.3 BUSY LINE INTERRUPTION**

The Busy Line Interruption rate element is assessed per telephone line verified and interrupted regardless of whether the caller releases the telephone line. When the Company operator verifies and interrupts the telephone line, only the Busy Line Interruption rate element is assessed.

**22. OPERATOR ASSISTANCE SERVICE**

**22.9 RATES AND CHARGES**

	<b>RATE PER CALL</b>
<b>22.9.1 BUSY LINE VERIFICATION</b>	
-per call verified	\$1.00
<b>22.9.2 BUSY LINE INTERRUPTION</b>	
-per call verified and interrupted	1.25

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 03-001**

(N)

DESCRIPTON.: DS1 and DS3 on Excess Facilities

CONTRACT AVAILABILITY: Effective from March 31, 2003 through June 30, 2003

CONTRACT TERM: 36- or 60-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23, preceding

This contract tariff is for new DS1 or DS3 Service purchased on a 36-month or 60-month Pricing Plan located where the Company has identified excess facilities into a customer's premises. For each Channel Termination installed at the aforementioned premises, a one-time credit will be given.

Monthly and nonrecurring rates and regulations for DS1 and DS3 Services are set forth in Sections 7.11, 7.12 and 17, preceding. The customer understands the actual rates are those in effect on the first day service is made available for use, i.e., the date the service order is completed by the Company. The customer shall pay the Company all applicable taxes, usual and customary surcharges and all government imposed fees and charges that relate to the service or installation rendered hereunder.

This offering is available to customers ordering DS1 or DS3 Channel Termination in a building where excess facilities exists. Such customers for each DS1 Service will receive a \$300 credit per DS1 Channel Termination and for each DS3 Service will receive a \$3,000 credit per DS3 Channel Termination, the credits will be applied to the customer's first month bill.

When service is disconnected prior to the completion of the Pricing Plan, Termination Liability and Waiver Policy, TLA, as set forth in 7.1, preceding, will apply. In addition to the TLA, the customer shall repay the credit received for each qualifying Channel Termination.

Enrollment Forms or Access Service Requests (ASR) for either DS1 or DS3 Service must be received from March 31, 2003 through June 30, 2003. Customer requested due dates for DS1 or DS3 orders must be within 60 days of receipt of either the signed Enrollment Form or the ASR.

CASE NO. 03-002 (Cont'd)

(S-y)

C. SHNS Fixed Period Rate Plans are eligible to receive the following incentive application:

(T-x)

(S-y)

- SHNS Fixed Period Rate Plans that have expired before this Contract's Effective Date may be extended to either 36- or 60-month terms.

(S-y)

(T-x)

- SHNS Fixed Period Rate Plans that expire after the Effective Date and before this Contract Tariff expires, may be extended to either a 36- or 60-month term contract once the original SHNS Fixed Period Rate Plan expires.

(S-y)

(T-x)

(S-y)

- Minimum Service Periods will not apply to SHNS Fixed Period Rate Plans renewed under this Contract Tariff.

(S-y)

(T-x)

For all SHNS Fixed Period Rate Plans covered under this Contract Tariff, the following terms and conditions apply:

(T-x)

(S-y)

- Additional discounts, as specified following, for 36- and 60-month SHNS Fixed Period Rate Plans, will be available to the customer.
- Based upon the discount the customer selects, a corresponding Termination Liability will be assessed on SHNS Fixed Period Rate Plans that terminate prior to the SHNS Fixed Period Rate Plan's term. The following schedule will be used in determining the corresponding discount and Termination Liability percentages:

<b>DISCOUNT OFF CURRENT TARIFFED SHNS FIXED PERIOD RATE PLAN RATES</b>	<b>TERMINATION LIABILITY ASSESSMENT FOR EARLY TERMINATION</b>
--	---

0%	0%
10%	20%
20%	40%

Issued: May 22, 2003

Effective: May 24, 2003

**24. CONTRACT TARIFFS**

**24.2 CONTRACTS**

CASE NO. 03-002

C. SHNS Fixed Period Rate Plans are eligible to receive the following incentive application: (Cont'd)

- Termination Liability is determined based on the value of the Fixed Period Rate Plan remaining at the time of termination. The calculation is made by taking the number of months remaining in the existing Fixed Period Rate Plan, times (x) the monthly discounted charge for the service being disconnected early, times (x) the applicable Termination Liability assessment percentage.
- To start receiving a discount for a SHNS ring, the customer must send a access service request to the Company that has:
  - The identifier of the particular SHNS ring
  - The applicable discount option clearly noted in the comment section of the access service request, and
  - Whether the term will be 36 or 60 months.
- Discounts will begin to apply on the effective date of the request or the expiration date of the ring's Fixed Rate Plan, whichever is the latter of the two.
- Upon the effective date of renewal, the rates for a SHNS Fixed Period Rate Plan will not increase for the term of the renewal.

