**7. PRIVATE LINE TRANSPORT SERVICE**

**7.12 DS3 SERVICE**

**7.12.2 OPTIONAL FEATURES AND FUNCTIONS**

**B. Self-Healing Alternate Route Protection (Cont'd)**

This added protection is provided by ensuring that backup electronics and 2 physically separate facility paths are used in the provisioning of the service. One primary (or working) service path is established between the Serving Wire Center and the customer designated premises. In addition, a protect path is provisioned between the customer designated premises and the Serving Wire Center via a Company designated Alternate Wire Center. In the event that the working facility or electronics fail, or the service performance becomes impaired, i.e., the bit error rate degenerates to less than or equal to 10 to the minus 6, the facility automatically switches to the service protect path in order to maintain a near continuous flow of information between locations.

Due to constraints of the local network architecture as determined by the Company, there may be occasions where the service will be provisioned without the use of an Alternate Wire Center.

## **7. PRIVATE LINE TRANSPORT SERVICE**

### **7.12 DS3 SERVICE**

#### **7.12.3 PRICING PLANS (Cont'd)**

##### **B. Fixed Period Service Rate Plans**

###### **1. General**

Customers who subscribe to DS3 Service for a 12-, 24-, 36- or 60-month fixed period service rate plan must specify the length of the fixed period service at the time the service is ordered (as of December 2, 2004, the 120-month term plan is limited to existing customers only). The minimum service period for fixed period service is 12 months. (C)

The DS3 rate elements may be ordered individually and as either month-to-month or any optional rate plan. For Capacity Channel Terminations, the initial optional rate plan term must be satisfied before it can convert to month-to-month. For example, the customer may order the Capacity Channel Termination under the 120-month fixed period service plan, the Per DS3 Channel Termination and Transport Channel under the 60-month fixed period service plan and the multiplexing on a month-to-month basis. (C)

For customers who subscribe to fixed period service of 12-, 24-, 36- or 60-month, the monthly rates for the entire fixed period will be frozen from Company-initiated increases, at the rates in effect for the fixed period on the service date (as of December 2, 2004, the 120-month term plan is limited to existing customers only).. At the end of the fixed period, the customer may convert to month-to-month or subscribe to a new fixed period service. The monthly rates will be adjusted to those in effect for the new fixed period service. Should the customer not make a choice by the end of the fixed period, the rates will automatically revert to the month-to-month option. (C)

If a rate decrease occurs during the term of an existing fixed period service rate plan established on or after September 1, 1998, the reduced rates will not be applied to the time remaining in the service period. Fixed Period Rate Plans established on or before August 31, 1998, will automatically receive a rate decrease if the Company decreases rates during the term of the plan. (C)

With the Transport Channel Mileage Band restructure, effective September 7, 1999, existing customers with service in the Over 200 Mileage Band will be converted to the new structure.

##### **C. Regional Commitment Program**

DS3 customers may participate in the Regional Commitment Program as specified in 7.1.3.C.

(Filed under Transmittal No. 221.)

Issued: November 17, 2004

Effective: December 2, 2004

**7. PRIVATE LINE TRANSPORT SERVICE**

## **7. PRIVATE LINE TRANSPORT SERVICE**

### **7.99 GRANDFATHERED SERVICES AND TERMS**

#### **7.99.12 DS3 SERVICE**

A. DS3 Capacity 24 System to DS3 Capacity 24 System Connecting Arrangement [1] (M)

An arrangement that allows a customer to connect 2 electrical or optical DS3 Capacity 24 systems at the system level within the same wire center or in different Company Hubs not to exceed a distance of 50 miles between Company Hubs. This option is available to existing DS3 Capacity 24 customers only.

When a DS3 Capacity 24 System to DS3 Capacity 24 System Connecting Arrangement is within the same wire center, the customer will be assessed one COCC charge per system connecting arrangement as set forth in 7.12.4.A.3., following. When the connecting arrangement is between two Company Hubs, the DS3 Capacity 24 System to DS3 Capacity 24 System Transport Channel mileage rate element applies as set forth in 7.12.4, following, in lieu of DS3 Transport Channel mileage.

DS3 Capacity 24 System to DS3 Capacity 24 System Transport Channel mileage may be ordered under a pricing plan fixed period term (i.e., 12, 24, 36, 60, 120 months). The DS3 Capacity 24 System to DS3 Capacity 24 System Transport Channel pricing plan must expire on the same date as the DS3 Capacity 24 System with the least amount of remaining time in its fixed period.

Service Rearrangement charges apply when the DS3 Capacity 24 System to DS3 Capacity 24 System Connecting Arrangement is not installed at the same time as the DS3 Capacity 24 systems. The Service Rearrangement charge is equal to a DS3 channel termination rate element installation nonrecurring charge. Only one such charge will apply per system arrangement, per change. In the event the customer discontinues the DS3 Capacity 24 System to DS3 Capacity 24 System Connecting Arrangement and one or both of the DS3 Capacity systems remain in service, the Company will assess a Service Rearrangement equal to one DS3 channel termination rate element installation nonrecurring charge to disengage the system to system connecting arrangement. Termination Liability Charges as set forth in 7.1.8, may apply for the remaining months of the DS3 Capacity 24 System to DS3 Capacity 24 System Transport Channel fixed period term.

[1] Effective February 28, 1998, DS3 Service Electrical Interface Capacities of two and greater are limited to existing customers only, customers may continue this service until the service is moved or disconnected. As of March 1, 1998, new customers may not subscribe to DS3 Service Electrical Interface Capacities of two and greater. (M)