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACTS (Cont'd)**

CASE NO. 03-003

ORIGINAL CONTRACT NO. MIN-940830-0004

DESCRIPTON: Synchronous Service Transport (SST) with Self-Healing Alternate Route Protection (SHARP) Contract

CONTRACT  
AVAILABILITY: From June 12, 2003 through July 12, 2003

CONTRACT  
EFFECTIVE DATE: June 12, 2003

CONTRACT  
EXPIRATION DATE: Thirty-six Months from the date the service is made available to the customer

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

A. This Contract Tariff provides an incentive for Private Line SST with SHARP, as specified in other sections of this Tariff,

B. SST with SHARP Fixed Period Rate

For the SST with SHARP Fixed Period Rate Plan covered under this Contract Tariff, the following terms and conditions apply:

- SST with SHARP is available on a 36-Month Fixed Period Rate Plan. This incentive plan will discount the SST and SHARP 36-month term rates that are in effect on the day service is made available by 20%.
- Termination Liability is determined based on the value of the Fixed Period Rate Plan remaining at the time of termination. The termination charge is 70% of the total monthly charges for the remaining portion of the term, unless the customer chooses to discontinue pricing plan service prior to completion of the minimum service period of 12 months. In which case, the remaining number of months in the minimum service period will be billed at 100%.

**24. CONTRACT TARIFFS**

**24.2 CONTRACTS**

CASE NO. 03-003 (Cont'd)

C. To qualify for this Plan, the customer must install two OC48 (2.488 Gbps) SST, point-to-point circuits with SHARP. The order(s) to install service:

- Must be received by the Company on the same day, at the same time
- Must have the same requested due date
- Orders must be completed within 120 days of signed contract unless delayed due to Company reasons

(N)

(N)

**24. CONTRACT TARIFFS**

**24.2 CONTRACTS (Cont'd)**

CASE NO. 03-004

ORIGINAL CONTRACT NO. 85551

DESCRIPTION: Private Line Contract

CONTRACT  
AVAILABILITY: From October 1, 2003 through October 31, 2003

CONTRACT  
EFFECTIVE DATE: October 1, 2003

CONTRACT  
EXPIRATION DATE: October 1, 2004

AVAILABLE MSAS: MSAs identified in Section 23

A. This Contract Tariff provides an annual incentive associated with the customer's aggregated revenue commitment for Private Line Services.

**B. Contract Term**

This contract shall commence upon the effective date of this contract Tariff and shall continue with the Contributory Service(s) until October 1, 2004. Customers requesting a like contract will have the contract become effective on the first day of the first full month after the contract is signed by all parties. Each contract shall terminate after 12 monthly billing periods.

Contributory Services are those Private Line services in Section 17 and the equivalent rate elements in Sections 7 and 15.

(N)

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACTS**

CASE NO. 03-004 (Cont'd)

(N)

#### **C. Terms and Conditions**

1. When this contract becomes effective, the customer must meet the minimum and maximum circuit requirements specified in D.6., following. The customer's Contributory Charges incurred after the effective date of this contract must exceed the Minimum Contributory Charges. If the customer ordered Contributory Service(s) prior to the effective date of this contract, those Contributory Charges generated after the effective date of this contract shall apply towards the Minimum Contributory Charges.
2. At the end of the term, the total of the customer's Contributory Services billing will be determined. If the customer fails to meet their Minimum Contributory Charge Commitment, the Company will not provide an Annual Incentive for the term of this contract. Failure to meet the Minimum Contributory Charge requirement will have no other impact on the customer.

#### **D. Annual Incentive and Circuit Requirements**

1. During the term of this contract, the customer is eligible to receive an Annual Incentive. The amount is determined by using the Contributory Charge Commitment requirements identified in 7., following.
2. Eligibility is based upon the customer meeting the Minimum and Maximum Circuit Requirements and exceeding the annual Minimum Contributory Charge.
3. The Annual Incentive credit is applied against the eligible Contributory Charges of the Contributory Services within any Phase II MSA, during the term of this contract. The Annual Incentive is only credited to customers with no monthly charges in arrears.

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACTS**

CASE NO. 03-004

#### **D. Annual Incentive and Circuit Requirements (Cont'd)**

4. To receive the Annual Incentive, the customer must subscribe to the minimum number of channel terminations for each type of service, but cannot exceed the maximum number of channel terminations for each type of service.
5. The Annual Incentive is calculated using the incremental revenue that exceeds the Contributory Charge minimum amount. Revenue exceeding the Maximum Contributory Charge amount is not eligible for an Annual Incentive.

The formula is: Annual Incentive = (Either the Annual Contributory Charge achieved or Maximum Contributory Charge, whichever is less, minus the Minimum Contributory Charge) x Applicable Incentive Percentage.

For example, at the end of the term, the customer exceeds the annual Minimum Contributory Charge but does not exceed the annual Maximum Contributory Charge amount. The Actual Contributory Charge achieved is \$35,500,000.00. The Minimum Contributory Charge of \$30,681,439.00 is subtracted from the Actual Contributory Charge achieved. The difference is \$4,818,561.00. Using the information provided in 7., following, the associated incentive percentage for this example is 15%. Multiply this percentage by the difference between the Actual Contributory Charge achieved and the Minimum Contributory Charge, and the Annual Incentive equals \$722,784.00.

$$(\$35,500,000 - \$30,681,439.00) \times 15\% = \$722,784.00$$

(N)

(N)

**24. CONTRACT TARIFFS**

**24.2 CONTRACTS**

CASE NO. 03-004

D. Annual Incentive and Circuit Requirements (Cont'd)

6. Minimum and Maximum Circuit Requirements on the effective date of this contract:

TYPE OF SERVICE	QUANTITY OF CHANNEL TERMINATIONS	
	MINIMUM	MAXIMUM
DS1	4,500	6,000
DS3	70	100

7. Contributory Charge Commitment must fall between the following minimum and maximum amounts.

	MINIMUM	MAXIMUM
End of Term Commitment	\$30,681,439.00	\$40,499,500.00

The Incentive Percentage is determined as following:

END OF TERM REVENUE	INCENTIVE PERCENTAGE
\$30,681,439.00 - \$33,135,954.00	10%
33,135,954.00 - 35,590,469.00	15%
35,590,469.00 - 38,044,985.00	20%
38,044,985.00 - 40,499,500.00	25%

**24.2 CONTRACT NO. 03-005**

(N)

DESCRIPTON.: Incentive Offering for DDS, DS1, DS3, SST or SHNS Service

CONTRACT AVAILABILITY: Effective from November 15, 2003 through February 13, 2004

CONTRACT TERM: 36- or 60-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23, preceding

This contract tariff provides an incentive for customers of competitors to subscribe to the Company's DDS, DS1, DS3, SST or SHNS Service offered in Sections 7, 15 and 17 of this Tariff. Following is a list of requirements and restrictions that must be adhered to by prospective customers for eligibility:

- The service addresses must be identical to the addresses of the service provided by the competitor
- Must present documentation demonstrating that current service is being provided by a competitor. Examples of documentation are as follows:
  - Invoices
  - Design Layout Report
  - Coordinated orders to move the service
- Must subscribe to 36- or 60-Month Term Plans for DDS, DS1, DS3, SST or SHNS Service
- Not available as month-to-month service or Qwest Private Line Regional Commitment Plan (RCP)

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 03-005 (Cont'd)**

The following incentives will be offered to customers who meet the aforementioned criteria for eligibility:

- Customers subscribing to a 36-Month Term Plan for DDS, DS1, DS3, SST or SHNS Service will receive:
  - A waiver of nonrecurring charges on all DDS, DS1, DS3 Channel Terminations and Transport Channels, excluding special construction
  - Two month credit on all DDS, DS1, DS3 Channel Terminations and Transport Channels; SST all Nodes and Transport Channels or SHNS Hub Nodes and/or Access Nodes and Interoffice Transport, excluding surcharges and applicable taxes
- Customers subscribing to a 60-Month Term Plan for DDS, DS1, DS3, SST or SHNS Service will receive:
  - A waiver of nonrecurring charges on all DDS, DS1, DS3 Channel Terminations and Transport Channels, excluding special construction
  - Three month credit on all DDS, DS1, DS3 Channel Terminations and Transport Channels; SST all Nodes and Transport Channels or SHNS Hub Nodes and/or Access Nodes and Interoffice Transport, excluding surcharges and applicable taxes

(N)

(N)

**24. CONTRACT TARIFFS**

**24.2 CONTRACT NO. 03-005 (Cont'd)**

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) will apply, as specified in previous sections of this tariff for the respective products offered in this contract. In addition to the TLA, the customer will be responsible for reimbursing the Company for any incentives received.

Orders for DDS, DS1, DS3, SST or SHNS Service must be received from November 15, 2003 through February 13, 2004. Customer requested due dates for DDS or DS1 order(s) must be within 60 days of receiving customer authorization for the order(s), and customer requested due dates for DS3, SST or SHNS order(s) must be within 120 days of receiving customer authorization for the order(s).

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-001**

(N)

DESCRIPTION: Contract for DS1 and DS3 Services

CONTRACT AVAILABILITY: Effective from March 31, 2004 through April 30, 2004

CONTRACT TERM: 60-Months

This contract tariff is for a combination of new DS1 and DS3 Services purchased on a 60-month Pricing Plan. All rate elements for the DS1 and DS3 Services will be available at 20% less than the 60-month Pricing Plan rates set forth in Section 17, preceding, and all nonrecurring charges will be waived. Monthly rates for the entire 60-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

The following eligibility criteria must be met in order to receive this DS1 Contract Offer:

- Service must be located at a Federal Military Installation
- Service must be in any of the following Colorado Springs, Colorado Wire Centers: Colorado Springs, East CLSPCOEA, Colorado Springs CLSPCOMA and Stratmoor CLSPCOSM
- Service must be comprised of a minimum of 21 DS1s and 1 DS3

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) as set forth in Section 7, preceding, will apply.

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-002**

(N)

DESCRIPTION: Contract for Synchronous Service Transport (SST)  
Bandwidth Capacity of 2.488 Gbps OC48

CONTRACT AVAILABILITY: Effective from April 10, 2004 through  
June 10, 2004

CONTRACT  
EFFECTIVE DATE: April 10, 2004

CONTRACT  
EXPIRATION DATE: Sixty Months from the date the service is made  
available to the customer

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for Synchronous Service Transport (SST) Bandwidth Capacity of 2.488 Gbps OC48 purchased on a 60-month Pricing Plan. Each SST OC48 purchased under this contract will be discounted 22% from the total 60 month OC48 rates, based on all rate elements in effect at the time the customer's service is activated. However for billing purposes, the 22% discount will not be applied to all of the rate elements. Rather, each OC48 Node element will be discounted proportionally to achieve the 22% total discount on the OC48 system. For example: if the 22% total system discount equates to \$1,000 for a four Node system, each of the four nodes will receive a discount of \$250 off the monthly recurring charge in effect at the time service turns up. All other rate elements, including any initially or subsequently ordered, will be billed at the current monthly rate(s) as set forth in Section 17, preceding. Monthly rates for the entire 60-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

The nonrecurring charge on ports will be waived for all ports ordered before the last day of the first full month following the initial activation of the associated OC48. All other nonrecurring charges will apply.

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) as set forth in Section 7, preceding, will apply.

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-004**

(N)

DESCRIPTION: Contract for Self-Healing Network Service (SHNS) Ring Bandwidth Capacity of 622.08 Mbps (OC12) with a Connecting Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel

CONTRACT AVAILABILITY: Effective from May 29, 2004 through June 29, 2004

CONTRACT  
EFFECTIVE DATE: May 29, 2004

CONTRACT  
EXPIRATION DATE: Sixty Months from the date the service is made available to the customer

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for a Self-Healing Network Service (SHNS) Ring Bandwidth Capacity of 622.08 Mbps (OC12) purchased on a 60-month Pricing Plan at the prices set forth, below. The Self-Healing Network Service (SHNS) Ring Bandwidth Capacity of 622.08 Mbps (OC12) with a connecting Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel purchased on a 6-month minimum term at prices set forth, below. Monthly rates for the entire 60-months will be frozen from Company-initiated rate changes, at the rates following. All other rate elements, including any initially or subsequently ordered, will be billed at the current monthly rate(s) as set forth in Section 17, preceding.

The following eligibility criteria must be met in order to receive this SHNS Contract Offer:

- The SHNS Service must connect to a Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel at the Bloomington, MN wire center (BLTNMNCE)
  - The Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel must be installed at the same time the SHNS Ring is installed
  - The Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel must be ordered on a 6-month MSP which maybe terminated at the end of the 6-month MSP without TLA

(N)

**24. CONTRACT TARIFFS**

**24.2 CONTRACT NO. 04-004 (CONT'D)**

The customer may move or add to the SHNS Service where facilities exist at the current recurring and nonrecurring charges. There may be occasions when SHNS is not available due to facilities limitations, or when it may be necessary to construct facilities. If Special Construction is involved, the regulations as set forth in Tariff F.C.C. No. 2 apply.

The following rate structure applies to the initial connection of this SHNS Contract Offer:

- The nonrecurring charge for the initial installation of the SHNS and connecting SST will be \$165,301.00

<b>SHNS SERVICE ELEMENTS</b>	<b>MONTHLY RATE</b>	<b>QUANTITY</b>	<b>TOTAL MONTHLY RATE</b>
• Access Nodes,	\$1,762.20	3	\$5,286.60
• Hub Nodes	2,710.00	1	2,710.00
• DS3 Access Ports	215.00	10	2,150.00
• OC3 Access Ports	480.00	3	1,440.00
• DS3 Hub Ports	230.00	5	1,150.00
• Transport Mileage	82.80	28	2,318.40
• COCC	10.00	5	50.00
• SRC	300.00	1	300.00

<b>SST SERVICE ELEMENTS</b>	<b>QUANTITY</b>	<b>MONTHLY RATE</b>
• Circuit,	1	\$5,000.00
- Additional Synchronous Service Transport (SST) 622.08 Mbps (OC12) Channel Service Elements may be added at the rates set forth in Section 17, preceding, so long as such additions are coterminous with the existing SST Circuit.

**24.2 CONTRACT NO. 04-003**

DESCRIPTION: Contract for all Synchronous Service Transport (SST) Ports and all Self-Healing Network Service (SHNS) Ports

CONTRACT AVAILABILITY: Effective from May 29, 2004 through August 31, 2004

CONTRACT  
EFFECTIVE DATE: May 29, 2004

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for all Synchronous Service Transport (SST) Ports and all Self-Healing Network Service (SHNS) Ports. This offer waives the nonrecurring charge for all Synchronous Service Transport (SST) Ports and all Self-Healing Network Service (SHNS) Ports when installed or ordered prior to August 31, 2004 with order completion within 90 days of the order application date. When order completion is delayed due to Company reasons, the order completion date will be extended.

1801 California Street, Denver, Colorado 80202

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-005**

(N)

DESCRIPTION: Contract for DS1, DS3, Synchronous Service Transport (SST) and/or Self-Healing Network Service (SHNS)

CONTRACT AVAILABILITY: Effective from May 27, 2004 through June 27, 2004

CONTRACT  
EFFECTIVE DATE: May 27, 2004

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for DS1, DS3, Synchronous Service Transport (SST) and/or Self-Healing Network Service (SHNS) purchased under a 36-month term plan at the 60-month Pricing Plan Rates. Monthly rates for the entire 36-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

The following eligibility criteria must be met in order to receive this DS1, DS3, SST and/or SHNS Contract Offer:

- The customer must commit to purchasing at least \$10,600,000 of Contributory Services over 36-months. Contributory Services include SHNS, SST, SHARP (Self-Healing Alternate Routing Protection), SRS (SONET Ring Service), DS3, DS1, DDS (Digital Data Service), DSS (Digital Switched Service), Low Speed Data, VG36, VG32, Scan Alert, Analog Trunks, DPA (Different Premise Address), Selective Screening, ISDN Basic Rate Service, Flat Business Lines, Flat Residence Lines, DSL Service, Caller ID, Voice Mail and Measured Business Lines.
- No more than 60% of the monthly recurring charges paid to the Company by the customer in the month prior to the customer's acceptance of this contract tariff arose from services offered under this tariff.

Renewal, Extension and Shortfall Terms and Conditions once the Initial Term of 36-months is complete:

- If the customer meets the \$10,600,000 commitment within the first 36-months:
  - The customer may renew the Initial Term on a month-to-month basis until either the Company or the customer provides the other party with no less than 60 days written notice of termination. Once termination is declared the customer may have up to 12 months to transition off the services or

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-005**

Renewal, Extension and Shortfall Terms and Conditions once the Initial Term of 36-months is complete:

- If the customer meets the \$10,600,000 commitment within the first 36-months (Cont'd):

- The customer may extend the Initial Term for up to two additional 12-month periods beginning on the last day of the Initial Term. The revenue commitment for each 12-month renewal terms shall be one-third of the revenue commitment of the Initial Term. If the revenue commitment is not met in the first or second 12-month term then the customer may pay the shortfall or extend the contract 1 year, contributing that year's revenue toward the interstate shortfall. If at the end of the year dedicated to recovery of the shortfall, the revenue has not been recovered, then the shortfall will come due and the customer will have up to 12 months to transition off the services. The second 12-month extension will only be available when the customer has met their commitment for the first 12-month extension.

- If at the end of the 36-month term the customer has not met the \$10,600,000 commitment then:

- The customer may pay the interstate shortfall and have up to 12 months to transition off the services or
- The customer may elect to extend the contract 1 year, contributing that year's revenue toward the interstate shortfall. If the \$10,600,000 commitment has not been met by the end of the 4th year the customer will be responsible for the interstate shortfall and may have up to 12 months to transition off the services.

- The interstate shortfall shall be calculated by multiplying the difference between the commitment and customer's actual revenues for Contributory Services during the term, by the proportion of all Contributory Services that are interstate (i.e.,  $\text{interstate shortfall} = [\text{the commitment} - \text{actual revenues for Contributory Services}] \times [\text{actual revenues for interstate Contributory Services} \div \text{actual revenues for all Contributory Services}]$ ).

When the entire service is disconnected prior to the expiration of the term plan then the interstate shortfall will be due immediately.

DESCRIPTION: Contract for Two GeoMax Circuits

CONTRACT AVAILABILITY: Effective from May 27, 2004 through June 27, 2004

CONTRACT  
EFFECTIVE DATE: May 27, 2004

CONTRACT  
EXPIRATION DATE: 36-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for a two GeoMax circuits purchased on a 36-month Pricing Plan. All rate elements for the GeoMax Services will be available at 25% less than the 36-month term plan rates set forth in Section 17, preceding. Monthly rates for the entire 36-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

The following eligibility criteria must be met in order to receive this GeoMax Contract Offer:

- Service must be in any of the following Washington State MSA Wire Centers: Seattle – East, STTLWA03; Renton, RNTNWA01; Bellevue, BLLVWAGL; and Issaquah, ISQHWAEX.
- Service must be a renewal of an existing 36-month term plan
- Service must be comprised of a two node configuration

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) as set forth in Section 7, preceding, will apply.

DESCRIPTION: Contract for Self-Healing Network Service (SHNS) with an OC12 Bandwidth

CONTRACT AVAILABILITY: Effective from May 27, 2004 through June 27, 2004

CONTRACT EFFECTIVE DATE: May 27, 2004

CONTRACT EXPIRATION DATE: Sixty Months from the date the service is made available to the customer

AVAILABLE MSAS: Phase I and Phase II Wire Centers; as defined in Section 23

This contract tariff is for a Self-Healing Network Service (SHNS) with an OC12 Bandwidth purchased on a 60-month Pricing Plan. All rate elements for the SHNS will be available at 25% less than the 60-month term plan rates set forth in Section 17, preceding. Monthly rates for the entire 60-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

The following eligibility criteria must be met in order to receive this SHNS Contract Offer:

- Service must be in any of the following Minnesota State MSA Wire Centers: Eagan, MN, EAGNMNLB; Minneapolis, MPLSMNDT; and St. Paul, STPLMNMK.
- The customer's total monthly charges for Company Private Line and Switched Services ordered out of this tariff must be equal to or greater than \$75,000 at the effective date of this contract

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) as set forth in Section 7, preceding, will apply.

- DESCRIPTION.: SST Pricing Plan Renewal
- CONTRACT AVAILABILITY: Effective from June 11, 2004 through December 31, 2004
- CONTRACT  
EFFECTIVE DATE: June 11, 2004
- CONTRACT  
EXPIRATION DATE: Sixty Months from the date the service is made available to the customer
- AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23, preceding
- A. This Contract Tariff provides a renewal incentive for Synchronous Service Transport (SST) Service, as specified in Section 7, preceding.
- B. To qualify for this Plan, the customer must have generated a minimum annual SST revenue of \$18,000,000.00, based on the current month billing (the last bill the customer receives before a renewal is requested).

(N)

**24. CONTRACT TARIFFS**

**24.2 CASE NO. 04-008 (CONT'D)**

C. SST Fixed Period Rate Plans are eligible to receive the following discount application:

- SST Fixed Period Rate Plans that have expired before this Contract's Effective Date may be renewed for an additional 36- or 60-month term.
- SST Fixed Period Rate Plans that expire after the Effective Date and before this Contract Tariff expires (December 31, 2004), may be renewed to either a 36- or 60-month term contract once the original SST Fixed Period Rate Plan expires.
- Minimum Service Periods will not apply to SST Fixed Period Rate Plans renewed under this Contract Tariff.

For all SST Fixed Period Rate Plans covered under this Contract Tariff, the following terms and conditions apply:

- Renewal discounts, as specified following, for 36- and 60-month SST Fixed Period Rate Plans, will be available to the customer.
- Based upon the discount percent the customer selects, a corresponding Termination Liability will be assessed on SST Fixed Period Rate Plans that terminate prior to the SST Fixed Period Rate Plan's term. The following schedule will be used in determining the corresponding discount and Termination Liability percentages:

<b>DISCOUNT OFF CURRENT TARIFFED SST FIXED PERIOD RATE PLAN RATES</b>	<b>TERMINATION LIABILITY ASSESSMENT FOR EARLY TERMINATION</b>
0%	0%
10%	20%
20%	40%

## **24. CONTRACT TARIFFS**

### **24.2 CASE NO. 04-008**

C. SST Fixed Period Rate Plans are eligible to receive the following discount application: (Cont'd)

- Termination Liability is determined based on the value of the Fixed Period Rate Plan remaining at the time of termination. The calculation is made by taking the number of months remaining in the existing Fixed Period Rate Plan, times (x) the monthly discounted charge for the service being disconnected early, times (x) the applicable Termination Liability assessment percentage.
- To start receiving a discount for SST, the customer must send an access service request to the Company that has:
  - The identifier of the particular SST
  - The applicable discount option clearly noted in the comment section of the access service request, and
  - Whether the term will be 36 or 60 months.
- Discounts will begin to apply on the effective date of the request or the expiration date of the SST's Fixed Rate Plan, whichever is the latter of the two.
- Upon the effective date of renewal, the rates for a SST Fixed Period Rate Plan will not change for the term of the renewal.

(N)

DESCRIPTION: Contract for System Discounts per DS3 CO Ports and per OC3 CO Ports working in conjunction with Eligible Synchronous Service Transport (SST) Systems

CONTRACT AVAILABILITY: Effective from July 10, 2004 through August 10, 2004

CONTRACT EFFECTIVE DATE: July 10, 2004

CONTRACT EXPIRATION DATE: Sixty Months from the date the service is made available to the customer

AVAILABLE MSAS: Phase I and Phase II Wire Centers located in the MSAs of Salt Lake City, Utah; Tucson, Arizona; Albuquerque, New Mexico; and Colorado Springs, Colorado; as defined in Section 23

This contract tariff is for a system discount per DS3 CO Port and per OC3 CO Port working in conjunction with eligible Synchronous Service Transport (SST) Systems at discounts set forth, below. The discount rate for one OC3 CO Port will be equivalent to 3-DS3 CO Ports.

The discount in this contract tariff is for each CO DS3 Port or CO OC3 Port (i.e., an OC3 Port will be treated like 3-DS3 Ports for the discount). Only CO Ports on one side of the circuit are eligible for the discount (Remote Ports are not eligible for discount).

The availability of a new SST System contemplates the use of existing facilities. There may be occasions when SST is not available due to facilities limitations, or when it may be necessary to construct facilities. If Special Construction is involved, the regulations as set forth in Tariff F.C.C. No. 2 apply.

(N)

**24. CONTRACT TARIFFS**

**24.2 CONTRACT NO. 04-010 (Cont'd)**

The customer must have at a minimum the following SST Systems as specified in the respective MSAs listed below:

(N)

<b>SALT LAKE CITY MSA</b>	<b>ALBUQUERQUE MSA</b>	<b>TUCSON MSA</b>	<b>COLORADO SPRINGS MSA</b>
<ul style="list-style-type: none"> <li>• 1-OC12 System</li> <li>• 2-OC24 Systems</li> <li>• 1-OC48 System</li> <li>• 1-OC192 System</li> </ul>	<ul style="list-style-type: none"> <li>• 1-OC24 System</li> <li>• 1-OC48 System</li> </ul>	<ul style="list-style-type: none"> <li>• 6-OC12 Systems</li> <li>• 2-OC24 Systems</li> </ul>	<ul style="list-style-type: none"> <li>• 2-OC48 Systems</li> </ul>

The customer will receive the discounts as set forth below:

- In the Salt Lake City, Utah, MSA, the customer is required to sign up for a new 60-month term plan for their existing OC12 System and OC192 System to be eligible for this discount offer. The rates and charges for the new 60-month term before the port discount is applied will be the 60-month term rates, as set forth in Sections 7 and 17, preceding, excepting the port charges which are only available on a month-to-month plan. Ports for the remaining OC24 and OC48 Systems are eligible for the discount under this offer through the end of their existing term and may be moved to the OC192 System as the original term plans expire on the existing OC24 and OC48 Systems.

(N)

DESCRIPTION: Contract for Voice Grade Service (VGS), Digital Data Service (DDS), DS1, DS3, Synchronous Service Transport (SST) and/or Self-Healing Network Service (SHNS)

CONTRACT AVAILABILITY: Effective from July 31, 2004 through August 31, 2004

CONTRACT  
EFFECTIVE DATE: July 31, 2004

CONTRACT  
EXPIRATION DATE: 36-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for Voice Grade Service (VGS), Digital Data Service (DDS), DS1, DS3, Synchronous Service Transport (SST) and/or Self-Healing Network Service (SHNS) purchased under a 36-month term plan at the 36-month Pricing Plan Rates. Monthly rates for the entire 36-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

Upon meeting the respective minimum service periods set forth in Sections 7 and 15, preceding, the customer will be able to move, add, change, discontinue or terminate services without incurring any shortfall charge or Termination Liability, so long as the Revenue Commitment set forth below, is met and any associated nonrecurring revenue charges disclosed to the customer in advance are paid.

The following eligibility criteria must be met in order to receive this VGS, DDS, DS1, DS3, SST and/or SHNS Contract Offer:

- The customer must commit to purchasing at least \$66,000,000 of Contributory Services over 36-months. Contributory Services include Voice Grade Service (VGS), Digital Data Service (DDS), DS1, DS3, Synchronous Service Transport (SST), Self-Healing Network Service (SHNS), Analog Trunks, ISDN Basic Rate Service, Digital Switched Service (DSS), Uniform Access Solutions (UAS), Business Voice Messaging, Centrex Prime, Centrex 21, Centron, Flat Business Lines, Flat Residence Lines, DSL Service, Caller ID, Voice Mail, Measured Business Lines, Business Line Plus, GeoMax Service, Frame Relay Service (FRS), LAN Switching Service and ATM.

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-011**

The following eligibility criteria must be met in order to receive this VGS, DDS, DS1, DS3, SST and/or SHNS Contract Offer(Cont'd):

- No more than 50% of the monthly recurring charges paid to the Company by the customer in the month prior to the customer's acceptance of this contract tariff arose from services offered under this tariff. This Contract will replace and supercede all existing and prior agreements for services between the customer and the Company. The customer shall not incur any Termination Liability, shortfall or cancellation penalties under any existing agreements that are replaced or superceded by this Contract. In addition any existing services that have a minimum service period and are services that will move under this Contract, shall be able to count time in service toward the satisfaction of the applicable minimum service period under this Contract.

Renewal, Extension and Shortfall Terms and Conditions once the Initial Term of 36-months is complete:

- If the customer meets the \$66,000,000 commitment within the first 36-months:
  - The customer must notify the Company in writing of their intent to renew this Contract
  - The Contract may be automatically extended on the same terms and conditions, but excluding the revenue commitment, for a period of six months from the end of the thirty-six month period when the customer and the Company are involved in good faith negotiations
- If at the end of the 36-month term the customer has not met the \$66,000,000 commitment then:

If the customer fails to meet the revenue commitment, the Company at its sole option, may assess a shortfall charge, provided that the shortfall charge has not been waived or reduced in an amount equal to the difference between the revenue commitment and the actual amounts billed and paid for during the thirty-six month period

**24. CONTRACT TARIFFS**

**24.2 CONTRACT NO. 04-011**

Renewal, Extension and Shortfall Terms and Conditions once the Initial Term of 36-months is complete(Cont'd):

- The interstate shortfall shall be calculated by multiplying the difference between the commitment and customer's actual revenues for Contributory Services during the term, by the proportion of all Contributory Services that are interstate (i.e., interstate shortfall = [the commitment – actual revenues for Contributory Services] x [actual revenues for interstate Contributory Services ÷ actual revenues for all Contributory Services]).

When the entire service is disconnected prior to the expiration of the term plan then the interstate shortfall will be due immediately.

DESCRIPTION: Contract for Digital Data Service (DDS), DS1, DS3, Self-Healing Network Service (SHNS) or Self-Healing Alternate Route Protection (SHARP) Services

CONTRACT AVAILABILITY: Effective from August 26, 2004 through September 26, 2004

CONTRACT  
EFFECTIVE DATE: August 26, 2004

CONTRACT  
EXPIRATION DATE: 36-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for Digital Data Service (DDS), DS1, DS3, Self-Healing Network Service (SHNS) or Self-Healing Alternate Route Protection (SHARP) Services purchased under a 36-month term plan at the 60-month Pricing Plan Rates in effect on August 26, 2004. Monthly rates for the entire 36-months will be frozen from Company-initiated rate changes, at the rate in effect on the service date.

Upon meeting the respective minimum service periods set forth in Sections 7 and 15, preceding, the customer will be able to move, add, change, discontinue or terminate services without incurring any Termination Liability, so long as the Revenue Commitment set forth below, is met.

The following eligibility criteria must be met in order to receive this Digital Data Service (DDS), DS1, DS3, Self-Healing Network Service (SHNS) or Self-Healing Alternate Route Protection (SHARP) Services Contract Offer:

- The customer must achieve an Annual Revenue Commitment of \$9,500,000 from Contributory Services. Contributory Services include Digital Data Service (DDS), DS1, DS3, Self-Healing Network Service (SHNS) Self-Healing Alternate Route Protection (SHARP) Services, Analog Trunks, ISDN Basic Rate Service, Digital Switched Service (DSS), Uniform Access Solutions (UAS), Business Voice Messaging, Centrex Prime, Centrex 21, Centron, Flat Business Lines, Flat Residence Lines, DSL Service, Caller ID, Voice Mail, Measured Business Lines, Business Line Plus, Frame Relay Service (FRS), LAN Switching Service and ATM.

(N)

## **24. CONTRACT TARIFFS**

### **24.2 CONTRACT NO. 04-014 (CONT'D)**

(N)

Annual Review and Shortfall Terms and Conditions:

- Contributory charges shall be measured at the end of each Annual Period
- If the customer fails to meet the Revenue Commitment during any Annual Period over the 3 year period, the Company may assess a shortfall charge equal to 50% of the difference between the Revenue Commitment of \$9,500,000 and the contributory charges paid the applicable Annual Period

Upon completion of the initial 36-months of this contract, a month-to-month extension at the discounted rates will only be allowed for the remainder of a minimum service period for a particular service. All other services shall be continued on a month-to-month basis at the then current month-to-month rates.

Terms and Conditions for Early Termination of this Contract “without cause”:

- The customer must give 30 day written notification to the Company
- The customer will be responsible for paying any outstanding nonrecurring charges and/or installations charges and/or Special Construction Charges.
- The customer will be responsible for paying the remainder of the minimum service period on any service that is terminated prior to the completion of the associated minimum service period.
- The customer shall pay 50% of the Revenue Commitment for each remaining Annual Period, or fraction thereof, in the initial 36-months

CONTRACT EXPIRATION DATE: 36-Months

AVAILABLE MSAS: Phase I and Phase II, as defined in Section 23

This contract tariff is for one GeoMax System and two Self-Healing Network Service (SHNS) Systems purchased under a 36-month term plan at the 36-month Pricing Plan Rates in effect on August 28, 2004. A 42% discount will be applied to the 36-months rates for GeoMax and a 33% discount will be applied to the 36-months rates for SHNS, nonrecurring charges will not receive the discount. Monthly rates for the entire 36-months will be frozen from Company-initiated rate changes, at the rates in effect as of August 28, 2004.

Exception: SHNS Port rate elements are billed on a monthly basis and not available under a rate plan. As a result, a 33% discount will be applied to the recurring port rates in effect at the time the port is ordered nonrecurring charges will not receive the discount.

The following eligibility criteria must be met in order to receive this Contract Offer:

- Service must be in the following Washington State MSA Wire Centers: Seattle – Main, STTLWA06; Bellevue - Sherwood, BLLVWASH; Bellevue - Glencourt, BLLVWAGL and Seattle – Cherry, STTLWACH.
- Must be the renewal of an existing GeoMax and an existing SHNS Systems and one new SHNS System
- GeoMax System configuration must consist of 5 Premise Nodes, 1 Central Office Node and 4 additional selves
- Moves or additions to the systems contemplate the use of existing facilities. There may be occasions when SHNS or GeoMax are not available due to facilities limitations. If Special Construction is necessary, the regulations as set forth in Tariff F.C.C. No. 2 apply.

#### **Terms and Conditions for Renewal:**

- On or before the expiration of the initial 36-month term, the customer may extend this contract for an additional 12-month period. A 45% discount will be applied to the 36-months rates in effect on August 28, 2004 for GeoMax and a 36% discount will be applied to the 36-months rates in effect on August 28, 2004 for SHNS. The renewal request must be in writing.
- The customer may extend this contract for a second additional 12-month period. A 47% discount will be applied to the 36-months rates in effect on August 28, 2004 for GeoMax and a 38% discount will be applied to the 36-months rates in effect on August 28, 2004 for SHNS. The renewal request must be in writing.
- The customer may extend this contract for a third additional 12-month period. A 52% discount will be applied to the 36-months rates in effect on August 28, 2004 for GeoMax and a 43% discount will be applied to the 36-months rates in effect on August 28, 2004 for SHNS. The renewal request must be in writing.
- Exception: SHNS Port rate elements will be discounted at the same percent as the SHNS System per 12 month extension period and the discount will be applied to the recurring port rates in effect at the time the port is ordered.
- At the end of the third extension, the recurring rates will revert to the current month-to-month rates or the customer may subscribe to a new contract agreement at the current rates.

When the entire service or a portion of the service is disconnected prior to the expiration of the fixed period service rate plan then Termination Liability and Waiver Charges (TLA) as set forth in Section 7, preceding, will apply.
